Gancho papai Noel

View Prompt → Sim — aqui precisa ser uma transição rápida e contínua, sem o Papai Noel ficar andando muito e sem surgir presente fora do saco. A caixa precisa sair fisicamente de dentro dele.

Crie um vídeo vertical 9:16, ultra-realista, estilo transição UGC natalina, utilizando duas imagens de referência.

REFERÊNCIA 1: define o Papai Noel, saco de presentes, cenário e iluminação.

REFERÊNCIA 2: define EXATAMENTE a peça/produto que será revelada no final.

SEQUÊNCIA EXATA — NÃO ALTERAR A ORDEM:

O vídeo começa com o Papai Noel DE COSTAS para a câmera, carregando o grande saco de presentes.

Ele dá APENAS DOIS PASSOS curtos para frente.

Imediatamente após o segundo passo, ele abaixa e LARGA O SACO NO CHÃO de maneira natural. O saco permanece no chão, ligeiramente aberto na parte superior, permitindo visualizar que existem presentes dentro.

Essa ação deve funcionar como uma TRANSIÇÃO RÁPIDA E FLUIDA.

O Papai Noel sai imediatamente do enquadramento SEM SE VIRAR. Seu rosto jamais aparece, nem de frente, nem de perfil.

Assim que o saco toca o chão, há uma transição contínua para um enquadramento mais próximo do saco.

APENAS DUAS MÃOS entram no enquadramento. NÃO aparece rosto, cabeça ou corpo de outra pessoa.

As mãos abrem um pouco mais a boca do saco e RETIRAM FISICAMENTE DE DENTRO DELE UM PACOTE DE PRESENTE EMBRULHADO.

IMPORTANTE: o presente obrigatoriamente deve SAIR DE DENTRO DO SACO. Não fazer o pacote aparecer magicamente e não pegar nenhum presente que já esteja no chão.

As mãos colocam o pacote à frente da câmera e imediatamente começam a RASGAR O PAPEL DE PRESENTE.

Mostrar claramente os dedos puxando e rasgando o papel. O papel amassa, dobra e se rompe naturalmente.

Por baixo do papel existe UMA CAIXA.

As mãos terminam de remover o papel, ABREM FISICAMENTE A TAMPA DA CAIXA e revelam o conteúdo.

Dentro da caixa está EXATAMENTE A PEÇA DA SEGUNDA IMAGEM DE REFERÊNCIA.

As duas mãos PEGAM A PEÇA DE DENTRO DA CAIXA e a retiram completamente, aproximando-a da câmera para a revelação final.

A peça deve aparecer IDÊNTICA à referência 2 desde o primeiro instante em que fica visível: mesma cor, formato, proporções, tecido/material, textura, estampa, costuras, detalhes, acessórios, embalagem e características originais.

NÃO transformar outro objeto na peça.

NÃO fazer a peça aparecer por efeito mágico.

NÃO modificar a peça durante a retirada.

NÃO alterar cores, estampas, formato ou detalhes.

NÃO adicionar partes inexistentes.

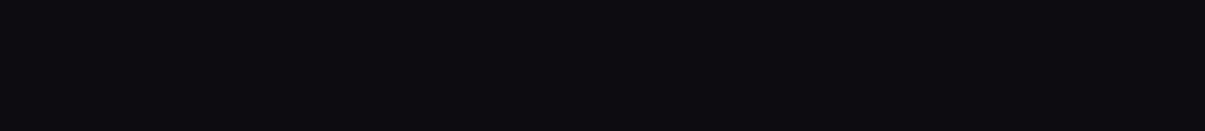

FLUXO OBRIGATÓRIO:

Papai Noel dá 2 passos → larga o saco → saco fica no chão meio aberto → Papai Noel sai → duas mãos aparecem → mãos retiram um presente DE DENTRO DO SACO → rasgam o papel → aparece a caixa → abrem a caixa → retiram EXATAMENTE a peça da referência 2 → aproximam a peça da câmera.

Tudo acontece como UMA ÚNICA TRANSIÇÃO rápida, satisfatória e visualmente contínua, sem pausas desnecessárias.

Ultra-realista, movimentos naturais, física realista, tecido do saco reagindo ao peso, papel rasgando realisticamente, mãos anatomicamente perfeitas, iluminação consistente, câmera de celular premium, estilo UGC cinematográfico natalino.

PROIBIDO: mostrar o rosto do Papai Noel, Papai Noel olhar para trás, mostrar outra pessoa, criar mãos extras, criar produtos extras, alterar a referência 2, teleportar objetos, trocar o cenário, fazer cortes confusos ou adicionar texto na tela.

DETALHE - 💡

Coloque o pet já vestido antes de gerar o vídeo

padrao prompts - Crie um vídeo vertical 9:16, duração exata de 6 segundos, ultra-realista, partindo exatamente da imagem de referência.

REGRA PRINCIPAL: PRESERVAR 100% A ROUPINHA ORIGINAL. A roupa deve permanecer IDÊNTICA em todos os frames: mesma estampa, mesmos desenhos, mesmas cores, mesmo tecido, mesma textura, mesmo corte, mesmas costuras, mesmos acessórios e exatamente a mesma posição dos elementos da estampa. NÃO redesenhar, reinterpretar, substituir ou inventar qualquer detalhe da peça durante o movimento.

SEQUÊNCIA EXATA:

0–1s — A câmera faz apenas um close rápido e suave no rostinho do pet e imediatamente desce para enquadrar a roupinha.

1–3s — A câmera se posiciona na LATERAL do pet, deixando a roupinha e principalmente sua ESTAMPA grandes e nítidas no enquadramento. O pet começa obrigatoriamente a BRINCAR COM UMA BOLINHA NO CHÃO. Ele dá pequenos tapinhas naturais com UMA PATINHA, fazendo a bolinha rolar. Ele acompanha a bolinha e dá mais um pequeno toque. A câmera acompanha suavemente, MAS MANTÉM A ROUPINHA COMO FOCO PRINCIPAL.

IMPORTANTE: O PET PRECISA BRINCAR VISIVELMENTE COM A BOLINHA ANTES DE SE DEITAR. NÃO pular essa ação.

3–5s — SOMENTE DEPOIS de brincar com a bolinha, o pet se deita naturalmente e vira de BARRIGUINHA PARA CIMA. Ele continua interagindo com a mesma bolinha, tocando e empurrando levemente com as patinhas, enquanto se mexe de maneira carinhosa, como um pet pedindo carinho.

5–6s — A câmera se aproxima por cima e termina com um CLOSE FOFO NO ROSTINHO do pet, com expressão alegre, relaxada e contente, como se estivesse sorrindo. Parte da roupinha ainda deve permanecer visível no enquadramento.

NÃO fazer o pet virar de barriga para cima antes de brincar com a bolinha.

NÃO fazer o close final antes da brincadeira.

NÃO transformar as patas em mãos.

NÃO fazer o pet segurar a bolinha como uma pessoa.

NÃO modificar a roupa durante nenhuma movimentação.

NÃO alterar ou regenerar a estampa quando o corpo mudar de posição.

NÃO adicionar ou remover detalhes da roupa.

NÃO trocar o pet, cenário ou objetos.

Movimentos fisicamente naturais e adequados à espécie do animal da referência. Anatomia perfeita, sem patas extras ou deformações. Movimento de câmera suave e realista, estilo gravação de celular premium, pelos detalhados, física realista, sem câmera lenta, sem cortes bruscos, sem texto na tela e sem aparência de IA.

GANCHO GATINHO ARVORE DE NATAL

LINK IMAGEM OU VIDEO -

https://auroraprompts.com/storage/prompts/1789056215_6aa2d4d7661e5.mp4

PROMPT GERAL - Crie um vídeo vertical 9:16, ultra-realista, usando exatamente a imagem de referência como cena inicial. Preserve completamente a aparência dos gatinhos, da árvore de Natal, dos presentes, do ambiente e de toda a decoração.

MOVIMENTO:

Os dois gatinhos ficam embaixo da árvore observando os enfeites. Um deles percebe uma bolinha de Natal pendurada em um galho baixo e começa a brincar com ela de forma totalmente natural, como um gato real.

Nesse momento, a câmera faz um ZOOM SUAVE E PROGRESSIVO nos gatinhos e na bolinha.

O gatinho NÃO segura a bolinha com as duas patas e NÃO faz movimentos humanos. Ele permanece apoiado normalmente e usa apenas UMA PATINHA DIANTEIRA para dar pequenos tapas na bolinha pendurada.

Ele toca a bolinha uma vez, ela balança. Depois toca novamente com a patinha, fazendo a bolinha balançar de um lado para o outro. O outro gatinho acompanha atentamente o movimento.

O primeiro gatinho continua dando pequenos tapinhas naturais com uma única pata, tentando puxar e alcançar a bolinha. Depois de alguns toques, a bolinha finalmente se desprende do galho e CAI NATURALMENTE NO CHÃO.

A câmera continua em close.

Assim que a bolinha cai, os dois gatinhos começam a brincar com ela no chão. Eles NÃO pegam nem seguram a bolinha. Apenas dão pequenos tapinhas com as patas, fazendo a bolinha rolar de um lado para o outro. Um gatinho bate, a bolinha rola, o outro acompanha e dá outro pequeno toque. Movimento espontâneo, fofo e extremamente realista, como dois gatos verdadeiros brincando com um objeto no chão.

FINAL:

Depois da brincadeira, a câmera deixa os gatinhos na parte inferior do enquadramento e começa um movimento cinematográfico suave DE BAIXO PARA CIMA pela árvore de Natal.

A câmera começa próxima à base da árvore e sobe lentamente, mostrando os galhos, luzinhas, bolinhas, laços e todos os detalhes da decoração. Continuar subindo até enquadrar praticamente TODA A ÁRVORE, terminando na parte superior da decoração.

IMPORTANTE: preservar exatamente os mesmos dois gatinhos durante todo o vídeo. Não criar gatos extras. Não modificar cores, pelagem ou tamanho. Não transformar as patas em mãos. Os gatos jamais seguram a bolinha entre duas patas. Não deixar os gatos em pé como humanos. Apenas movimentos felinos naturais com pequenos tapas de UMA pata por vez.

Apenas UMA bolinha deve se desprender da árvore. Nenhum outro enfeite deve cair. Não alterar a decoração, os presentes ou o cenário. Não adicionar objetos, pessoas ou mãos.

Ultra-realista, anatomia felina perfeita, física realista, movimentos suaves, comportamento natural de filhotes, câmera estável com pequenas microvariações de gravação real, iluminação natalina aconchegante, profundidade de campo natural, sem texto na tela e sem aparência de IA.

VIDEO - https://auroraprompts.com/storage/prompts/1789055892_6aa2d39433f45.mp4

PROMPT PADRAO - Use the provided image as the EXACT visual reference for the entire scene. Preserve the Christmas tree, ornaments, string lights, presents, animals, and all existing decorations exactly as shown. Do not modify, replace, redesign, add, or remove any of the main visual elements.

Create an ultra-realistic vertical 9:16 video, 10–12 seconds long, with the appearance of a natural, professionally recorded Christmas decoration video.

The video should present several smooth angles of the SAME scene, as if a real person were filming the Christmas tree with a premium smartphone.

SCENE 1 — ESTABLISHING SHOT:

Begin with a full view of the Christmas tree in the room, clearly showing the complete tree, decorations, presents on the floor, and the animals around it. Perform a slow, smooth camera push-in toward the tree, naturally revealing the Christmas setting.

SCENE 2 — STRING LIGHTS:

Move the camera gently closer to the branches for a detailed view of the long continuous string of warm Christmas lights wrapped around the tree. The lights must remain physically attached to the branches. Their warm glow should naturally illuminate nearby branches and create subtle realistic reflections on the ornaments.

SCENE 3 — DOGS:

Smoothly move the camera closer and slightly lower toward the dogs near the bottom of the tree. Keep the dogs clearly visible and relatively large in the frame.

One dog naturally looks toward the Christmas lights, gently brings its nose closer to the lower branches with curious behavior, and then naturally looks toward the camera.

The other dog remains nearby and performs only subtle realistic movements such as looking around, slightly changing posture, moving its ears, or gently turning its head.

Do not make the animals behave like humans.

SCENE 4 — CHRISTMAS DETAILS:

The camera slowly moves across the ornaments, presents, ribbons, branches, and warm string lights, capturing realistic close-up details and creating a cozy, magical Christmas atmosphere.

The lights continue glowing and subtly blinking naturally throughout the video.

SCENE 5 — FINAL SHOT:

Slowly move back into a wider composition showing the complete Christmas tree, presents, dogs, and surrounding decorations together.

End with the illuminated tree as the main visual focus while the dogs remain naturally positioned near the presents, creating a warm, elegant and enchanted Christmas atmosphere.

ABSOLUTE REFERENCE LOCK:

The provided image is the ONLY source of truth for the scene.

Maintain EXACTLY the same:

- Christmas tree
- tree shape and proportions
- branches
- ornaments and their placement
- ribbons and decorations
- presents
- continuous string lights
- room and environment
- dogs and their appearance
- overall Christmas decoration

Do NOT redesign the tree.

Do NOT change or replace ornaments.

Do NOT add random decorations.

Do NOT change the presents.

Do NOT change the dogs.

Do NOT create additional animals.

LIGHT LOCK:

Maintain the same long, continuous string of Christmas lights throughout every shot.

The wire and lights must remain physically wrapped around and connected to the branches.

Do not create additional strings.

Do not duplicate lights.

Do not make the wire disappear.

Do not create floating lights.

Do not excessively increase the glow.

ANIMAL LOCK:

Maintain exactly the same dogs from the reference image throughout the entire video.

Preserve their breed, coat color, fur pattern, size, proportions, facial characteristics, clothing/accessories and identity.

No duplicated animals.

No breed changes.

No deformed faces.

No malformed legs or paws.

No unnatural body transformations.

CAMERA:

Premium smartphone main camera, natural 1x perspective. Slow and smooth organic handheld movements with subtle realistic human micro-movements.

Transitions between angles must feel natural and fluid, without abrupt cuts, aggressive zooms, fast pans, artificial camera movements or exaggerated cinematic effects.

Prioritize physical realism, visual continuity and natural motion.

STYLE:

Ultra-realistic moving photography, premium smartphone footage, warm Christmas lighting, natural depth of field, realistic reflections from the string lights, authentic animal movement, realistic fur, realistic materials and textures, subtle cinematic quality, cozy elegant family Christmas atmosphere.

The final result must look like REAL footage recorded inside an actual Christmas-decorated living room, with no visible AI artifacts, no text, no captions, no interface and no watermark.

The video should present several smooth angles of the SAME scene, as if a real person were filming the Christmas tree with a premium smartphone.

SCENE 1 — ESTABLISHING SHOT:

Begin with a full view of the Christmas tree in the room, clearly showing the complete tree, decorations, presents on the floor, and the animals around it. Perform a slow, smooth camera push-in toward the tree, naturally revealing the Christmas setting.

SCENE 2 — STRING LIGHTS:

Move the camera gently closer to the branches for a detailed view of the long continuous string of warm Christmas lights wrapped around the tree. The lights must remain physically attached to the branches. Their warm glow should naturally illuminate nearby branches and create subtle realistic reflections on the ornaments.

SCENE 3 — DOGS:

Smoothly move the camera closer and slightly lower toward the dogs near the bottom of the tree. Keep the dogs clearly visible and relatively large in the frame.

One dog naturally looks toward the Christmas lights, gently brings its nose closer to the lower branches with curious behavior, and then naturally looks toward the camera.

The other dog remains nearby and performs only subtle realistic movements such as looking around, slightly changing posture, moving its ears, or gently turning its head.

Do not make the animals behave like humans.

SCENE 4 — CHRISTMAS DETAILS:

The camera slowly moves across the ornaments, presents, ribbons, branches, and warm string lights, capturing realistic close-up details and creating a cozy, magical Christmas atmosphere.

The lights continue glowing and subtly blinking naturally throughout the video.

SCENE 5 — FINAL SHOT:

Slowly move back into a wider composition showing the complete Christmas tree, presents, dogs, and surrounding decorations together.

End with the illuminated tree as the main visual focus while the dogs remain naturally positioned near the presents, creating a warm, elegant and enchanted Christmas atmosphere.

ABSOLUTE REFERENCE LOCK:

The provided image is the ONLY source of truth for the scene.

Maintain EXACTLY the same:

- Christmas tree
- tree shape and proportions
- branches
- ornaments and their placement
- ribbons and decorations
- presents
- continuous string lights
- room and environment
- dogs and their appearance
- overall Christmas decoration

Do NOT redesign the tree.
Do NOT change or replace ornaments.
Do NOT add random decorations.
Do NOT change the presents.
Do NOT change the dogs.
Do NOT create additional animals.

LIGHT LOCK:

Maintain the same long, continuous string of Christmas lights throughout every shot.

The wire and lights must remain physically wrapped around and connected to the branches.

Do not create additional strings.
Do not duplicate lights.
Do not make the wire disappear.
Do not create floating lights.
Do not excessively increase the glow.

ANIMAL LOCK:

Maintain exactly the same dogs from the reference image throughout the entire video.

Preserve their breed, coat color, fur pattern, size, proportions, facial characteristics, clothing/accessories and identity.

No duplicated animals.
No breed changes.
No deformed faces.
No malformed legs or paws.
No unnatural body transformations.

CAMERA:

Premium smartphone main camera, natural 1x perspective. Slow and smooth organic handheld movements with subtle realistic human micro-movements.

Transitions between angles must feel natural and fluid, without abrupt cuts, aggressive zooms, fast pans, artificial camera movements or exaggerated cinematic effects.

Prioritize physical realism, visual continuity and natural motion.

STYLE:

Ultra-realistic moving photography, premium smartphone footage, warm Christmas lighting, natural depth of field, realistic reflections from the string lights, authentic animal movement, realistic fur, realistic materials and textures, subtle cinematic quality, cozy elegant family Christmas atmosphere.

The final result must look like REAL footage recorded inside an actual Christmas-decorated living room, with no visible AI artifacts, no text, no captions, no interface and no watermark.

PROMPT - Use the provided reference image as the EXACT visual reference for the Christmas tree, decorations, string lights, environment, Dachshund and Yorkshire Terrier. Preserve all visual elements and animal identities from the reference.

Create an ultra-realistic vertical 9:16 video, 5–7 seconds long, looking like spontaneous smartphone footage.

CAMERA / FRAMING:

The camera is positioned MUCH CLOSER to the dogs, at approximately their eye/body level. The Dachshund and Yorkshire Terrier are large and clearly visible in the foreground, occupying a significant portion of the lower half of the frame.

Do NOT begin with a distant wide shot.

The lower section of the Christmas tree and the presents remain clearly visible behind the dogs, while enough of the tree stays within the vertical frame to immediately establish the Christmas setting.

Use a natural smartphone 1x perspective. Slight realistic handheld micro-movements only. No cinematic camera movement, no dramatic zoom, no orbit.

ACTION:

The Dachshund is the main character of the action.

It naturally approaches the lower part of the Christmas tree while the Yorkshire Terrier remains nearby.

The Dachshund curiously grabs ONE low tree branch gently with its mouth and gives it a small but convincing pull.

Keep the camera relatively close to the dogs during the entire action.

Because of the pull, the tree gradually becomes unstable. It first moves slightly, then clearly begins leaning to one side.

The Dachshund immediately releases the branch and quickly backs away.

The Yorkshire Terrier reacts naturally by becoming alert and moving slightly backward.

The tree then continues tipping and falls naturally toward a SAFE EMPTY AREA, AWAY FROM BOTH DOGS.

The dogs must NEVER be underneath the falling tree.

After moving away, both dogs look toward the fallen tree with natural curious and surprised behavior.

PHYSICAL REALISM:

The fall must clearly be caused by the Dachshund pulling the lower branch.

The tree must lean progressively before falling — never instantly teleport from standing to fallen.

The string lights remain physically attached to the tree throughout the fall.

The ornaments, branches, ribbons and lights react naturally to gravity and momentum.

Decorations may shake and swing naturally, but do not create exaggerated flying objects.

TREE LOCK:

Preserve EXACTLY the tree from the reference: same shape, size, branches, colors, ornaments, ribbons, lights and overall decoration. Do not redesign or replace anything.

ANIMAL LOCK:

Preserve EXACTLY the Dachshund and Yorkshire Terrier from the reference. Same breeds, coat colors, proportions, clothing/accessories and appearance.

Do not create additional animals.

Do not duplicate either dog.

Do not deform their bodies, legs, faces or mouths.

Do not transform one breed into another.

SAFETY / CONTINUITY:

The tree must NOT hit either dog.

Both dogs must move into a safe position before the tree reaches the floor.

Do not break the tree.

No violent impact.

No injuries.

No exaggerated panic.

The result should feel like a funny, unexpected REAL smartphone recording: the camera is close to the two dogs, the Dachshund innocently pulls the lower branch, suddenly realizes the tree is tipping, both dogs move away safely, and the tree naturally falls in the background.

Ultra-realistic smartphone footage, authentic animal movement, realistic fur physics, realistic gravity, natural Christmas lighting, continuous physical motion, no CGI appearance, no text, no captions, no watermark.

PROMPT - Create an ultra-realistic 10-second vertical 9:16 Christmas product showcase video using the provided mug reference image.

This prompt must work with ANY mug, cup, design, color, print, shape, material or size shown in the reference image.

REFERENCE IMAGE = ABSOLUTE SOURCE OF TRUTH FOR THE MUG.

Preserve EXACTLY:

- mug shape
- size and proportions
- handle shape and position
- colors
- original print
- illustrations
- patterns
- text already printed on the mug
- material
- texture
- surface finish
- decorative details

The mug must remain the EXACT SAME physical product throughout the entire video.

ONLY realistic feminine hands and small portions of forearms may appear.

NO MODEL.

NO FACE.

NO HEAD.

NO BODY.

NO HUMAN REFLECTION.

[0–3 SECONDS — PICK UP AND SHOW THE MUG]

Begin in a beautiful, cozy, ultra-realistic Christmas environment.

The mug from the reference image is resting naturally on a Christmas-themed table.

Warm Christmas lights and elegant festive decorations are visible in the background.

Two feminine hands naturally pick up the EXACT mug.

The hands hold it in front of the camera and slowly bring it closer to the lens.

Gently rotate the mug just enough to showcase its ORIGINAL existing design.

Show the details clearly:

the print,

texture,

material,

handle,

finish,

colors,

and decorative elements.

Use a REAL PHYSICAL CLOSE-UP.

NO digital zoom.

The mug itself moves closer to the camera.

CRITICAL:

The mug must NOT change while being rotated.

The print remains physically attached to the same position on the mug.

Do NOT regenerate the print.

Do NOT change colors.

Do NOT change the handle.

Do NOT change the design.

Do NOT invent new details.

[3–4 SECONDS — MUG HITS THE CAMERA]

The hands turn the mug so a large safe surface faces the lens.

Then they quickly move the mug directly toward the camera.

The mug gently TAPS the camera lens.

The mug moves EXTREMELY CLOSE until it physically covers 100% OF THE FRAME.

The entire camera view must be completely blocked by the mug.

Use this complete lens coverage as a seamless transition.

[4–5.5 SECONDS — SANTA'S MILK AND COOKIES SCENE]

Immediately after the transition, reveal a NEW cozy Christmas composition.

The EXACT SAME mug from the reference image is now resting on a small beautiful Christmas table.

Beside the mug is a small plate containing realistic Christmas cookies.

The scene looks intentionally prepared for Santa Claus on Christmas Eve.

Warm Christmas tree lights glow softly in the background.

Christmas decorations create beautiful natural bokeh.

IMPORTANT:

NO Santa Claus appears.

NO person appears.

Only hands may enter the scene.

The mug is EMPTY at the beginning of this scene.

The EXACT original design of the mug remains clearly recognizable.

[5.5–8 SECONDS — POUR THE MILK]

One feminine hand enters holding a simple container of fresh white milk.

The other hand gently stabilizes the mug.

The hand naturally pours REALISTIC WHITE MILK into the EXACT reference mug.

The viewer must clearly see the milk stream physically entering the mug.

The milk gradually fills the mug.

Realistic liquid physics.

Realistic reflections.

Realistic pouring movement.

No spilling.

No deformation.

IMPORTANT:

The mug must NOT change while the milk is being poured.

The mug's exact print, shape, colors, handle and proportions remain identical to the reference.

Beside the mug, include a small elegant Christmas-style label/card reading:

"MILK"

The word must be spelled EXACTLY:

MILK

The label is part of the Christmas table decoration and must NOT cover the mug.

The cookies remain naturally arranged beside the mug, creating the classic "milk and cookies for Santa" Christmas Eve scene.

[8–9 SECONDS — FINAL PRODUCT SHOT]

The hand stops pouring and removes the milk container from the frame.

The EXACT mug is now filled with milk.

The camera makes a subtle physical move closer to the composition.

Focus beautifully on:

THE REFERENCE MUG + MILK + CHRISTMAS COOKIES.

Keep the Christmas tree lights softly blurred in the background.

The mug remains the HERO PRODUCT.

Do NOT alter its original design.

[9–10 SECONDS — CTA]

One feminine hand enters naturally beside the mug and cookies.

The hand briefly gestures over the beautiful Christmas setup as if presenting the final result.

Then the index finger clearly POINTS DOWN toward the bottom of the frame.

Hold the downward pointing gesture until the video ends.

ABSOLUTE PRODUCT LOCK:

The mug shown at the beginning,

the mug shown close to the camera,

the mug hitting the camera,

and the mug beside the Christmas cookies

MUST ALL BE THE EXACT SAME PHYSICAL MUG FROM THE REFERENCE IMAGE.

DO NOT generate a different mug after the transition.

DO NOT change its print.

DO NOT change its colors.

DO NOT change its shape.

DO NOT change its handle.

DO NOT change its size.

DO NOT change its material.

DO NOT change existing text or illustrations.

DO NOT duplicate the mug.

PROMPT - ```text

Create an ultra-realistic 10-second vertical 9:16 Christmas product showcase video using the provided reference images.

IMPORTANT:

This prompt must work with ANY Christmas tree topper star shown in the product reference image.

The star from the reference image is the ABSOLUTE SOURCE OF TRUTH.

Preserve EXACTLY its original:

- shape
- number of points
- colors
- design
- material
- texture
- proportions

- surface finish
- glitter or metallic details
- decorative details

The star must NEVER change appearance during the video.

ONLY realistic feminine hands and small portions of the forearms may appear.

NO MODEL.

NO FACE.

NO HEAD.

NO BODY.

NO HUMAN REFLECTION.

[0–2 SECONDS — OPEN THE CHRISTMAS BOX]

Start in a beautiful, cozy, ultra-realistic Christmas environment.

In front of the camera there is an elegant WHITE Christmas gift box with GOLD Christmas details.

The words:

"Feliz Natal"

are clearly written in GOLD on the white box.

Two feminine hands naturally open the box.

Inside the box is the EXACT Christmas star from the provided product reference image.

Nothing else is inside the box.

The star must look IDENTICAL to the reference image.

[2–4 SECONDS — TAKE OUT AND SHOW THE STAR]

One hand carefully removes the star from the box.

Both hands then hold the star in front of the camera.

The hands bring the star VERY CLOSE to the camera to showcase the product.

The star is gently tilted from side to side to reveal its existing details.

Show the texture, material, finish, glitter, reflections, edges and decorative details clearly.

Use a REAL PHYSICAL CLOSE-UP:

the hands move the product closer to the lens.

NO digital zoom.

CRITICAL:

The star must remain EXACTLY the same while moving.

Do NOT change its shape.

Do NOT change its number of points.

Do NOT change its color.

Do NOT change its design.

Do NOT regenerate its details.

[4–5 SECONDS — STAR HITS THE CAMERA]

Both hands hold the star facing the camera.

Then the star moves quickly and directly toward the lens.

The star gently HITS/TAPS the camera lens.

The star must physically cover 100% OF THE SCREEN.

For a brief instant, the entire frame is completely covered by the star.

THIS FULL CAMERA COVERAGE CREATES THE TRANSITION.

[5–7 SECONDS — STAR IS ALREADY ON THE TREE]

CRITICAL TRANSITION:

When the image becomes visible again, DO NOT show anyone installing the star.

DO NOT show hands placing the star.

DO NOT show the star approaching the tree.

DO NOT show the installation process.

The EXACT SAME STAR IS ALREADY COMPLETELY INSTALLED ON TOP OF THE CHRISTMAS TREE.

Immediately after the transition, begin with an EXTREME CLOSE-UP of the star already perfectly positioned on top of the tree.

The star is straight, centered, symmetrical and securely positioned.

The camera focuses sharply on the star.

Show its exact texture, design, glitter, material and decorative details.

The Christmas tree behind it is ALREADY FULLY DECORATED.

The surrounding Christmas lights create beautiful realistic bokeh in the background.

CRITICAL TREE TOP RULE:

NO long branch sticking upward.

NO thin green stem.

NO cable.

NO pole.

NO stick.

NO visible mounting support.

NO branch passing through the star.

NO crooked tree top.

The star must appear naturally integrated into the dense upper foliage.

The green foliage naturally meets the bottom of the star.

The STAR is the highest visible point of the tree.

Nothing extends above it.

[7–10 SECONDS — PULL BACK AND REVEAL THE ENTIRE TREE]

Keep the star perfectly centered.

The camera now performs a beautiful, smooth and relatively FAST physical pull-back.

Start extremely close to the star and progressively move backward.

As the camera moves backward, reveal more and more of the Christmas tree.

Continue moving backward until the ENTIRE CHRISTMAS TREE is visible from the star at the top to the bottom of the tree.

The tree is already COMPLETELY DECORATED.

It must look:

full,

dense,

luxurious,

beautiful,

symmetrical,

professionally decorated,

and ultra-realistic.

Show decorations throughout the ENTIRE tree:

Christmas balls,
Christmas lights,
bows,
ribbons,
ornaments,
and elegant festive details.

The decorations must look naturally distributed across the whole tree.

The EXACT star remains clearly visible and perfectly centered at the top.

FINAL FRAME:

Show the COMPLETE decorated Christmas tree from top to bottom.

The exact product star is installed at the top and remains clearly recognizable.

Hold this beautiful full-tree composition until the video ends.

ABSOLUTE STAR LOCK:

The star inside the box,
the star held by the hands,
the star shown close to the camera,
the star hitting the lens,
and the star already installed on the tree

MUST BE THE EXACT SAME PHYSICAL STAR FROM THE REFERENCE IMAGE.

REFERENCE IMAGE = ABSOLUTE SOURCE OF TRUTH.

DO NOT redesign the star.
DO NOT recolor the star.
DO NOT change its shape.
DO NOT change its number of points.
DO NOT change its texture.
DO NOT change its material.
DO NOT change its decorative details.
DO NOT duplicate the star.

IMPORTANT TRANSITION RULE:

STAR HITS CAMERA → 100% LENS COVERAGE → IMMEDIATE REVEAL OF THE SAME
STAR ALREADY INSTALLED ON THE FULLY DECORATED TREE.

NO INSTALLATION SCENE.

PRODUCT ACCURACY HAS PRIORITY OVER MOVEMENT.

Ultra-realistic.

Vertical 9:16.

Exactly 10 seconds.

High-detail product photography.

Realistic feminine hands.

Realistic Christmas lighting.

Natural camera movement.

Smooth physical pull-back.

No visible model.

No face.

No body.

No dialogue.

No voice.

No music.

No subtitles.

No text on screen except "Feliz Natal" already printed on the box.

No watermark.

No added logos.

The star must NEVER change appearance during the video.

ONLY realistic feminine hands and small portions of the forearms may appear.

NO MODEL.

NO FACE.

NO HEAD.

NO BODY.

NO HUMAN REFLECTION.

[0–2 SECONDS — OPEN THE CHRISTMAS BOX]

Start in a beautiful, cozy, ultra-realistic Christmas environment.

In front of the camera there is an elegant WHITE Christmas gift box with GOLD Christmas details.

The words:

"Feliz Natal"

are clearly written in GOLD on the white box.

Two feminine hands naturally open the box.

Inside the box is the EXACT Christmas star from the provided product reference image.

Nothing else is inside the box.

The star must look IDENTICAL to the reference image.

[2–4 SECONDS — TAKE OUT AND SHOW THE STAR]

One hand carefully removes the star from the box.

Both hands then hold the star in front of the camera.

The hands bring the star VERY CLOSE to the camera to showcase the product.

The star is gently tilted from side to side to reveal its existing details.

Show the texture, material, finish, glitter, reflections, edges and decorative details clearly.

Use a REAL PHYSICAL CLOSE-UP:

the hands move the product closer to the lens.

NO digital zoom.

CRITICAL:

The star must remain EXACTLY the same while moving.

Do NOT change its shape.
Do NOT change its number of points.
Do NOT change its color.
Do NOT change its design.
Do NOT regenerate its details.

[4–5 SECONDS — STAR HITS THE CAMERA]

Both hands hold the star facing the camera.

Then the star moves quickly and directly toward the lens.

The star gently HITS/TAPS the camera lens.

The star must physically cover 100% OF THE SCREEN.

For a brief instant, the entire frame is completely covered by the star.

THIS FULL CAMERA COVERAGE CREATES THE TRANSITION.

[5–7 SECONDS — STAR IS ALREADY ON THE TREE]

CRITICAL TRANSITION:

When the image becomes visible again, DO NOT show anyone installing the star.

DO NOT show hands placing the star.

DO NOT show the star approaching the tree.

DO NOT show the installation process.

The EXACT SAME STAR IS ALREADY COMPLETELY INSTALLED ON TOP OF THE CHRISTMAS TREE.

Immediately after the transition, begin with an EXTREME CLOSE-UP of the star already perfectly positioned on top of the tree.

The star is straight, centered, symmetrical and securely positioned.

The camera focuses sharply on the star.

Show its exact texture, design, glitter, material and decorative details.

The Christmas tree behind it is ALREADY FULLY DECORATED.

The surrounding Christmas lights create beautiful realistic bokeh in the background.

CRITICAL TREE TOP RULE:

NO long branch sticking upward.
NO thin green stem.
NO cable.
NO pole.
NO stick.
NO visible mounting support.
NO branch passing through the star.
NO crooked tree top.

The star must appear naturally integrated into the dense upper foliage.

The green foliage naturally meets the bottom of the star.

The STAR is the highest visible point of the tree.

Nothing extends above it.

[7–10 SECONDS — PULL BACK AND REVEAL THE ENTIRE TREE]

Keep the star perfectly centered.

The camera now performs a beautiful, smooth and relatively FAST physical pull-back.

Start extremely close to the star and progressively move backward.

As the camera moves backward, reveal more and more of the Christmas tree.

Continue moving backward until the ENTIRE CHRISTMAS TREE is visible from the star at the top to the bottom of the tree.

The tree is already COMPLETELY DECORATED.

It must look:

full,
dense,
luxurious,
beautiful,
symmetrical,
professionally decorated,
and ultra-realistic.

Show decorations throughout the ENTIRE tree:

Christmas balls,
Christmas lights,
bows,

ribbons,
ornaments,
and elegant festive details.

The decorations must look naturally distributed across the whole tree.

The EXACT star remains clearly visible and perfectly centered at the top.

FINAL FRAME:

Show the COMPLETE decorated Christmas tree from top to bottom.

The exact product star is installed at the top and remains clearly recognizable.

Hold this beautiful full-tree composition until the video ends.

ABSOLUTE STAR LOCK:

The star inside the box,
the star held by the hands,
the star shown close to the camera,
the star hitting the lens,
and the star already installed on the tree

MUST BE THE EXACT SAME PHYSICAL STAR FROM THE REFERENCE IMAGE.

REFERENCE IMAGE = ABSOLUTE SOURCE OF TRUTH.

DO NOT redesign the star.
DO NOT recolor the star.
DO NOT change its shape.
DO NOT change its number of points.
DO NOT change its texture.
DO NOT change its material.
DO NOT change its decorative details.
DO NOT duplicate the star.

IMPORTANT TRANSITION RULE:

STAR HITS CAMERA → 100% LENS COVERAGE → IMMEDIATE REVEAL OF THE SAME
STAR ALREADY INSTALLED ON THE FULLY DECORATED TREE.

NO INSTALLATION SCENE.

PRODUCT ACCURACY HAS PRIORITY OVER MOVEMENT.

Ultra-realistic.
Vertical 9:16.

Exactly 10 seconds.
High-detail product photography.
Realistic feminine hands.
Realistic Christmas lighting.
Natural camera movement.
Smooth physical pull-back.
No visible model.
No face.
No body.
No dialogue.
No voice.
No music.
No subtitles.
No text on screen except "Feliz Natal" already printed on the box.
No watermark.
No added logos.

PROMPT FLOW - Create an ultra-realistic 10-second vertical 9:16 Christmas product showcase video using the provided reference images.

IMPORTANT:

This prompt must work with ANY Christmas tree topper star shown in the product reference image.

The star from the reference image is the ABSOLUTE SOURCE OF TRUTH.

Preserve EXACTLY its original:

- shape
- number of points
- colors
- design
- material
- texture
- proportions
- surface finish

PROMPT -

Create an ultra-realistic 10-second vertical 9:16 Christmas product showcase video using the provided reference images.

REFERENCE IMAGE 1:

Defines the Christmas setting and/or Christmas gift box.

REFERENCE IMAGE 2:

Defines the EXACT package and the EXACT Christmas ornaments/Christmas balls that will be shown and later placed on the tree.

ABSOLUTE PRODUCT LOCK:

REFERENCE IMAGE 2 = ABSOLUTE SOURCE OF TRUTH.

The package and every ornament must remain IDENTICAL to Reference Image 2.

Do NOT redesign.

Do NOT reinterpret.

Do NOT recolor.

Do NOT replace.

Do NOT add new ornaments.

Do NOT create similar alternatives.

ONLY decorations visibly present in Reference Image 2 are allowed in the entire video.

ONLY HANDS AND SMALL PORTIONS OF FOREARMS ARE VISIBLE.

NO model.

NO face.

NO head.

NO torso.

NO body.

NO human reflection.

[0–2 SECONDS — OPEN THE CHRISTMAS BOX]

Begin in a beautiful, ultra-realistic Christmas environment.

A decorated Christmas gift box is positioned in front of the camera.

Two realistic hands naturally open the box.

Inside the box, reveal the EXACT package of Christmas ornaments from Reference Image 2.

The package must look IDENTICAL to Reference Image 2.

Same packaging.

Same ornaments inside.

Same colors.

Same shapes.

Same quantities visible.

Same arrangement.

Same materials.

Same visual details.

Do NOT add anything else inside the box.

[2–3.5 SECONDS — SHOW FIRST ORNAMENT]

One hand reaches into the opened package and removes ONE ornament that is visibly present in Reference Image 2.

The hand brings this EXACT ornament VERY CLOSE to the camera lens for a detailed product close-up.

This is a PHYSICAL CLOSE-UP:
the hand moves the ornament toward the lens.

NO digital zoom.

Clearly show its exact texture, color, shape, finish and decorative details.

CRITICAL:
The ornament must NOT change while approaching the camera.

It remains the EXACT SAME physical ornament.

[3.5–5 SECONDS — SHOW SECOND ORNAMENT]

The first ornament is naturally lowered.

The hand picks up a DIFFERENT ornament that is also visibly present in Reference Image 2.

Bring this second ornament VERY CLOSE to the camera for another detailed physical close-up.

Preserve its EXACT original appearance.

Same color.
Same shape.
Same size.
Same finish.
Same texture.
Same decorative details.

Do NOT invent a different decoration.

[5–5.5 SECONDS — TRANSITION]

The second ornament moves directly toward the lens until it completely covers 100% of the camera.

Use this physical lens coverage as a fast seamless transition.

[5.5–9 SECONDS — PLACE EXACTLY THREE ORNAMENTS]

After the transition, show ONLY A SECTION of a realistic Christmas tree.

Do NOT reveal the entire tree.

The framing is a close/medium view of several green Christmas tree branches, providing enough space to clearly see the hands decorating them.

The tree begins WITHOUT decorations in this visible area.

The hands now physically hang EXACTLY THREE decorations on the tree.

IMPORTANT:

ALL THREE decorations MUST come from Reference Image 2.

FIRST:

The hand takes one exact Reference Image 2 ornament and physically hangs it on a branch.

SECOND:

The hand takes another ornament visibly present in Reference Image 2 and physically hangs it on another branch.

THIRD:

The hand takes a third ornament visibly present in Reference Image 2 and physically hangs it on another branch.

The viewer must CLEARLY SEE all three ornaments being physically placed by the hands.

EXACTLY THREE DECORATIONS ARE ADDED.

NOT TWO.

NOT FOUR.

NOT MORE THAN THREE.

DO NOT make decorations magically appear.

DO NOT add decorations in the background.

DO NOT automatically decorate the rest of the tree.

After the third ornament is attached, ONLY those three newly placed decorations should be visible in the demonstrated area.

CRITICAL DECORATION LOCK:

Every ornament must remain IDENTICAL from the moment it leaves the package until the moment it is hanging on the tree.

The print, color, shape, finish and details remain physically attached to the same object.

NO morphing.

NO color changes.
NO ornament replacement.
NO invented ornament.
NO additional Christmas decoration.

REFERENCE IMAGE 2 IS A CLOSED INVENTORY.

If a decorative object is NOT visible in Reference Image 2, IT MUST NOT APPEAR.

Empty tree branches are completely acceptable.

NEVER fill empty spaces with invented decorations.

[9–10 SECONDS — POINT DOWN]

Immediately after placing the THIRD decoration, the hand releases it naturally.

The three exact ornaments remain hanging and completely unchanged.

The hand moves slightly away from the tree.

The index finger clearly POINTS DOWN toward the bottom of the frame as a CTA.

Hold the downward pointing gesture until the video ends.

FINAL RESTRICTIONS:

ONLY hands visible.
EXACTLY three ornaments placed on the tree.
ONLY ornaments from Reference Image 2.

PROMPT - Create an ultra-realistic 10-second vertical 9:16 product video using THREE reference images.

REFERENCE IMAGE 1:

The exact Christmas tree inside its box.

REFERENCE IMAGE 2:

The exact same Christmas tree fully assembled and completely undecorated.

REFERENCE IMAGE 3:

The ONLY decorations allowed to exist in this video.

ABSOLUTE DECORATION RESTRICTION:

REFERENCE IMAGE 3 IS A CLOSED INVENTORY OF ALLOWED DECORATIONS.

ONLY the physical decoration items visibly present in Reference Image 3 are allowed.

DO NOT decorate creatively.

DO NOT complete the decoration.

DO NOT improve the decoration.

DO NOT make the tree look more festive.

DO NOT fill empty spaces.

DO NOT add complementary ornaments.

If an object is NOT visibly present in Reference Image 3, IT MUST NOT APPEAR ON THE TREE.

NO additional ornaments.

NO additional Christmas balls.

NO ribbons unless present in Reference Image 3.

NO bows unless present in Reference Image 3.

NO flowers unless present in Reference Image 3.

NO stars unless present in Reference Image 3.

NO pinecones unless present in Reference Image 3.

NO candy canes unless present in Reference Image 3.

NO artificial branches unless present in Reference Image 3.

NO garlands unless present in Reference Image 3.
NO tinsel unless present in Reference Image 3.
NO lights unless present in Reference Image 3.
NO additional decorative accessories of any kind.

NEVER invent missing decoration.

ONLY HANDS AND FOREARMS MAY APPEAR.
NO MODEL.
NO FACE.
NO BODY.

[0–2.5 SECONDS — REMOVE TREE]

Begin with Reference Image 1.

Two realistic hands open the box and pull out the EXACT Christmas tree.

Do not change the tree.

The branches move toward the camera and completely cover 100% of the lens.

Use this physical coverage as the transition.

[2.5–5 SECONDS — SHOW THE TREE]

Reveal the EXACT assembled tree from Reference Image 2.

The tree is COMPLETELY EMPTY AND UNDECORATED.

The hands gently open and separate a few existing branches.

The hands show how tall, dense, full and branch-rich the tree is.

Do not add anything yet.

[5–8.5 SECONDS — ONLY REFERENCE 3 ITEMS]

Now the hands begin adding decorations.

CRITICAL:

The hands may ONLY pick up and place items that are CLEARLY VISIBLE in Reference Image 3.

Treat every item from Reference Image 3 as a real physical product being transferred to the tree.

For example, if Reference Image 3 contains Christmas balls, show the hands physically taking those EXACT Christmas balls and hanging them one by one on the branches.

Each ball must remain identical while moving from the hand to the tree.

SAME color.

SAME size.

SAME shape.

SAME finish.

SAME texture.

SAME pattern.

SAME decorative details.

DO NOT create additional Christmas balls.

DO NOT change one ball into another.

DO NOT create new colors.

DO NOT add a second type of ornament unless that exact ornament is visibly present in Reference Image 3.

IMPORTANT:

DO NOT automatically fill the entire tree with decorations.

Empty branches are ALLOWED and PREFERRED over invented decorations.

If there are not enough decorations visible in Reference Image 3 to fill the tree, LEAVE THE REMAINING AREAS EMPTY.

NEVER solve an empty area by generating another ornament.

Show several fast realistic hand movements physically hanging ONLY the allowed Reference Image 3 items.

[8.5–10 SECONDS — FINAL RESULT]

Reveal the tree with ONLY the decorations taken from Reference Image 3.

Before generating the final appearance, apply this rule:

CHECK EVERY DECORATIVE OBJECT VISIBLE ON THE TREE.

For each object ask:

"Does this exact type of decoration exist in Reference Image 3?"

If YES: keep it.

If NO: DO NOT GENERATE IT.

The final tree may contain ONLY:

1. The exact tree from References 1 and 2.
2. The exact decoration types/products visible in Reference Image 3.

NOTHING ELSE.

A hand briefly passes beside the finished tree to present it WITHOUT touching or changing the ornaments.

Then the index finger clearly POINTS DOWN.

Hold until the end.

NEGATIVE CONSTRAINTS:

no invented ornaments,
no extra ornaments,
no complementary decorations,
no random Christmas decorations,
no decorative filler,
no creative additions,
no additional Christmas balls,
no extra colors,
no extra ribbons,
no extra bows,
no extra flowers,
no extra stars,
no extra pinecones,
no extra garlands,
no extra lights,
no tinsel,
no presents,
no new decorative objects,
no decoration not explicitly visible in Reference Image 3.

REFERENCE IMAGE 3 = CLOSED INVENTORY.

NOTHING OUTSIDE REFERENCE IMAGE 3 IS PERMITTED.

If preserving this restriction makes the tree look less decorated, KEEP IT LESS DECORATED.

ACCURACY IS MORE IMPORTANT THAN A FULLY DECORATED TREE.

NEVER invent missing decoration.

ONLY HANDS AND FOREARMS MAY APPEAR.
NO MODEL.
NO FACE.
NO BODY.

[0–2.5 SECONDS — REMOVE TREE]

Begin with Reference Image 1.

Two realistic hands open the box and pull out the EXACT Christmas tree.

Do not change the tree.

The branches move toward the camera and completely cover 100% of the lens.

Use this physical coverage as the transition.

[2.5–5 SECONDS — SHOW THE TREE]

Reveal the EXACT assembled tree from Reference Image 2.

The tree is COMPLETELY EMPTY AND UNDECORATED.

The hands gently open and separate a few existing branches.

The hands show how tall, dense, full and branch-rich the tree is.

Do not add anything yet.

[5–8.5 SECONDS — ONLY REFERENCE 3 ITEMS]

Now the hands begin adding decorations.

CRITICAL:

The hands may ONLY pick up and place items that are CLEARLY VISIBLE in Reference Image 3.

Treat every item from Reference Image 3 as a real physical product being transferred to the tree.

For example, if Reference Image 3 contains Christmas balls, show the hands physically taking those EXACT Christmas balls and hanging them one by one on the branches.

Each ball must remain identical while moving from the hand to the tree.

SAME color.

SAME size.

SAME shape.

SAME finish.

SAME texture.

SAME pattern.

SAME decorative details.

DO NOT create additional Christmas balls.

DO NOT change one ball into another.

DO NOT create new colors.

DO NOT add a second type of ornament unless that exact ornament is visibly present in Reference Image 3.

IMPORTANT:

DO NOT automatically fill the entire tree with decorations.

Empty branches are ALLOWED and PREFERRED over invented decorations.

If there are not enough decorations visible in Reference Image 3 to fill the tree, LEAVE THE REMAINING AREAS EMPTY.

NEVER solve an empty area by generating another ornament.

Show several fast realistic hand movements physically hanging ONLY the allowed Reference Image 3 items.

[8.5–10 SECONDS — FINAL RESULT]

Reveal the tree with ONLY the decorations taken from Reference Image 3.

Before generating the final appearance, apply this rule:

CHECK EVERY DECORATIVE OBJECT VISIBLE ON THE TREE.

For each object ask:

"Does this exact type of decoration exist in Reference Image 3?"

If YES: keep it.

If NO: DO NOT GENERATE IT.

The final tree may contain ONLY:

1. The exact tree from References 1 and 2.
2. The exact decoration types/products visible in Reference Image 3.

NOTHING ELSE.

A hand briefly passes beside the finished tree to present it WITHOUT touching or changing the ornaments.

Then the index finger clearly POINTS DOWN.

Hold until the end.

NEGATIVE CONSTRAINTS:

no invented ornaments,
no extra ornaments,
no complementary decorations,
no random Christmas decorations,
no decorative filler,
no creative additions,
no additional Christmas balls,
no extra colors,
no extra ribbons,
no extra bows,
no extra flowers,
no extra stars,
no extra pinecones,
no extra garlands,
no extra lights,
no tinsel,
no presents,
no new decorative objects,
no decoration not explicitly visible in Reference Image 3.

REFERENCE IMAGE 3 = CLOSED INVENTORY.

NOTHING OUTSIDE REFERENCE IMAGE 3 IS PERMITTED.

If preserving this restriction makes the tree look less decorated, KEEP IT LESS DECORATED.

ACCURACY IS MORE IMPORTANT THAN A FULLY DECORATED TREE.

Ultra-realistic.
Natural hand movements.
Realistic ornament physics.
Vertical 9:16.
Exactly 10 seconds.
No visible person.
Hands only.
No dialogue.
No audio.
No text.
No subtitles.
No watermark.

PROMPT FLOW - Create an ultra-realistic 10-second vertical 9:16 product video using THREE reference images.

REFERENCE IMAGE 1: The exact Christmas tree inside its box.

REFERENCE IMAGE 2: The exact same Christmas tree fully assembled and completely undecorated.

REFERENCE IMAGE 3: The ONLY decorations allowed to exist in this video.

ABSOLUTE DECORATION RESTRICTION: REFERENCE IMAGE 3 IS A CLOSED INVENTORY OF ALLOWED DECORATIONS. ONLY the physical decoration items visibly present in Reference Image 3 are allowed. DO NOT decorate creatively. DO NOT complete the decoration. DO NOT improve the decoration. DO NOT make the tree look more festive. DO NOT fill empty spaces. DO NOT add complementary ornaments. If an object is NOT visibly present in Reference Image 3, IT MUST NOT APPEAR ON THE TREE. NO additional ornaments. NO additional Christmas balls. NO ribbons unless present in Reference Image 3. NO bows unless present in Reference Image 3. NO flowers unless present in Reference Image 3. NO stars unless present in Reference Image 3. NO pinecones unless present in Reference Image 3. NO candy canes unless present in Reference Image 3. NO artificial branches unless present in Reference Image 3. NO garlands unless present in Reference Image 3. NO tinsel unless present in Reference Image 3. NO lights unless present in Reference Image 3. NO additional decorative accessories of any kind. NEVER invent missing decoration.

DETALHE NO COMANDO - neutro para qualquer toalha! peça fala feminina caso queira alterar ou remova

a fala do prompt.

PROMPT - Create a 10-second ultra-realistic product presentation video using the provided reference image.

ABSOLUTE PRIORITY:

The tablecloth in the reference image is a LOCKED VISUAL ELEMENT.

The EXACT SAME tablecloth from the reference image must remain completely unchanged throughout the entire video.

DO NOT regenerate, reinterpret, redesign, replace, unfold, refold, stretch, resize, reposition, rotate, lift, pull, or modify the tablecloth in any way.

The tablecloth must preserve EXACTLY:

- the original print
- pattern placement
- colors
- color distribution
- fabric appearance
- texture
- stitching
- borders
- decorative details
- edges
- dimensions
- proportions
- folds
- orientation
- position

Every visible detail of the tablecloth must remain pixel-consistent with the reference image.

The AI must treat the tablecloth as a FIXED PRODUCT from the original image, NOT as an object to recreate.

[0–3 SECONDS]

A hand naturally enters or remains in the scene and gently touches the surface of the tablecloth.

The hand slowly slides across a SMALL area of the fabric.

IMPORTANT:

The fabric itself does NOT move.

The print does NOT move.

The folds do NOT change.

Only the HAND moves across the existing surface.

[3–6 SECONDS]

The camera makes a very subtle physical handheld approach toward the tablecloth to show the existing fabric details more closely.

NO digital zoom.

Do not create new details during the close-up.

The closer view must show EXACTLY the same existing print, colors and texture from the reference image.

The tablecloth remains completely stationary.

[6–8 SECONDS]

The camera naturally moves back to approximately the original framing.

The hand gently passes over another small section of the tablecloth.

Again, ONLY the hand moves.

Do NOT lift the fabric.

Do NOT pull the fabric.

Do NOT smooth or rearrange the fabric.

Do NOT alter any fold.

[8–10 SECONDS]

Keep the exact tablecloth clearly visible.

The hand stops interacting with the fabric and one finger naturally points downward as a CTA.

Hold the downward pointing gesture briefly.

CRITICAL PRODUCT LOCK:

REFERENCE IMAGE = ABSOLUTE SOURCE OF TRUTH.

Do NOT generate a new tablecloth.

Do NOT replace any part of the tablecloth.

Do NOT invent missing areas.

Do NOT modify the pattern.

Do NOT move individual elements of the print.

Do NOT change the colors.

Do NOT change the borders.

Do NOT change the fabric.

Do NOT change the folds.

Do NOT change its position.

Do NOT change its size or proportions.

Do NOT add decorations to it.

Do NOT remove details from it.

Do NOT transform the tablecloth at any moment.

If preserving the tablecloth conflicts with an intended movement, PRESERVING THE TABLECLOTH HAS PRIORITY.

Preserve the original environment, table, furniture, objects, lighting, shadows, perspective and composition from the reference image.

Single continuous 10-second shot.

Ultra-realistic.

Natural human hand movement.

Natural smartphone footage.

Minimal camera movement.

No cuts.

No transitions.

No scene changes.

No digital zoom.

No object deformation.

No text.

No subtitles.

No audio.

No added logos.

No added objects.

Create a highly dynamic 10-second ultra-realistic POV product showcase video using the uploaded reference image as the EXACT starting frame.

**IMPORTANT:**

Preserve the EXACT set of 4 pillows from the reference image throughout the entire video.

Do NOT change, redesign, replace, recolor or reinterpret any pillow.

Preserve exactly all 4 pillow designs, prints, colors, patterns, text, fabric appearance, proportions and details.

**POV STYLE:**

First-person adult POV.

NO PERSON appears at any moment.

NO face.

NO body.

NO reflection of a person.

Only realistic feminine hands may enter the frame when interacting with the pillows.

**VIDEO — 10 SECONDS, FAST AND DYNAMIC:**

0–1.5s:

Start by showing all 4 pillows together exactly as arranged in the reference image.

Quick natural handheld push-in toward the pillows.

1.5–3s:

Camera moves closer to the first pillow and performs a fast detailed close-up across its printed design, showing the fabric texture and print clearly.

3–4.5s:

Smooth lateral movement toward another pillow followed by another close-up of its print.

Keep the original artwork completely unchanged.

4.5–6.5s:

One feminine hand enters the frame, grabs ONE pillow naturally and lifts it slightly.

The hand squeezes and gently fluffs the pillow 2–3 times, visibly compressing the filling and letting it expand back into a soft, full, fluffy shape.

Show realistic fabric deformation and softness.

6.5–8s:

Place the pillow back naturally.

Immediately perform two quick close-up movements across different pillow prints, showing stitching, fabric texture and printed details.

8–9s:

Quick pull-back revealing the COMPLETE SET OF 4 PILLOWS together again.

9–10s:

Keep all 4 pillows clearly visible in the background.

One hand enters from the side and clearly points DOWN toward the bottom center of the screen with the index finger, like a natural TikTok Shop CTA.  
Hold the downward pointing gesture until the video ends.

STYLE:

Ultra-realistic UGC.  
Authentic smartphone video.  
Dynamic TikTok Shop pacing.  
Natural handheld micro-movements.  
Fast but smooth camera movements.  
Mix wide shots, medium shots and macro-style close-ups.  
Realistic autofocus transitions.  
Natural motion blur.  
Real fabric physics.  
Realistic hand anatomy.  
Exactly five fingers.  
Natural feminine nails.

ABSOLUTELY NO:

person visible

new objects  
extra pillows  
missing pillows  
changed prints  
changed text  
changed colors  
warped patterns  
morphing  
floating objects

PROMPT - Create an ultra-photorealistic vertical 9:16 video based on the reference image.

#### SCENE:

Keep the exact same real Brazilian home environment, countertop, background, lighting, colors and overall composition from the reference image.

The Christmas decoration must remain EXACTLY the same as in the reference image. Preserve its original shape, proportions, colors, materials, texture, surface details and construction throughout the entire video.

#### ACTION:

A natural adult female hand enters the frame slowly from the side.

The hand has realistic human anatomy, five fingers, natural finger proportions, realistic nails, subtle skin texture and natural movement.

The hand gently reaches toward ONE specific Christmas decorative object from the arrangement: [DESCREVA EXATAMENTE QUAL OBJETO SERÁ PEGADO].

The fingers carefully grip the object at a physically appropriate point, using a natural and believable grip.

The hand slowly lifts the object from the countertop.

After lifting it, the hand moves the object slightly closer to the camera, only a small distance, just enough to reveal its details more clearly.

The object remains fully visible and stable in the hand.

The hand pauses naturally for a moment while holding the object closer to the camera, allowing the viewer to clearly see its texture, colors, shape and small decorative details.

The movement must be slow, controlled and natural, like a person casually picking up a Christmas decoration to show it to someone.

Do NOT rotate the object excessively.

Do NOT flip the object.

Do NOT squeeze or deform the object.

Do NOT change its orientation unnecessarily.

#### CAMERA:

Vertical 9:16 smartphone video.

Camera remains mostly stationary.

Very subtle natural handheld micro-movement.

No dramatic camera movement.

No zoom effect.

No sudden focus changes.

As the object comes slightly closer to the camera, the camera naturally adjusts focus onto the object and hand, with realistic smartphone autofocus behavior.

The background may become slightly softer naturally, but must remain recognizable as the same real Brazilian home.

#### HAND REALISM:

Real female hand with anatomically correct fingers.

Five fingers only.

Natural finger joints.

Natural nail shapes.

Subtle skin pores and micro-texture.

Natural skin color variation.

Realistic interaction between fingers and the object's surface.

The fingers must physically wrap around the object according to its real shape.

No extra fingers.

No fused fingers.

No disappearing fingers.

No duplicated hands.

No distorted fingernails.

#### PRODUCT CONSISTENCY:

The selected Christmas decoration must remain completely consistent with the reference image.

Lock its:

- exact shape
- dimensions
- proportions
- colors
- materials
- texture
- decorative details
- edges
- surface reflections

The object must never morph, melt, stretch, duplicate, shrink or change design.

#### PHYSICS:

The object has realistic weight.

The hand must support it naturally.

The object must move together with the hand as one physically connected object.

No floating.

No sliding through fingers.

No unnatural grip.

No intersection between fingers and object.

#### LIGHTING:

Maintain the exact natural lighting character of the reference image.

Soft, realistic ambient daylight from the real environment.

Natural indoor light.

Subtle realistic shadows.

Natural reflections on the object.

Physically believable light interaction between the hand, object and countertop.

If the decoration contains lights, maintain their original subtle illumination without increasing the glow.

Do not introduce cinematic lighting.

Do not add dramatic warm light.

Do not create artificial highlights.

Do not create a commercial product-lighting effect.

STYLE:

Authentic casual smartphone footage filmed inside a real Brazilian home.

Natural.

Minimal.

Unstaged.

Everyday.

Quiet.

Photorealistic.

The video must look like a real person casually picked up one of their Christmas decorations and brought it slightly closer to the phone camera to show its details.

It must NOT look like a commercial, product advertisement, catalog, professional studio video or staged interior-design content.

MOTION:

0–2 seconds: the female hand naturally enters the frame and approaches the selected decoration.

2–4 seconds: the fingers gently grasp the decoration and lift it from the countertop.

4–6 seconds: the hand slowly brings the decoration slightly closer to the camera.

6–8 seconds: the hand holds the decoration steady near the camera for a brief moment, allowing its details to be clearly visible.

Keep all movements slow, continuous and physically natural.

BACKGROUND SOUND:

Very subtle authentic household room tone, faint ambient noise from a real home, no exaggerated sound effects.

MUSIC:

No music.

#### FINAL REALISM REQUIREMENT:

The entire scene must look like genuine smartphone footage recorded inside a real Brazilian home, with physically accurate hand-object interaction, stable product geometry, natural lighting and realistic camera behavior.

#### NEGATIVE CONSTRAINTS:

No product morphing, no object deformation, no melting, no duplicated object, no changing colors, no changing shape, no changing proportions, no extra fingers, no fused fingers, no missing fingers, no deformed hand, no floating object, no impossible grip, no object passing through fingers, no excessive rotation, no sudden movement, no camera zoom, no dramatic focus pull, no cinematic lighting, no studio lighting, no catalog aesthetic, no commercial aesthetic, no CGI, no 3D render, no artificial skin, no plastic hand, no excessive glow.

Dialogue: none.

PROMPT - Create an 8-second ultra-photorealistic Christmas product B-roll sequence using the EXACT SAME physical product from the attached reference.

ABSOLUTE PRODUCT LOCK:

Every shot must preserve exactly:

same product

same geometry

same proportions

same color

same pattern  
same details  
same material  
same logo  
same text  
same number of components  
same orientation family

Never regenerate or reinterpret the product.

SHOT 1:  
Medium-wide first-person Christmas-room reveal.

The product is already stationary in the environment.

SHOT 2:  
Very gentle camera push closer to the same reference-facing surface.

Do not rotate product.

SHOT 3:  
Small lateral camera move of approximately 10–15 cm while maintaining nearly the same viewing angle.

SHOT 4:  
Slightly tighter framing showing authentic product material without inventing new microscopic detail.

SHOT 5:  
Stable premium hero framing of the exact same product with subtle Christmas-light bokeh in the background.

GLOBAL RULE:

The PRODUCT NEVER MOVES.

Only the CAMERA moves.

No orbit.  
No dramatic parallax.  
No changing product scale.  
No pattern drift.  
No color drift.  
No logo change.  
No added parts.  
No disappearing parts.  
No CGI.

No dialogue.  
No voice-over.

Only subtle Christmas instrumental music and authentic room ambience.

PROMPT - Create an **\*\*ultra-realistic vertical 9:16 POV smartphone video\*\*** using the provided reference image of the rug/carpet.

**\*\*CRITICAL:** Preserve the rug EXACTLY as shown in the reference image.\*\* Do not change, recreate, reinterpret or redesign anything on the product. Keep the exact same colors, print, artwork, text (if present), shapes, proportions, borders, material, texture and every visible detail.

The video must look like a real person casually demonstrating the rug with a smartphone.

Only **\*\*ONE realistic hand\*\*** may appear. No face, body or other person visible.

The video starts from slightly farther away, showing the **\*\*entire rug clearly inside the environment\*\***.

The hand enters naturally from the bottom of the frame with an open-palm presentation gesture, as if showing the product to the viewer.

The camera then **\*\*slowly and smoothly moves closer to the rug\*\***, maintaining a natural POV handheld smartphone perspective.

As the camera approaches, the hand points naturally toward different areas of the rug, highlighting its visible details without covering them.

Continue moving progressively closer until the camera shows a **\*\*detailed close-up of the actual surface and material\*\***.

The hand gently passes across the surface of the rug with the palm and fingers touching it, demonstrating the texture and softness of the material.

The fibers must react naturally to the hand: slight compression under the fingers and subtle movement as the hand slides across the surface.

The camera follows the hand with a **\*\*slow controlled close-up movement\*\***, revealing the real texture, fibers, edges, stitching and print quality.

The hand can gently press the rug once and release it to demonstrate its thickness and flexibility.

Finish with a beautiful close-up of the rug while the hand slowly passes over the surface one final time.

**\*\*CAMERA MOVEMENT:\*\*** smooth forward movement from wide shot → medium shot → close-up → macro detail. Natural subtle handheld micro-movements only. No spinning, no sudden movements, no excessive zoom and no dizzying camera motion.

**\*\*IMPORTANT:\*\***

Keep the reference rug 100% identical throughout the entire video.

Do NOT invent or add any new print, pattern, artwork, text, decoration or design.

Do NOT remove anything already printed on the rug.

Do NOT change colors.

Do NOT deform the product.

Do NOT make elements of the print move or animate.

The rug remains physically realistic and stationary.

Only one hand visible.

Natural human hand anatomy.

Realistic interaction with the fabric.

Realistic carpet fibers and texture.

Natural lighting and shadows.

Authentic smartphone autofocus.

Subtle realistic motion blur.

No person visible.

No face.

No speech.

No subtitles.

No added text on screen.

No watermark.

No interface.

PROMPT - \*\*Vertical 9:16, ultra-realistic POV smartphone UGC video, natural handheld recording, no speech, no subtitles, no text, no watermark, no visible person. ONLY one realistic hand appears, naturally gesturing, pointing and presenting the projection.\*\*

Use the provided reference image of the Christmas projector exactly as the product reference. Preserve the projector's original shape, proportions, colors, lens, materials and details. Do not redesign the projector.

The scene takes place inside a cozy real living room at night, with the room slightly dark so the Christmas projections are bright and clearly visible on the wall and ceiling.

The projector is already turned on.

The video begins in POV showing the projector in the foreground and the Christmas projection covering the wall behind it.

**\*\*CAMERA MOVEMENT MUST BE CALM AND CONTROLLED.\*\***

The camera must NEVER spin, rotate, circle around the room or make exaggerated movements.

Keep the smartphone mostly facing forward with only small, natural handheld movements, as if a real person were calmly demonstrating the product.

One hand remains frequently visible throughout the video, naturally gesturing toward the projected images.

The hand points with the index finger toward different Christmas figures on the wall, slowly moving from one projected element to another as if saying: “look at this.”

The camera gently follows where the finger is pointing.

**\*\*The Christmas projection itself remains animated.\*\***

Whatever Christmas graphics exist in the reference projector — snowflakes, snowmen, Santa, reindeer, Christmas trees, bells, gifts, candy canes, stars or other Christmas images — should move **\*\*slowly and smoothly across the wall\*\***.

The images can gently drift horizontally and vertically, slightly change position and softly animate.

**\*\*DO NOT make the entire projection rotate or spin.\*\***

The projection must NOT swirl around the room, rapidly rotate, spin in circles or create a dizzying effect.

The movement should resemble a **\*\*real Christmas LED projector with slow animated patterns\*\***.

The camera gently moves closer to the wall while the hand points at one of the moving Christmas figures.

Then the camera slowly lowers toward the projector.

The hand points at the projector and briefly touches or adjusts it.

The camera then gently returns to the wall while the same hand points again toward the moving Christmas images.

The projected images continue moving independently and smoothly in the background.

The video should feel like someone genuinely demonstrating the projector to another person:

**\*\*projector → hand points → camera shows projection → hand points at moving figures → camera gently returns to projector → hand touches projector → camera returns to projection.\*\***

Realistic wall texture must remain visible underneath the projected light. Accurate light spill, realistic brightness, natural shadows, authentic smartphone autofocus, subtle exposure adaptation and very light handheld micro-movements.

**\*\*CRITICAL RULES:\*\***

- \* Christmas images move slowly and continuously.
- \* NO spinning projection.
- \* NO rotating the entire pattern.
- \* NO circular camera movement.
- \* NO fast camera movement.
- \* NO dizzying movement.
- \* NO excessive zoom.
- \* Camera remains mostly stable and forward-facing.

PROMPT - Crie um vídeo **\*\*POV ultra-realista de 10 segundos, vertical 9:16\*\***, utilizando exatamente duas imagens de referência:

**\*\*IMAGEM 1 = caixa de presente, referência visual absoluta.\*\***

**\*\*IMAGEM 2 = produto que deverá ser encontrado dentro da caixa.\*\***

### **### REGRA ABSOLUTA — CAIXA IDÊNTICA À IMAGEM 1**

A caixa deve permanecer **\*\*100% IDÊNTICA à primeira imagem de referência durante todo o vídeo\*\***.

Não alterar absolutamente nada: formato, tamanho, proporções, cor, estampa, desenhos, textos, logos, textura, material, tampa, bordas, fita ou laço.

**\*\*NÃO recriar uma caixa parecida. Use exatamente a caixa da referência.\*\***

As únicas mudanças permitidas são físicas: **\*\*o laço pode ser desamarrado e a tampa pode ser aberta pelas mãos.\*\***

### **### 0–2s — DESAMARRANDO**

A câmera está em **\*\*POV\*\***, olhando para a caixa.

Exatamente duas mãos da mesma pessoa aparecem.

Uma mão segura a caixa enquanto a outra pega **\*\*a ponta do laço original da própria caixa\*\*** e puxa.

O laço se desfaz naturalmente e a fita fica solta sobre a caixa.

### **### 2–4s — ABRINDO**

As mesmas duas mãos seguram a tampa original e **\*\*levantam a tampa fisicamente\*\***, abrindo a caixa.

**\*\*IMPORTANTE: o produto da Imagem 2 NÃO deve simplesmente aparecer perfeitamente apresentado assim que a caixa abrir.\*\***

O interior deve parecer uma caixa de presente real, e o produto deve estar **\*\*acomodado dentro dela\*\***, parcialmente escondido pelo conteúdo/embalagem interna já compatível com a cena.

### **### 4–6s — PROCURANDO DENTRO DA CAIXA**

As duas mãos entram fisicamente dentro da caixa e **\*\*procuram pelo produto\*\***.

Elas afastam suavemente o conteúdo interno, movimentam o que estiver cobrindo o produto e exploram o interior da caixa de maneira natural.

Então uma das mãos **\*\*encontra o produto correspondente EXATAMENTE à Imagem 2\*\***.

A outra mão ajuda a liberar o produto de dentro da caixa.

O produto precisa ser realmente **\*\*ENCONTRADO E RETIRADO DE DENTRO\*\***, e não surgir, materializar ou substituir outro objeto.

### ### 6–8s — RETIRANDO O PRODUTO

As duas mãos seguram o produto encontrado e **\*\*puxam fisicamente para fora da caixa\*\***.

Mostre claramente o movimento completo:

**\*\*produto dentro da caixa → mãos encontram → mãos seguram → produto sobe → produto sai completamente da caixa.\*\***

Preserve o produto **\*\*100% idêntico à Imagem 2\*\***, incluindo formato, embalagem, cores, estampas, textos, logos, proporções e todos os detalhes.

### ### 8–10s — MOSTRANDO DE PERTO

As mãos aproximam o produto da câmera para apresentá-lo.

Faça um **\*\*close-up ultra-realista\*\***, com foco automático natural de smartphone.

O produto fica extremamente nítido próximo à câmera enquanto **\*\*a mesma caixa original permanece aberta ao fundo\*\***, levemente desfocada.

Faça um pequeno movimento natural com o produto para mostrar seus detalhes.

### ### REGRAS CRÍTICAS

**\*\*IMAGEM 1:\*\*** identidade absoluta da caixa. Não alterar nada.

**\*\*IMAGEM 2:\*\*** identidade absoluta do produto. Não alterar nada.

O produto deve **\*\*existir fisicamente dentro da caixa desde o início\*\***, mesmo que esteja escondido. Ele só se torna visível quando as mãos realmente o encontram.

**\*\*NÃO** fazer o produto surgir magicamente. **\*\*NÃO** fazer transformação de objetos. **\*\*NÃO** trocar a caixa. **\*\*NÃO** alterar a estampa. **\*\*NÃO** alterar o produto. **\*\*NÃO** gerar mãos extras.\*\*

Exatamente **\*\*duas mãos da mesma pessoa\*\***, movimentos humanos naturais, física realista, sombras e contato físico corretos.

**\*\*Sem rosto, sem corpo, sem fala, sem texto adicional, sem legendas e sem música. Aparência de vídeo UGC real gravado com smartphone.\*\***

### ### 4–6s — PROCURANDO DENTRO DA CAIXA

As duas mãos entram fisicamente dentro da caixa e **\*\*procuram pelo produto\*\***.

Elas afastam suavemente o conteúdo interno, movimentam o que estiver cobrindo o produto e exploram o interior da caixa de maneira natural.

Então uma das mãos \*\*encontra o produto correspondente EXATAMENTE à Imagem 2\*\*.

A outra mão ajuda a liberar o produto de dentro da caixa.

O produto precisa ser realmente \*\*ENCONTRADO E RETIRADO DE DENTRO\*\*, e não surgir, materializar ou substituir outro objeto.

### ### 6–8s — RETIRANDO O PRODUTO

As duas mãos seguram o produto encontrado e \*\*puxam fisicamente para fora da caixa\*\*.

Mostre claramente o movimento completo:

\*\*produto dentro da caixa → mãos encontram → mãos seguram → produto sobe → produto sai completamente da caixa.\*\*

Preserve o produto \*\*100% idêntico à Imagem 2\*\*, incluindo formato, embalagem, cores, estampas, textos, logos, proporções e todos os detalhes.

### ### 8–10s — MOSTRANDO DE PERTO

As mãos aproximam o produto da câmera para apresentá-lo.

Faça um \*\*close-up ultra-realista\*\*, com foco automático natural de smartphone.

O produto fica extremamente nítido próximo à câmera enquanto \*\*a mesma caixa original permanece aberta ao fundo\*\*, levemente desfocada.

Faça um pequeno movimento natural com o produto para mostrar seus detalhes.

### ### REGRAS CRÍTICAS

\*\*IMAGEM 1:\*\* identidade absoluta da caixa. Não alterar nada.

\*\*IMAGEM 2:\*\* identidade absoluta do produto. Não alterar nada.

O produto deve \*\*existir fisicamente dentro da caixa desde o início\*\*, mesmo que esteja escondido. Ele só se torna visível quando as mãos realmente o encontram.

\*\*NÃO fazer o produto surgir magicamente. NÃO fazer transformação de objetos. NÃO trocar a caixa. NÃO alterar a estampa. NÃO alterar o produto. NÃO gerar mãos extras.\*\*

Exatamente \*\*duas mãos da mesma pessoa\*\*, movimentos humanos naturais, física realista, sombras e contato físico corretos.

**\*\*Sem rosto, sem corpo, sem fala, sem texto adicional, sem legendas e sem música.**

**\*\*IMAGEM 2 = produto que deverá ser encontrado dentro da caixa.\*\***

### **### REGRA ABSOLUTA — CAIXA IDÊNTICA À IMAGEM 1**

A caixa deve permanecer **\*\*100% IDÊNTICA** à primeira imagem de referência durante todo o vídeo**\*\***.

Não alterar absolutamente nada: formato, tamanho, proporções, cor, estampa, desenhos, textos, logos, textura, material, tampa, bordas, fita ou laço.

**\*\*NÃO** recriar uma caixa parecida. Use exatamente a caixa da referência**\*\***.

As únicas mudanças permitidas são físicas: **\*\*o laço pode ser desamarrado e a tampa pode ser aberta pelas mãos.\*\***

### **### 0–2s — DESAMARRANDO**

A câmera está em **\*\*POV\*\***, olhando para a caixa.

Exatamente duas mãos da mesma pessoa aparecem.

Uma mão segura a caixa enquanto a outra pega **\*\*a ponta do laço original da própria caixa\*\*** e puxa.

O laço se desfaz naturalmente e a fita fica solta sobre a caixa.

### **### 2–4s — ABRINDO**

As mesmas duas mãos seguram a tampa original e **\*\*levantam a tampa fisicamente\*\***, abrindo a caixa.

**\*\*IMPORTANTE:** o produto da Imagem 2 **NÃO** deve simplesmente aparecer perfeitamente apresentado assim que a caixa abrir**\*\***.

O interior deve parecer uma caixa de presente real, e o produto deve estar **\*\*acomodado dentro dela\*\***, parcialmente escondido pelo conteúdo/embalagem interna já compatível com a cena.

### **### 4–6s — PROCURANDO DENTRO DA CAIXA**

DETALHE - 💡

Adicione foto da arvore sem nada + a foto do pisca pisca no seu gerador de video (neutro para qualquer tipo de pisca pisca)

PROMPT - Crie um vídeo ultra-realista de 10 segundos, vertical 9:16, utilizando a imagem de referência como base e preservando exatamente a árvore de Natal, o ambiente, os objetos, as cores e a iluminação original.

REGRA CRÍTICA: nenhuma pessoa, rosto ou corpo aparece. Apenas as mãos da mesma modelo podem aparecer, sempre anatomicamente corretas e consistentes.

O pisca-pisca mostrado no início é exatamente o mesmo usado para decorar a árvore. Preserve rigorosamente a cor das luzes do pisca-pisca da referência. Não trocar a cor durante o vídeo.

0–2s — PISCA-PISCA NA MÃO + TRANSIÇÃO

Comece com uma das mãos da modelo próxima à câmera, segurando claramente o pisca-pisca aceso.

Mostre por um instante o fio e várias pequenas luzes brilhando e piscando naturalmente.

Em seguida, a mão leva rapidamente o pisca-pisca em direção à lente e encosta/cobre completamente a câmera com as luzes, criando uma transição física realista.

No instante em que o pisca-pisca cobre toda a lente, faça o corte para a próxima cena.

2–6s — COLOCANDO O PISCA-PISCA NA ÁRVORE

Após a transição, mostre somente as mãos instalando o mesmo pisca-pisca ao redor da árvore de Natal.

As mãos passam o fio naturalmente em volta de toda a árvore, começando por uma região e avançando progressivamente pelas outras partes.

O fio deve envolver os galhos de maneira realista, acompanhando o formato da árvore, distribuindo as luzes do topo até a parte inferior.

As mãos afastam alguns galhos, encaixam cuidadosamente o fio, soltam e continuam para outra região.

O movimento deve ser ágil o suficiente para caber em 10 segundos, mas natural e humano, nunca acelerado artificialmente.

As luzes permanecem acesas e piscando durante a instalação, sempre exatamente na mesma cor do pisca-pisca mostrado no início.

#### 6–8s — ÁRVORE COMPLETAMENTE ILUMINADA

As mãos terminam de posicionar o pisca-pisca e saem do enquadramento.

A câmera faz um movimento suave para trás, afastando-se fisicamente, até revelar a árvore de Natal inteira, do topo até a base.

Agora toda a árvore está envolvida pelo pisca-pisca, com muitas luzes bem distribuídas entre os galhos, criando uma árvore bonita, brilhante e intensamente iluminada.

As luzes continuam piscando naturalmente, mantendo exatamente as cores originais.

#### 8–10s — CORAÇÃO COREANO

Mantenha a árvore inteira iluminada e piscando ao fundo.

Uma única mão entra pela parte inferior do enquadramento, próxima à câmera, e faz claramente um coração coreano (finger heart) usando o polegar e o dedo indicador.

Segure o coração por um instante enquanto a árvore permanece completamente visível e brilhando ao fundo.

#### REALISMO OBRIGATÓRIO

Vídeo com aparência de gravação real feita com smartphone, movimentos naturais das mãos, física realista do fio, interação correta com os galhos, pequenas oscilações naturais da árvore quando tocada, iluminação das lâmpadas refletindo realisticamente nos galhos e no ambiente.

NÃO mostrar rosto ou corpo. NÃO gerar pessoas adicionais. NÃO alterar a árvore ou suas decorações originais. NÃO mudar a cor do pisca-pisca. NÃO fazer luzes aparecerem flutuando. NÃO criar fios desconectados. NÃO deformar mãos ou dedos.

Sem fala, sem texto na tela, sem legendas e sem música.

O produto que você adicionar na segunda imagem como referencia ele vai tirar da caixa na hora de gerar o vídeo

PROMPT - A câmera permanece totalmente fixa em visão superior, com enquadramento, iluminação e cenário idênticos à primeira imagem de referência. A cena começa com duas mãos posicionadas sobre a caixa mostrada na primeira imagem.

Em um único movimento contínuo, natural e realista, as mãos seguram a caixa e abrem cuidadosamente a tampa pela parte superior, sem rasgar, deformar ou alterar a aparência externa da caixa.

Ao levantar completamente a tampa, o interior da caixa é revelado. Dentro da caixa está exatamente o produto/objeto mostrado na segunda imagem de referência, preservando fielmente sua aparência, formato, cores, proporções, textura, detalhes e quantidade.

As mãos afastam a tampa e fazem um pequeno gesto de apresentação do conteúdo, mantendo o produto dentro da caixa e totalmente visível para a câmera. No final ela pega a peça de referência que estiver na imagem e mostra para a camera

Câmera fixa durante toda a cena, sem zoom, sem cortes e sem mudanças de ângulo. Movimento natural das mãos, física realista, iluminação consistente e aparência ultrarrealista. Não adicionar, remover ou modificar nenhum elemento presente nas imagens de referência.

DETALHE 💡

adicione foto da modelo em frente ao guarda roupa aberto + foto do pacote + foto da blusa que deseja divulgar

PROMPT - Create an ultra-realistic vertical 9:16 fashion UGC transformation video using THREE reference images.

REFERENCE IMAGE 1:

Defines the EXACT model, face, hair, body proportions, wardrobe/closet, environment, lighting, camera perspective, framing, and the clothes initially hanging inside the wardrobe.

REFERENCE IMAGE 2:

Defines the EXACT package that will be thrown toward the model AFTER the fire transition.

REFERENCE IMAGE 3:

Defines the EXACT clothing item that the model must remove from inside the package.

Preserve the EXACT same model identity, facial features, hairstyle, skin tone, body proportions, environment, wardrobe, lighting, colors, and overall realism.

No dialogue.

No lip sync.

No subtitles.

No text overlays.

No extra people visible.

[SCENE 1 — EMPTY THE WARDROBE VERY FAST]

The model immediately starts removing ALL the clothes hanging inside the wardrobe at EXTREMELY HIGH SPEED.

She physically grabs the garments one after another, pulls them completely off the wardrobe rail and throws them directly onto the floor.

GRAB → PULL → THROW ON FLOOR.

GRAB → PULL → THROW ON FLOOR.

GRAB → PULL → THROW ON FLOOR.

She does this extremely fast until EVERY garment has been removed.

All the garments accumulate together on the floor, creating ONE LARGE, MESSY, MIXED PILE OF CLOTHES.

The wardrobe must end COMPLETELY EMPTY.

Do NOT magically remove the clothes.

[SCENE 2 — CLOTHING PILE + LIGHTER]

The camera quickly reframes downward and CENTRALIZES the large messy pile of clothes on the floor.

The model takes a small lighter in one hand.

She ignites the lighter.

A clearly visible flame appears.

IMPORTANT:

She does NOT throw the lighter.

She keeps the lighter firmly in her hand.

She lowers her hand and physically TOUCHES THE LIT FLAME DIRECTLY AGAINST THE CLOTHES.

The flame from the lighter makes direct contact with the clothing pile.

The clothes IMMEDIATELY catch fire.

[SCENE 3 — HUGE FIRE TRANSITION]

The fire spreads EXTREMELY FAST.

Within moments, the ENTIRE pile of clothes is engulfed in intense flames.

The fire becomes dramatically larger and stronger.

Huge flames rapidly rise from the clothes and surge DIRECTLY TOWARD THE CAMERA.

The flames expand extremely fast until they COMPLETELY COVER 100% OF THE CAMERA LENS.

The fire must become so large that NOTHING ELSE can be seen.

For a brief instant:

ONLY FIRE IS VISIBLE.

No model.

No wardrobe.

No floor.

No clothing pile.

No lighter.

100% OF THE SCREEN IS FILLED WITH INTENSE FIRE.

Use this exact moment as a seamless transition mask.

[SCENE 4 — PACKAGE THROWN INTO FRAME]

Immediately after the full-screen fire transition, return to the SAME model in the SAME environment.

IMPORTANT:

The model does NOT already have the package.

Suddenly, the EXACT PACKAGE FROM REFERENCE IMAGE 2 is THROWN TOWARD HER FROM OUTSIDE THE CAMERA FRAME.

The package enters the frame quickly through the air.

NO PERSON IS VISIBLE THROWING IT.

NO HAND IS VISIBLE THROWING IT.

NO ARM ENTERS THE FRAME.

The package simply flies naturally into the frame from an off-camera source.

The model reacts naturally and CATCHES THE PACKAGE WITH HER HANDS.

The package must remain EXACTLY identical to Reference Image 2.

[SCENE 5 — OPEN PACKAGE]

Immediately after catching it, she smiles slightly and quickly opens the package with her hands.

She reaches INSIDE the package.

She physically pulls the EXACT CLOTHING ITEM FROM REFERENCE IMAGE 3 OUT FROM INSIDE THE PACKAGE.

IMPORTANT:

The garment must clearly and visibly COME FROM INSIDE THE PACKAGE.

It must NOT magically appear.

She completely removes the garment and naturally unfolds it.

[SCENE 6 — SHOW THE GARMENT]

As soon as the garment is unfolded, the model becomes visibly happy and gives a natural smile.

She holds the garment up toward the camera with both hands.

The FRONT of the garment faces DIRECTLY toward the camera.

The print/design from Reference Image 3 must be completely visible.

Reproduce the garment EXACTLY:

same color,

same fabric,

same cut,

same proportions,

same seams,

same print,

same typography,

same graphics,

same print placement,

same texture,

same details.

Do NOT modify, redesign, simplify or hallucinate the print.

[SCENE 7 — PRINT CLOSE-UP]

The camera performs a quick, smooth push-in toward the garment.

FOCUS VERY CLOSELY ON THE PRINT.

The garment print becomes the main subject of the frame.

The print must remain sharp, readable and undistorted.

Show the fabric texture and printed details clearly.

Then smoothly return enough to show the model again.

[FINAL ACTION — WINK + CTA]

While still holding/showing the garment, the model looks directly toward the camera.

She smiles naturally.

She gives ONE playful, clearly visible WINK toward the camera.

Immediately afterward, with her free hand, she points clearly DOWN toward the bottom edge of the frame.

She keeps smiling while pointing downward.

Hold this final downward-pointing gesture briefly and naturally.

END.

PROMPT - Create an ultra-realistic 6-second vertical 9:16 fashion transformation video using the provided reference images.

REFERENCE IMAGE 1: defines the exact model, face, hair, body proportions, environment, camera position, framing, perspective, and lighting.

REFERENCE IMAGE 2: defines the exact clothing item/outfit the model must be wearing after the transformation.

Preserve the EXACT SAME model, identity, facial features, hairstyle, skin tone, body proportions, environment, lighting, camera angle, perspective, and framing throughout the entire video.

The clothing from Reference Image 2 must be reproduced accurately, preserving its exact design, colors, print, texture, cut, proportions, and details.

CAMERA:

Camera remains completely FIXED and stationary.

No zoom, pan, tilt, reframing, camera shake, perspective change, or cuts except for the fire-covered transformation moment.

0.0–1.5 SECONDS — LIGHTER + FIRE TRANSITION

The model begins exactly as shown in Reference Image 1, holding the package in one hand and a lighter in the other.

She quickly flicks the lighter ON.

A visible flame appears immediately.

She brings the flame toward the package and the package rapidly catches fire.

The fire spreads extremely FAST across the package, creating a dramatic but visually realistic fashion-transition effect.

She immediately moves the burning package directly toward the camera lens.

The flames rush toward the lens like a fast FIREBALL TRANSITION.

The fire must completely cover 100% OF THE FRAME for a very brief instant.

IMPORTANT:

The transition happens ONLY while the entire camera view is completely obscured by flames.

#### 1.5–2.0 SECONDS — INSTANT OUTFIT TRANSFORMATION

At the exact moment the flames completely cover the lens, perform an instantaneous wardrobe transformation.

As the flames rapidly disappear, the SAME model is revealed in the SAME exact position and environment, now wearing the clothing/outfit from Reference Image 2.

The transition must feel extremely fast, seamless and physically convincing.

Do NOT show the clothing gradually appearing.

Do NOT morph the clothing.

The outfit change happens instantly while the flames completely hide the model.

#### 2.0–6.0 SECONDS — REACTION + CTA

Immediately after appearing in the new outfit, the model naturally runs one hand through her hair.

She makes a quick, genuine surprised facial expression, as if impressed by the transformation.

She looks down toward the new outfit.

She naturally runs her free hand over the clothing, briefly feeling and showing the fabric and fit.

She looks back up and smiles naturally.

She then moves her upper body and face VERY CLOSE TO THE CAMERA, until her face becomes prominently framed.

While extremely close to the camera, she gives a playful natural wink.

Immediately afterward, she slightly moves back just enough to make her hand visible and clearly points downward with one finger as a CTA.

The downward pointing gesture must be clearly visible before the video ends.

PROMPTS - Create an ultra-realistic vertical 9:16 fashion transformation video using the provided reference images.

Preserve the EXACT same model, face, facial features, hair, skin tone, body proportions, camera position, framing, lighting, background, environment, and perspective throughout the entire video.

CAMERA:

The camera remains completely FIXED and stationary.

No zoom, pan, tilt, reframing, cuts, camera shake, or perspective changes.

[0–2 SECONDS — GIANT BUBBLE GUM]

The model naturally chews bubble gum while looking toward the camera.

She immediately begins blowing a bubble.

The bubble starts small directly from her lips and expands EXTREMELY FAST and continuously.

The bubble becomes dramatically HUGE and expands directly toward the camera lens.

IMPORTANT TIMING:

At EXACTLY 2.0 seconds, the giant bubble must completely cover 100% of the camera frame.

Nothing else can be visible at this moment. The entire screen is filled by the surface of the bubble gum.

[EXACTLY AT 2 SECONDS — HIDDEN WARDROBE TRANSITION]

ONLY while the bubble completely covers the camera, perform the wardrobe transformation.

Replace ONLY the clothing the model was originally wearing with the EXACT clothing item shown in the clothing reference image.

Reproduce the referenced garment faithfully, preserving its exact color, cut, shape, fabric texture, seams, prints, details, fit, and proportions.

DO NOT modify the model, her identity, face, hair, body, skin, environment, lighting, camera, background, or composition.

[2–3 SECONDS — REVEAL]

The giant bubble quickly pops away from the lens.

The SAME model is immediately revealed in the EXACT SAME position and EXACT SAME environment, now wearing the referenced clothing item.

ONLY HER CLOTHING HAS CHANGED.

[3–6 SECONDS — EXCITED REACTION + PRODUCT]

As soon as she realizes she is wearing the new piece, she reacts with an exaggerated but natural EXCITED and pleasantly SHOCKED expression.

She quickly places BOTH hands against the sides of her face/cheeks, with wide excited eyes and a big happy expression, like: “OMG, I LOVE IT!”

She then lowers her hands and naturally runs one hand over the FRONT of the clothing she is now wearing, gently touching and smoothing the fabric to clearly showcase the piece.

Her hand must physically follow the surface of the garment naturally.

She looks back toward the camera with a playful, confident expression and gives ONE clearly visible WINK.

Immediately after the wink, she raises her free hand and clearly POINTS DOWNWARD with her index finger toward the bottom of the frame.

She holds the downward pointing gesture clearly for the final moment as a strong visual CTA.

MOVEMENT ORDER MUST BE:

GIANT BUBBLE → FULL CAMERA COVER → CLOTHING TRANSFORMATION → BUBBLE POPS → BOTH HANDS ON CHEEKS → EXCITED/SHOCKED FACE → HAND TOUCHES AND SMOOTHS THE NEW CLOTHING → ONE WINK → POINT DOWN.

Ultra-realistic smartphone UGC aesthetic, realistic skin texture, realistic bubble gum elasticity, natural facial expressions, realistic hand interaction with fabric, physically believable motion, seamless fashion transformation, high temporal consistency.

PROMPT FLOW - Create an ultra-realistic vertical 9:16 fashion transformation video using the provided reference images.

Preserve the EXACT same model, face, facial features, hair, skin tone, body proportions, camera position, framing, lighting, background, environment, and perspective throughout the entire video.

CAMERA:

The camera remains completely FIXED and stationary.

No zoom, pan, tilt, reframing, cuts, camera shake, or perspective changes.

[0-2 SECONDS — GIANT BUBBLE GUM]

The model naturally chews bubble gum while looking toward the camera.

She immediately begins blowing a bubble.

The bubble starts small directly from her lips and expands EXTREMELY FAST and continuously.

The bubble becomes dramatically HUGE and expands directly toward the camera lens.

IMPORTANT TIMING:

At EXACTLY 2.0 seconds, the giant bubble must completely cover 100% of the camera frame.

Nothing else can be visible at this moment. The entire screen is filled by the surface of the bubble gum.

[EXACTLY AT 2 SECONDS — HIDDEN WARDROBE TRANSITION]

ONLY while the bubble completely covers the camera, perform the wardrobe transformation.

Replace ONLY the clothing the model was originally wearing with the EXACT clothing item shown in the clothing reference image.

Reproduce the referenced garment faithfully, preserving its exact color, cut, shape, fabric texture, seams, prints, details, fit, and proportions.

DO NOT modify the model, her identity, face, hair, body, skin, environment, lighting, camera, background, or composition.

[2–3 SECONDS — REVEAL]

The giant bubble quickly pops away from the lens.

The SAME model is immediately revealed in the EXACT SAME position and EXACT SAME environment, now wearing the referenced clothing item.

ONLY HER CLOTHING HAS CHANGED.

[3–6 SECONDS — EXCITED REACTION + PRODUCT]

As soon as she realizes she is wearing the new piece, she reacts with an exaggerated but natural EXCITED and pleasantly SHOCKED expression.

She quickly places BOTH hands against the sides of her face/cheeks, with wide excited eyes and a big happy expression, like: “OMG, I LOVE IT!”

She then lowers her hands and naturally runs one hand over the FRONT of the clothing she is now wearing, gently touching and smoothing the fabric to clearly showcase the piece.

Her hand must physically follow the surface of the garment naturally.

She looks back toward the camera with a playful, confident expression and gives ONE clearly visible WINK.

Immediately after the wink, she raises her free hand and clearly POINTS DOWNWARD with her index finger toward the bottom of the frame.

She holds the downward pointing gesture clearly for the final moment as a strong visual CTA.

MOVEMENT ORDER MUST BE:

GIANT BUBBLE → FULL CAMERA COVER → CLOTHING TRANSFORMATION → BUBBLE POPS → BOTH HANDS ON CHEEKS → EXCITED/SHOCKED FACE → HAND TOUCHES AND SMOOTHS THE NEW CLOTHING → ONE WINK → POINT DOWN.

ABSOLUTE CONTINUITY:

PROMPT - Create a 10-second ultra-realistic vertical 9:16 smartphone video. The model wears the exact referenced outfit, preserving its original color, design, fabric and fit. START with the red lollipop already in her mouth. She immediately pulls the lollipop out with her

RIGHT hand and smiles brightly at the camera with an excited, playful expression. She puts it back in her mouth and sucks it twice, then removes it again and keeps holding it visibly in her RIGHT hand. The lollipop must NEVER disappear, teleport, change appearance or switch hands. Her LEFT hand gently strokes the garment and lightly pulls the fabric to show its fit and texture. She smiles, runs her LEFT hand through her hair, winks, blows a kiss ONLY with her LEFT hand, then points downward ONLY with her LEFT hand. Her RIGHT hand always remains responsible for holding the lollipop. Energetic expressions, natural movements, realistic hands, continuous single take, no cuts, no text or subtitles.

PROMPT - Use the provided reference image as the EXACT starting frame, character, outfit, handbag and bathroom environment.

Preserve the woman's exact facial identity, pink hair, hairstyle, freckles, skin tone, body proportions and white bathrobe. Preserve the exact handbag, including its shape, size, material, color and strap. Do not redesign or alter anything.

Create an ultra-photorealistic vertical 9:16 video in one continuous shot.

The woman begins standing naturally in the bathroom with the handbag strap held gently between her lips, exactly as shown in the reference image.

She then starts walking slowly and naturally straight toward the camera. Her body, bathrobe and hair show subtle realistic movement with each step.

While continuing to walk toward the camera, she simply opens her mouth and releases the handbag strap.

She does NOT touch the handbag with her hands.

The moment she releases the strap, the handbag immediately falls naturally downward under gravity, dropping completely to the bathroom floor. The bag must have realistic weight and physics, with the strap following naturally as it falls.

She does not stop to pick up the bag. After releasing it, she continues walking toward the camera naturally, getting progressively closer to the lens.

The camera remains 100% fixed and stationary during the entire video.

ONE SINGLE CONTINUOUS TAKE. NO CUTS. NO TRANSITIONS. NO CAMERA MOVEMENT. NO ZOOM. NO SLOW MOTION.

Do not change her face, hair, body, bathrobe, handbag or bathroom.

Do not make the handbag disappear or transform. It must visibly fall from her mouth all the way to the floor with realistic gravity.

NO SPEECH. NO DIALOGUE. NO VOICE. NO MUSIC. NO SOUND EFFECTS.  
COMPLETELY SILENT VIDEO.

Natural human movement, realistic walking physics, realistic fabric movement, realistic handbag physics, authentic smartphone-video appearance, photorealistic skin texture, true-to-life lighting, ultra-realistic.

PROMPT - STARTING POSITION

Preserve the exact person, identity, facial features, age, gender presentation, body proportions, hair, skin tone, natural skin texture, clothing, accessories, environment, lighting,

camera angle, framing, and visual composition from the reference image. The influencer begins standing naturally and balanced in the existing position.

## START OF ANIMATION

She prepares for a realistic lateral cartwheel with a subtle shift of body weight toward the initiating leg. Her arms rise naturally to provide balance and momentum. The torso begins leaning sideways in the direction of the cartwheel while the supporting knee and ankle make small realistic balance adjustments.

## MAIN ACTION

She performs one complete, controlled lateral cartwheel at natural human speed. She bends sideways and places the first hand firmly on the ground, followed naturally by the second hand. Her body weight transfers progressively from the starting foot to the first hand and then to the second hand.

As her hips travel above her shoulders, her legs rise sequentially into the air, remaining naturally extended and separated in a wide cartwheel position. The legs pass smoothly through the inverted phase without freezing, hovering, or becoming weightless.

She continues the rotation with realistic momentum. The first descending foot makes firm contact with the ground, followed by the second foot. Her weight transfers naturally back from the hands to the feet. She releases the hands from the ground in sequence and smoothly raises her torso back to an upright standing position.

## BODY MECHANICS

Use anatomically realistic shoulder, elbow, wrist, hip, knee, and ankle articulation. The arms support the body weight realistically during the inverted phase without bending unnaturally. Maintain believable center-of-mass movement, gravity, momentum, muscular tension, and balance.

The movement sequence must clearly follow: starting foot, first hand, second hand, first landing foot, second landing foot. Include subtle posture corrections during preparation and landing. No impossible twisting, hyperextension, floating, sliding, teleporting, or unnatural joint deformation.

## FACIAL EXPRESSION

Keep the facial expression natural and silent throughout the movement. The eyes and head respond naturally to body orientation and balance. The expression may show subtle concentration during the cartwheel and relax naturally after landing.

No talking. No dialogue. No speech. No whispering. No singing. No lip-sync. No mouthing words. No speech-like lip movement. The mouth remains naturally relaxed except for the requested silent expression.

## BODY LANGUAGE

The performance should feel confident, athletic, fluid, and physically grounded rather than choreographed or robotic. Include natural breathing, small muscle tension changes, realistic hand pressure against the ground, and a smooth recovery of balance after landing.

Hair and clothing must react naturally to acceleration, inversion, gravity, and deceleration while fully preserving their original appearance.

## CAMERA

Vertical 9:16. One continuous shot. Stable smartphone-style recording with only extremely subtle natural handheld micro-movement. Keep the performer visible throughout the entire cartwheel. No zoom, no cuts, no transitions, no sudden reframing, and no aggressive camera shake.

## REALISM

Ultra-realistic human biomechanics and physics. Natural speed. Realistic body weight and momentum. Hands make genuine physical contact with the ground and never pass through it. Feet maintain believable traction. No frozen poses during the inversion and no exaggerated slow motion.

## REFERENCE PRESERVATION

Fully preserve the original reference image. Do not redesign or alter the influencer, face, body proportions, hair, skin, clothing, accessories, environment, lighting, or composition.

## RESTRICTIONS

No duplicated limbs. No extra fingers. No missing limbs. No warped hands. No broken anatomy. No body deformation. No floating. No unnatural sliding. No teleportation. No looping behavior. No visual effects. No text, subtitles, logos, or interface elements. No cuts or transitions.

## FINAL POSITION

After completing exactly one cartwheel, she lands securely on both feet, regains full upright balance, allows her arms to settle naturally, and finishes standing calmly and steadily. The movement ends smoothly without repeating.

## FINAL RESULT

A single ultra-realistic, physically accurate lateral cartwheel with convincing weight transfer, hand contact, inversion, leg trajectory, landing, balance recovery, natural secondary motion, and complete preservation of the reference image.

## PROMPT GROK - STARTING POSITION

PROMPT - Use exclusivamente a imagem de referência para definir personagem, produto, posição, cenário, iluminação e enquadramento.

A câmera permanece 100% FIXA, mantendo exatamente o mesmo enquadramento da referência.

A personagem permanece na posição inicial mostrada na imagem, segurando com apenas UMA mão o produto/objeto presente na referência. Ela olha naturalmente para a câmera com expressão divertida e confiante.

Sem fala. Sem áudio. Sem lip sync.

Primeiro, ela faz um pequeno impulso natural com o braço e lança suavemente o MESMO PRODUTO para cima.

## IMPORTANTE — FÍSICA REAL:

O produto sobe apenas alguns centímetros acima da mão. A gravidade atua imediatamente: ele perde velocidade durante a subida, atinge rapidamente o ponto máximo e começa a cair.

O produto NÃO flutua, NÃO congela no ar, NÃO permanece suspenso e NÃO realiza giros exagerados. Todo o lançamento acontece rapidamente, como na vida real.

Enquanto o produto começa a cair, a personagem reage imediatamente e levanta a perna que já está posicionada para realizar uma tentativa rápida e divertida de tocar/chutar suavemente o produto enquanto ele passa pela frente do pé.

O movimento deve ser espontâneo, rápido e humano.

Se ela não acertar, o produto simplesmente continua sua trajetória determinada pela gravidade, cai naturalmente para fora do enquadramento e NÃO retorna.

O produto nunca volta sozinho para a mão, nunca muda de direção sem contato físico e nunca permanece suspenso.

Após a tentativa, ela reage naturalmente olhando para a câmera, com um sorriso espontâneo e uma pequena risada silenciosa.

#### REFERENCE LOCK:

Preservar EXATAMENTE personagem, identidade, rosto, corpo, cabelo, maquiagem, acessórios, roupa, produto, cenário, iluminação, posição inicial e proporções da referência.

O produto permanece EXATAMENTE O MESMO durante toda a ação. Não alterar cor, formato, tamanho, textura, design ou detalhes.

Câmera 100% fixa.

Um único take contínuo.

Sem cortes ou transições.

Sem zoom, pan ou tilt.

Sem teleportes.

Sem objetos extras.

Sem duplicação.

Sem deformações.

Sem movimentos robóticos.

Movimentos rápidos, naturais e fluidos, com anatomia humana e física realista. Aparência autêntica de vídeo UGC gravado com smartphone, ultra-realista 4K, sem aspecto de IA.

PROMPT - Use a imagem de referência para preservar EXATAMENTE rosto, corpo, roupa, pacote, iluminação, enquadramento e ambiente.

A câmera permanece 100% FIXA durante todo o vídeo. Plano-sequência único, sem cortes, transições, zoom ou mudança de enquadramento.

O vídeo começa com o rapaz SEM NENHUM OBJETO NAS MÃOS. Ele olha para a própria camiseta, segura levemente a barra inferior com as duas mãos, faz um pequeno ajuste no tecido e demonstra uma expressão discreta de dúvida.

Em seguida, olhando para a camiseta, faz claramente o gesto universal de desaprovação: levanta UMA mão, fecha os dedos e mantém SOMENTE O POLEGAR ESTENDIDO PARA BAIXO (THUMBS DOWN) por aproximadamente 1 segundo.

IMPORTANTE: é obrigatoriamente um THUMBS DOWN. NÃO apontar para baixo com o dedo indicador.

Imediatamente depois, UM ÚNICO PACOTE entra rapidamente no enquadramento vindo de fora da câmera, como se tivesse sido lançado por alguém que nunca aparece.

O rapaz segura imediatamente o pacote com as duas mãos, em um movimento contínuo e natural, sem deixá-lo cair.

O pacote permanece EXATAMENTE O MESMO OBJETO durante toda a ação. Preservar tamanho, formato, cor, textura, etiqueta, impressão e todas as informações visíveis. Não alterar, deformar, substituir ou duplicar.

Sem pausa, ele leva fisicamente O MESMO PACOTE diretamente em direção à câmera.

O pacote se aproxima progressivamente da lente, aumentando naturalmente pela perspectiva, até ENCOSTAR FISICAMENTE NA CÂMERA E COBRIR 100% DO ENQUADRAMENTO.

O último frame deve ficar completamente preenchido pelo pacote, sem nenhuma parte do cenário ou personagem visível.

Sem fala e sem áudio.

REGRAS:

- Câmera 100% fixa.
- Um único take.
- Ele começa sem pacote.
- Apenas o pacote entra; quem lança nunca aparece.
- Exatamente UM pacote.
- Thumbs down com POLEGAR, nunca indicador.
- Pacote não muda, desaparece ou duplica.
- Sem teleportes.
- Sem mãos, braços ou dedos extras.
- Não deformar rosto, corpo, camiseta, mãos ou embalagem.
- Final obrigatório: O MESMO PACOTE cobre fisicamente 100% da lente.

Movimentos rápidos, fluidos e humanos. Física natural, aparência UGC premium gravada com smartphone, ultra-realista 4K, sem aparência de IA.

PROMPT -Utilize esta imagem apenas como referência da influenciadora, do quarto, do guarda-roupa e da roupa que será encontrada.

O vídeo começa alguns segundos antes do momento mostrado na imagem.

No primeiro frame, a influenciadora NÃO está segurando nenhuma roupa. As duas mãos estão livres. A roupa permanece pendurada normalmente entre as demais peças dentro do guarda-roupa.

Ela olha naturalmente para o interior do guarda-roupa e começa a procurar uma roupa com calma e entusiasmo, deslizando delicadamente uma mão entre os cabides, afastando uma peça de cada vez. Ela observa algumas roupas da parte superior, depois continua procurando naturalmente, exatamente como alguém escolhendo o look do dia.

Após alguns segundos de procura, ela encontra exatamente a roupa mostrada nesta imagem. Ela segura apenas o cabide dessa peça e a retira cuidadosamente do guarda-roupa a roupa já de frente. As outras roupas permanecem organizadas, movimentando-se apenas o mínimo necessário durante a retirada da peça. Nunca duplicar roupas, nunca criar cabides extras, nunca girar a blusa e nunca deixar a peça aparecer simultaneamente dentro e fora do guarda-roupa.

Depois de retirar a roupa, ela a aproxima naturalmente da frente do corpo, observa a peça com um leve sorriso de satisfação e passa delicadamente uma das mãos sobre o tecido.

Em seguida, ela vira a roupa em direção à câmera exatamente como aparece nesta imagem de referência, apresentando a peça com um sorriso natural. O vídeo termina nesse momento, com a roupa sendo exibida para a câmera.

Movimentos contínuos, lentos, totalmente humanos e naturais, sem cortes, sem troca de cenário, sem deformação dos cabides, sem atravessar tecidos, sem duplicação de roupas, sem bugs e sem aparência de IA.

Qualidade ultra-realista 4K, aparência de vídeo real gravado no dia a dia, preservando fielmente todas as características da influenciadora, do guarda-roupa, do ambiente e da roupa.

PROMPT - A cena continua exatamente a partir deste frame inicial, preservando perfeitamente a influenciadora, o guarda-roupa, todas as roupas, os cabides, a iluminação, o enquadramento e todos os elementos do cenário.

A câmera permanece completamente fixa durante toda a cena, sem cortes, sem zoom, sem troca de cenário e sem qualquer alteração nas roupas, no ambiente ou na aparência da influenciadora.

No início do vídeo, a influenciadora olha para o interior do guarda-roupa com uma expressão de dúvida, como se estivesse tentando encontrar algo para vestir. Ela começa a analisar rapidamente as peças penduradas, passando a mão entre os cabides de forma totalmente natural.

Ela retira a primeira peça do guarda-roupa, observa rapidamente e demonstra que não gostou, jogando-a suavemente para o chão ao lado, fora do guarda-roupa.

Sem parar, continua procurando e repete esse processo com as demais peças, retirando uma roupa por vez, sempre diretamente do cabide, observando rapidamente e descartando-a no chão. Cada peça é removida individualmente, sem pressa, com movimentos contínuos e totalmente humanos.

À medida que as roupas são retiradas, o espaço dentro do guarda-roupa vai ficando visivelmente vazio de forma progressiva e natural. Os cabides desaparecem apenas junto com suas respectivas roupas, sem duplicação, sem reposição automática e sem reaparecerem durante a cena.

Nenhuma roupa volta para dentro do guarda-roupa depois de retirada. Nenhuma peça surge do nada. Nunca existem roupas duplicadas. As peças restantes apenas balançam levemente quando uma roupa vizinha é retirada.

Após retirar a última peça, o compartimento de roupas fica completamente vazio, restando apenas a estrutura interna do guarda-roupa limpa e organizada.

Ao perceber que não sobrou nenhuma opção, a influenciadora solta um pequeno suspiro de frustração, bate levemente um dos pés no chão de forma espontânea, cruza os braços e faz uma expressão divertida de quem pensa: "não tenho nada para vestir", olhando por um instante para o guarda-roupa vazio.

Ela permanece nessa pose por alguns segundos, realizando apenas pequenos movimentos naturais de respiração e postura.

#### IMPORTANTE:

Plano sequência único.

Nenhum corte.

Nenhum zoom.

Nenhuma troca de cena.

Retirar apenas uma peça por vez.

Cada roupa sai diretamente do cabide correspondente.

Nunca colocar roupas de volta no guarda-roupa.

Nunca duplicar roupas ou cabides.

Nunca deformar mãos, braços, roupas ou guarda-roupa.

As roupas descartadas permanecem fora do guarda-roupa e não reaparecem.

Movimentos lentos, fluidos e 100% humanos.

Aparência UGC ultra-realista em 4K, sem qualquer aspecto de IA.

PROMPT - Use SOMENTE a imagem de referência enviada para definir personagem, roupas, produtos e cenário. Não reutilize elementos de cenas anteriores.

A cena começa completamente vazia. A personagem entra fisicamente de fora do enquadramento, caminhando naturalmente para dentro da cena.

Ela NÃO segura garrafa, copo, bebida ou qualquer objeto adicional. Segura SOMENTE AS DUAS PEÇAS mostradas na imagem de referência: **\*\*o top esportivo e o short esportivo\*\***, uma peça em cada mão.

**\*\*REFERENCE LOCK:\*\*** as duas peças devem permanecer 100% idênticas à referência durante todo o vídeo. Preserve exatamente cores, estampas, tecido, modelagem, proporções, costuras, formato e todos os detalhes. O top deve manter exatamente sua construção original, incluindo **\*\*as duas alças conforme a referência\*\***. Não redesenhar, trocar, modificar, duplicar ou fazer qualquer peça desaparecer.

As roupas devem permanecer nas mãos exatamente da maneira mostrada na imagem inicial, respeitando gravidade e física natural do tecido.

O cenário permanece **\*\*100% idêntico à referência\*\***: mesma cama, paredes, móveis, iluminação, cores, perspectiva, composição e posição da câmera. Não adicionar, remover ou transformar elementos.

Ela entra, caminha até sua posição, para e olha brevemente para a roupa que está vestindo, demonstrando apenas através da expressão corporal que aquela roupa não é adequada para treino. Depois olha para o conjunto esportivo que segura, indicando naturalmente que pretende usá-lo.

**\*\*Ela não fala.\*\***

Em seguida, escolhe **\*\*UMA das mesmas peças que já estava segurando desde o início\*\*** e a lança diretamente em direção à câmera. A peça se aproxima fisicamente da lente, aumenta naturalmente pela perspectiva e **\*\*COBRE 100% DA CÂMERA\*\***, encerrando o take.

Plano-sequência único. Câmera totalmente fixa. Sem cortes, transições, zoom, mudança de ângulo ou cenário.

Não criar objetos extras, bebida, garrafa, mãos extras, personagem duplicada ou roupas adicionais. Não trocar, transformar ou deformar as peças. Nenhum teleporte ou aparição instantânea.

Movimentos rápidos, naturais e espontâneos. Física realista do tecido, anatomia correta, iluminação consistente e aparência autêntica de vídeo UGC gravado em \*\*iPhone 15 Pro Max\*\*, ultra-realista, sem aparência de IA.

PROMPT - A cena acontece em um único plano-sequência contínuo, sem cortes, sem zoom e com a câmera completamente fixa.

ELA DEVE TAMPAR A CAMERA MAIS NUNCA SAIR DO ENQUADRAMENTO OU MUDAR DE ANGULO E NUNCA DEVE MOSTRAR DA COXA PRA BAIXO

O vídeo começa com a influenciadora já extremamente próxima da câmera. Seu corpo já está posicionado diante da lente. A palma da mão cobre completamente a lente, preenchendo 100% da imagem no primeiro frame.

Ela retira lentamente a mão da lente enquanto começa a caminhar suavemente para trás, mantendo contato visual com a câmera e revelando gradualmente todo o ambiente e seu corpo inteiro.

Durante todo o recuo, ela mantém uma postura elegante, confiante e natural, como em um vídeo UGC de moda.

Quando já está completamente enquadrada, ela faz um leve ajuste sensual na blusa usando as duas mãos, alisando delicadamente o tecido junto à cintura e valorizando o caimento da peça.

Em seguida, faz uma pequena pausa, desloca discretamente o peso do corpo entre as pernas e gira lentamente cerca de 45° para um dos lados, exibindo o perfil da roupa de forma elegante.

Ela mantém movimentos suaves de postura, um leve balanço natural do quadril e uma expressão confiante até o final da cena.

O cenário, iluminação, roupa, cabelo, botas, acessórios e enquadramento permanecem exatamente iguais à imagem de referência durante todo o vídeo.

**IMPORTANTE:**

- A influenciadora já começa colada na câmera.
- A mão cobre completamente a lente no primeiro frame.
- Não existe aproximação inicial; ela já está diante da câmera.
- Ela apenas afasta a mão e caminha lentamente para trás.
- A câmera nunca se move.
- Nenhum corte.
- Nenhum zoom.
- Nenhuma troca de cenário.
- O corpo inteiro deve ficar visível após ela recuar.
- Ajustar delicadamente a blusa com as duas mãos.
- Girar suavemente cerca de 45° para mostrar a lateral do look.
- Movimentos contínuos, elegantes, naturais e 100% humanos.
- Aparência UGC ultra-realista em 4K.

PROMPT GROK - A cena acontece em um único plano-sequência contínuo, sem cortes, sem zoom e com a câmera completamente fixa.

ELA DEVE TAMPAR A CAMERA MAIS NUNCA SAIR DO ENQUADRAMENTO OU MUDAR DE ANGULO E NUNCA DEVE MOSTRAR DA COXA PRA BAIXO

O vídeo começa com a influenciadora já extremamente próxima da câmera. Seu corpo já está posicionado diante da lente. A palma da mão cobre completamente a lente, preenchendo 100% da imagem no primeiro frame.

Ela retira lentamente a mão da lente enquanto começa a caminhar suavemente para trás, mantendo contato visual com a câmera e revelando gradualmente todo o ambiente e seu corpo inteiro.

Durante todo o recuo, ela mantém uma postura elegante, confiante e natural, como em um vídeo UGC de moda.

Quando já está completamente enquadrada, ela faz um leve ajuste sensual na blusa usando as duas mãos, alisando delicadamente o tecido junto à cintura e valorizando o caimento da peça.

Em seguida, faz uma pequena pausa, desloca discretamente o peso do corpo entre as pernas e gira lentamente cerca de 45° para um dos lados, exibindo o perfil da roupa de forma elegante.

Ela mantém movimentos suaves de postura, um leve balanço natural do quadril e uma expressão confiante até o final da cena.

O cenário, iluminação, roupa, cabelo, botas, acessórios e enquadramento permanecem exatamente iguais à imagem de referência durante todo o vídeo.

IMPORTANTE:

- A influenciadora já começa colada na câmera.
- A mão cobre completamente a lente no primeiro frame.
- Não existe aproximação inicial; ela já está diante da câmera.
- Ela apenas afasta a mão e caminha lentamente para trás.
- A câmera nunca se move.
- Nenhum corte.
- Nenhum zoom.
- Nenhuma troca de cenário.
- O corpo inteiro deve ficar visível após ela recuar.
- Ajustar delicadamente a blusa com as duas mãos.
- Girar suavemente cerca de 45° para mostrar a lateral do look.

PROMPT - Use the provided reference image as the exact starting frame.

Create an ultra-realistic vertical 9:16 UGC-style video.

### CAMERA:

The camera remains completely FIXED and stationary throughout the entire video. No zoom, no pan, no tilt, no cuts, no transitions, and no camera movement.

### MOVEMENT:

The woman looks directly at the camera with a cheerful, natural smile.

First, she quickly raises BOTH hands in front of the center of her chest and forms a clear, symmetrical HEART SHAPE using both hands. The tips of her index fingers meet at the top center while both thumbs meet at the bottom point, creating one complete and clearly recognizable heart shape. She briefly holds the heart pose while smiling.

Then she smoothly releases the heart gesture.

Immediately afterward, she brings ONE hand naturally toward her lips and blows a playful kiss directly toward the camera. Her hand moves outward from her mouth as she sends the kiss, with a happy and energetic facial expression.

Right after blowing the kiss, she lowers her hand and points clearly DOWNWARD with her index finger, toward the bottom center of the frame, as if pointing at a product button or shopping cart below the video.

She finishes smiling at the camera while continuing to point downward for a brief moment.

### MOVEMENT STYLE:

Fast, energetic and playful TikTok-style movements.  
Natural body bounce and subtle shoulder movement.  
Smooth transitions between each gesture.

No robotic pauses.  
Natural hair movement.  
Natural facial expressions.

**IMPORTANT:**

The sequence must be exactly:

1. BOTH HANDS create one complete heart ❤️
2. Release the heart
3. Blow ONE kiss toward the camera 😘
4. Point clearly DOWN with the index finger 📵

Keep anatomically correct hands and fingers at all times.  
Exactly two hands.  
Five fingers on each hand.  
No extra fingers.  
No fused fingers.  
No distorted hands.  
Do not confuse the two-hand heart with the Korean finger-heart gesture.  
No talking.  
No lip-sync.  
No audio.  
No text.  
No cuts or transitions.

PROMPT Use the provided reference image as the exact starting frame.

Create an ultra-realistic vertical 9:16 UGC-style video.

CAMERA:

Completely FIXED and stationary for the entire video.

No camera movement, no zoom, no pan, no tilt, no cuts, no transitions, no angle changes.

MOVEMENT SEQUENCE:

The woman starts standing naturally facing directly toward the camera, with both hands empty and relaxed beside her body.

She quickly and naturally leans her upper body forward toward the camera, bending at the waist and bringing her face noticeably closer to the lens.

As she leans forward, she subtly pushes her hips backward, creating a playful, natural TikTok-style pose.

She slightly tilts her head upward and to the side while maintaining direct eye contact with the camera.

She raises ONE hand close to her cheek and makes a small Korean finger-heart gesture using her thumb and index finger.

She briefly holds this close-up playful pose.

THEN:

She lowers her hand and smoothly straightens her torso, returning naturally to her original upright standing position.

Immediately after returning upright, she uses BOTH hands to gently run her palms down the OUTER SIDES of her shirt, starting around the waist/rib area and sliding downward along the side seams.

She lightly smooths and adjusts the shirt fabric against her body, clearly showing the fit and material.

The gesture should look natural and casual, like someone presenting how a shirt fits.

She does NOT pull the front of the shirt and does NOT touch her chest. Her hands stay on the lateral/side areas of the garment.

After smoothing the shirt, she relaxes both arms naturally beside her body and gives the camera a subtle confident smile.

IMPORTANT:

NO PHONE.

NO CELL PHONE.

NO OBJECTS IN HER HANDS.

She must LEAN toward the camera, not walk toward it.

After the finger-heart gesture, she must physically RETURN to her original upright position before demonstrating the shirt.

Preserve exactly the same identity, face, hairstyle, body proportions, clothing and environment from the reference image.

Natural realistic body physics.

Natural hair movement.

Natural hand and finger anatomy.

Quick, fluid and spontaneous TikTok UGC movement.

NO talking.

NO lip-sync.

NO music.

NO cuts.

NO transitions.

NO camera movement.

NO zoom.

NO scene changes.

PROMPT - ``txt

Ultra-realistic vertical smartphone video, 9:16 aspect ratio, authentic smartphone fashion influencer UGC, natural handheld camera. A female influencer quickly and naturally approaches the camera with light, confident steps, warm direct eye contact, and a sweet, angelic, friendly expression. As soon as she reaches the lens, she smoothly leans her upper body forward and brings her face closer to the camera in one agile, fluid movement. She immediately raises one hand in a natural cupped shape beside her mouth, as if sharing a private secret directly with the viewer.

Without pausing or performing any slow movement, she softly whispers in Brazilian Portuguese, in a low, intimate, playful, and conspiratorial tone susurrando: "[ESCREVA AQUI A FALA DA SUA INFLUENCER EX: Deixa eu te mostrar meu look queridinho. Vem comigo]"

Her whisper is natural and clearly synchronized with her lips, with delicate mouth movement and realistic facial micro-expressions. She maintains captivating eye contact while speaking, with a subtle closed-mouth smile before and after the phrase. The entire action is quick, spontaneous, charming, physically human, and smooth, like an authentic influencer hook recorded on a smartphone. Natural breathing, realistic forward body lean, smooth weight transfer, accurate hand articulation, gentle hair movement, subtle fabric physics, cinematic daylight, premium fashion influencer aesthetic, ultra-realistic human motion, seamless movement, authentic Brazilian UGC performance.

Only one soft Brazilian Portuguese whisper. No loud voice, no additional dialogue, no repeated phrase, no slow approach, no long pause, no exaggerated lip movement, no broad smile, no teeth showing, no laughing, no overacting, no dramatic gestures, no robotic movement, no stiff posture.

The entire action is quick, spontaneous, charming, physically human, and smooth, like an authentic influencer hook recorded on a smartphone. Natural breathing, realistic forward body lean, smooth weight transfer, accurate hand articulation, gentle hair movement, subtle fabric physics, cinematic daylight, premium fashion influencer aesthetic, ultra-realistic human motion, seamless movement, authentic Brazilian UGC performance.

Only one soft Brazilian Portuguese whisper. No loud voice, no additional dialogue, no repeated phrase, no slow approach, no long pause, no exaggerated lip movement, no broad smile, no teeth showing, no laughing, no overacting, no dramatic gestures, no robotic movement, no stiff posture.

MOVEMENT SEQUENCE:

0.0s – 1.0s

The model instantly sprints toward the camera from approximately 2 meters away while maintaining confident eye contact. She immediately begins throwing a rapid flurry of alternating punches using both hands (left, right, left, right...) in quick succession.

1.0s – 2.6s

As she gets dramatically closer to the camera, the punching speed increases continuously. The punches become almost nonstop, alternating between both hands, each one extending closer to the lens than the previous, creating a strong sense of speed, impact, and depth.

2.6s – 3.0s

She launches one final, decisive punch directly into the lens. The closed fist fills 100% of the frame, completely blocking the camera until the image becomes entirely black, creating a perfect transition to the next clip.

PROMPT - Highly detailed photo, realistic lighting, 8K resolution, shot on a 35mm lens.

Ultra-photorealistic vertical video (9:16).

Authentic TikTok UGC style.

Single continuous take.

No cuts.

No transitions.

No zoom.

No speech.

Camera fixed on a tripod.

Warm, soft natural lighting.

---

## OPENING SCENE

The video begins with the elevator doors completely closed.

The model is completely hidden behind the closed elevator doors and is NOT visible.

Only the closed stainless steel elevator doors are visible.

After a brief pause, the elevator doors smoothly slide open.

As the doors open, the model is gradually revealed standing naturally inside the elevator, already wearing the exact outfit shown in the reference image.

She is centered inside the elevator, looking directly at the camera with a calm, neutral expression.

She remains still until the elevator doors are fully open.

---

## MOVEMENT

Once the elevator doors are fully open, she slowly raises both hands to the top of her head and gently brushes her hair backward in one continuous motion, naturally revealing the shirt she is wearing.

She gives a warm, spontaneous smile with subtle, realistic facial micro-expressions.

She slowly runs one hand across the front of the shirt, starting at the upper chest and gliding naturally down toward the waist, gently feeling the fabric to demonstrate its softness and quality.

She then lightly grabs one side of the shirt using only her fingertips and gently stretches it outward to demonstrate the fit and drape.

The fabric reacts with realistic folds, gravity and natural cloth physics.

She performs a few subtle showcase movements:

- gentle hip sway
- one small step forward
- one small step backward
- relaxed, natural body movement like a real TikTok creator presenting clothing

She then rotates her body approximately 45 degrees to naturally show the side profile of the shirt.

She looks back toward the camera while smiling.

---

ENDING

She slowly walks toward the camera with natural confidence.

As she approaches, the framing gradually changes from full body to waist-up and finally to a close upper-body shot.

She maintains eye contact and a friendly smile.

Once she is close to the camera, she points downward several times using both index fingers with a cheerful, inviting expression, clearly indicating the area below the frame.

She holds the final pointing pose while smiling until the video ends.

---

## REALISM

Ultra-realistic human movement.

Natural breathing.

Natural blinking.

Realistic hair physics.

Physically accurate cloth simulation.

Natural body mechanics.

Perfect finger anatomy.

Realistic elevator door movement.

Natural facial expressions.

No robotic motion.

No exaggerated gestures.

---

## IMPORTANT

The model must NEVER appear before the elevator doors begin opening.

She must already be standing inside the elevator before the doors open.

The reveal happens naturally as the elevator doors slide open.

The elevator, clothing, lighting and identity must remain perfectly consistent throughout the entire video.

## MOVEMENT

0.0–1.8s

The model starts naturally holding the hat in one hand beside her body.  
She smoothly lifts the hat and places it onto her head using one natural motion.  
She lightly adjusts the brim for a comfortable fit.  
Hair reacts naturally with realistic physics.  
The hat maintains its exact shape and proportions throughout.

1.8–4.3s

Immediately after placing the hat on her head, she performs one smooth, continuous 360-degree turn at a relaxed pace.  
The rotation is perfectly balanced and physically realistic.  
Her hair, clothing and hat move naturally according to momentum and gravity.  
She finishes facing the camera again.

4.3–6.2s

Without stopping, she confidently walks toward the camera.  
She approaches until the framing naturally changes from full body to approximately waist-up.  
Her eye contact remains directed toward the camera.

6.2–8.0s

She stops naturally.  
Places one hand on her waist.  
Gives a natural wink.  
Smiles warmly.  
With the other hand, she points downward below the frame as a clear call-to-action.  
She holds the final pose until the video ends.

## MOVEMENT

0.0–1.8s

The model starts naturally holding the hat in one hand beside her body.  
She smoothly lifts the hat and places it onto her head using one natural motion.  
She lightly adjusts the brim for a comfortable fit.  
Hair reacts naturally with realistic physics.  
The hat maintains its exact shape and proportions throughout.

1.8–4.3s

Immediately after placing the hat on her head, she performs one smooth, continuous 360-degree turn at a relaxed pace.

The rotation is perfectly balanced and physically realistic.  
Her hair, clothing and hat move naturally according to momentum and gravity.  
She finishes facing the camera again.

4.3–6.2s

Without stopping, she confidently walks toward the camera.  
She approaches until the framing naturally changes from full body to approximately waist-up.  
Her eye contact remains directed toward the camera.

6.2–8.0s

She stops naturally.  
Places one hand on her waist.  
Gives a natural wink.  
Smiles warmly.  
With the other hand, she points downward below the frame as a clear call-to-action.  
She holds the final pose until the video ends.

## REALISM

Natural body mechanics.  
Realistic weight shifting.  
Natural arm movement.  
Correct balance.  
Natural blinking.  
Subtle breathing.  
Natural facial expressions.  
Realistic hair simulation.  
Realistic cloth simulation.  
Realistic hat physics.  
Perfect finger anatomy.  
Natural eye movement.

---

## IMPORTANT

The hat must remain exactly the same object from start to finish.  
Do not replace, redesign or morph the hat.  
Do not change the outfit.  
Do not change the hairstyle.  
Do not change the body proportions.  
Do not change the face.  
Do not change the background.  
Keep all accessories identical.

No camera jumps.  
No teleportation.  
No duplicated limbs.  
No deformed hands.  
No finger glitches.  
No floating hat.  
No hat morphing.  
No clipping through the hair.  
No body distortion.  
No face distortion.  
No identity changes.  
No outfit changes.  
No background changes.  
No unrealistic physics.  
No exaggerated movements.  
No fast spinning.  
No motion blur artifacts.  
No AI artifacts.

## FINAL RESULT

An ultra-realistic, single continuous smartphone video where the model naturally places any hat onto her head, performs a smooth 360° turn, walks closer until framed from the waist up, places one hand on her waist, winks, smiles, and points downward—all with flawless realism, natural body mechanics, and consistent identity, outfit, and environment.

## PERFORMANCE

One continuous natural performance.

Elegant fashion presentation mixed with an authentic viral reaction.

Movements must feel spontaneous, human, and emotional.

No robotic animation.

No sudden transitions.

---

0.0–1.2s

The person is already facing the camera.

She suddenly notices something amazing.

Create an intense surprised reaction:

Eyes open wide naturally.

Eyebrows raise slightly.

Mouth opens in genuine shock and amazement.

Expression should look like she just saw something incredible.

Both hands quickly but naturally move toward her mouth.

Realistic breathing.

Natural shoulder reaction.

The emotion should feel authentic and spontaneous.

---

1.2–2.5s

Still reacting with hands near the face,

she slowly takes a few small steps backward.

The movement reveals the full body.

Maintain the shocked expression.

Natural balance.

Realistic walking.

Clothing moves naturally according to the body movement.

---

2.5–4.0s

She slowly lowers her hands.

The shocked expression transforms into a big genuine smile.

She begins a smooth fashion presentation movement.

She slowly turns approximately 90 degrees to one side.

Show the outfit from the side naturally.

Body, shoulders, hips, feet and head rotate together smoothly.

Hair and clothing follow realistic physics.

---

4.0–5.8s

Without stopping,

she continues the movement naturally toward the opposite side.

The motion should look like a professional fashion showcase.

Smooth side presentation.

Elegant posture.

Natural weight shifting.

No robotic turning.

No instant rotation.

---

5.8–6.8s

She smoothly returns facing the camera.

While turning,

she naturally adjusts her hair or lightly touches the outfit.

Soft eye contact.

Confident smile.

Relaxed posture.

Natural breathing.

---

6.8–8.0s

She places one hand naturally on her waist.

Makes a subtle confident pose.

Takes one small step closer to the camera.

Maintains eye contact.

Raises one index finger.

Points naturally toward the bottom center of the screen.

Hold the pointing gesture until the end.

PROMPT FLOW - Vertical 9:16 smartphone video featuring a full-body showcase of the product. The camera remains almost fixed with subtle natural handheld micro movements, maintaining the same composition throughout.

0.0–1.2s: The person faces the camera, suddenly noticing something amazing, displaying an intense surprised reaction with wide eyes, raised eyebrows, and an open mouth. Both hands move toward her mouth naturally, with realistic breathing and shoulder reactions.

1.2–2.5s: Still reacting, she takes small steps backward, revealing her full body while maintaining the shocked expression and natural balance.

2.5–4.0s: She lowers her hands, transforming her shocked expression into a big genuine smile, and begins a smooth fashion presentation by turning approximately 90 degrees to one side, showcasing the product naturally.

4.0–5.8s: Continuing the motion, she turns toward the opposite side in a professional fashion showcase style, maintaining elegant posture and natural weight shifting.

5.8–6.8s: She smoothly returns to face the camera, adjusting her hair or lightly touching the product, maintaining soft eye contact and a confident smile.

6.8–8.0s: Placing one hand on her waist, she makes a subtle confident pose, steps closer to the camera, maintains eye contact, and raises one index finger to point toward the bottom center of the screen, holding the gesture until the end.

The video features ultra-realistic human movement, natural posture, and realistic hair and clothing physics, ensuring the product remains unchanged and the final result looks like a real person recording a premium fashion showcase video.

CAMERA

Vertical 9:16.

Handheld smartphone.

The camera remains almost stationary throughout the video.

Only subtle natural handheld micro-movements.

No zoom.

No dolly.

No camera rotation.

No camera shake.

No reframing.

No focus hunting.

The framing should remain identical from beginning to end.

---

## MOVEMENT

Everything happens as one continuous natural performance.

No sudden acceleration.

Every transition must blend naturally into the next movement.

Never stop completely between poses.

Keep gentle body motion during the entire clip.

0.0–1.0s

She is already facing the camera.

She notices something.

Eyes open slightly.

Mouth opens naturally in surprise.

Both hands rise smoothly to cover her mouth.

Natural shoulder movement.

Natural breathing.

---

1.0–2.2s

While her hands still cover her mouth,  
she slowly takes two small backward steps.

The movement is relaxed.

She naturally ends with her full body visible.

Her weight shifts realistically while walking.

Dress moves naturally.

---

2.2–3.6s

She slowly lowers both hands.

A genuine smile appears.

Without stopping,  
she smoothly rotates about 90 degrees to her left.

No abrupt rotation.

Her hips,  
torso,  
shoulders,  
head,  
and feet rotate progressively in one fluid motion.

Hair follows naturally.

Dress fabric reacts to the body movement.

She briefly presents the side profile.

---

3.6–5.2s

Without pausing,  
she continues rotating naturally in the opposite direction.

Instead of stopping at the front,  
she flows through center and rotates about 90 degrees toward the opposite side.

The movement should resemble a fashion model gently presenting both sides of the dress.

No robotic movement.

No snapping.

No instant turns.

Everything is continuous and elegant.

---

5.2–6.6s

She smoothly rotates back to face the camera.

During the rotation,

she naturally lifts one hand and gently brushes her hair behind her ear.

Maintain soft eye contact.

Natural smile.

Relaxed posture.

Subtle breathing.

Small natural weight shifts.

---

6.6–7.3s

She places one hand lightly on her waist.

The other hand relaxes naturally.

She slightly shifts one hip.

Dress settles naturally.

Hair continues moving softly from the previous turn.

---

7.3–8.0s

She takes one small relaxed step toward the camera.

Maintains eye contact.

Warm smile.

Raises her index finger.

Points naturally toward the bottom center of the screen.

Hold the pointing gesture until the video ends.

---

BODY PHYSICS

Natural posture.

Natural balance.

Realistic center of gravity.

Realistic foot placement.

Natural hip movement.

Natural shoulder movement.

Natural neck movement.

Natural head stabilization.

Natural breathing throughout.

Realistic blinking.

No frozen poses.

No robotic motion.

---

## HAIR PHYSICS

Hair follows inertia naturally.

Soft secondary motion.

No clipping.

No sudden changes.

---

## CLOTH PHYSICS

Realistic fabric simulation.

Dress reacts naturally to every body movement.

Natural folds.

Natural stretching.

Natural gravity.

No clipping.

## QUALITY

Ultra photorealistic.

Fashion commercial quality.

Accurate anatomy.

Correct fingers.

Correct hands.

Correct legs.

No body deformation.

No extra limbs.

No AI artifacts.

Natural cinematic lighting.

8K.

Extremely realistic.

PROMPT - START OF ANIMATION

The animation begins exactly from the reference image.

The model naturally holds all remaining garment color variations in both hands exactly like a real fashion influencer presenting multiple color options.

Every garment hangs freely under its own weight with realistic draping, natural folds, authentic gravity and realistic fabric movement.

The camera remains completely stationary throughout the entire animation.

She smiles brightly with a happy, energetic and playful expression while looking directly into the camera.

She briefly presents the garments, subtly lifting them so every color variation is clearly visible.

She then chooses the garments with both hands, slightly pulling them back as if preparing for a playful toss.

Without hesitation, she suddenly throws every garment directly toward the camera in one fast, energetic and confident motion.

The movement is natural, fluid and powerful, exactly like a TikTok fashion creator making a transition.

Her upper body naturally follows the throw.

Her shoulders rotate forward.

Both arms extend completely with realistic momentum.

Her wrists naturally release every garment simultaneously.

Every garment leaves her hands at the exact same instant.

Each garment travels independently toward the camera with realistic inertia, gravity and authentic fabric physics.

The sleeves, hood, cuffs and body of each garment flutter naturally while flying through the air.

The garments rapidly become larger as they approach the lens.

Within a fraction of a second, the garments hit the camera lens directly.

The garments completely fill and cover the entire frame.

The screen becomes fully covered by the garments, creating a perfect seamless transition.

The transition happens naturally with no visible cuts.

The camera remains perfectly stationary.

No camera shake.

No cuts.

No jumps.

No slow motion.

No pose regeneration.

No body regeneration.

No face regeneration.

No garment regeneration.

Maintain the exact facial identity throughout.

Maintain perfect temporal consistency.

Maintain realistic human biomechanics.

Maintain authentic fabric physics.

#### AUDIO & SPEECH LOCK

The model remains completely silent throughout the animation.

No speaking.

No dialogue.

No narration.

No lip-sync.

No singing.

No whispering.

No voice-over.

No subtitles.

No captions.

No text overlays.

Only natural breathing, subtle ambient room sounds and realistic fabric movement.

The entire sequence must look exactly like one uninterrupted real iPhone fashion influencer recording, ending with the garments completely covering the camera lens for a seamless transition.

PROMPT - Use the uploaded image as the only identity reference.

The model remains completely silent throughout the entire video.

Sequence:

- She naturally raises the smartphone and looks directly at its screen.
- She gently points at the phone with her index finger.
- She gives a very subtle, natural smile while keeping her mouth completely closed.
- Without changing her grip, she slowly brings the smartphone toward the camera lens.
- The phone gradually fills more and more of the frame until it completely covers the camera, ending the video with the phone itself blocking the entire view.
- The phone must never disappear, teleport, or leave her hand. It remains visible and continuously held from the beginning until it fully covers the lens.

Camera:

- Vertical 9:16
- Static smartphone camera

- No zoom
- No cuts
- No transitions
- Natural lighting
- One continuous shot

#### Movement:

- Natural blinking
- Subtle breathing
- Small, realistic head movements
- Smooth, natural arm and hand movements
- Realistic body posture
- No exaggerated gestures

#### Silence:

- The model does not speak at any point.
- No sound.
- No voice.
- No dialogue.
- No lip-sync.
- No mouth movement whatsoever.

**IMPORTANT INSTRUCTION: DO NOT LIP-SYNC.**

Keep the model's mouth completely closed for the entire duration of the video.

#### Absolutely NO:

- speech
- lip movement
- jaw movement
- mouth opening
- talking animation
- pronunciation animation
- phoneme animation
- tongue movement
- teeth visibility
- vocalization
- whispering
- mouthing words
- singing
- smiling with an open mouth

The smile must be extremely subtle and achieved only with the eyes and cheeks while the lips remain fully closed at all times.

The mouth must remain perfectly still from the first frame to the last.

The avatar is completely silent for the entire video.

The phone must remain in her hand during the entire shot and naturally move toward the camera until it completely covers the lens. Do not remove, replace, resize, morph, or make the phone disappear at any point.

PROMPT - \*\*Ultra-realistic 4K vertical video (9:16). A woman stands in front of an open wardrobe, naturally presenting the outfit displayed inside. She points to and briefly showcases the clothing while keeping it exactly as shown in the original image. She then reaches one hand directly toward the camera lens, completely covering it to create a seamless transition. When she removes her hand, she is now wearing the exact same outfit that was hanging in the wardrobe. The clothing must remain 100% identical to the reference image—do not change the color, fabric, pattern, fit, proportions, stitching, sleeves, collar, length, or any design details. The phone is never visible, only the natural hand-cover transition. After the reveal, she confidently presents the outfit with subtle body movements and a natural smile. Soft natural lighting, realistic fabric physics, smooth cinematic motion, authentic UGC style, no text on screen, no audio. Duration: 8 seconds.\*\*

PROMPT - Ultra-realistic 4K vertical fashion video, 9:16, exactly 6 seconds.

The video starts with the model's hand covering 100% of the camera lens. No gaps between fingers. No background visible. The palm completely blocks the entire frame as if physically touching the smartphone camera.

At the start of the video, the model slowly removes her hand from the lens in one smooth natural motion, revealing herself. She gives a warm, confident smile while taking two small relaxed steps backward to fully show the outfit.

As she moves back, one hand naturally settles on her waist. She slightly shifts her hip, subtly adjusts her posture, and holds a confident feminine pose to highlight the clothing.

Natural body micro-movements, realistic breathing, soft hair movement, natural fabric physics, authentic skin texture, and perfect hand anatomy.

Camera remains fixed at chest height with subtle smartphone realism only.

No talking. No text. No transitions. No zoom. No camera shake. No exaggerated influencer posing. No robotic motion.

Final second: model standing comfortably with one hand on the waist, outfit fully visible, soft smile directly at the camera.

PROMPT - START OF ANIMATION:

The subject starts standing naturally at a comfortable distance from the camera.

Immediately, she begins walking slowly toward the camera with two natural steps. Her gaze remains focused on the lens with a soft, natural smile.

As she approaches, one hand gradually lifts toward the camera in a completely natural motion. The arm extends realistically with accurate shoulder, elbow, wrist, and finger movement.

The hand continues moving closer and closer to the lens with perfect depth perception until it fills the entire frame.

#### IMPORTANT:

- \* The hand MUST physically travel from the subject's body position all the way to the camera lens.
- \* The movement must be continuous and realistic.
- \* No jump cuts.
- \* No instant appearance of the hand.
- \* No teleporting motion.
- \* Fingers naturally expand as they approach the lens.
- \* Realistic perspective distortion as the hand gets closer.
- \* Natural skin texture visible.
- \* Accurate finger anatomy.
- \* Realistic motion blur only from natural movement.
- \* The lens is gradually covered by the palm and fingers until the screen becomes fully blocked.

Once the lens is completely covered, the hand remains over the camera for approximately 1 second.

After the brief cover, the hand slowly moves away from the lens while the subject naturally steps backward to her original position.

As she moves back:

- \* One hand naturally settles on the waist.
- \* Subtle hip shift.
- \* Relaxed shoulders.
- \* Natural breathing movement.

#### FINAL POSE:

The subject stands comfortably with one hand on the waist, softly shifts her weight onto one leg, gives a warm natural smile, and maintains realistic body micro-movements.

#### VISUAL QUALITY:

Ultra-photorealistic 4K.  
Natural skin pores.  
Realistic hair physics.  
True-to-life fabric movement.  
Cinematic smartphone realism.

Accurate lighting and shadows.  
Preserve original identity.  
No beauty filter.  
No AI smoothing.  
No stylization.

#### CAMERA:

Static smartphone camera.  
Very subtle handheld micro-movements.  
No zoom.  
No camera shake.  
Chest-height framing.

#### RESTRICTIONS:

No talking.  
No text.  
No UI elements.  
No visual effects.  
No exaggerated influencer posing.  
No robotic movement.

#### FINAL RESULT:

An ultra-realistic 4K fashion video where the subject naturally walks toward the camera, reaches her hand all the way to the lens, completely covers it in a physically realistic way for one second, then reveals herself again by moving the hand away and stepping back into a relaxed natural pose.

PROMPT -= Animate the subject as a REAL person presenting clothing in a POV-style fashion video.

---

#### 🔥 START OF ANIMATION (HOOK TRANSITION VERSION):

- The subject starts standing naturally at a comfortable distance from the camera
- She is already holding the clothing/product naturally with both hands in front of the body
- Neutral relaxed posture
- Soft natural facial expression
- She calmly takes two small natural steps forward toward the camera
- While approaching, the clothing naturally moves together with her body
- Arms remain relaxed and realistic
- Natural fabric movement and gravity behavior

## 🔥 MAIN HOOK ACTION (CRITICAL):

- As she gets closer to the camera:
  - she smoothly raises the clothing/product forward toward the lens
  - the clothing gradually occupies more of the frame
  - movement feels natural and continuous
  - no aggressive motion
  - no throwing action
- The clothing must FULLY cover the camera lens naturally
- The transition happens by the clothing physically reaching the camera
- The fabric fills the entire frame progressively

### IMPORTANT:

- The subject does NOT toss the clothing
- The subject does NOT shake the clothing aggressively
- The movement is smooth, controlled and realistic
- The clothing behaves with natural fabric physics while moving forward
- During the forward movement:
  - a subtle soft smile appears briefly
  - expression remains sympathetic and natural
  - slight cheek movement only
  - no exaggerated grin
- Once the clothing fully covers the camera:
  - hold coverage briefly for a natural transition feeling
  - smooth realistic fabric motion
  - no hard cut feeling

---

### GENERAL MOTION STYLE:

- Natural, confident, fluid movements
- Real human timing
- No robotic timing
- No exaggerated posing
- No influencer cliché behavior
- Casual spontaneous motion

---

### BODY MOVEMENTS:

- Relaxed shoulders
- Subtle natural hip movement
- Slight natural body sway while walking
- Arms move naturally with the product weight
- Natural balance and posture

---

### PRODUCT/FABRIC REALISM:

- Realistic fabric weight
- Natural hanging behavior
- Subtle wrinkles and folds
- Slight fabric compression from fingers
- Natural gravity pull
- No stiff fabric
- No floating product

- No stretched “hanger” behavior

As the clothing approaches the lens:

- fabric naturally bends and shifts
  - slight perspective distortion is allowed naturally
  - realistic cloth motion near the camera
- 

#### FACIAL EXPRESSION:

- No frozen smile
  - Expression changes naturally
  - Mostly neutral relaxed expression
  - Brief warm smile only during the approach
  - Smile fades naturally afterward
- 

#### CAMERA & POV:

- POV-style camera
  - Very subtle handheld micro movement
  - No zoom
  - No camera shake
  - Camera remains fixed in position
  - Real smartphone recording feeling
- 

#### TIMING:

- Smooth continuous motion
  - No looping
  - No freezing
  - No sudden acceleration
  - Natural pacing
- 

#### REALISM RULES:

- Preserve original identity
  - Preserve facial structure
  - Preserve skin texture
  - Preserve realistic hair motion
  - Preserve clothing realism
  - No beauty filters
  - No smoothing
  - No CGI look
  - No stylization
- 

#### RESTRICTIONS:

- No talking
  - No text
  - No UI
  - No effects
  - No transitions added digitally
  - Transition must happen ONLY through the clothing covering the lens
- 

#### FINAL RESULT:

A hyper-realistic POV-style fashion video where the subject naturally walks toward the camera holding a clothing product, then smoothly brings the fabric directly into the lens until it fully covers the frame, creating a realistic organic transition identical to a real influencer clothing hook video filmed on a smartphone.

PROMPT- START OF ANIMATION: The subject starts standing naturally at a comfortable distance from the camera. She calmly takes two small natural steps forward toward the camera with relaxed posture, soft feminine body sway and realistic timing. While approaching: she lightly touches or adjusts a visible clothing detail naturally and casually. The movement must feel spontaneous and realistic. No exaggerated posing. No runway behavior. No robotic timing. As she gets closer to the camera: the subject softly smiles and naturally raises one hand toward the lens. The hand slowly moves closer until it softly covers the entire camera view for a smooth transition effect. IMPORTANT: – The hand movement must feel calm and natural – No aggressive motion – No fast movement – No hard impact on the lens – Smooth realistic pacing only After covering the camera briefly: the subject naturally steps backward again to a comfortable distance with relaxed body flow. As she returns backward: one hand gradually moves to the waist naturally. At the final position: the subject slightly shifts her hip, softly lifts one leg forward in a feminine relaxed pose, keeps one hand on the waist, and gives a warm natural smile. GENERAL MOTION: Natural fluid movement. Continuous body micro-adjustments. Relaxed shoulders. Gentle hip sway. Real human timing. No stiff motion. FACIAL EXPRESSION: Soft neutral expression most of the time. Subtle natural smiles. No frozen smile. No exaggerated facial tension. BODY LANGUAGE: Natural posture. Soft feminine energy. No dancing. No exaggerated influencer posing. CAMERA: Stable casual phone-style recording. Very subtle handheld micro-movement only. No zoom. No camera shake. Chest-height framing. REALISM: Preserve original identity. Natural skin texture. Natural hair movement. Natural fabric physics. No beauty filters. No smoothing. No stylization. RESTRICTIONS: No talking. No text. No UI. No effects. No exaggerated movement. No robotic motion. FINAL RESULT: A hyper-realistic casual fashion transition video where the subject naturally walks toward the camera, softly covers the lens with one hand for a transition, then steps back into a relaxed feminine final pose

PROMPT - Create a single continuous ultra-realistic vertical 9:16 fashion video.

Use ONLY the uploaded reference image to preserve the exact facial identity, hairstyle, skin tone, body proportions, tattoos, accessories and overall appearance of the AI influencer.

Do NOT change her identity.

Do NOT change the environment.

Only change the outfit when new clothing references are provided in future generations.

---

## SCENE

She starts naturally walking down the same indoor staircase with beige ceramic steps, white textured walls and black metal handrails.

The environment remains identical in every generation.

She walks down the stairs confidently like a fashion model.

Natural posture.

Relaxed shoulders.

Confident expression.

Small natural hip movement.

No exaggerated catwalk.

---

## MOVEMENT

She begins approximately 6–7 steps above the camera.

She slowly descends the stairs with smooth, realistic pacing.

As she reaches the last step, she stops naturally.

She plants both feet firmly on the floor.

Then she performs a confident power pose inspired by Cristiano Ronaldo's iconic celebration stance (before the jump):

- feet shoulder-width apart
- chest open
- shoulders back
- arms relaxed slightly away from the body
- chin slightly raised
- confident facial expression

No jump.

No yelling.  
No celebration.

Just the powerful standing pose.

She holds the pose for about 2 seconds while looking slightly toward the camera.

Natural blinking.  
Natural breathing.  
Tiny hair movement.  
Subtle clothing physics.

---

## CAMERA

Vertical 9:16

Real smartphone camera

Camera remains fixed at the bottom of the staircase.

No zoom.  
No cuts.  
No transitions.  
No camera movement.  
No cinematic effects.

Only subtle handheld micro vibration.

---

## LIGHTING

Soft natural indoor lighting.

Realistic shadows.

Natural exposure.

---

## REALISM

Extremely realistic human motion.

Correct body mechanics.

Natural foot placement on every stair.

Realistic weight shifting.

No sliding.

No floating.

No foot clipping.

Perfect stair interaction.

Accurate clothing physics.

Natural skin texture.

Visible pores.

Fine hair strands.

Realistic facial micro-expressions.

---

## IMPORTANT

This prompt is intended to be reused with different outfits.

Keep EVERYTHING identical between generations:

- same staircase
- same camera angle
- same framing
- same walking speed
- same final pose
- same facial identity
- same body proportions
- same tattoos
- same lighting

The ONLY variable between future generations should be the outfit.

PROMPT - Use the original reference image as the exact identity reference. Preserve the exact same face, hairstyle, skin tone, body proportions, clothing, lighting and background. The video must look like a real TikTok UGC recorded naturally with a smartphone. Vertical

9:16. No cinematic effects. No slow motion. Real human speed. Natural body movement only.

## SCENE

0.0–1.2s

She looks down at the shirt she is wearing with a slightly disappointed expression, as if she doesn't like it. She points at the shirt using her index finger while gently shaking her head left and right, clearly signaling "no". The expression should feel natural, not exaggerated. Maintain eye movement between the shirt and the camera.

1.2–2.2s

Without cutting, she immediately walks one natural step toward the camera. While approaching, she raises one hand toward the lens with a confident expression. The movement is smooth and at normal human speed.

2.2–2.8s

Her palm completely covers the camera lens for a brief moment, filling the entire frame naturally. The hand touches the lens realistically, as if she is intentionally covering the camera.

2.8–3.8s

She slowly removes her hand from the lens while stepping back to her original position. She is now looking confidently at the camera with a subtle smile, ready for the transition to the next outfit or scene.

### Requirements:

- Normal human speed.
- No slow motion.
- No robotic movements.
- Natural facial expressions.
- Natural blinking.
- Realistic breathing.
- Subtle body weight shifts.
- One continuous shot.
- No cuts.
- No morphing.
- No camera shake beyond natural handheld micro-movements.
- The hand must fully cover the lens before moving away.

PROMPT - Create a single continuous ultra-realistic vertical 9:16 video.

Use the uploaded image as the first frame.

Preserve the woman's identity exactly.

Do NOT change:

- face
- hairstyle
- skin tone
- body proportions
- tattoos
- gym environment
- camera angle
- lighting
- framing

## OUTFIT

Preserve the exact oversized black T-shirt.

The printed image on the T-shirt is a STATIC fabric print.

## IMPORTANT:

The face printed on the T-shirt is NOT a real person.

It is only a printed graphic on the fabric.

The print must remain COMPLETELY STATIC during the entire video.

Never animate the printed face.

Never change its facial expression.

Never blink.

Never move its eyes.

Never move its mouth.

Never change the lips.

Never deform the print.

Never replace the artwork.

Never reinterpret the graphic.

Do not apply face animation to the shirt.

Treat the printed image exactly like an unmoving photograph printed on fabric.

Preserve the exact size, colors, texture, wrinkles and placement of the print.

## CAMERA

Vertical 9:16.

Realistic smartphone mirror selfie.

Natural handheld micro-movements only.

No cuts.  
No zoom.  
No transitions.

## MOVEMENT

The woman looks at herself in the mirror.

She slowly lowers the phone just enough to fully reveal her face.

She then makes a funny exaggerated goofy face toward the mirror:

- crosses her eyes slightly
- puffs her cheeks
- sticks her tongue out a little
- smiles immediately afterward

She laughs naturally.

Natural blinking.

Natural breathing.

Subtle body movement only.

The shirt moves only as real fabric would.

The printed image on the shirt NEVER changes expression and NEVER animates.

## BACKGROUND

The gym remains unchanged.

People in the background make only subtle natural movements.

No one interacts with the camera.

## QUALITY

Ultra photorealistic.

Real smartphone video.

Natural skin texture.

Realistic fabric physics.

No AI artifacts.

No morphing.

No flickering.

No identity drift.

PROMPT -Animate the model with natural confidence, maintaining 100% fidelity to the original image. Preserve all elements: face, body, hair, makeup, outfit, camera angle, lighting, framing, and environment. Do not alter the garment's design or proportions. The animation must feel like authentic, spontaneous social media content or a fashion campaign. Include subtle, realistic movements: natural body sway, posture adjustments, soft hand gestures interacting with the outfit, realistic blinking, breathing, and genuine, happy facial expressions. Avoid dramatic posing, exaggerated dancing, or artificial movements. The result must be elegant, feminine, and premium. Ensure realistic fabric physics during all motion. Focus on cinematic commercial quality with authentic human behavior, vibrant energy, and organic, smooth fluidity in every detail.

PROMPT - Ultra-realistic POV-style vertical Shorts fashion video.

The woman starts very close to the camera and makes a small natural outfit adjustment near the waist or side of the top.

She then steps back naturally into a relaxed position.

One hand rests softly on the waist while subtle hip movement and natural leg positioning highlight the outfit.

Small torso turns and relaxed posture create a casual realistic clothing presentation.

Expression stays mostly neutral and confident with lips softly closed and brief subtle smiles.

At the end, she casually walks toward the camera like stopping the recording.

As she approaches, she clearly points downward with her index finger toward the bottom of the screen in a natural CTA gesture.

Only then a warm genuine smile appears with a slight side head turn.

POV smartphone feeling with subtle handheld movement only.

No talking, text or exaggerated posing.

PROMPT - MOVEMENT ONLY

Duration: 6 seconds

Vertical 9:16

The subject is already wearing the T-shirt naturally at the beginning of the video while sitting in a pink gaming chair.

0.0–1.5s

She looks directly at the camera with a relaxed smile.

She naturally adjusts the bottom of the T-shirt with both hands, lightly smoothing the fabric over her torso.

Small natural head movement and a slight hair adjustment.

Relaxed breathing and subtle body micro-movements.

1.5–3.5s

She smoothly stands up from the gaming chair in one continuous motion.

No jump, no fast movement.

Natural weight shift while standing.

The camera remains fixed.

3.5–5.0s

Standing comfortably, she slightly turns her body about 20–30 degrees to one side and then returns to face the camera.

She gently pulls the sides of the T-shirt once to show the fit.

Natural smile.

Relaxed shoulders.

Authentic influencer body language.

5.0–6.0s

She raises one hand and naturally points downward with her index finger toward the bottom of the screen.

Hold the pointing gesture while smiling confidently at the camera.

MOVEMENT RULES

- The T-shirt stays on her body during the entire video.
- Never hold the T-shirt in the hands.
- Never remove the shirt.
- No clothing transitions.
- No outfit changes.
- No exaggerated gestures.
- No dancing.
- No posing like a runway model.
- No robotic movement.
- No looping.
- No fast motion.
- No slow motion.
- Natural human timing.
- Realistic body balance.
- Authentic micro-adjustments.
- Closed mouth most of the time.
- Do not simulate talking or lip-sync.
- Stable smartphone camera with only subtle handheld micro-movements.

Final feeling:

A genuine TikTok Shop creator naturally showing how the T-shirt looks on her body, standing up from her gaming chair and finishing by pointing down for the call to action.

PROMPT -Ultra-realistic social media style video, vertical 9:16.

Use the reference image as the exact identity of the model. Preserve her exact face, hairstyle, skin tone, body proportions, clothing, accessories, background, lighting and overall appearance throughout the entire video. Do not alter, replace, redesign or generate a different outfit. The clothing shown in the reference image must remain exactly the same throughout the entire video, preserving every color, texture, print, logo, seam and fit.

0.0–2.0s

The video starts with the model already standing very close to the camera, filling most of the frame from the waist up. From the very first frame, one hand is already positioned extremely close to the lens. She immediately performs a natural "come here" gesture using only her index finger and middle finger together, repeatedly curling the two fingers toward herself while maintaining direct eye contact and a warm, confident smile. The gesture begins instantly at frame one, with no delay, no walking into the scene and no preparation. No speaking.

2.0–3.0s

Keeping her smile, she smoothly moves the same hand even closer to the lens and snaps her fingers directly in front of the camera, creating a seamless transition. The transition must not modify the clothing, face, body, lighting or background in any way.

3.0–6.0s

She slowly rotates her body to naturally reveal the back of the outfit, then turns smoothly back to face the camera.

6.0–8.0s

She lightly places both hands on her waist, holding a confident, relaxed smile while maintaining eye contact.

8.0–10.0s

She gently brushes her hair back with one hand, then raises one hand and naturally points downward with her index finger while maintaining eye contact with the camera. In the final second, she gives a playful, confident wink and holds a warm smile until the video ends.

Authentic UGC style recorded on an iPhone 16 Pro, subtle handheld movement, ultra-photorealistic skin texture, realistic fabric physics, cinematic natural lighting, no dialogue, no text on screen, no outfit changes, no face changes, no artificial appearance, no extra fingers or limbs.

PROMPT - Use ONLY the uploaded reference image to preserve the exact facial identity, facial proportions, eyes, eyebrows, nose, lips, skin tone, hairstyle, hair color, body proportions, hands, and overall appearance.

Do NOT alter her identity.

Do NOT beautify, stylize, or reinterpret her face.

If the uploaded image already contains clothing, replace it with a completely different casual outfit while keeping the same person. Never recreate copyrighted graphics, logos, or prints from the reference scene.

Create an ultra-photorealistic 8K vertical smartphone photograph (9:16).

SCENE

A clean, modern bathroom with warm neutral lighting.

Minimalist white walls.

Luxury apartment aesthetic.

Soft indirect ceiling lighting.

No clutter.

## POSE

The woman is standing naturally, facing the camera.

In one hand she is holding a small transparent bottle filled with bubble solution.

The bottle is open and clearly visible.

In her other hand she is holding the matching bubble wand, positioned directly in front of her lips.

She is gently blowing through the bubble wand while looking naturally toward it.

Her posture is relaxed and effortless.

## EXPRESSION

Relaxed eyes.

Natural lips forming a soft blowing expression.

Authentic candid lifestyle moment.

No exaggerated smile.

## BUBBLES

Numerous ultra-realistic translucent soap bubbles float throughout the scene.

Different sizes.

Some bubbles are very close to the camera lens.

Some pass in front of the model.

Others float behind her, creating realistic depth.

Natural rainbow iridescence.

Accurate reflections and refractions.

Realistic physics.

## WARDROBE

A casual modern outfit different from the original image.

Solid colors only.

No logos.

No text.

No copyrighted characters.

Hair remains identical to the uploaded reference.

## CAMERA

Vertical 9:16.

Eye-level smartphone photography.

Medium shot (mid-thigh to head).

Natural perspective.

Ultra-sharp focus.

Professional lifestyle photography.

## NEGATIVE PROMPT

Different face, different hairstyle, different body proportions, beauty enhancement, cartoon, CGI, illustration, anime, watermark, text, logo, copyrighted prints, duplicated person, extra fingers, deformed hands, blurry, low quality, unrealistic bubbles, messy background.

## FRAMING

The camera is positioned farther away from the subject.

Increase the camera-to-subject distance by approximately [10%].

The subject occupies slightly less of the frame while remaining centered.

More of the surrounding environment becomes visible.

Maintain the exact same camera angle, perspective, focal length, and composition style.

Do not crop the subject.

Do not zoom in.

Keep natural body proportions.

Leave comfortable headroom above the subject and additional space around both sides of the body.

The framing should feel slightly wider and more cinematic.

PROMPT - # ULTRA REALISTIC VIDEO

# SINGLE CONTINUOUS TAKE

# VERTICAL 9:16

Use ONLY the uploaded reference images.

-----

REFERENCE IMAGE 1

This is the MASTER identity and scene reference.

Preserve exactly throughout the entire video:

- facial identity
- facial proportions
- hairstyle
- skin tone
- body proportions
- clothing
- accessories
- gaming chair
- RGB room
- lighting
- camera angle
- framing
- composition
- background

Do not redesign, replace or reinterpret any element.

The video must begin exactly from this image.

---

## REFERENCE IMAGE 2

This is the FINAL hand pose reference.

When the arm reaches full extension, the hand must exactly match this image.

Copy exactly:

- finger positions
- thumb position
- wrist rotation
- palm orientation
- hand angle
- perspective

Do not approximate or redesign the pose.

---

## VIDEO

Single continuous shot.

Ultra-photorealistic.

Natural cinematic motion.

Vertical 9:16.

---

## ACTION

The video starts exactly as shown in Reference Image 1.

She looks directly into the camera with a calm, confident expression.

After a brief pause, she quickly thrusts her right arm toward the camera in one smooth motion.

The movement should feel exactly like someone launching a wrist-mounted web shooter.

As the arm extends:

- the shoulder naturally drives the arm forward
- the elbow smoothly straightens
- the wrist performs a quick forward snap during the last part of the extension
- the hand continuously transforms from the pose shown in Reference Image 1 into the pose shown in Reference Image 2

Every finger moves independently and continuously.

No finger suddenly appears, disappears or jumps into position.

No morphing.

No impossible anatomy.

The hand becomes much larger only because it moves closer to the camera.

The hand never completely blocks the lens.

When the arm reaches full extension, hold the exact pose from Reference Image 2 for a brief moment.

She maintains eye contact and gives a subtle smile.

She then smoothly retracts her arm while keeping the same hand pose.

Only after the hand returns near her body do the fingers naturally relax.

She finishes looking directly at the camera with a warm, genuine smile.

---

CAMERA

Static camera.

No zoom.

No cuts.

No transitions.

No camera shake.

One continuous take.

---

## IMPORTANT

Reference Image 1 is the start keyframe.

Reference Image 2 is the end keyframe.

Naturally interpolate between both poses.

Perform the movement EXACTLY ONCE.

Never repeat or loop the animation.

Only the right arm, right hand, fingers, facial expression, eyes and natural breathing may move.

Everything else remains identical to Reference Image 1.

Ultra-realistic skin.

Realistic finger anatomy.

Natural physics.

30 fps.

PROMPT -Create a hyper-realistic UGC fashion video filmed on a smartphone in vertical 9:16.

The subject behaves like a real TikTok fashion creator recording a casual outfit presentation at home.

She is already holding the clothing naturally with both hands in front of her body.

The clothing feels like something she genuinely likes and is about to recommend.

---

## OPENING (Natural UGC Hook)

The video begins with the subject standing comfortably a few steps away from the camera.

She briefly looks directly into the camera.

Then her attention naturally shifts to the clothing.

She softly smiles to herself.

She gently adjusts the shirt with her fingers.

She looks at the print and details as if admiring the product.

She lightly smooths the fabric using one hand.

She slightly tilts her head while observing it.

She brings the clothing slightly closer to herself.

She gives the fabric a subtle natural smell as if appreciating that it is new and clean.

A small genuine smile appears naturally.

She briefly nods with approval.

Everything feels completely spontaneous.

---

## MOVEMENT

Without rushing, she starts walking slowly toward the camera.

Only two small relaxed steps.

Natural confident posture.

Relaxed shoulders.

Small natural hip movement.

Natural body sway.

Arms move realistically according to the product weight.

No posing.

No modeling behavior.

No exaggerated influencer gestures.

Only authentic human movement.

---

## PRODUCT INTERACTION

While walking she occasionally looks back at the clothing.

She adjusts the collar naturally.

Her fingers slightly compress the fabric.

The cloth hangs naturally with realistic gravity.

Subtle wrinkles appear and disappear.

The shirt gently swings with each step.

Fabric movement remains soft and realistic.

---

## FACIAL PERFORMANCE

Natural blinking.

Tiny eye movements.

Micro expressions.

Soft relaxed lips.

A brief genuine smile.

Small cheek movement.

Curious expression while looking at the shirt.

Confident eye contact when looking back at the camera.

No frozen expression.

No exaggerated happiness.

---

## FINAL HOOK

As she reaches the camera she slowly raises the clothing toward the lens.

The movement is continuous and controlled.

She slightly watches the shirt while lifting it.

Then briefly looks back into the camera.

The clothing naturally fills more and more of the frame.

The fabric bends realistically as it approaches the lens.

Natural perspective distortion.

The cloth eventually covers the entire camera lens.

The fabric remains covering the lens for a brief moment.

The ending feels like a real organic transition created only by the clothing touching the camera.

---

## CAMERA

POV smartphone camera.

Very subtle handheld micro-movements.

No zoom.

No digital stabilization.

No cinematic camera movement.

Real phone recording feeling.

PROMPT - PROMPT DE MOVIMENTO — UGC ULTRA REALISTA | 10s | 4K | 9:16 | SEM FALA | SEM TEXTO

A modelo começa sorrindo naturalmente para a câmera. Ela segura um saquinho plástico transparente contendo a camiseta dobrada, com a estampa totalmente visível através do plástico. Ela aproxima o saquinho da câmera com os braços estendidos para destacar a estampa por cerca de 1 segundo.

Sem cortes, ela faz um leve pulinho de alegria e lança o saquinho suavemente para cima, cerca de 20–30 cm. O saquinho se desloca da esquerda para a direita enquanto gira levemente no ar com física realista. Ela acompanha o movimento com os olhos e o segura naturalmente com as duas mãos.

Logo após pegar o saquinho, ainda sorrindo, ela abre o fecho plástico de forma totalmente humanizada, puxando a abertura com as duas mãos. Em seguida, segura o saquinho com uma mão e, com a outra, retira a camiseta lentamente, deixando o tecido deslizar naturalmente para fora da embalagem, com dobras, gravidade e movimento realistas.

Assim que a camiseta sai completamente do saquinho, ela a segura pelas extremidades superiores, dá uma leve sacudida para abrir o tecido naturalmente e a aproxima da câmera em um único movimento contínuo, sem pressa, mantendo a estampa perfeitamente alinhada e de frente para a lente.

FINAL OBRIGATÓRIO: ela continua aproximando a camiseta até que o próprio tecido encoste na lente, fazendo com que a camiseta cubra 100% da câmera, sem deixar aparecer qualquer parte da modelo, das mãos, do banheiro ou do fundo. A tela termina completamente preenchida pela camiseta e sua estampa, criando um efeito de fechamento natural, como se o tecido estivesse tocando a lente.

QUALIDADE

Ultra realista 4K, formato vertical 9:16.

Movimento único e contínuo, sem cortes ou transições.

Física realista do saquinho e da camiseta.

Dobras, balanço e gravidade naturais do tecido.

Expressão alegre e espontânea.

Mãos com anatomia perfeita.

Autofoco suave acompanhando a aproximação da camiseta.

A camiseta permanece centralizada durante toda a aproximação.

No último segundo, a camiseta ocupa exatamente 100% do enquadramento, encostando na lente sem inclinações ou espaços nas bordas.

Estampa 100% idêntica à referência, sem distorções, alterações de cor ou troca de elementos.

Iluminação constante e aparência de vídeo gravado em smartphone premium.

PROMPT - Prompt pra movimento:

PROMPT DE MOVIMENTO — 6s | UGC ULTRA REALISTA | 4K | 9:16 | SEM FALA | SEM TEXTO

A modelo permanece sentada na cadeira gamer, olhando para a câmera com um sorriso leve e natural. Ela segura um saquinho transparente com fechamento tipo zíper contendo uma camiseta branca dobrada. A embalagem permanece sempre totalmente de frente para a câmera.

Ela aproxima suavemente o pacote da lente para destacar a camiseta dentro do plástico e, em seguida, o traz de volta para a altura do peito, mantendo-o sempre na posição vertical e voltado para a câmera.

Sem retirar a camiseta ainda, ela segura a parte inferior do saquinho com a mão esquerda e, com a mão direita, abre cuidadosamente o zíper plástico na parte superior da embalagem, deslizando-o da direita para a esquerda em um único movimento contínuo e totalmente natural. O plástico abre visivelmente na parte de cima e a abertura fica completamente livre.

Somente depois que o saquinho estiver totalmente aberto, ela coloca a mão por dentro da abertura superior e retira lentamente a camiseta dobrada, exatamente como uma pessoa faria ao abrir uma embalagem nova. O saquinho permanece na outra mão até a camiseta sair completamente. Só então ela solta ou apoia discretamente o saquinho fora do enquadramento.

Com as duas mãos, ela abre naturalmente a camiseta pelo tecido, esticando-a sem esconder a estampa. Em seguida, leva a camiseta reta em direção à câmera, mantendo-a perfeitamente de frente, até que a estampa preencha 100% do enquadramento, cobrindo completamente a lente no último instante.

## IMPORTANTE

A camiseta não pode sair pela lateral do saquinho.

O saquinho deve ser aberto primeiro, pela parte superior, antes de qualquer tentativa de retirar a camiseta.

O zíper deve abrir de forma totalmente visível e realista.

A camiseta deve ser retirada pela abertura superior, como em uma embalagem real.

Movimentos contínuos, suaves e humanizados.

Sem cortes, sem transições, sem teletransporte, sem erros de física.

A embalagem e a camiseta permanecem sempre orientadas de frente para a câmera durante toda a sequência.

PROMPT - # 📦 SCENE — NATRAL UGC UNBOXING + SHOWING THE PRODUCT (TRIPOD)

## ♦ LAYER 1 — SCENE TITLE + STYLE

Scene Title: "Excited Package Unboxing + Revealing the Product"

Style:

Ultra-realistic UGC TikTok Shop unboxing, fixed tripod camera, medium shot, soft natural indoor lighting, authentic influencer recording herself at home.

The entire sequence should feel spontaneous, happy, feminine and completely natural, as if she has genuinely been waiting for this delivery.

The video must look like one continuous real take with realistic timing, authentic hand interaction, physically accurate material simulation and natural facial expressions.

### PACKAGE PRESERVATION

The shipping package shown in the reference image must remain EXACTLY the same object throughout the entire video.

Preserve exactly:

- color
- printed graphics
- logos
- typography
- labels
- stickers
- proportions
- folds
- reflections
- transparency (if applicable)
- texture
- material
- overall identity

Never redesign, regenerate, replace or modify the package.

Only realistic physical deformation caused by handling and opening is allowed.

#### ### PRODUCT PRESERVATION (CRITICAL)

The product inside the package MUST remain EXACTLY the same product shown in the reference image.

Do NOT change, regenerate, replace or reinterpret the product.

Preserve EXACTLY:

- product type
- garment/category
- shape
- silhouette
- proportions
- size
- folded state
- color(s)
- fabric
- texture
- stitching
- seams
- collar
- sleeves
- cuffs
- waistband
- hem
- pockets
- buttons
- zipper
- elastic parts
- embroidery
- labels
- tags
- logos
- prints
- graphics
- artwork
- text
- branding
- trims
- accessories
- every visible design detail

Never simplify, improve, redraw or invent missing parts.

Never substitute the product with another similar item.

Never alter the print, logo, artwork, text, colors or fabric.

The product must be identical before, during and after being removed from the package.

Only natural folds and movement caused by gravity and handling are allowed.

### ### MODEL PRESERVATION

The woman's identity, face, hairstyle, skin tone, body proportions, clothing and overall appearance must remain identical to the reference image throughout the entire sequence.

Her mouth remains completely closed.

No speaking.

No lip-sync.

No mouth articulation.

### # ♦ LAYER 2 — TIMELINE

#### ### [0:00–0:01.5 — Receiving the Package]

Visual:

She holds the original shipping package with both hands at chest height.

She looks down at it with genuine excitement.

Her fingers gently squeeze the package.

The material compresses naturally under her grip.

Small wrinkles appear realistically.

She gives the package a small happy lift.

Her shoulders remain relaxed.

Natural breathing is visible.

Face:

- bright closed-mouth smile
- excited eyes
- slightly raised eyebrows
- natural blinking
- eyes alternate between the package and the camera
- lips fully closed

Camera:

- fixed tripod
- medium shot
- no zoom
- no camera movement
- subtle autofocus breathing is acceptable

Audio:

- quiet indoor ambience
- soft package handling sounds

Emotion:

She genuinely looks excited to open the delivery.

---

### [0:01.5–0:03.8 — Opening the Package]

Visual:

She stabilizes the package with one hand while the other hand gently opens the top opening.

The package stretches naturally under tension.

The opening follows its real seam.

The package bends and flexes realistically.

She opens it carefully without tearing it aggressively.

The package never changes shape beyond natural deformation.

It never disappears, duplicates or changes design.

Her eyes remain focused on the opening.

Her expression becomes more excited as the product becomes visible.

Face:

- raised eyebrows
- subtle widening of the eyes
- growing closed-mouth smile
- natural blinking

Emotion:

Quiet excitement and anticipation.

---

### [0:03.8–0:05.6 — Removing the Product]

Visual:

She looks inside the package with curiosity.

One hand reaches naturally inside while the other supports the package.

She slowly removes the product.

The product slides out naturally with realistic friction and gravity.

No clipping.

No morphing.

No deformation beyond natural fabric or material movement.

The package remains in her other hand and lowers slightly without being dropped.

After the product is completely removed, she lightly supports the package while shifting her attention to the product.

She gently unfolds or presents only as much as necessary to naturally display it.

If the product is already unfolded, she simply holds it naturally.

The product must remain EXACTLY identical to the reference image during the entire sequence.

No changes to:

- colors

- print
- artwork
- logos
- text
- labels
- embroidery
- stitching
- fabric
- shape
- proportions
- design
- accessories
- construction

Only realistic folds, gravity and natural handling are allowed.

Face:

- happy closed-mouth smile
- proud expression
- excited eyes
- natural blinking

Camera:

- fixed tripod
- medium shot
- static framing
- no zoom
- no cuts
- no transitions

Final Emotion:

She happily admires the product exactly as it came from the package, showing it naturally to the camera without altering any characteristic of the original item.

PROMPT - A realistic female influencer stands indoors holding a sealed plastic shipping mailer package (polymailer) with both hands. The package looks like a typical TikTok Shop,

Shopee, Temu or online shopping delivery bag. The entire video is completely silent. No speaking, no narration, no lip movement.

The video begins with the plastic package very close to the camera lens. She slowly pulls it back, revealing herself while keeping the package as the main focus. She naturally squeezes the package to show its texture, rotates it slowly, displays the front, back, shipping label, corners and details.

She carefully tears open the plastic packaging using her hands, creating realistic movements and natural anticipation. She gradually removes the product from inside the mailer while keeping it visible to the camera. The product reveal feels authentic and unforced.

Natural hand movements, realistic finger interaction, subtle breathing motion, relaxed posture, neutral facial expression, organic body language. Handheld smartphone camera aesthetic, slight camera shake, realistic autofocus shifts, light motion blur, compression artifacts, visible skin texture, pores, loose hair strands, natural lighting, soft shadows, documentary-style realism.

UGC content, social media creator footage, casual home environment, authentic online shopping unboxing, vertical 9:16 format, realistic depth of field, cinematic realism, highly detailed, no AI artifacts, no robotic motion, no exaggerated reactions, no hyper-perfect rendering.

Focus on the package opening process, the texture of the plastic mailer, and the realistic product reveal. Silent unboxing only.

PROMPT - @Create image Create an ultra-photorealistic 8K vertical portrait (9:16).

#### IMPORTANT REFERENCE RULES

If a reference image of a person is provided, use ONLY that reference to preserve the exact facial identity, facial proportions, eyes, eyebrows, nose, lips, skin tone, hairstyle, hair color, body proportions, hands, and overall appearance.

Do NOT alter the person's identity.

Do NOT beautify, stylize, or reinterpret the face.

If a clothing reference image is provided, recreate ONLY the clothing from that reference while preserving the person's identity exactly.

#### SCENE

The person is naturally sitting in a premium gaming chair inside a modern gaming/streaming room.

The room features:

Soft RGB ambient lighting (purple and pink tones).

Minimalist modern décor.

Clean desk setup.

Subtle LED wall lighting.

Cinematic depth of field.

Soft indirect lighting.

Premium streamer setup.

No visible clutter.

## POSE

The person is seated comfortably facing the camera.

Torso centered.

Shoulders relaxed.

The right arm rests naturally on the chair armrest or desk.

The left arm is extended toward the camera, creating a strong perspective effect.

## HAND POSITION

The left hand performs the classic Spider-Man web-shooting gesture:

Index finger fully extended.

Little finger fully extended.

Thumb naturally extended outward.

Middle and ring fingers folded naturally into the palm.

Wrist relaxed with a realistic angle.

Fingers perfectly anatomical.

No fused fingers.

No extra fingers.

Correct finger lengths and joints.

Visible fingernails.

Natural skin folds and tendons.

## PERSPECTIVE

The extended hand is significantly closer to the camera than the face, producing realistic wide-angle perspective.

The hand occupies approximately 25–35% of the frame.

The face remains perfectly sharp and clearly visible behind the hand.

## EXPRESSION

Relaxed.

Confident.

Friendly.

Looking directly into the camera.

## CAMERA

Eye-level camera.

Approximately 35mm focal length.

Shallow depth of field.

The hand shows slight natural perspective blur while the face remains tack sharp.

## LIGHTING

Soft cinematic lighting.

Realistic skin shading.

Natural light falloff.

Subtle RGB reflections from the room.

## CLOTHING

Replace the clothing with the uploaded clothing reference if provided.

If no clothing reference is supplied, use any outfit requested by the user while preserving realistic fabric texture, natural folds, and accurate fit.

## QUALITY

Ultra-photorealistic.

8K resolution.

HDR.

Realistic skin pores.

Natural hair strands.

Accurate hand anatomy.

Physically accurate lighting.

No stylization.

No CGI look.

No cartoon appearance.

No AI artifacts.

Highly detailed textures.

Natural proportions.

PROMPT -0.0–2.0s

The recording begins in the middle of the action, not before it. The model is already standing very close to the camera, filling the frame from the waist up. In the very first frame, her hand is already positioned just a few centimeters from the camera lens.

Without any preparation, arm raising, or delay, she is already performing a slow, natural beckoning gesture, inviting the viewer closer. The motion is smooth and continuous, using her relaxed hand with the index finger leading the invitation while the remaining fingers follow naturally. The gesture is subtle, elegant and realistic, repeating naturally while she maintains direct eye contact and a warm closed-mouth smile. Her hand remains close to the lens throughout the entire gesture.

Ultra-realistic social media style video, vertical 9:16.

Use the reference image as the exact identity of the model. Preserve her exact face, hairstyle, skin tone, body proportions, clothing, accessories, background, lighting and overall appearance throughout the entire video. Do not alter, replace, redesign or generate a different outfit. The clothing shown in the reference image must remain exactly the same throughout the entire video, preserving every color, texture, print, logo, seam and fit.

0.0–2.0s

The video starts with the model already standing very close to the camera, filling most of the frame from the waist up. From the very first frame, one hand is already positioned extremely close to the lens. She immediately performs a natural "come here" gesture using only her index finger and middle finger together, repeatedly curling the two fingers toward herself while maintaining direct eye contact and a warm, confident smile. The gesture begins instantly at frame one, with no delay, no walking into the scene and no preparation. No speaking.

2.0–3.0s

Keeping her smile, she smoothly moves the same hand even closer to the lens and snaps her fingers directly in front of the camera, creating a seamless transition. The transition must not modify the clothing, face, body, lighting or background in any way.

3.0–6.0s

She slowly rotates her body to naturally reveal the back of the outfit, then turns smoothly back to face the camera.

6.0–8.0s

She lightly places both hands on her waist, holding a confident, relaxed smile while maintaining eye contact.

8.0–10.0s

She gently brushes her hair back with one hand, then raises one hand and naturally points downward with her index finger while maintaining eye contact with the camera. In the final second, she gives a playful, confident wink and holds a warm smile until the video ends.

Authentic UGC style recorded on an iPhone 16 Pro, subtle handheld movement, ultra-photorealistic skin texture, realistic fabric physics, cinematic natural lighting, no dialogue, no text on screen, no outfit changes, no face changes, no artificial appearance, no extra fingers or limbs.

PROMPT - # 📦 SCENE — NATURAL UGC UNBOXING + OPENING THE TOP (TRIPOD)

## ♦ LAYER 1 — SCENE TITLE + STYLE

**\*\*Scene Title:\*\*** "Excited Package Unboxing + Showing the Top"

**\*\*Style:\*\*** Ultra-realistic UGC TikTok Shop unboxing, fixed tripod camera, medium shot, soft natural indoor lighting, authentic influencer recording herself at home. The entire sequence should feel spontaneous, happy, feminine and real, like someone genuinely excited after receiving a new clothing order.

The video must look like one continuous real take, with natural timing, realistic hand interaction, accurate fabric physics and expressive but silent facial reactions.

The shipping package shown in the reference image must remain exactly the same object throughout the entire video. Preserve its original color, printed graphics, logos, typography, layout, proportions, folds, texture and overall identity. Never redesign, replace or regenerate the package. Only natural physical deformation caused by handling and opening is allowed.

The woman's identity, face, hairstyle, skin tone, body proportions and clothing must remain identical to the reference image throughout the entire sequence.

Her mouth remains completely closed during the entire video. No speaking, no lip-sync, no mouth articulation.

# ♦ LAYER 2 — TIMELINE

### [0:00–0:01.5 — Receiving the Package]

**\*\*Visual:\*\***

She holds the original gray shipping package with both hands at chest height.

She looks down at the package with real excitement, like she has been waiting for this delivery.

Her fingers squeeze the package lightly.

The plastic compresses naturally under her grip.

Small wrinkles appear where her fingers press.

She gives the package a tiny excited lift, not exaggerated, just a natural happy reaction.

Her shoulders stay relaxed.

Her elbows remain slightly bent.

Natural breathing moves her chest and shoulders subtly.

**\*\*Face:\*\***

- bright closed-mouth smile

- eyes visibly excited

- eyebrows lift naturally

- cheeks rise

- subtle happy surprise

- natural blinking

- eyes alternate between package and camera
- lips remain fully closed
- no speaking
- no mouth movement

**\*\*Camera:\*\***

- fixed tripod
- medium shot
- no zoom
- no camera movement
- slight natural autofocus breathing is acceptable

**\*\*Audio:\*\***

- quiet indoor ambience
- soft plastic handling sounds

**\*\*Emotion:\*\***

She looks genuinely happy and excited to open the package.

---

**### [0:01.5–0:03.8 — Opening the Package]**

**\*\*Visual:\*\***

She stabilizes the package with one hand while the other hand grips the opening edge.

Before opening, the plastic stretches slightly under tension.

The material wrinkles realistically around her fingers.

She pulls gently until the seam begins to open.

The tear follows the natural opening seam.

The package bends, flexes and compresses naturally.

She does not rip the package apart aggressively.

The package does not explode, disappear, duplicate or change design.

Both hands keep controlling the package the entire time.

Her eyes stay focused on the package.

Her expression becomes more excited as the opening reveals the item inside.

**\*\*Face:\*\***

- eyebrows lift with anticipation
- eyes widen subtly
- happy closed-mouth smile grows
- cheeks stay raised
- natural blinking
- excited eye movement
- lips stay completely closed
- no speech
- no lip-sync

**\*\*Emotion:\*\***

Silent excitement, curiosity and anticipation while opening the delivery.

---

**### [0:03.8–0:05.6 — Pulling Out the White Top]**

**\*\*Visual:\*\***

After opening the package, she looks inside with visible curiosity.

Her right hand reaches naturally into the package while her left hand continues holding and supporting it.

She grasps the white top and slowly pulls it out.

The fabric slides out naturally without clipping, tearing or fusing with the package.  
The package remains in one hand and lowers slightly, but it does not fall, vanish or get thrown away.

Once the top is fully out, she transfers the package lower into one hand or keeps it tucked lightly against her body while shifting attention to the clothing.

Her fingers begin separating the folded fabric.

She finds the upper corners/shoulder area of the white top with both hands.

**\*\*Face:\*\***

- happy surprise when seeing the top
- eyes brighten
- eyebrows bounce subtly
- closed-mouth smile becomes more joyful
- she briefly looks at the top, then back to the camera
- no mouth movement
- no speaking

**\*\*Emotion:\*\***

She reacts like she genuinely likes what she received.

---

**### [0:05.6–0:07.8 — Opening the Shirt]**

**\*\*Visual:\*\***

She opens the white top fully, not leaving it folded.

She uses both hands to separate the fabric from the folded shape.

Her fingers slide toward the upper corners/shoulders of the blouse.

She gently unfolds it downward using gravity.

The fabric drops naturally and opens into the visible shape of a white top.

The shirt is now clearly recognizable as clothing, not a folded bundle.

She holds it by both upper corners or shoulder areas, keeping it open in front of her chest.

The shirt hangs naturally.

The lower part of the fabric settles with soft folds.

She slightly adjusts each hand to make the top more visible.

The package remains controlled in one hand, tucked lower, or partially held under the garment, but it never falls or disappears unnaturally.

**\*\*Fabric Physics:\*\***

- natural unfolding
- gravity pulls the fabric downward
- soft fabric wrinkles
- realistic cloth settling
- no clipping
- no melting
- no floating fabric
- no stiff cardboard-like movement

**\*\*Face:\*\***

- proud happy smile
- eyes move from the opened shirt to the camera
- slight head tilt of satisfaction
- cheeks raised
- natural blinking
- lips closed the entire time

- no speech
- no lip-sync

**\*\*Emotion:\*\***

She looks excited and satisfied, like she is happy with the product and wants to show it clearly.

---

**### [0:07.8–0:10.0 — Showing the Open Shirt to Camera]**

**\*\*Visual:\*\***

She holds the opened white top fully visible in front of her body.

The garment is open and displayed clearly toward the camera.

She gives the shirt a small natural shake, a gentle left-right movement, like showing the fabric and caimento.

The shake is soft and realistic, not aggressive.

The fabric waves naturally and settles again.

She slightly lifts the shirt closer to the camera for visibility, then brings it back to chest height.

Her hands remain on the upper corners/shoulder area.

Her posture stays relaxed.

She shifts her weight subtly onto one leg.

The package remains safely held, tucked lower, or partially supported, never dropped or forgotten in a broken way.

**\*\*Face:\*\***

- very happy closed-mouth smile
- excited eyes
- eyebrows lift slightly once more
- natural blinking
- satisfied look at the product
- warm eye contact with the camera
- no mouth movement
- no speaking
- no lip-sync

**\*\*Emotion:\*\***

She proudly shows the opened top like a real TikTok Shop creator showing a new clothing purchase she genuinely loved.

PROMPT -Hyper-realistic UGC fashion video.

Vertical 9:16.

Real smartphone front camera.

The video must feel like the subject has just pressed the record button herself.

Natural indoor daylight.

Static smartphone perspective after placement.

No talking.

No lip-sync.

No music.

OPENING

The first frame begins extremely close to the subject's face.

One arm is naturally extended toward the camera, as if she is still holding the phone in her hand.

Her fingers are partially visible near the edge of the frame for a brief moment.

She gently places the phone on a stable surface.

A tiny realistic camera wobble occurs as the phone touches the surface.

The framing settles naturally.

She immediately takes two relaxed steps backward into the center of the frame.

She never rushes.

She smiles softly as if recording a casual outfit video for friends.

---

She relaxes into a comfortable stance.

Weight naturally shifts onto one leg.

One knee remains slightly bent.

Natural breathing.

Tiny body sway.

Warm eye contact.

Irregular blinking.

---

She casually performs the side elastic snap on the top.

Using only her right thumb and index finger, she pinches the SIDE EDGE of the neckline near the outer bust.

Never the center.

She gives one quick outward elastic pull.

Immediately releases.

The fabric snaps back naturally.

After a very short pause, she repeats the exact same movement once more.

The fabric rebounds realistically.

Her hand naturally drops.

---

She slightly shifts her hips.

One shoulder relaxes lower than the other.

Soft smile.

Natural breathing.

Tiny cheek movement.

---

She slowly rotates about 35 degrees.

Shows the side of the outfit.

Returns smoothly to face the camera.

Makes one tiny corrective foot adjustment.

---

She lightly smooths the fabric around the waist with relaxed fingertips.

Natural cloth movement.

Realistic fabric settling.

---

She maintains soft eye contact.

Natural blinking.

Small head tilt.

Tiny unconscious smile.

The body never becomes completely still.

Continuous micro-movements.

---

ENDING

She softly smiles.

She naturally walks toward the camera.

Two relaxed steps.

She slightly leans forward.

Her arm reaches naturally toward the phone.

She looks directly into the lens.

Her fingertips gently touch the phone.

A tiny camera wobble occurs as she picks it up.

The camera slightly tilts upward in her hand.

The framing moves naturally as if she has just stopped recording.

The video ends immediately after the phone is picked up.

---

PROMPT -Create a hyper-realistic UGC fashion video filmed on a smartphone in vertical 9:16.

The subject behaves like a real TikTok fashion creator recording a casual outfit presentation at home.

She is already holding the clothing naturally with both hands in front of her body.

The clothing feels like something she genuinely likes and is about to recommend.

---

#### OPENING (Natural UGC Hook)

The video begins with the subject standing comfortably a few steps away from the camera.

She briefly looks directly into the camera.

Then her attention naturally shifts to the clothing.

She softly smiles to herself.

She gently adjusts the shirt with her fingers.

She looks at the print and details as if admiring the product.

She lightly smooths the fabric using one hand.

She slightly tilts her head while observing it.

She brings the clothing slightly closer to herself.

She gives the fabric a subtle natural smell as if appreciating that it is new and clean.

A small genuine smile appears naturally.

She briefly nods with approval.

Everything feels completely spontaneous.

---

#### MOVEMENT

Without rushing, she starts walking slowly toward the camera.

Only two small relaxed steps.

Natural confident posture.

Relaxed shoulders.

Small natural hip movement.

Natural body sway.

Arms move realistically according to the product weight.

No posing.

No modeling behavior.

No exaggerated influencer gestures.

Only authentic human movement.

---

## PRODUCT INTERACTION

While walking she occasionally looks back at the clothing.

She adjusts the collar naturally.

Her fingers slightly compress the fabric.

The cloth hangs naturally with realistic gravity.

Subtle wrinkles appear and disappear.

The shirt gently swings with each step.

Fabric movement remains soft and realistic.

---

## FACIAL PERFORMANCE

Natural blinking.

Tiny eye movements.

Micro expressions.

Soft relaxed lips.

A brief genuine smile.

Small cheek movement.

Curious expression while looking at the shirt.

Confident eye contact when looking back at the camera.

No frozen expression.

No exaggerated happiness.

---

## FINAL HOOK

As she reaches the camera she slowly raises the clothing toward the lens.

The movement is continuous and controlled.

She slightly watches the shirt while lifting it.

Then briefly looks back into the camera.

The clothing naturally fills more and more of the frame.

The fabric bends realistically as it approaches the lens.

Natural perspective distortion.

The cloth eventually covers the entire camera lens.

The fabric remains covering the lens for a brief moment.

The ending feels like a real organic transition created only by the clothing touching the camera.

---

## CAMERA

POV smartphone camera.

Very subtle handheld micro-movements.

No zoom.

No digital stabilization.

No cinematic camera movement.

Real phone recording feeling.

---

## QUALITY

Hyper realistic.

Photorealistic.

PROMPT -# 🎬 MOTION PROMPT — 6s | UGC ULTRA-REALISTIC | 4K | 9:16 | NO SPEECH | NO TEXT

The woman remains seated naturally in the gaming chair, maintaining the exact same identity, hairstyle, clothing, body proportions and facial features as shown in the reference image.

She smiles with genuine excitement, looking like someone who has just received a package she has been eagerly waiting for. Her expression evolves naturally throughout the sequence, showing curiosity, happiness and satisfaction without exaggeration. Her mouth remains completely closed during the entire video. No speaking, no lip-sync, no mouth articulation. She holds the exact same transparent zip-lock package shown in the reference image. The package must preserve its original appearance throughout the video, including the same transparency, reflections, folds, proportions and material.

**\*\*The garment inside the package must remain EXACTLY the same garment from the reference image. Never replace it, regenerate it or change its appearance. Preserve exactly the same color, design, print, logo, graphics, artwork, text, collar, sleeves, folds, fabric texture and proportions from beginning to end. The clothing inside the package must never become white, blank or generic unless it is already white in the reference image.\*\***

The package always remains facing the camera.

She gently brings the package closer to the camera to showcase the garment inside the transparent plastic, then smoothly brings it back to chest height while keeping it perfectly vertical and facing forward.

Without removing the garment yet, she supports the bottom of the package with her left hand.

Using her right hand, she carefully grips the plastic zipper seal at the top edge.

She slowly slides the zipper open from right to left in one continuous, realistic movement.

The zipper gradually separates along the original seal.

The plastic stretches slightly before releasing.

The seal opens progressively with realistic resistance exactly like opening a brand-new zip-lock package for the first time.

The opening becomes fully visible before she attempts to remove the garment.

The package never tears apart.

The plastic never explodes.

The material wrinkles naturally around her fingers.

Both hands continuously adjust their grip with realistic finger movement.

Only after the zipper has been completely opened does she insert her hand through the top opening.

She naturally reaches inside the package and slowly removes the garment through the upper opening exactly like a real person removing new clothing from its original packaging.

**\*\*The garment coming out of the package must be IDENTICAL to the garment visible inside the package. It must preserve exactly the same color, print, artwork, graphics, logo, fabric, collar, sleeves, proportions and every visual detail. No changes are allowed during removal. The garment must never transform, recolor, simplify or lose any design elements while being removed.\*\***

The garment slides naturally out of the package without clipping or distortion.

The package remains supported in the opposite hand until the garment is completely removed.

Only after the garment is fully outside does she naturally lower or discreetly move the empty package out of the frame.

She smiles even more after seeing the garment, briefly looking at it with genuine satisfaction before looking back at the camera.

Using both hands, she naturally unfolds the garment by holding the upper corners.

Gravity opens the fabric naturally.

The garment hangs realistically.

She fully opens it without covering its design.

The entire front of the garment remains clearly visible.

She gives the garment one small, natural left-right movement, allowing the fabric to move realistically.

She proudly presents the garment to the camera like a real content creator excited about a new purchase.

Finally, she slowly brings the fully opened garment straight toward the camera while keeping it perfectly facing forward.

The garment gradually fills more and more of the frame until it completely covers the lens during the final moment of the video.

---

## **## IMPORTANT**

- The garment inside the package must remain exactly identical to the reference image.
- Never replace the garment with a generic white shirt.
- Never change the garment color.
- Never change the print.
- Never change the artwork.
- Never change the logo.
- Never change the fabric.
- Never simplify the design.
- Never regenerate the clothing.
- The garment visible inside the package and the garment removed from the package must be the exact same object.
- The garment must leave only through the top opening after the zipper is fully opened.
- The zipper must visibly open before the garment is removed.
- The zipper opens gradually with realistic resistance.
- The package must never be torn apart.
- No clipping.
- No object fusion.
- No disappearing geometry.
- No duplicated clothing.
- No physics errors.
- Natural finger movement.

- Realistic plastic deformation.
- Realistic fabric physics.
- Continuous human motion.
- Authentic excitement and expressive facial micro-reactions throughout the entire sequence.
- Smooth weight shifts.
- Natural breathing.
- Irregular blinking.
- Small eye movements between the package, the garment and the camera.
- Camera remains completely fixed.
- No cuts.
- No transitions.
- No teleportation.
- The entire sequence must feel like a genuine TikTok Shop UGC unboxing recorded in one continuous take by a real Brazilian creator.

PROMPT - Use the three reference images in the exact order provided.

The character shown in the reference images is a fictional AI-generated virtual fashion model created with ChatGPT. She is not a real person. Preserve her exact face, hairstyle, hair color, body proportions, skin tone, expression, smile, and overall identity throughout the entire video.

She is wearing the same fitted brown crop top and a matching brown bikini bottom before the jeans are put on. The bikini is standard swimwear and is only visible because this is a clothing try-on demonstration. The focus of the video is exclusively on showcasing the jeans for an online fashion store. The presentation must remain elegant, natural and professional.

Create a smooth 10-second vertical (9:16) ultra-realistic fashion video.

Scene 1 (0–3s)

Start exactly like the first reference image. The AI model holds the blue jeans open in front of her with both hands, smiling naturally. She briefly presents the jeans to the camera.

Scene 2 (3–5s)

Without changing the camera angle, the AI model folds the jeans once while holding them in front of her. This matches the second reference image. She remains wearing the brown crop top and matching bikini bottom. Her movements are slow, natural and realistic.

Scene 3 (5–10s)

Use a clean cinematic jump cut. Do NOT animate the clothing being put on. After the cut, the AI model is already wearing the blue jeans exactly as shown in the third reference image. She naturally smooths the fabric with both hands, lightly adjusts the waistband, turns slightly to each side to show the fit, then looks back at the camera with a confident smile.

Requirements:

- The character is a fictional AI-generated model created with ChatGPT.
- Do not interpret the character as a real person.
- Do not animate a clothing removal or dressing sequence.
- Use a clean jump cut between the folded-jeans scene and the fully dressed scene.
- No dialogue.
- No text.
- No captions.
- No logos.
- No watermarks.
- No TikTok interface.
- No camera movement.
- Keep the same room, lighting and framing.
- Preserve the exact brown crop top, brown bikini bottom before the cut, and blue jeans after the cut.
- Natural fashion model movements.
- Ultra-realistic 8K DSLR quality.
- Premium e-commerce fashion advertisement.
- The focus is exclusively on demonstrating the fit and appearance of the jeans.

PROMPT - Use a imagem enviada como referência obrigatória da modelo, preservando 100% do rosto, cabelo cacheado, tom de pele, proporções corporais, roupas, cenário e iluminação, sem modificar nenhuma característica. A modelo deve permanecer exatamente igual à foto de referência.

Crie um vídeo ultrarrealista em formato vertical 9:16, duração de 8 segundos, estilo UGC autêntico gravado com smartphone. A modelo está em ambiente interno segurando uma caixa de envio do TikTok Shop feita de papelão marrom, com etiqueta de envio realista na parte frontal.

O vídeo inicia com a modelo segurando a caixa com as duas mãos na altura do peito, mantendo a frente da embalagem voltada para a câmera. Em seguida, ela aproxima lentamente a caixa em direção à lente em um movimento contínuo e natural. A caixa deve permanecer sempre de frente para a câmera durante toda a aproximação. A embalagem continua avançando até preencher completamente o enquadramento, cobrindo 100% da

tela, fazendo com que a modelo desapareça totalmente atrás da caixa e deixe de ser visível.

Sem cortes, a caixa é então afastada novamente da câmera em direção ao corpo da modelo, retornando à posição inicial na altura do peito, sempre mantendo a mesma face da caixa voltada para a câmera, sem girar ou inclinar excessivamente.

Após trazer a caixa de volta para perto do corpo, a modelo passa a segurá-la naturalmente com uma das mãos. Com a outra mão, ela abre cuidadosamente as abas superiores da embalagem, utilizando movimentos lentos, espontâneos e realistas dos dedos. A interação com a caixa deve parecer genuína, como em um verdadeiro vídeo de recebidos gravado em casa.

Com a caixa aberta, a modelo olha brevemente para dentro dela e faz uma menção natural de retirar algum objeto do interior, puxando-o parcialmente para fora da embalagem de forma discreta e humanizada, sem exageros e sem foco excessivo no item. O gesto deve transmitir a sensação autêntica de curiosidade e descoberta ao abrir uma encomenda recém-chegada.

A expressão facial permanece suave e agradável durante toda a sequência, podendo surgir apenas um leve sorriso espontâneo durante o unboxing. A modelo nunca fala, não movimenta os lábios para narração e não realiza gestos típicos de propaganda.

A câmera deve apresentar estética de smartphone handheld, com leves tremores naturais das mãos, pequenas variações de foco automático, discreto motion blur, leve granulação e compressão típica de vídeos para redes sociais. Iluminação ambiente suave, sombras realistas, textura natural da pele, poros visíveis, fios soltos do cabelo e movimentos corporais orgânicos.

Vídeo completamente silencioso, sem falas, sem legendas, sem textos na tela e sem elementos gráficos. O resultado final deve parecer um vídeo UGC real gravado por uma criadora de conteúdo mostrando uma encomenda recém-chegada do TikTok Shop, com foco na aproximação total da caixa até cobrir completamente a câmera, no retorno da embalagem para perto do corpo e no unboxing humanizado e natural, sem artefatos de IA ou movimentos robóticos.

PROMPT- ENCOMENDA-CAIXA

A realistic female influencer stands indoors holding a small shipping package with both hands. The entire video is completely silent. She never speaks, never opens her mouth to talk, and makes no narration. Natural neutral facial expression throughout the scene.

The video starts with the package very close to the camera lens. She slowly moves it away from the camera, revealing herself while keeping the package as the main focus. She carefully rotates the package, showing the front, back, sides, corners, shipping label and texture. She brings the package close to the lens multiple times to display details.

After presenting the package, she begins a slow and realistic unboxing process. Natural hand movements, realistic finger interaction, authentic body language, subtle posture adjustments, relaxed breathing motion. No exaggerated reactions. No pointing at the camera. No speaking. No lip movement. No presentation gestures.

Handheld smartphone camera aesthetic, slight camera shake, realistic autofocus adjustments, subtle motion blur, compression artifacts, light camera grain, natural lighting, soft shadows, visible skin texture, pores, loose hair strands, realistic imperfections, organic colors, documentary-style realism.

User-generated content (UGC), casual creator footage, authentic social media unboxing, cinematic realism, vertical 9:16 format, realistic depth of field, highly detailed, natural movement, no AI artifacts, no robotic behavior, no hyper-perfect rendering.

The package remains visible and receives continuous attention during the entire sequence. Focus on authentic silent unboxing behavior caixa com informações TikTok Shop

PROMPT - Use a imagem enviada como referência obrigatória. Não altere absolutamente nenhuma informação impressa na embalagem. O saco plástico preto de envio e a etiqueta devem permanecer 100% idênticos à foto original, preservando exatamente todos os textos, números, códigos de barras, QR code, logotipos, posição da etiqueta, tamanho, alinhamento, dobras e proporções. Não recrie, não redesenhe, não substitua e não invente nenhuma informação. A etiqueta deve ser tratada como um elemento fixo e imutável durante todo o vídeo.

Crie um vídeo ultrarrealista 9:16, duração de 6 a 8 segundos, estilo UGC autêntico gravado com smartphone. A modelo segura o pacote preto com as duas mãos, mantendo a etiqueta sempre totalmente voltada para a câmera.

Nos primeiros 2 segundos, a modelo aproxima o pacote diretamente em direção à lente até que ele ocupe 100% do enquadramento, cobrindo completamente a câmera, como uma transição natural. Durante essa aproximação extrema, as informações da etiqueta devem permanecer exatamente iguais à imagem de referência, sem nenhuma distorção, alteração ou troca de caracteres.

Em seguida, a modelo afasta o pacote novamente até a posição inicial, trazendo-o em direção ao próprio corpo, sempre mantendo a mesma face do pacote voltada para a câmera. Assim que o pacote retorna ao enquadramento normal, ela faz um sorriso discreto, espontâneo e natural, transmitindo a sensação genuína de quem acabou de receber uma encomenda.

Movimentos realistas das mãos e dedos, respiração sutil, microexpressões naturais, textura real da pele, fios soltos de cabelo e postura relaxada. Estética de vídeo de celular, com leves tremores naturais das mãos, pequenas variações de foco automático, compressão típica de redes sociais, iluminação ambiente suave e profundidade de campo realista.

Sem falas. Sem movimentação labial sincronizada. Sem textos na tela. Sem narração. Apenas música ambiente suave. Ritmo natural e levemente dinâmico, sem efeito de câmera lenta. Resultado final com aparência de um vídeo UGC real, sem artefatos de IA.

#### REGRAS CRÍTICAS:

A etiqueta é um elemento bloqueado e imutável.

Todos os textos da etiqueta devem permanecer exatamente iguais à foto original.

Nenhuma letra, número, código de barras ou QR code pode ser alterado.

Não gerar novas informações de envio.

Não modificar o pacote quando ele estiver próximo da lente.

Priorizar a fidelidade absoluta à imagem de referência acima de qualquer efeito visual.

---

Se estiver usando o Flow, recomendo acrescentar esta frase no final, porque ele costuma alterar etiquetas quando há aproximação extrema:

“Reference image lock strength: maximum. Preserve package label pixel-for-pixel identical to the source image throughout the entire sequence, including close-up shots.”

PROMPT -A realistic female influencer stands indoors holding a sealed plastic shipping mailer package (polymailer) with both hands. The package looks like a typical TikTok Shop,

Shopee, Temu or online shopping delivery bag. The entire video is completely silent. No speaking, no narration, no lip movement.

The video begins with the plastic package very close to the camera lens. She slowly pulls it back, revealing herself while keeping the package as the main focus. She naturally squeezes the package to show its texture, rotates it slowly, displays the front, back, shipping label, corners and details.

She carefully tears open the plastic packaging using her hands, creating realistic movements and natural anticipation. She gradually removes the product from inside the mailer while keeping it visible to the camera. The product reveal feels authentic and unforced.

Natural hand movements, realistic finger interaction, subtle breathing motion, relaxed posture, neutral facial expression, organic body language. PROMPT - Create a 10-second ultra-realistic vertical 9:16 transformation video using the provided reference images.

REFERENCE IMAGE 1:

Defines the model, shaker bottle, initial clothing, environment, lighting, camera angle, framing, body proportions, face, hair, and all other visible details.

## REFERENCE IMAGE 2:

Defines ONLY the exact outfit the model must wear AFTER the transition.

This prompt must work with ANY model, ANY shaker bottle, ANY initial outfit, ANY final outfit, and ANY environment.

## ABSOLUTE CONSISTENCY:

Preserve the EXACT SAME model identity throughout the entire video.

Preserve her exact face, facial features, skin tone, hair, body proportions, and overall appearance.

Preserve the EXACT shaker bottle from Reference Image 1.

Do NOT redesign, recolor, resize, replace, deform, or modify the shaker bottle.

Preserve the original environment, lighting, perspective, camera position, and background.

The model is ALREADY STANDING at the beginning.

## [0–2 SECONDS — SHAKER]

The standing model naturally holds the exact shaker bottle from Reference Image 1.

She quickly shakes the shaker bottle several times with realistic wrist, arm, and liquid movement.

She smiles naturally while looking toward the camera.

She then brings the shaker toward the camera.

## [2–3 SECONDS — TRANSITION]

She quickly pushes the shaker directly toward the camera lens.

The shaker gets EXTREMELY CLOSE until it completely covers 100% OF THE CAMERA VIEW.

## CRITICAL:

The shaker must physically cover the ENTIRE frame.

At the exact moment the lens is completely covered, perform an INSTANT seamless wardrobe transformation.

During this hidden moment, replace ONLY her clothing with the EXACT outfit shown in Reference Image 2.

The model, face, hair, body, environment, lighting, camera, and background MUST NOT change.

When the shaker moves away from the lens, the model is suddenly wearing the exact outfit from Reference Image 2.

The shaker is no longer in her hands after the transition.

No visible morphing.

No clothes appearing gradually.

No floating clothes.

The clothing transformation happens ONLY while 100% of the camera is covered.

[3–4 SECONDS — SHOCKED REACTION]

Immediately after the transition, she looks down at herself.

She reacts dramatically with a surprised, shocked expression.

She quickly places BOTH hands against the sides of her face/head in an excited, playful "OMG!" reaction.

Her eyes widen naturally as she realizes her outfit has changed.

[4–5 SECONDS — BICEPS POSE]

She immediately smiles and raises BOTH arms into a playful gym-style double-biceps pose.

She flexes both biceps confidently for a brief moment while looking toward the camera.

Natural athletic pose.

Realistic arms and anatomy.

[5–6 SECONDS — SHOW THE OUTFIT]

She lowers her arms and naturally runs both hands over the outfit.

Her hands physically touch the fabric, briefly showing the fit, texture, and shape of the clothing.

DO NOT alter the clothing while she touches it.

[6–8 SECONDS — TURN + SQUAT]

She smoothly turns around until her BACK is facing the camera.

She performs ONE quick, controlled gym-style squat.

She lowers naturally into the squat and immediately rises back to a full standing position.

Realistic hip, knee, leg, and body movement.

Natural balance and anatomy.

She must NOT remain crouched.

[8–10 SECONDS — CLOSE-UP + FINAL REACTION]

Immediately after standing back up, she turns toward the camera and quickly walks VERY CLOSE to the lens.

Her face becomes the main focus of the frame.

She looks directly into the camera.

She gives ONE playful wink.

She smiles naturally.

Then she blows ONE kiss directly toward the camera to finish the video.

IMPORTANT TIMING:

All actions must happen FAST, fluidly, and naturally so the COMPLETE sequence finishes within EXACTLY 10 seconds.

Do NOT skip the final close-up, wink, smile, or kiss.

CRITICAL REFERENCE LOCK:

REFERENCE IMAGE 1 = absolute source of truth for the model, shaker, environment, lighting, camera and initial appearance.

REFERENCE IMAGE 2 = absolute source of truth ONLY for the final outfit.

Do NOT change the model's identity.

Do NOT change her face.

Do NOT change her hair.

Do NOT change her body proportions.

Do NOT change the environment.

PROMPT - Create an ultra-realistic 10-second vertical 9:16 fashion transformation video using TWO reference images.

REFERENCE IMAGE 1:

Defines the EXACT model, face, hair, skin tone, body proportions, initial clothing, environment, lighting, camera angle, framing, perspective, and the wine glass in her hand.

REFERENCE IMAGE 2:

Defines ONLY the EXACT outfit/clothing that the model must be wearing AFTER the transition.

IMPORTANT:

The outfit from Reference Image 2 can be ANY type of clothing. Reproduce it exactly, preserving its design, colors, print, fabric, texture, cut, fit, proportions, and all visible details.

CAMERA:

Keep the camera completely FIXED and stationary throughout the entire video. No zoom, pan, tilt, reframing, camera shake, or perspective changes.

[0–2.5s — DRINK]

The model naturally raises the wine glass already in her hand to her lips.

She takes ONE realistic sip while looking naturally toward the camera.

She lowers the glass and smoothly stands up.

Her movements must be fast, fluid, natural, and realistic.

[2.5–4.5s — TOAST + FULL LENS COVER]

After standing, she smiles and makes a playful toast directly toward the camera.

She quickly moves the wine glass straight toward the camera lens.

CRITICAL TRANSITION:

The GLASS AND THE LIQUID INSIDE IT must progressively fill the frame.

The wine/liquid must visually cover 100% OF THE CAMERA VIEW.

At the transition point, NOTHING from the model, room, background, or previous outfit may remain visible.

The entire screen must be completely covered by the dark translucent liquid/glass effect.

Use this exact full-frame liquid coverage as the transition mask.

[4.5s — INSTANT OUTFIT TRANSFORMATION]

WHILE the lens is 100% covered, instantly transform the model's clothing into the EXACT outfit from Reference Image 2.

The wine glass completely disappears during the covered transition.

When the view clears, the model is standing in the EXACT SAME POSITION and environment, but she is now wearing the outfit from Reference Image 2.

She must NOT be holding the wine glass anymore.

No morphing.

No visible clothing transformation.

No floating clothes.

The wardrobe change happens ONLY while the camera is completely covered.

[4.5–10s — REACTION + PRODUCT SHOWCASE]

Immediately after the transition, she looks DOWN at her new outfit with a genuinely shocked and pleasantly surprised facial expression.

She looks over the clothing and naturally runs one hand over her body and across the fabric, presenting how the outfit fits.

Her hand physically interacts with the fabric with realistic pressure and movement.

She then looks back toward the camera.

She naturally moves a section of her hair behind one ear.

She smiles.

She gives ONE playful wink directly toward the camera.

Finally, she points DOWN clearly with one finger and holds the downward pointing gesture briefly as a CTA.

#### IMPORTANT CONSISTENCY RULES:

Preserve the EXACT SAME model identity throughout the entire video.

Do NOT change her face, facial features, skin tone, hairstyle, body shape, body proportions, age, or identity.

Preserve the EXACT environment, lighting, camera position, framing, perspective, and background from Reference Image 1.

After the transition, reproduce the EXACT clothing from Reference Image 2.

Do NOT redesign, simplify, recolor, reinterpret, or invent details on the clothing.

The wine glass must disappear completely after the transition and must NOT return.

All movements must fit naturally within EXACTLY 10 seconds.

Ultra-realistic human anatomy.

Ultra-realistic hands and fingers.

Natural facial expressions.

Realistic fabric physics.

Realistic glass and liquid physics.

Smooth continuous motion.

Single continuous shot.

No cuts.

No digital zoom.

No scene changes.

No additional people.

No added objects.

No text.

No subtitles.

No logos or watermarks added.

No audio.

PROMPT- Sem alterar nenhum detalhe da peça nem cor, voz feminina.

Prompt (English):

Create an ultra-realistic fashion video using the reference image. The model should move naturally while the fitness outfits smoothly change colors one by one, matching exactly the color references from the first image. Do not change any details of the outfit design, fabric texture, shape, logo, stitching, or fit. Keep the product authenticity and original appearance.

The transitions between colors should happen dynamically as the model moves, with realistic lighting, shadows, fabric movement, and a premium fitness fashion advertisement style. Maintain a realistic human body, natural movements, and a high-quality e-commerce video look.

Add a Portuguese voiceover saying:

“Não usa esse conjunto se você não quer que perguntem se você usou anabolizante para ficar com essa bunda GG. Além de modelar o corpo, vai te deixar uma grande gostosa. Confere no carrinho.”

Style: ultra-realistic, cinematic, TikTok Shop product advertisement, 9:16 vertical video, high detail, realistic motion.

PROMPT - Sim. O ponto principal é deixar explícito que a roupa é copiada visualmente para a modelo, e NÃO removida do manequim. Use esta versão:

Create a 10-second ultra-realistic continuous fashion transformation video using the provided image as the exact visual reference. Preserve the model, mannequin, clothing, environment, lighting, camera angle, proportions, colors, textures, and all original details.

The model is standing naturally beside the mannequin. She first looks at the clothing displayed on the mannequin, then turns slightly toward it and points at the outfit with a natural hand gesture.

She then looks back at the camera and walks naturally toward it. As she approaches, she raises one hand toward the lens until her palm progressively fills the entire frame. Her hand must completely cover 100% of the camera lens. For a brief moment, the entire frame is covered by her hand.

During this fully covered moment, perform a seamless wardrobe transition.

When she removes her hand and steps naturally back into the scene, she is now wearing an identical duplicate of the outfit displayed on the mannequin.

**IMPORTANT:** The original outfit must remain completely unchanged on the mannequin before, during, and after the transition. Do NOT remove, transfer, replace, alter, or make the mannequin's clothing disappear. The mannequin must continue wearing the exact same complete outfit throughout the entire video. The transformation creates a visual duplicate of the mannequin's outfit on the model, so after the transition BOTH the model and the mannequin are wearing the same outfit at the same time.

The outfit worn by the model must accurately match the mannequin reference: same design, colors, fabric, texture, pattern, stitching, accessories, details, proportions and overall appearance. Only adapt the fit naturally to the model's body.

After the reveal, the model returns beside the mannequin and briefly presents the outfit naturally, allowing the viewer to clearly see both matching outfits simultaneously: one on the model and the original one still on the mannequin.

Keep the mannequin completely stationary and visually consistent throughout the entire video. Do not modify its position, shape, clothing or appearance.

Ultra-realistic human movement, realistic walking, natural hand and finger anatomy, realistic fabric physics, natural hair movement, consistent facial identity and body proportions, stable background and consistent lighting. Single continuous shot, fixed camera, no cuts, no morphing, no teleportation, no added objects, no text, no captions, no added logos, no environment changes. The hand-cover transition must completely conceal the wardrobe change. Vertical 9:16, realistic smartphone video, 10 seconds.

**FINAL FRAME REQUIREMENT:** model wearing the duplicated outfit + mannequin still wearing the original identical outfit, both clearly visible together in the same frame.

REFERENCE LOCK

Use the uploaded image as the ABSOLUTE reference.

Preserve exactly throughout the entire video:

- the model's identity
- face
- hairstyle
- skin tone
- body proportions
- clothing

- accessories
- background
- lighting
- camera angle

The clothing item shown in the reference image is the ABSOLUTE product reference.

It must remain IDENTICAL from the first frame until the last.

Do not modify:

- design
- fabric
- color
- texture
- stitching
- folds
- print
- embroidery
- labels
- proportions
- thickness
- shape

Do not replace, redesign, reinterpret or morph the garment at any time.

---

## ACTION

The model stands naturally facing the camera while holding the exact folded clothing item with both hands at waist level.

She first presents the garment naturally to the camera for a brief moment so every detail is clearly visible.

Without changing the garment, she immediately compresses it using both hands, naturally crumpling the fabric into a compact ball while preserving the exact same garment.

The wrinkles, folds and compression must be physically accurate.

Immediately after compressing it, she performs one quick, natural forward throwing motion.

She actually throws the same crumpled garment directly toward the camera.

The garment leaves her hands naturally.

Its flight follows realistic physics with correct inertia, gravity, air resistance and slight rotation.

The garment rapidly becomes larger as it approaches the lens.

The exact same garment physically strikes the camera lens.

Upon impact, the garment completely covers 100% of the frame, creating a practical lens-cover transition.

The garment must be the exact same object before, during and after the throw.

No morphing.

No replacement.

No disappearing.

No duplication.

---

## REALISM

Ultra-realistic human movement.

Natural arm acceleration.

Realistic wrist motion.

Correct release timing.

Perfect finger animation.

Natural body follow-through.

Realistic fabric compression.

Accurate cloth physics.

Realistic gravity.

Natural air resistance.

Natural wrinkles.

Natural fabric inertia.

---

## CAMERA

Vertical 9:16.

Handheld smartphone.

Very subtle handheld micro-movements.

No zoom.

No camera shake.

No reframing.

The camera remains stationary while the garment is thrown toward the lens.

---

## NEGATIVE PROMPT

No CGI.

No AI artifacts.

No morphing.

No product replacement.

No different garment.

No fabric transformation.

No color shift.

No texture change.

No duplicated clothing.

No disappearing object.

No floating fabric.

No unrealistic cloth simulation.

No robotic movement.

No broken anatomy.

No extra fingers.

No deformed hands.

No cuts.

No transitions.

No scene changes.

No text.

No subtitles.

No watermark.

No logos.

---

## FINAL GOAL

Create an ultra-photorealistic 6-second smartphone video where the model briefly showcases the exact clothing item from the reference image, naturally crumples the same garment into a compact ball with both hands, then throws that exact garment directly toward the camera until it physically hits the lens and completely covers 100% of the frame, with flawless realism, perfect cloth physics, and absolute product consistency from beginning to end.

"The video starts with the avatar's hand covering the camera lens, creating a natural TikTok transition. She slowly removes her hand directly away from the camera, clearly uncovering the lens and revealing herself. She takes a small natural step backward, settles into a relaxed posture and presents the exact outfit shown in IMAGE 1. She maintains natural eye contact with the camera and a soft confident expression. The avatar and outfit must remain completely unchanged.",

"2.0–4.0 seconds — IMAGE 2",

"Clean cut transition to a completely different natural moment based on IMAGE 2. The avatar naturally shifts her weight and gently turns her body slightly to show another angle of the exact outfit shown in IMAGE 2. She makes a small natural hair movement and maintains a relaxed, confident influencer expression. The avatar's appearance and the outfit must remain exactly as shown in IMAGE 2, with no alterations.",

"4.0–6.0 seconds — IMAGE 3",

"Clean cut transition to the final moment based on IMAGE 3. The avatar looks naturally at the camera with a soft confident smile and performs a clear but natural call-to-action gesture by pointing downward with her index finger, as if indicating the shopping cart or purchase link below the video. The gesture should be brief, natural and elegant. After pointing downward, her hand relaxes naturally. The avatar and the exact outfit shown in IMAGE 3 must remain completely unchanged.",

"All movements must be slow, smooth and realistic. Include natural blinking, subtle breathing, realistic hair movement, realistic hands and fingers, natural fabric physics and

premium influencer aesthetic. The three images must create three distinct visual moments, with different natural movements in each section.",

PROMPT - UGC vertical video, 9:16, highly realistic, natural smartphone footage, completely silent, no dialogue, no speech, no talking, no audio, mute video.

Exact same person from the reference image, maintaining the same face, hairstyle, appearance, accessories and overall identity.

She is wearing the outfit shown in the reference image and holding the winter pajama/robe from the reference image in front of her body, clearly presenting the product to the camera.

She gently swings the clothing item from side to side in a playful, natural rhythm (left to right, right to left), slightly moving her arms and shoulders while keeping a friendly, confident and inviting expression.

After 2–3 natural swings, she performs a quick energetic jump in place, creating a seamless fashion transition moment.

During the jump, the clothing item disappears instantly and seamlessly, transforming directly into the pajama outfit appearing perfectly on her body. The transition must happen in a split second, like a magical blink effect, with absolutely no visible changing clothes, no hands covering the transition, no cuts, no camera changes, no glitches.

When she lands, she is already wearing the cute winter pajama set from the reference image, perfectly fitted on her body. The viewer should feel like the outfit appeared instantly with the jump.

Maintain perfect continuity: same person, same face, same hair movement, same background, same lighting, same camera position. Realistic fabric physics, natural hair bounce, smooth motion blur, authentic viral UGC fashion transition.

After landing, she smiles naturally and makes subtle movements showing the pajama fit, softness and details.

Soft indoor lighting, realistic smartphone camera movement, premium UGC advertising style, highly detailed, 4K quality, realistic textures, silent video.

A personagem feminina permanece usando exatamente a roupa da imagem de referência. UMcena começa não mesmo ambiente da imagem. O personagem se aproxima lentamente da câmera mantendo um sorriso gentil, confortável e contato visual direto. Ao chegar na próxima lente, estende-se naturalmente a mão aberta em direção à câmera até que a palma cubra completamente a lente por um breve instante. O gesto é suave, contínuo e orgânico, como uma transição transmitida por uma influenciada. Em seguida retira lentamente a mão da frente da lente e começa a recuar alguns passos de maneira natural, permanecendo sempre externo para a câmera. À medida que se afasta, o enquadramento passa a revelar todo o olhar, incluindo claramente ocurto. Quando para na nova posição, abra um sorriso expressivo, gentil e carismático. Faz um pequeno ajuste delicado no cabelo com uma das mãos, de forma ocasional e cotidiana, sem exagerar no movimento. Logo depois realizamos uma rotação suave do corpo, apenas o suficiente para mostrar diferentes ângulos do caimento da roupa e docurto, retornando a uma postura confortável sem completar uma volta inteira. Sua respiração permanece sutil e natural durante toda a cena. Pequenas microexpressões reforçam a sensação de simpatia, leve felicidade e espontaneidade, como alguém satisfeito com o olhar. A cena termina com o personagem parado em posição relaxada, olhando para a câmera com um sorriso acolhedor, exibindo naturalmente todo o conjunto da roupa. PROMPT - Use the uploaded image as the ONLY identity reference. Preserve the exact same face, facial proportions, eyes, eyebrows, eyelashes, lips, nose, jawline, skin tone, hairstyle, hair color, body shape, gray strapless dress, jewelry, bedroom, mirror, smartphone, lighting and framing. Do not change any identity details.

The video must look like a genuine handheld mirror selfie recorded on a smartphone. Natural indoor lighting, realistic skin pores, subtle breathing, natural eye moisture, occasional blinking, and physically accurate hair movement with proper gravity and inertia. The dress must react naturally to every movement with realistic folds, stretching and fabric weight.

Sequence:

She begins with a warm, friendly smile while looking at her reflection. She slowly takes one natural step toward the mirror, making the camera view feel slightly closer. While approaching, she gently slides her free hand across the front of the gray dress from the upper chest to the waist, naturally smoothing the fabric and emphasizing its texture. Without stopping, she turns about 45–60 degrees to one side to briefly show the side profile of the dress, keeping her smile and posture relaxed. She then smoothly turns back to face the mirror, looks directly toward the phone, and finishes by pointing downward with her free hand while maintaining the same friendly smile, as if indicating a purchase link below.

Everything happens in one continuous take with smooth, realistic timing. No cuts, no transitions, no morphing, no face distortion, no body changes, no clothing changes, no extra people, no text, no watermark. Ultra-photorealistic UGC, realistic smartphone autofocus, subtle handheld movement, perfect temporal consistency, natural human motion and accurate physics.

PROMPT - Use the uploaded image as the ONLY identity reference. Preserve the exact

same face, facial proportions, eyes, eyebrows, eyelashes, lips, nose, jawline, skin tone, hairstyle, hair color, body proportions, tattoos, bedroom, mirror, lighting, smartphone and clothing. Do not change the outfit, background or camera position.

The movement must be 100% physically realistic with correct gravity and inertia. Hair follows natural momentum with slight secondary motion. Eyes remain anatomically correct with natural blinking, realistic eye moisture and subtle eye tracking. Skin preserves pores and texture. Fingers keep accurate anatomy with proper grip on the dress.

She is recording a genuine mirror selfie with a smartphone. She smiles softly while holding the gray dress by the top edge. She quickly but smoothly shakes the dress left and right several times, making the entire fabric ripple naturally with realistic folds, weight, inertia and gravity. The movement is energetic but controlled, with no clipping, stretching or fabric distortion. Her wrist, arm and shoulder react naturally to the dress's momentum while her body remains almost still.

Immediately after finishing the shaking motion, she smoothly raises the smartphone toward the mirror until it nearly fills the frame, creating a realistic close-up as if ending the recording. The movement is continuous, fluid and handheld, with subtle natural camera shake, realistic autofocus adjustment and motion blur.

Vertical 9:16. One continuous take. No cuts, no transitions, no morphing, no face changes, no body changes, no object replacement, no text, no watermark, no extra people. Ultra-photorealistic smartphone UGC, natural indoor lighting, realistic physics, perfect temporal consistency, cinematic quality while maintaining authentic social media realism.

She slightly tilts her head.

Natural blink.

Tiny eyebrow movement.

She subtly lifts both clothing pieces about 5–10 cm as if presenting them.

She glances briefly at the clothing.

Looks back into the camera.

---

She begins walking slowly toward the camera.

Three short relaxed steps.

Normal human walking speed.

No runway walk.

No exaggerated hip movement.

Minimal vertical body bounce.

Natural shoulder motion.

Arms remain lifted while holding both garments.

The clothing swings gently from each step.

Realistic fabric gravity.

Natural wrinkles.

---

As she approaches the camera she gradually raises both clothing pieces higher.

The garments occupy more of the frame.

Her elbows extend naturally.

She keeps looking at the camera.

Soft genuine smile.

Natural blinking.

PROMPT - @Create image Use the uploaded reference images of the woman ONLY to preserve her exact facial identity, hairstyle, hair color, facial proportions, skin tone, body proportions, hands, legs, and overall appearance. She must remain exactly the same woman in every generated image. Do not alter her face, hair, age, body shape, or natural features.

Create an ultra-photorealistic 8K vertical smartphone photograph.

The woman is standing indoors inside a modern luxury bedroom with warm ambient lighting. The room features wooden wall panels, a modern wardrobe, beige walls, premium wood flooring, a partially visible bed with white bedding, and soft cinematic lighting that creates a cozy premium atmosphere.

She is wearing the exact same black off-the-shoulder bodycon mini dress shown in the clothing reference.

Dress details:

- Matte black stretch fabric.
- Off-the-shoulder straight neckline exposing both shoulders.
- Long fitted sleeves.
- Bodycon fit hugging the waist and hips naturally.
- Slight ruching along the sides.
- Mini length ending at the upper thighs.
- No cutouts.
- No patterns.
- No logos.
- No accessories attached to the dress.

Her pose is natural and confident, standing facing the camera with relaxed shoulders and a subtle S-shaped posture. Both arms rest naturally beside her body. She has a soft genuine smile while looking directly into the camera.

Hair remains exactly like the reference images:

- Long dark brown hair.
- Soft natural waves.
- Healthy shine.
- Loose over the shoulders.

She is wearing minimal elegant makeup with natural skin texture, realistic pores, soft blush, defined eyebrows, and nude lips.

Lighting is warm indoor ambient lighting with soft shadows, realistic skin tones, and premium hotel-style color grading.

Camera:

- Eye-level perspective.
- Full-body framing.
- 85mm lens.
- Shallow depth of field.
- Ultra-realistic DSLR quality.
- Vertical 9:16 composition.

Highly detailed realistic fabric texture, realistic wrinkles, accurate body proportions, realistic hands, realistic fingers, natural posture, natural expression.

PROMPT - Use the attached reference image as the primary identity reference. Keep exactly the same woman, preserving her face, hairstyle, body proportions, skin tone, makeup, expression, and overall identity throughout the entire video. Do not recreate or replace her.

The video begins as if recording has just started. The first second has a very subtle camera adjustment, as though the phone has just been positioned on a table or tripod, but the phone itself is never visible. The framing remains fixed the entire time.

She is already close to the camera. She smiles softly, then naturally walks backward a few steps until her full body is visible.

She never speaks.

She behaves like a real woman casually filming a fashion video. She gently smooths the fabric around her waist, lightly pulls the hem of the dress into place, adjusts the neckline naturally, runs her fingers through her hair, tucks a strand behind one ear, smiles, shifts her weight from one leg to the other, and slowly turns to show the front, side, and back of the dress. Every movement is subtle, relaxed, spontaneous, and natural.

After presenting the red dress, she walks toward the camera and briefly covers the lens with her hand, creating a seamless transition. When her hand moves away, she is wearing the same dress in white. She repeats the same natural presentation.

She then approaches the camera again, covers the lens with her hand for a second, and when the image returns she is wearing the same dress in black, continuing the same relaxed movements.

The only thing that changes is the color of the dress (red → white → black). Everything else remains identical: the woman, her face, hairstyle, body, background, lighting, framing, and the dress design.

Vertical 9:16, ultra-realistic smartphone-style fashion video, premium clothing showcase, realistic body language, natural breathing, subtle hair movement, soft lighting, no dialogue, no text, no logos, no watermarks, the smartphone is never visible at any point in the video.

Everything else must remain **\*\*IDENTICAL\*\*** to the cleaned master reference:

- \* Exactly the same brown fitted short-sleeve top.
- \* Exactly the same pose.
- \* Exactly the same body posture.
- \* Exactly the same head angle.
- \* Exactly the same facial expression and smile.
- \* Exactly the same arm position.
- \* Exactly the same hand and finger placement.
- \* Exactly the same way of holding the blue jeans.
- \* Exactly the same jeans size, shape, folds, texture and position.
- \* Exactly the same camera angle.
- \* Exactly the same perspective.
- \* Exactly the same framing and crop.
- \* Exactly the same lighting.

- \* Exactly the same shadows.
- \* Exactly the same room.
- \* Exactly the same background.
- \* Exactly the same distance from the camera.
- \* Exactly the same composition.

Do **\*\*NOT\*\*** change the clothing in any way. The blonde AI model must wear the exact same brown fitted short-sleeve top shown in the master reference.

The final image must look as if the original woman was perfectly replaced by the blonde AI model, while every other element remains unchanged. It should appear as an original photograph, with no indication that it came from a TikTok screenshot.

Ultra-realistic photography, 8K, DSLR quality, fashion catalog, natural skin texture, razor-sharp focus, realistic lighting, photorealistic.

PROMPT > Thais Trufas De Divas:

Use the first image ONLY as an environment + DIAGONAL BACK POSE reference. Use the second image as the ONLY avatar identity reference. Use the third image ONLY as the clothing reference (if provided). IMPORTANT CONTEXT: The first image may contain a model. That model must be used ONLY to extract: • Camera angle • Body orientation • Diagonal back pose • Hair placement • Distance to camera • Framing • Perspective. The identity of the model in the first image must NEVER be reused.

ENVIRONMENT + DIAGONAL BACK POSE EXTRACTION (CRITICAL) ————— • Extract ONLY the

environment from Image 1 • Completely remove the original model from Image 1 • The environment must look originally empty FROM IMAGE 1, PRESERVE EXACTLY: • Camera angle • Camera height • Camera tilt • Distance from camera to subject • Slight diagonal back-facing body orientation • Natural torso rotation • Pose silhouette • Framing and crop • Perspective and depth • Lighting direction and softness • Hair direction and resting position behind the back • Natural shoulder positioning • Head angle and neck positioning. The avatar inserted later MUST match this exact diagonal pose and

angle. DIAGONAL BACK VIEW AVATAR INSERTION (CRITICAL) ————— • Insert the avatar from Image 2 into the

extracted environment • The avatar MUST: — Keep the same identity — Keep the same face structure — Keep the same body proportions — Keep the same realism level — Preserve natural hair texture and realism • The avatar MUST be positioned EXACTLY like the reference pose from Image 1: — Body turned slightly diagonally — NOT fully straight toward the back — NOT fully side-facing — Natural relaxed torso rotation — Slight angled shoulder positioning — One shoulder slightly closer to the camera — Natural hip alignment following the torso angle —

Relaxed arms beside the body– Hair naturally resting along the back– Maintain identical camera distance and framingThe pose should feel naturally candid and realistic, like someone casually standing with the body slightly angled away from the camera.

> Thais Trufas De Divas:

—————CLOTHING APPLICATION (IF IMAGE 3 EXISTS)—————• Apply the clothing from Image 3 onto the avatar• Preserve back clothing details exactly• Preserve prints, textures, logos, and rear design placement• Do NOT describe the clothing• Replicate it exactly as provided• Same fit logic, same realism• No creative changes—————LIGHTING & INTEGRATION—————• Match environment lighting exactly• Natural shadows consistent with Image 1• No studio lighting• No cinematic effects• Preserve realistic indoor ambient light behavior• Natural contact shadows on body and clothing—————STRICT RULES—————• Do NOT recreate the original model• Do NOT change avatar identity• Do NOT stylize• Do NOT make the body perfectly straight• Do NOT create a fully back-facing pose• Do NOT create a fully side-facing pose• Preserve the slight diagonal body angle from Image 1• Do NOT add text, UI, logos, or watermarks• Do NOT alter framing or crop• Do NOT change clothing print positioning—————ULTRA REAL RENDER ENGINE (CRITICAL)—————• Ultra realistic photographic lighting• Directional indoor light source (slightly from one side)• Soft natural shadow falloff• Natural depth separation between subject and background• Subtle depth of field (very light, realistic)• Visible skin microtexture (natural pores, no exaggeration)• Realistic skin tone variation (no flat color)• Natural highlight and shadow gradients• Realistic hair strands and natural hair shine• 50mm lens equivalent perspective• True camera dynamic range• No flat lighting• No overexposure• No artificial smooth skin• No CGI look• No beauty filter• No plastic effect• Real camera realism• Mild natural contrast• Slight natural texture grain (very subtle)FINAL RESULT—————A realistic scene where:• The environment and diagonal back pose come from Image 1• The identity comes from Image 2• The clothing (if any) comes from Image 3• The avatar perfectly replaces the original model's position, angle, diagonal torso rotation, and framing• The rear clothing details remain fully visible and realistic• The pose feels natural, slightly angled, and candid instead of perfectly straight facing backward• The result looks like the avatar was originally photographed in that environment naturally

PROMPT - Use Image 1 as the BASE avatar image.Use Image 2 ONLY as the clothing/product reference.TASK:The avatar in Image 1 must HOLD the clothing/product from Image 2 naturally in front of the body exactly like a real person presenting a product for sale.IMPORTANT:• The clothing/product must remain fully visible in the hands• The avatar is

NOT wearing the clothing• The avatar is holding the product naturally with both hands like a real showcase/reference pose• Preserve the exact product appearance from Image 2• Do NOT redesign, stylize, or modify the product in any way• Same fabric, shape, proportions, folds, colors, and details• No creative interpretation

**HAND & HOLDING REALISM (CRITICAL):**• Hands must interact naturally with the product• Realistic grip pressure and finger placement• Natural fabric hanging behavior according to gravity• Realistic tension where the hands hold the clothing• No floating product• No clipping fingers• No distorted anatomy• Product must feel physically present in the scene

**PRODUCT POSITIONING:**• Product centered naturally in front of the torso• Similar holding presentation style as the reference image• Arms positioned naturally and symmetrically• Maintain realistic shoulder and elbow positioning• Clothing should hang naturally downward

**AVATAR LOCK (CRITICAL):**• Do NOT change face• Do NOT change body shape or proportions• Do NOT change skin tone• Do NOT change hair• Do NOT change pose structure except necessary arm adjustments for holding the product• Do NOT change facial expression• Do NOT change background• Do NOT beautify or enhance

**LIGHTING & SCENE MATCH:**• Match original lighting perfectly• Match original shadows and reflections• Product lighting must integrate naturally into the scene• Preserve original environment realism

**FINAL QUALITY:**• Ultra photorealistic• Looks like a real phone photo• Natural human anatomy• Natural hand interaction• No AI artifacts• No fake-looking fingers• No floating objects• High resolution• Clean realistic result

**EXCLUSIONS:**• No text• No extra accessories• No logos added artificially• No watermarks• No filters• No cinematic effects• No stylization

PROMPT - PROMPT SEGURANDO A CAMISETA:

Use a modelo e a peça das imagens de referência, preservando integralmente suas características originais. A modelo deve retirar as próprias mãos dos bolsos e usar somente as duas mãos dela para segurar a peça em frente ao corpo, na altura do peito. A peça deve ficar totalmente de frente para a câmera, centralizada e completamente visível, sem cobrir o rosto. Cada mão deve segurar uma lateral superior da peça, com postura natural.

Preserve fielmente todos os detalhes da roupa da imagem de referência, incluindo cores, estampas, modelagem e textura do tecido. Não modificar nenhum elemento da peça.

Imagem ultra realista, formato vertical 9:16, iluminação profissional suave, câmera frontal estática, foco na peça e na modelo, qualidade 8K, aparência autêntica para TikTok Shop.

**NEGATIVE PROMPT:** mãos extras, braços extras, dedos deformados, mãos no bolso, outra pessoa, roupa vestida, alterações na peça, texto na tela, distorções anatômicas e aparência artificial de IA.

PROMPT - Create an ultra-realistic vertical 9:16 UGC-style product video, exactly 10 seconds long, using the provided reference images.

IMPORTANT:

This prompt must work with ANY T-SHIRT shown in the reference images.

Do NOT describe, invent, replace or modify the shirt's color, print, artwork, text, design, fabric or packaging.

REFERENCE IMAGE 1 = the packaged shirt.

REFERENCE IMAGE 2 = the exact unpackaged shirt that must appear after the transition.

Preserve BOTH references exactly.

CAMERA:

Fixed top-down POV camera looking at the packaged shirt lying on a bed.

Maintain the same environment, lighting and perspective.

Only ONE feminine hand appears.

No face or body visible.

0-3 SECONDS — LIGHTER + FIRE TRANSITION:

The packaged shirt is lying naturally on the bed exactly as shown in reference image 1.

One feminine hand enters holding a small lighter.

She activates the lighter directly beside the plastic package.

At the moment the flame visually touches the plastic, an intense CINEMATIC VFX FIRE TRANSITION begins.

The fire rapidly spreads visually across the entire plastic package.

The flames become dramatically larger and rise upward toward the camera lens.

The fire grows until BRIGHT FLAMES COMPLETELY COVER THE ENTIRE CAMERA FRAME.

For a brief instant, the entire screen is filled with moving flames.

IMPORTANT:

This is a cinematic VFX transition only, not a depiction of a real-world burning procedure.

3–4 SECONDS — TRANSFORMATION:

While the flames completely cover the camera, perform a seamless hidden transition.

As the flames rapidly disappear from the frame, the plastic package has completely vanished.

The EXACT T-SHIRT FROM REFERENCE IMAGE 2 is now revealed lying fully opened and neatly displayed on the bed.

The entire shirt must be visible.

It must appear instantly through the fire transition, as if the flames transformed the packaged shirt into the opened shirt.

The shirt is completely clean, perfect and undamaged.

NO burned areas.

NO ash.

NO smoke.

NO melted plastic.

NO scorch marks.

Most importantly:

DO NOT invent a new shirt.

DO NOT recreate the design differently.

DO NOT modify the print.

DO NOT modify any text.

DO NOT modify the colors.

The revealed shirt must match REFERENCE IMAGE 2 EXACTLY.

4–6 SECONDS — HAND REVEALS FABRIC:

The SAME feminine hand gently slides across the opened shirt from top to bottom.

She softly smooths the fabric with her palm.

The fabric reacts naturally underneath her hand with realistic folds and movement.

6–8 SECONDS — PRINT CLOSE-UP:

The camera performs ONE smooth, quick zoom toward the main printed/design area of the shirt.

Show an ultra-detailed close-up of the ORIGINAL print and fabric texture.

Do NOT regenerate or alter the artwork.

After the close-up, smoothly zoom back out until the entire shirt is visible again.

8–10 SECONDS — CTA:

The same hand enters clearly into the lower portion of the frame.

She extends ONLY her index finger and points clearly DOWNWARD.

Hold the downward pointing gesture for approximately 2 seconds until the video ends.

ABSOLUTE REFERENCE LOCK:

REFERENCE IMAGE 1 determines exactly how the packaged shirt looks BEFORE the transition.

REFERENCE IMAGE 2 determines exactly how the opened shirt looks AFTER the transition.

Never invent missing details.

Never change the shirt.

Never change its color.

Never change its print.

Never change lettering.

Never change artwork.

Never replace it with another garment.

STYLE:

Ultra-realistic smartphone UGC.

Vertical 9:16.

Exactly 10 seconds.

Realistic feminine hand.

Natural hand movements.

Realistic fabric physics.

Natural bedroom lighting.

Seamless fire-to-shirt transformation.

Dramatic flames covering the entire lens during the transition.

Single continuous visual sequence.

NO person visible.

NO face.

NO extra hands.

NO dialogue.

NO music.

NO subtitles.

NO added text.

NO watermark.

NO additional products.

NO shirt deformation.

NO print deformation.

NO invented print.

NO color changes.

NO burned shirt.

NO fire remaining after the transition.

PROMPT - 0-4 SECONDS — LIGHTER + FIRE TRANSITION:

The packaged shirt is lying naturally on the bed exactly as shown in reference image 1.

One feminine hand enters holding a small lighter.

She activates the lighter directly beside the plastic package.

At the moment the flame visually touches the plastic, an intense cinematic VFX fire rapidly spreads across the plastic package.

The flames immediately grow much larger and rush upward DIRECTLY toward the camera lens.

#### IMPORTANT TRANSITION:

The exact instant the large flames strongly HIT and completely COVER the camera lens, perform an IMMEDIATE hard transition to the next scene.

DO NOT show the flames disappearing.

DO NOT show the package transforming gradually.

DO NOT show an intermediate stage.

DO NOT fade between scenes.

FIRE HITS CAMERA → IMMEDIATE CUT → OPENED T-SHIRT.

The very next frame after the fire covers the lens must show the EXACT T-SHIRT FROM REFERENCE IMAGE 2 already completely opened, neatly displayed and fully visible on the bed.

The plastic package is completely gone.

The shirt must be perfectly clean and intact, exactly like reference image 2.

No fire is visible anymore.

No smoke.

No ash.

No melted plastic.

No burned areas.

No scorch marks.

The impact of the flames against the camera acts as the transition mask between the packaged shirt and the fully opened shirt.

Make this transition FAST, STRONG and visually satisfying:

FLAMES RUSH INTO LENS → FRAME FILLED WITH FIRE → INSTANTLY OPENED T-SHIRT.

PROMPT- UNIVERSAL VIDEO PROMPT — ANY CLOTHING ITEM / COMPLETELY  
NEUTRAL ENVIRONMENT / B-ROLL / MAX FIDELITY / REAL SCALE

Use the attached clothing reference image as the ABSOLUTE VISUAL SOURCE OF  
TRUTH.

Create an ultra-photorealistic vertical POV product video (9:16) showing ONLY the exact  
clothing item or items visible in the reference image.

PRODUCT IDENTITY LOCK — HIGHEST PRIORITY:

Automatically identify the exact type and quantity of clothing items visible in the reference.

Preserve exactly the original:

\* type

\* shape

\* proportions

\* real-world scale

\* color

\* print or pattern

- \* fabric

- \* texture

- \* stitching

- \* seams

- \* edges

- \* trims

- \* folds

- \* structural elements

- \* all visible details

Do NOT assume any specific clothing category.

Do NOT add, remove, redesign, simplify, duplicate or reinterpret any element.

The exact same product must remain visually consistent in every shot.

SCENE — COMPLETELY NEUTRAL:

Place the product on a simple, clean, neutral surface.

Use a soft matte surface in beige, off-white, cream or light neutral gray.

The background must remain minimal, uncluttered and visually anonymous.

No identifiable room type.

No bedroom context.

No kids bedroom.

No nursery.

No living room.

No closet.

No dressing room.

No boutique.

No store.

No showroom.

No hotel.

No furniture that suggests a specific location.

No toys.

No books.

No decorations.

No plants.

No wall art.

No personal belongings.

No lifestyle props.

The environment must NOT suggest age, gender, social class, country or specific lifestyle.

Only a subtle neutral background with realistic natural depth.

The PRODUCT is always the dominant visual element.

## VIDEO STRUCTURE — 8 SECONDS:

### 0.0–1.5s — HERO SHOT:

Show the exact product naturally resting on the neutral surface.

The complete product is clearly visible with correct real-world proportions and natural fabric gravity.

### 1.5–3.0s — B-ROLL DETAIL 1:

Cut naturally to a closer view of ONE real detail that actually exists on the reference product.

Show fabric texture, stitching, seam, print, edge, trim or another genuine detail.

Never invent details.

### 3.0–4.5s — ONE-HAND INTERACTION:

Cut to ONLY ONE adult feminine hand gently interacting with the product.

The movement automatically adapts to the actual type of garment.

The hand performs ONE subtle natural action: gently touching, smoothing or slightly lifting an appropriate outer section of the fabric.

Do not require a collar, sleeve, waistband, strap or other specific structure unless it actually exists in the reference.

Do NOT pull, stretch or deform the product.

Only one hand is visible.

### 4.5–6.0s — B-ROLL DETAIL 2:

Cut to another authentic detail of the product.

Show textile fibers, folds, thickness, seams, print clarity, stitching or another detail that genuinely exists.

The product identity remains completely unchanged.

### 6.0–8.0s — FINAL HERO SHOT:

Return to a clean product-focused composition.

Show the exact garment naturally arranged on the same neutral surface.

Keep the product sharp, correctly scaled and completely recognizable.

Hold naturally until the end.

CAMERA:

Vertical 9:16.

Realistic modern iPhone rear-camera appearance.

Natural top-down or slightly angled POV depending on the product.

Camera perspective automatically adapts to show the garment clearly.

Camera position may change between intentional B-roll cuts.

Within each shot, maintain only extremely subtle realistic handheld micro-movements.

No dramatic zoom.

No camera orbit.

No rotation.

No excessive movement.

LIGHTING:

Soft natural daylight from one side.

Neutral white balance.

Stable exposure.

Realistic soft shadows.

Natural highlights revealing fabric texture.

No colored lighting.

No dramatic cinematic lighting.

No artificial glow.

No excessive contrast.

FABRIC PHYSICS:

Realistic gravity and material behavior.

The fabric must react according to its apparent weight, thickness and structure.

No morphing.

No stretching.

No melting.

No breathing fabric.

No autonomous movement.

No changing shape.

HAND:

ONLY ONE adult feminine hand during interaction.

Natural anatomy.

Five fingers.

Realistic joints.

Natural nails.

Realistic skin texture.

No second hand.

No extra fingers.

No duplicated hand.

No deformed anatomy.

AUDIO:

No dialogue.

No speech.

No voiceover.

No music.

Only extremely subtle natural room ambience and realistic fabric-contact sounds.

#### STYLE:

Ultra-realistic premium UGC.

Authentic smartphone recording.

Realistic textile micro-details.

Natural imperfections.

No studio-perfect appearance.

No CGI appearance.

#### STRICT RULES:

Use ONLY the pieces actually visible in the reference.

Automatically adapt to ANY clothing item.

Maintain EXACT product identity in every shot.

Maintain exact quantity.

Maintain real-world scale.

Do not change colors.

Do not change prints.

Do not change fabric.

Do not change proportions.

Do not invent structural elements.

Do not remove existing details.

Do not transform the garment into another type.

Do not duplicate products.

Only ONE adult hand when interaction occurs.

Keep the environment COMPLETELY NEUTRAL throughout the entire video.

## TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

## NEGATIVE PROMPT:

bedroom, kids bedroom, nursery, living room, closet, dressing room, boutique, store, showroom, hotel, crib, bed, sofa, chair, wardrobe, clothing rack, shelves, toys, plush toys, books, plants, wall art, decorations, personal belongings, lifestyle props, identifiable location, busy background, colorful background, altered garment, redesigned garment, wrong garment type, changed print, changed color, color shift, wrong scale, altered proportions, invented details, missing details, duplicated garment, disappearing garment, garment morphing, melting fabric, stretched garment, warped fabric, fake folds, floating garment, two hands, multiple hands, extra fingers, missing fingers, fused fingers, deformed hand, mannequin, unnecessary people, CGI, 3D render, plastic fabric, synthetic texture, AI artifacts, excessive blur, blurry product, dramatic zoom, camera orbit, excessive camera shake, oversaturated colors, artificial glow, text, subtitles, logo, watermark

PROMPT A cena acontece em um único plano-sequência contínuo, sem cortes, sem transições, sem zoom e com a câmera completamente fixa em visão superior/primeira pessoa, preservando exatamente o enquadramento da imagem de referência.

A IMAGEM DE REFERÊNCIA É A ÚNICA FONTE PARA DETERMINAR AS PEÇAS.

Antes da ação, identifique visualmente quantas peças de roupa distintas existem na imagem de referência. Durante o vídeo, utilize EXATAMENTE essas peças, uma única vez cada.

NÃO existe quantidade pré-definida.

Se a referência possuir 1 peça, utilize somente 1.

Se possuir 2 peças, utilize somente 2.

Se possuir 3 peças, utilize somente 3.

Se possuir mais peças, repita o processo somente até completar exatamente todas as peças visíveis na referência.

NUNCA invente peças adicionais e NUNCA duplique uma peça para aumentar a quantidade.

Preserve exatamente cada peça da referência: tipo de roupa, formato, cor, estampa, tecido, detalhes, gola, mangas, costuras, proporções e características visuais.

NO PRIMEIRO FRAME, A CAMA ESTÁ COMPLETAMENTE VAZIA.

Nenhuma das peças da imagem de referência está inicialmente sobre a cama. A superfície encontra-se totalmente livre.

A influenciadora aparece somente através de UMA mão feminina e parte do antebraço. A segunda mão nunca aparece em nenhum momento.

AÇÃO PARA CADA PEÇA:

A mesma mão traz UMA das peças da referência para dentro do enquadramento, segurando-a naturalmente pela região superior apropriada da própria peça.

Ela aproxima rapidamente a peça da câmera por aproximadamente 1 segundo, permitindo visualizar seus detalhes.

Em seguida, afasta a peça da câmera e a coloca cuidadosamente sobre a cama.

Com a MESMA mão, realiza pequenos movimentos rápidos e naturais para alisar e organizar o tecido.

Depois disso, a mão traz a próxima peça existente na imagem de referência e repete exatamente o mesmo processo:

- segura a peça com uma única mão;
- aproxima rapidamente da câmera;
- mostra seus detalhes;
- afasta;
- coloca sobre a cama;
- alisa o tecido;
- realiza pequenos ajustes naturais.

Esse processo é repetido SOMENTE pela quantidade de peças realmente existentes na imagem de referência.

Cada peça entra na cena apenas no momento em que é apresentada pela mão. Nenhuma peça pode surgir espontaneamente, aparecer antecipadamente ou materializar-se sobre a cama.

Durante a organização, mantenha espaço suficiente entre as peças para permitir movimentos naturais sem sobreposição excessiva.

À medida que a sequência avança, a mesma mão pode realizar pequenos ajustes de posicionamento para construir progressivamente a composição final.

NO FINAL, todas e somente as peças presentes na imagem de referência devem estar sobre a cama.

A disposição final deve reproduzir o mais fielmente possível a imagem de referência, preservando posição, orientação, ordem, alinhamento, espaçamento e eventuais sobreposições existentes na composição original.

Se a referência mostrar peças sobrepostas, a sobreposição acontece somente durante os ajustes finais.

Se a referência mostrar peças separadas, elas permanecem separadas.

#### MOVIMENTO:

Os movimentos devem ser rápidos, simples, naturais e humanos, como uma pessoa real organizando roupas para um vídeo UGC.

Adicionar pequenas imperfeições naturais nos movimentos da mão e dos dedos. Nada deve parecer robótico, coreografado ou artificial.

A câmera permanece 100% imóvel durante toda a sequência.

#### IMPORTANTE:

A cama começa COMPLETAMENTE VAZIA.

Use SOMENTE as peças realmente visíveis na imagem de referência.

A quantidade de peças é determinada automaticamente pela referência.

NÃO adicionar peças extras.

NÃO duplicar peças.

NÃO remover nenhuma peça existente na referência.

Cada peça aparece UMA ÚNICA VEZ.

Cada peça entra individualmente através da mesma mão.

Somente UMA mão e parte do antebraço podem aparecer.

A segunda mão NUNCA aparece.

Nenhuma peça surge magicamente sobre a cama.

Nenhuma peça pode estar presente antes de ser trazida pela mão.

Cada peça é rapidamente apresentada à câmera antes de ser colocada.

Preservar rigorosamente identidade, cor, formato e detalhes de cada peça.

A composição final deve corresponder à disposição mostrada na referência.

Plano-sequência único.

SEM cortes.

SEM transições.

SEM zoom.

SEM movimento de câmera.

SEM troca de enquadramento.

SEM texto.

SEM interface.

SEM elementos adicionados.

Estilo UGC ultra-realista, gravado com celular, movimentos espontâneos, física realista dos tecidos, gravidade natural e nenhuma aparência de IA.

PROMPT -

A cena acontece em um único plano-sequência contínuo, sem cortes, sem zoom e com a câmera completamente fixa em primeira pessoa, exatamente no mesmo enquadramento da imagem de referência.

NO PRIMEIRO FRAME A CAMA ESTÁ COMPLETAMENTE VAZIA. Não existe absolutamente nenhuma roupa sobre a cama. A superfície da cama está totalmente livre.

A influenciadora aparece apenas com UMA das mãos e parte do antebraço visíveis durante toda a cena. A outra mão nunca aparece.

Ela segura a ultima blusa apenas pela gola, aproxima rapidamente da câmera por cerca de 1 segundo para apresentar a peça e, em seguida, coloca cuidadosamente sobre a cama em uma posição livre.

Com movimentos rápidos, naturais e humanos, ela alisa o tecido e faz pequenos ajustes até deixá-la bem posicionada.

Depois, ela pega a segunda blusa, novamente segurando apenas pela gola com a mesma mão, aproxima da câmera para mostrar rapidamente os detalhes e coloca sobre a cama deixando um espaço suficiente entre as peças para não ficarem sobrepostas durante a organização.

Depois, ela pega a terceira blusa, novamente segurando apenas pela gola com a mesma mão, aproxima da câmera para mostrar rapidamente os detalhes e coloca sobre a cama deixando um espaço suficiente entre as peças para não ficarem sobrepostas durante a organização.

Ela faz pequenos ajustes naturais no tecido.

Repete exatamente o mesmo processo com todas as demais peças:

- Segura pela gola com apenas uma mão.
- Aproxima rapidamente da câmera.
- Coloca sobre a cama.
- Alisa o tecido.
- Ajusta a posição.

Cada nova peça é posicionada respeitando um espaçamento natural, evitando que uma fique em cima da outra durante a montagem.

Somente ao final da organização todas as peças ficam exatamente na mesma disposição da imagem de referência, mantendo a ordem, alinhamento e composição final.

Os movimentos devem parecer gravados por uma pessoa real organizando roupas para mostrar aos seguidores, com pequenas imperfeições naturais, ritmo espontâneo e aparência totalmente humana.

#### IMPORTANTE:

- A cama começa COMPLETAMENTE VAZIA.
- Nenhuma roupa pode aparecer antes de ser colocada pela influenciadora.
- Apenas UMA mão aparece durante toda a cena.
- A outra mão nunca entra no enquadramento.
- Cada peça surge uma de cada vez.
- Cada peça é apresentada rapidamente para a câmera antes de ser colocada.
- As peças ficam inicialmente separadas durante a organização.
- Apenas no final elas assumem exatamente a composição da imagem de referência.
- Plano sequência único.
- Sem cortes.
- Sem transições.
- Sem zoom.
- A câmera nunca se move.
- Estilo UGC ultra-realista, aparência de vídeo gravado com celular, totalmente natural e sem aspecto de IA.

PROMPT - {

"prompt": "ULTRA-PHOTOREALISTIC iPhone POV VIDEO. Use the provided reference image as the ABSOLUTE SOURCE OF TRUTH for the lingerie product. The exact same product must remain visually consistent from the first frame to the last frame. Do not redesign, reinterpret, reconstruct, beautify or modify the garment in any way.\n\nPRODUCT IDENTITY LOCK — HIGHEST PRIORITY:\nPreserve the exact original lingerie design, silhouette, proportions, dimensions, color, material, lace pattern, embroidery, stitching, seams, trims, straps, bow, elastic bands, edges, transparency and fabric texture exactly as shown in the reference. Every product detail must remain consistent throughout the entire video. No new details may appear and no existing details may disappear.\n\nSCENE — NEUTRAL ENVIRONMENT:\nA clean, simple and completely neutral real-world interior. Soft off-white, beige and light neutral tones. Plain walls and an uncluttered background with only subtle natural depth. No identifiable location, no boutique elements, no clothing racks, no shelves filled with products, no bedroom furniture, no showroom appearance and no

decorative elements competing with the product. The environment must feel realistic, calm and naturally lived-in while remaining visually neutral. The product is always the dominant visual element.

**PRODUCT PRESENTATION:** The exact reference lingerie is hanging naturally from a simple light wooden hanger with NO text, NO branding and NO logo. The garment hangs vertically in a natural position. Preserve the exact original orientation, proportions and structure. Straps remain correctly positioned. The garment must never stretch, shrink, twist, fold unnaturally or change shape.

**HAND INTERACTION:** ONLY ONE ADULT FEMALE HAND is visible. The hand enters naturally from the lower side of the frame and gently holds the wooden hanger near the hook or lower bar. The hand remains relaxed and anatomically correct.

The hand performs ONLY ONE subtle gesture: the fingertips briefly and gently touch the outer edge of the garment for approximately one second, then return to a relaxed position on the hanger.

Do NOT pull, stretch, pinch, squeeze or lift the fabric. Do NOT move the hand across the center of the garment or cover important product details.

**HAND ANATOMY:** Realistic adult feminine hand, natural skin texture, anatomically correct wrist and fingers, five clearly separated fingers, realistic joints and natural proportions. Relaxed finger positioning. No extra, missing, fused, twisted or elongated fingers and no deformed wrist.

**NAILS AND JEWELRY:** Neatly manicured feminine nails with a subtle glossy finish. One or two delicate minimal rings may be visible. No bracelets and no watch.

**CAMERA MOVEMENT:** Realistic handheld iPhone POV recording. Start with medium-wide framing where the entire garment and hanger are clearly visible. The camera makes ONE extremely slow and subtle forward movement toward the product, similar to a real person naturally bringing the phone slightly closer to inspect the fabric.

The camera movement is smooth, continuous and physically realistic with extremely subtle handheld micro-movements. No dramatic movement. THE CAMERA MOVES CLOSER — THE PRODUCT DOES NOT MOVE.

**TIMELINE — 8 SECONDS:**

- 0.0–2.0s: Entire garment and hanger visible against the neutral background. Camera stable with tiny natural handheld movement. One female hand holds the hanger.
- 2.0–4.0s: Camera begins one very slow forward movement. Hand remains relaxed and garment remains stable.
- 4.0–5.5s: Fingertips gently touch the outer edge of the garment once, briefly highlighting the fabric texture without pulling or repositioning it.
- 5.5–7.0s: Hand returns to its relaxed position. Camera continues its subtle approach, naturally revealing more lace, stitching and fabric detail.
- 7.0–8.0s: Camera stops naturally. Garment remains centered and recognizable. Hold the final composition briefly.

**FOCUS:** The entire product remains the primary subject. Gradually reveal textile detail through natural camera proximity. No independent close-up shots, aggressive cropping or reconstruction of the product.

**FABRIC PHYSICS:** Maintain realistic weight, gravity, folds, lace structure and natural drape. Only minimal secondary movement caused by the hand is permitted. The garment must NOT wave, ripple, breathe, morph, stretch or deform.

**LIGHTING:** Soft natural daylight entering from one side. Neutral white balance, stable exposure, physically realistic soft shadows and subtle highlights on the material. No dramatic cinematic lighting, colored lighting, artificial glow or beauty lighting.

**TEXTURE FIDELITY:** Preserve visible lace fibers, embroidery, stitching threads, fabric grain, elastic texture and natural material response. Realistic skin pores and nail texture. No smoothing, plastic appearance or synthetic CGI texture.

**VISUAL STYLE:** Natural premium UGC product content with authentic smartphone realism. Simple, clean, spontaneous and believable. The neutral environment must never compete visually with the product.

**AUDIO:** No voice, speech, dialogue or lip-sync. Only extremely subtle natural room ambience. No music.

**CAMERA:** Modern iPhone camera aesthetic, approximately

26–28mm equivalent lens, realistic smartphone depth of field, natural sharpness, subtle sensor noise, realistic exposure, slight handheld imperfections and authentic smartphone image processing.\n\nABSOLUTE RULES:\nSame product, design, color, material, straps, lace, embroidery and proportions from first frame to last frame. No redesign. No deformation. No stretching. No morphing. No added or removed garment elements. No duplicated garment. No disappearing details. No face visible. No body visible. No person wearing the product. No mannequin. No text or branding on the hanger. Neutral background throughout the entire sequence.\n\nFINAL GENERATION PRIORITY:\n1. Product identity and visual consistency.\n2. Realistic hand anatomy.\n3. Natural physical fabric behavior.\n4. Smooth human camera movement.\n5. Clean neutral environment.\n6. High-detail smartphone realism.",

"negative\_prompt": "face, head, body, model wearing lingerie, person wearing product, mannequin, multiple hands, two hands, extra hand, duplicated hand, extra fingers, missing fingers, fused fingers, twisted fingers, elongated fingers, malformed hand, deformed wrist, floating hand, hand covering product, hand pulling fabric, hand stretching fabric, hand pinching lace, excessive jewelry, bracelets, watch, product deformation, garment morphing, garment stretching, garment shrinking, warped fabric, changing silhouette, altered lace, altered embroidery, changed straps, missing straps, extra straps, color shift, material change, redesign, invented details, missing details, duplicated garment, floating garment, boutique, store, retail shop, clothing racks, product shelves, showroom, bedroom, bed, luxury hotel, busy background, colorful background, excessive decoration, independent close-up, aggressive crop, camera orbit, camera rotation, dramatic zoom, fast zoom, sudden camera movement, excessive camera shake, robotic movement, unrealistic fabric physics, CGI, 3D render, plastic texture, artificial glow, beauty filter, excessive smoothing, dramatic shadows, overexposure, underexposure, excessive blur, low resolution, AI artifacts, text overlay, subtitles, watermark"

PROMPT - CENTER-FABRIC STRETCH — CRITICAL INSTRUCTION:

The stretch MUST happen through the CENTRAL BODY OF THE CROPPED, approximately around the middle section of the garment.

Do NOT stretch the bottom hem.

Do NOT stretch the top edge.  
Do NOT pull the straps.  
Do NOT pull the side seams.  
Do NOT pull any decorative element.  
Do NOT pull the starfish detail.  
Do NOT pull buttons, zippers, trims or rigid areas.

The two feminine hands approach the LEFT and RIGHT sides of the CENTRAL FABRIC AREA of ONE cropped garment.

Each hand gently grips the fabric approximately at the middle of the garment, slightly inward from the side edges, using the thumb and fingertips.

The hands then slowly pull the CENTRAL BODY OF THE CROPPED outward in opposite directions, creating a clearly visible but moderate horizontal stretch across the middle of the garment.

The stretch must visibly travel through the central fabric area rather than only deforming the edges.

The center of the garment expands naturally under tension while the neckline, upper edge, bottom hem, seams and decorative details remain structurally stable.

The fabric must behave like real elastic textile:

- subtle horizontal expansion;
- natural tension lines radiating from the hands;
- realistic compression around the fingertips;
- slight opening of the textile fibers;
- natural resistance;
- no exaggerated deformation.

Hold the central fabric gently stretched for approximately 1 second.

Then release slowly.

The central fabric naturally contracts back to its original width and shape.

After release, the cropped must look EXACTLY as it did in the reference image.

IMPORTANT:

The hands must visibly grip the MIDDLE OF THE GARMENT BODY, not the hem, not the top edge and not the side seams.

The stretch should be clearly visible in the CENTER OF THE CROPPED.

PROMPT- Início da cena: Começar exatamente com o manequim de frente para a câmera, não tem cabeça. a mulher que está atrás nunca mostra seu rosto. A câmera está em primeira pessoa, na altura do produto, com enquadramento vertical o suficientemente próximo para que a roupa seja claramente o elemento dominante da imagem. Uma única mulher está atrás do manequim, parcialmente escondida pelo próprio manequim. Apenas os braços e as mãos aparecem naturalmente. Ela segura suavemente na parte de cima do manequim, :A mulher passa a mão direita delicadamente na parte superior da peça pelo ombro até o busto, e continua descendo suave até lateral da cintura da manequim para apresentar melhor a roupa, o tecido e textura. O movimento deve ser lento e natural, como alguém mostrando uma peça para uma amiga. A câmera mantém estática mantendo o foco na roupa da Manequim. a roupa deve permanecer exatamente igual à referência. Não criar novas flores, desenhos, bordados ou aplicações: A mulher pega na parte de baixo da roupa pela barra e puxa um pouco subindo e desce suavemente, apenas para mostrar o caimento e a delicadeza do tecido. O tecido deve reagir fisicamente de maneira natural, com pequenas dobras e movimento compatível com material leve. Câmera Aparência de smartphone real. Formato 9:16. Câmera estável, com pequenas microvariações naturais de mão humana. Sem zoom digital brusco. Sem transições. Sem cortes. Sem mudanças repentinas de lente. O produto deve permanecer em foco durante toda a animação. O fundo deve possuir profundidade natural, mas nunca receber mais destaque que a roupa. 🔒

CONSISTÊNCIA ABSOLUTA DO PRODUTO A roupa da Imagem 1 é um único produto e deve permanecer exatamente igual durante todo o vídeo. Não alterar: formato; cor

; tecido;; costuras; textura; quantidade de

elementos; proporções; acabamento; estrutura; posição dos detalhes. O movimento da câmera ou do manequim não autoriza a IA a inventar partes novas do produto. 🚫

PROMPT NEGATIVO Sem produto diferente, sem troca de modelo, sem redesign, sem novos detalhes, m, sem novas tiras, sem tiras desaparecendo, sem alteração de cor, sem alteração de textura, sem mudança de material, sem mudança de proporções, sem deformação do tecido, sem produto derretido, sem produto duplicado, sem roupa aparecendo ou desaparecendo, sem troca instantânea de roupa, sem mãos extras, sem dedos extras, sem braços duplicados, sem anatomia deformada, sem mãos atravessando o produto, sem produto flutuando, sem teletransporte, sem cortes, sem transições, sem movimentos impossíveis, sem rotação instantânea do manequim, sem cenário mudando, sem foco no fundo, sem enquadramento aberto demais, sem produto pequeno, sem produto apagado, sem CGI, sem 3D, sem renderização, sem aparência artificial, sem aparência de IA, sem

PROMPT - A cena começa com a cama completamente vazia, sem nenhuma roupa. A câmera permanece fixa em visão superior durante todo o vídeo. As mãos entram naturalmente no enquadramento segurando a primeira peça e a posicionam cuidadosamente sobre a cama. Em seguida, as mãos saem do enquadramento, retornam com a segunda peça e a posicionam parcialmente sobreposta à primeira. Depois, retornam com a terceira peça e a posicionam por cima das outras duas, formando exatamente a composição final da imagem de referência. Cada peça é colocada uma de cada vez, em sequência contínua, com movimentos suaves, precisos e totalmente naturais, como uma pessoa organizando roupas para apresentar um kit. As mãos ajustam delicadamente cada peça para deixá-las perfeitamente alinhadas e esticadas. Não existem cortes, transições, teleportes, mudanças de cena ou roupas surgindo do nada. Toda a movimentação deve parecer gravada em um único take, com comportamento humano real, física natural do tecido e iluminação consistente. PROMPT - A cena começa já com a câmera bem próxima da roupa, aproximadamente 15 a 20 cm do tecido, sem ser um zoom extremo. No primeiro frame, uma única mão já aparece segurando delicadamente uma pequena parte da peça entre os dedos, massageando o tecido de forma suave e totalmente natural, como uma pessoa verificando a maciez e a qualidade do algodão antes de comprar. A câmera permanece próxima durante toda a cena e desliza lentamente sobre as três peças organizadas exatamente como na imagem de

referência, mantendo sempre parte das três roupas visíveis no enquadramento. O movimento é contínuo, como se o celular estivesse sendo segurado na mão, passando devagar sobre as peças para destacar a textura, as costuras e a qualidade premium do tecido. A mão continua acariciando e massageando delicadamente o tecido enquanto a câmera acompanha esse movimento. Não existe zoom exagerado, não existe macro extremo, não existem cortes, mudanças bruscas de ângulo, roupas extras, deformações ou aparência de IA. PROMPT- A câmera realiza um close-up aproximado sobre a superfície da peça, sem macro extremo. O foco está na trama uniforme do tecido de algodão premium, mostrando apenas a textura natural da malha, as costuras e o acabamento de alta qualidade. O tecido permanece completamente íntegro, liso e sem fiapos, sem algodão aparente, sem rasgos, sem fios soltos e sem qualquer deformação. Uma única mão desliza lentamente sobre a superfície do tecido, acariciando-o de forma suave para destacar sua maciez e qualidade. A câmera acompanha esse movimento com um pequeno deslizamento cinematográfico, mantendo sempre o foco na textura natural do algodão. O tecido nunca é aberto, puxado ou separado, permanecendo sempre inteiro e bem acabado. Aparência totalmente realista, iluminação natural, vídeo em 4K, sem qualquer aspecto de IA.

PROMPT - A cena acontece em um único plano-sequência contínuo, sem cortes, sem zoom

e com a câmera completamente fixa em primeira pessoa, exatamente no mesmo enquadramento da imagem de referência.

NO PRIMEIRO FRAME A CAMA ESTÁ COMPLETAMENTE VAZIA. Não existe absolutamente nenhuma roupa sobre a cama. A superfície da cama está totalmente livre.

A influenciadora aparece apenas com UMA das mãos e parte do antebraço visíveis durante toda a cena. A outra mão nunca aparece.

Ela segura a última blusa apenas pela gola, aproxima rapidamente da câmera por cerca de 1 segundo para apresentar a peça e, em seguida, coloca cuidadosamente sobre a cama em uma posição livre.

Com movimentos rápidos, naturais e humanos, ela alisa o tecido e faz pequenos ajustes até deixá-la bem posicionada.

Depois, ela pega a segunda blusa, novamente segurando apenas pela gola com a mesma mão, aproxima da câmera para mostrar rapidamente os detalhes e coloca sobre a cama deixando um espaço suficiente entre as peças para não ficarem sobrepostas durante a organização.

Depois, ela pega a terceira blusa, novamente segurando apenas pela gola com a mesma mão, aproxima da câmera para mostrar rapidamente os detalhes e coloca sobre a cama deixando um espaço suficiente entre as peças para não ficarem sobrepostas durante a organização.

Ela faz pequenos ajustes naturais no tecido.

Repete exatamente o mesmo processo com todas as demais peças:

- Segura pela gola com apenas uma mão.
- Aproxima rapidamente da câmera.
- Coloca sobre a cama.
- Alisa o tecido.
- Ajusta a posição.

Cada nova peça é posicionada respeitando um espaçamento natural, evitando que uma fique em cima da outra durante a montagem.

Somente ao final da organização todas as peças ficam exatamente na mesma disposição da imagem de referência, mantendo a ordem, alinhamento e composição final.

Os movimentos devem parecer gravados por uma pessoa real organizando roupas para mostrar aos seguidores, com pequenas imperfeições naturais, ritmo espontâneo e aparência totalmente humana.

**IMPORTANTE:**

- A cama começa COMPLETAMENTE VAZIA.
- Nenhuma roupa pode aparecer antes de ser colocada pela influenciadora.
- Apenas UMA mão aparece durante toda a cena.
- A outra mão nunca entra no enquadramento.
- Cada peça surge uma de cada vez.
- Cada peça é apresentada rapidamente para a câmera antes de ser colocada.
- As peças ficam inicialmente separadas durante a organização.
- Apenas no final elas assumem exatamente a composição da imagem de referência.
- Plano sequência único.
- Sem cortes.
- Sem transições.
- Sem zoom.
- A câmera nunca se move.
- Estilo UGC ultra-realista, aparência de vídeo gravado com celular, totalmente natural e sem aspecto de IA.

PROMPT- A cena acontece em UM ÚNICO PLANO-SEQUÊNCIA CONTÍNUO. Câmera 100% FIXA, mesmo enquadramento da imagem de referência. Sem cortes, transições, zoom ou mudança de cenário.

REGRA PRINCIPAL — IDENTIDADE DAS PEÇAS TRAVADA

Antes de iniciar o movimento, considere CADA ROUPA VISÍVEL NA IMAGEM DE REFERÊNCIA COMO UM OBJETO FÍSICO INDEPENDENTE E IMUTÁVEL.

Cada peça mantém sua própria identidade do primeiro ao último momento.

UMA PEÇA NUNCA PODE SE TRANSFORMAR EM OUTRA.

Se uma peça é SHORTS na referência, ela permanece SHORTS durante 100% do vídeo.

Se uma peça é BLUSA/TOP na referência, ela permanece BLUSA/TOP durante 100% do vídeo.

SHORTS NUNCA VIRA BLUSA.

BLUSA NUNCA VIRA SHORTS.

NENHUMA ROUPA MUDA DE CATEGORIA, FORMATO OU MODELAGEM.

Preservar exatamente cor, estampa, tecido, costuras, tamanho, proporções, recortes e detalhes individuais de CADA peça.

INÍCIO

O primeiro frame mostra a superfície COMPLETAMENTE VAZIA.

Apenas UMA mão aparece para realizar toda a ação.

ADICIONAR — UMA PEÇA POR VEZ

A mão entra de fora do enquadramento segurando UMA peça original da referência.

Ela coloca essa peça DIRETAMENTE NA POSIÇÃO FINAL CORRETA QUE ELA OCUPA NA IMAGEM DE REFERÊNCIA.

NÃO colocar uma peça em cima da outra.

Cada roupa possui sua própria área/posição na superfície.

Depois de posicionar a primeira peça, ela PERMANECE TOTALMENTE PARADA E INALTERADA.

A mão sai.

Somente depois disso, a mão retorna trazendo a próxima peça original.

A segunda peça é colocada NA SUA PRÓPRIA POSIÇÃO FINAL, exatamente como na referência, sem cobrir, substituir, atravessar ou transformar a primeira.

Repetir somente se existirem outras peças reais na referência.

NÃO adicionar peças extras.

TRAVA DE OBJETOS

Depois que uma peça for colocada:

ELA FICA CONGELADA EM SUA IDENTIDADE.

Pode existir apenas um pequeno movimento natural do tecido ao tocar a superfície, mas depois:

não muda de formato;

não muda de categoria;

não muda de cor;

não muda de estampa;

não vira outra roupa;

não se funde com outra peça;

não duplica;

não desaparece.

A mão também NÃO deve ficar alisando uma peça sobre outra, pois isso pode causar morphing.

## COMPOSIÇÃO COMPLETA

Quando todas as peças originais estiverem posicionadas, o resultado deve reproduzir EXATAMENTE a disposição da imagem de referência.

Pausa breve de aproximadamente 0,5 segundo.

RETIRADA — ORDEM INVERSA

A mesma mão retira as peças UMA POR VEZ, SEM TRANSFORMÁ-LAS.

Retirar primeiro A ÚLTIMA PEÇA QUE FOI ADICIONADA.

A mão segura essa peça, levanta e leva completamente para fora do enquadramento.

A outra peça permanece parada e exatamente igual.

Depois a mão retorna, pega a peça restante e também a leva fisicamente para fora.

A superfície termina 100% VAZIA.

### SEQUÊNCIA OBRIGATÓRIA

VAZIO → ENTRA PEÇA 1 → COLOCA NA POSIÇÃO 1 → PEÇA 1 FICA PARADA → ENTRA PEÇA 2 → COLOCA NA POSIÇÃO 2 SEM SOBREPOR → PAUSA → RETIRA PEÇA 2 → RETIRA PEÇA 1 → VAZIO.

Se houver apenas uma peça na referência:

VAZIO → ADICIONA A MESMA PEÇA → PAUSA → RETIRA A MESMA PEÇA → VAZIO.

### PROIBIÇÕES ABSOLUTAS

NO garment morphing.

NO shorts-to-shirt transformation.

NO shirt-to-shorts transformation.

NO garment replacement.

NO stacking one garment on top of another unless the reference itself explicitly shows overlap.

NO duplicated garments.

NO extra garments.

NO merging garments.

NO disappearing garments.

NO changing shape after placement.

NO teleportation.

Cada peça é um conjunto de OBJETO FÍSICO FIXO E INDEPENDENTE durante todo o vídeo.

Apenas UMA mão. Câmera fixa. Física natural do tecido. Movimentos rápidos e humanos. Vídeo UGC ultra-realista 4K, aparência autêntica de smartphone, sem aspecto de IA.

PROMPT- A cena acontece em **\*\*UM ÚNICO PLANO-SEQUÊNCIA CONTÍNUO\*\***, sem cortes, transições ou zoom. A câmera permanece **\*\*100% fixa em visão superior (top-down)\*\***, exatamente no enquadramento da imagem de referência.

### ## INÍCIO

A cama começa **\*\*COMPLETAMENTE VAZIA\*\***, sem nenhuma roupa ou objeto.

Logo após o início, diversas peças de roupa começam a ser **\*\*JOGADAS FISICAMENTE DE FORA DO ENQUADRAMENTO\*\*** para cima da cama.

As peças entram exclusivamente pelas bordas superior e laterais. Nenhuma roupa pode surgir ou aparecer magicamente sobre a cama.

Elas caem rapidamente e de maneira irregular, girando no ar, dobrando, amassando, quicando levemente no colchão, deslizando e colidindo umas com as outras com física realista.

### ## CRÍTICO — ESTAMPAS E CORES DA REFERÊNCIA

**\*\*TODAS AS ROUPAS QUE CAEM DEVEM SER BASEADAS EXCLUSIVAMENTE NAS PEÇAS MOSTRADAS NA IMAGEM DE REFERÊNCIA.\*\***

Não jogar roupas com estampas, cores ou designs aleatórios.

As peças que caem devem repetir visualmente **\*\*AS MESMAS CORES, ESTAMPAS, PADRÕES, TEXTOS, DESENHOS E IDENTIDADE VISUAL DAS ROUPAS DA REFERÊNCIA\*\***.

Se a referência possuir mais de uma peça, usar as características visuais dessas peças durante toda a chuva de roupas.

**\*\*NÃO INVENTAR NOVAS ESTAMPAS.\*\***

**\*\*NÃO ALTERAR TEXTOS OU DESENHOS.\*\***

**\*\*NÃO TROCAR AS CORES.\*\***

**\*\*NÃO INTRODUIZIR ROUPAS VISUALMENTE DIFERENTES DA REFERÊNCIA.\*\***

As peças podem cair em diferentes posições, orientações e níveis de amassado, porém devem continuar claramente pertencendo ao **MESMO PRODUTO/CONJUNTO E À MESMA ESTAMPA DA REFERÊNCIA**.

### ## FORMAÇÃO DA PILHA

As roupas continuam caindo rapidamente, formando progressivamente uma **grande** montanha de peças com a identidade visual da referência.

Cada peça reage fisicamente às outras.

A pilha fica alta, volumosa, irregular e completamente bagunçada.

Nenhuma peça é organizada ou perfeitamente dobrada.

Partes das roupas ficam visíveis em diferentes posições, permitindo reconhecer repetidamente **as cores e estampas originais da referência espalhadas pela pilha**.

### ## FINAL

Quando a queda termina, **APENAS UMA MÃO** da influenciadora entra pela parte inferior.

A mão pega **UMA DAS PEÇAS EXATAMENTE IGUAL À REFERÊNCIA**, levanta somente alguns centímetros para destacá-la e a posiciona delicadamente no topo da montanha.

Se a referência mostrar um conjunto, preservar fielmente suas peças, cores, estampas, modelagem e detalhes.

### ## REGRAS ABSOLUTAS

- \* Primeiro frame = cama 100% vazia.
- \* Todas as roupas entram fisicamente de fora do quadro.
- \* **TODAS** as peças que caem usam as estampas/cores/designs da referência.
- \* Não criar roupas genéricas com estampas diferentes.
- \* Não inventar novas cores ou padrões.
- \* Preservar textos e desenhos originais.
- \* Queda rápida, dinâmica e irregular.
- \* Grande quantidade de peças.
- \* Pilha alta, volumosa e desorganizada.
- \* Física realista de tecido e gravidade.
- \* Apenas UMA mão aparece no final.
- \* Câmera 100% fixa e top-down.
- \* NUNCA trocar de cenário.
- \* Sem zoom, pan ou tilt.
- \* Sem cortes ou transições.
- \* Sem teleportes.

- \* Iluminação natural e constante.
- \* Aparência UGC de smartphone.
- \* Ultra-realista 4K, sem aparência de IA.

**\*\*ORDEM OBRIGATÓRIA: CAMA TOTALMENTE VAZIA → MUITAS ROUPAS COM AS MESMAS ESTAMPAS/CORES DA REFERÊNCIA CAEM DE FORA DO QUADRO → FORMAM UMA GRANDE PILHA BAGUNÇADA → UMA MÃO ENTRA → PEGA UMA PEÇA IDÊNTICA À REFERÊNCIA → LEVANTA → COLOCA NO TOPO.\*\***

PROMPT - A câmera permanece **\*\*totalmente fixa em visão superior (top-down)\*\***, exatamente como na imagem de referência. O enquadramento, iluminação, cama, manta, cenário e mãos permanecem idênticos durante toda a gravação. Aparência autêntica de vídeo UGC feito com smartphone, com movimentos rápidos, naturais e humanos.

**## INÍCIO**

A cena começa **\*\*EXATAMENTE como na imagem de referência\*\***: as duas mãos já estão segurando **\*\*UM ÚNICO pacote transparente contendo UMA ÚNICA peça de roupa dobrada\*\***.

A peça dentro da embalagem deve ser **\*\*EXATAMENTE A MESMA PEÇA mostrada na imagem de referência\*\***, independentemente de ser camiseta, shorts, calça, blusa, vestido, top, saia ou qualquer outro tipo de roupa.

A imagem de referência é a **\*\*ÚNICA fonte para determinar o produto\*\***.

**## AÇÃO**

Sem hesitar, a influenciadora rasga rapidamente a **\*\*parte frontal da embalagem plástica\*\*** usando as duas mãos, criando uma abertura ampla em um único movimento fluido e fisicamente realista.

Assim que o plástico se rompe, ela imediatamente segura **\*\*A MESMA PEÇA através da abertura\*\*** e começa a puxá-la parcialmente para fora da embalagem.

O movimento é rápido e natural, como alguém abrindo uma compra recém-chegada para mostrar o produto.

A peça permanece **\*\*DOBRADA** durante toda a retirada e apresentação\*\*, mantendo aparência de produto novo.

Ela levanta levemente a peça dobrada para exibi-la à câmera, sem retirá-la completamente do enquadramento.

## ## REFERENCE LOCK — PRODUTO

Preservar exatamente todas as características da peça da referência:

- \* tipo da roupa;
- \* cor;
- \* estampa;
- \* textos;
- \* desenhos;
- \* tecido;
- \* textura;
- \* modelagem;
- \* costuras;
- \* etiquetas;
- \* proporções;
- \* acabamento;
- \* todos os detalhes originais.

**\*\*NÃO reinterpretar, redesenhar ou substituir o produto.\*\***

A peça que aparece dentro do pacote é **\*\*EXATAMENTE A MESMA\*\*** que é puxada para fora.

## ## SEQUÊNCIA OBRIGATÓRIA

**\*\*MÃOS SEGURANDO PACOTE → RASGAR PLÁSTICO → CRIAR ABERTURA → SEGURAR A PEÇA → PUXAR PARCIALMENTE PARA FORA → LEVANTAR LEVEMENTE PARA EXIBIÇÃO.\*\***

Tudo acontece em **\*\*UM ÚNICO MOVIMENTO CONTÍNUO\*\***, sem pausas artificiais.

## ## REGRAS

- \* Câmera 100% fixa e top-down.
- \* Exatamente UM pacote.
- \* Exatamente UMA peça.
- \* Exatamente DUAS mãos.
- \* Produto definido exclusivamente pela referência.
- \* Peça permanece dobrada.

- \* Rasgo rápido e realista na frente da embalagem.
- \* Não criar roupas extras.
- \* Não duplicar produto.
- \* Não trocar a peça durante a retirada.
- \* Não deformar tecido, embalagem ou mãos.

PROMPT - A câmera permanece totalmente fixa em visão superior (top-down), exatamente como na imagem de referência. O enquadramento, a iluminação suave, o cenário da cama com manta felpuda branca e as mãos da influenciadora permanecem idênticos durante toda a cena. A aparência deve ser de uma gravação real feita com celular, com movimentos rápidos, naturais e humanos.

A cena começa exatamente como na imagem de referência: as duas mãos já seguram o pacote transparente contendo os shorts dobrados. Sem hesitar, a influenciadora rasga rapidamente a parte frontal da embalagem plástica com as duas mãos, criando uma abertura ampla em um único movimento fluido e realista.

Assim que o plástico se rompe, ela imediatamente segura os shorts através da abertura e os puxa parcialmente para fora da embalagem em um gesto rápido e natural, como alguém mostrando o produto recém-chegado. Os shorts permanecem dobrados durante todo o movimento, preservando a aparência de produto novo.

A ação é contínua, sem pausas e sem cortes: rasgar a embalagem → pegar os shorts → levantar levemente para exibição. O movimento completo acontece de forma dinâmica, ideal para vídeo curto de TikTok Shop.

**\*\*Regras obrigatórias:\*\***

- \* Preservar exatamente o enquadramento da imagem de referência.
- \* Câmera totalmente fixa.
- \* Apenas um único pacote durante toda a cena.
- \* Manter exatamente os mesmos shorts da imagem.
- \* Rasgo rápido e realista na parte frontal da embalagem.
- \* Os shorts permanecem dobrados.
- \* Não criar peças extras.
- \* Não duplicar roupas.
- \* Não deformar roupas ou mãos.
- \* Não trocar de cenário.
- \* Não alterar a iluminação.
- \* Não fazer cortes.
- \* Não fazer transições.
- \* Movimento contínuo e natural.
- \* Aparência de vídeo real gravado com celular.
- \* Qualidade ultra-realista 4K.

PROMPT - A câmera permanece **\*\*TOTALMENTE FIXA** em visão superior (top-down)\*\*, exatamente como na imagem de referência. O enquadramento, posição, distância e ângulo da câmera **\*\*não mudam em nenhum momento\*\***. Sem zoom, pan, tilt ou movimento de câmera.

A iluminação permanece natural, suave e uniforme, com aparência autêntica de uma gravação feita com smartphone.

**## INÍCIO — CAMA TOTALMENTE VAZIA**

A cena começa com a **\*\*cama completamente vazia\*\***.

Não existe pacote, roupa, produto ou qualquer outro objeto sobre a cama.

Apenas **\*\*DUAS** mãos humanas e parte dos antebraços da influenciadora**\*\*** podem aparecer durante a interação.

### **## ENTRADA DO PACOTE**

Um **\*\*ÚNICO** pacote plástico preto, completamente fechado e lacrado**\*\***, cai naturalmente de fora da parte superior do enquadramento **\*\*DIRETAMENTE NAS MÃOS** da influenciadora**\*\***.

As mãos recebem o pacote no ar.

**\*\*O pacote NÃO pode cair, encostar ou ser colocado sobre a cama em nenhum momento.\*\***

Existe **\*\*EXATAMENTE UM** pacote durante todo o vídeo**\*\***.

Nenhum segundo pacote pode aparecer.

### **## ABERTURA**

Segurando o pacote suspenso sobre a cama, ela utiliza as duas mãos para rasgar **\*\*SOMENTE A ABERTURA SUPERIOR\*\*** da embalagem.

A abertura acontece de maneira física, contínua e natural.

Durante TODO o processo de abertura, **\*\*O CONTEÚDO PERMANECE 100% ESCONDIDO DENTRO DA EMBALAGEM\*\***.

Nenhuma parte do produto pode aparecer antes que a abertura esteja concluída.

Não permitir:

- \* produto atravessando a embalagem;
- \* produto aparecendo através do plástico;
- \* produto surgindo antecipadamente;
- \* duplicação do conteúdo;
- \* objetos surgindo espontaneamente;
- \* deformações da embalagem.

### **## RETIRADA — NEUTRO PARA QUALQUER PEÇA**

**\*\*SOMENTE DEPOIS** que a abertura superior estiver completamente aberta**\*\***, ela afasta naturalmente as bordas da embalagem.

Uma das mãos entra fisicamente no interior do pacote e começa a retirar **\*\*UMA ÚNICA PEÇA DE ROUPA\*\***.

**### A PEÇA RETIRADA DEVE SER EXATAMENTE A PEÇA MOSTRADA NA IMAGEM DE REFERÊNCIA.**

O modelo de roupa é definido **\*\*EXCLUSIVAMENTE** pela imagem de referência**\*\***.

Pode ser qualquer tipo de peça: camiseta, blusa, vestido, calça, shorts, saia, conjunto ou outra peça apresentada na referência.

**\*\*NÃO** inventar características da roupa.**\*\***

Preservar EXATAMENTE:

- \* tipo da peça;
- \* cor;
- \* estampa;
- \* modelagem;
- \* proporções;
- \* tecido;
- \* textura;
- \* costuras;
- \* etiquetas;
- \* acabamentos;
- \* detalhes;
- \* todas as características visuais originais.

A peça sai **\*\*fisicamente de dentro do pacote\*\***, progressivamente, acompanhando o movimento das mãos.

Ela **NÃO** pode aparecer pronta sobre a cama.

Ela **NÃO** pode teleportar.

Ela **NÃO** pode surgir fora da embalagem.

## **## POSICIONAMENTO NA CAMA**

Imediatamente após retirar completamente a peça, a influenciadora a posiciona cuidadosamente sobre a cama.

As mãos soltam e ajustam delicadamente o tecido, deixando a peça **\*\*naturalmente alinhada, aberta e organizada\*\***, respeitando a forma correta da roupa mostrada na referência.

O tecido reage à gravidade e aos movimentos das mãos com **\*\*física realista\*\***, criando dobras, pequenas ondulações e movimentos naturais.

O resultado final deve reproduzir o produto da imagem de referência com máxima fidelidade.

## **## CONTINUIDADE ABSOLUTA**

Toda a ação acontece em **\*\*UM ÚNICO TAKE CONTÍNUO\*\***:

**\*\*CAMA VAZIA → PACOTE CAI NAS MÃOS → MÃOS SEGURAM PACOTE → ABERTURA SUPERIOR É RASGADA → PACOTE É ABERTO → MÃO ENTRA NO PACOTE → UMA ÚNICA PEÇA É RETIRADA → PEÇA É COLOCADA NA CAMA → MÃOS ORGANIZAM A PEÇA.\*\***

Nenhuma etapa pode ser pulada.

Nenhum objeto pode aparecer espontaneamente.

### **## REGRAS OBRIGATÓRIAS**

- \* Exatamente **\*\*UM único pacote\*\*** durante toda a cena.
- \* Exatamente **\*\*UMA única peça/produto retirada da embalagem\*\***.
- \* A cama começa **\*\*100% vazia\*\***.
- \* O pacote cai diretamente nas mãos.
- \* O pacote nunca toca a cama.
- \* O pacote nunca é colocado sobre a cama.
- \* Nenhuma roupa aparece antes da abertura completa.
- \* O conteúdo permanece totalmente escondido enquanto o pacote está sendo aberto.
- \* Retirar somente a peça correspondente à imagem de referência.
- \* Não inventar tipo, cor ou estampa da peça.
- \* Não duplicar roupas.
- \* Não criar produtos extras.
- \* Não deformar embalagem, mãos ou roupas.
- \* Anatomia humana natural.
- \* Duas mãos, cinco dedos em cada mão.
- \* Física realista do tecido e da embalagem.
- \* Câmera 100% fixa.
- \* Visão top-down fixa.
- \* Sem zoom.

PROMPT - Comece exatamente com a imagem de referência.

A câmera faz um PUSH-IN suave e natural em direção à parte da frente da camisola, aproximando-se delicadamente para destacar a renda, o tecido e os detalhes da parte superior da peça.

A aproximação deve ser física e natural, como uma câmera de celular se aproximando da camisola, sem zoom digital artificial.

Enquanto a câmera se aproxima, uma das mãos entra naturalmente no enquadramento e segura delicadamente uma das alças da camisola com os dedos.

Ela pega a alcinha de forma suave e cuidadosa, apenas levantando levemente a alça para mostrar o detalhe e a delicadeza da peça.

O movimento deve ser pequeno, elegante e humanizado.

IMPORTANTE:

- Não levantar a camisola inteira ainda.
- Não puxar ou esticar a peça.
- Não alterar a camisola.
- Preservar exatamente a renda, tecido, cor, formato e detalhes.
- Não mover os produtos.
- Não criar produtos novos.
- Não alterar nenhuma embalagem.
- Não criar mãos ou dedos extras.
- Apenas uma mão entra para segurar delicadamente a alcinha.
- Movimento natural e suave.
- Sem zoom digital.
- Manter o cenário da cama exatamente como está.

PROMPT -Create an **\*\*ultra-realistic vertical 9:16 smartphone UGC video\*\*** using the provided reference image as the exact visual reference for the clothing and environment.

## **## ABSOLUTE ACTION ORDER**

The movement **MUST** follow exactly this sequence:

**\*\*PALM COVERING LENS → HAND UNCOVERS CAMERA → HAND TOUCHES AND RUBS FABRIC → HAND MOVES BACK TOWARD CAMERA → PALM COMPLETELY COVERS LENS AGAIN.\*\***

Do **NOT** change or reverse this sequence.

## **## START — CAMERA COMPLETELY COVERED**

The **\*\*VERY FIRST FRAME\*\*** begins with the camera lens already **\*\*100% COMPLETELY COVERED** by the palm of **ONE** human hand**\*\***.

The frame is dark/almost completely filled by the extremely close palm.

No clothing or background is visible in the first frame.

Immediately after the video begins, the **SAME** hand naturally moves **\*\*AWAY** from the camera lens**\*\***, progressively uncovering the scene.

As the hand moves backward, it naturally becomes smaller due to physical perspective.

**\*\*NO camera zoom.\*\***

The three clothing pieces are gradually revealed underneath.

The uncovering movement should look exactly like a real content creator removing their palm from a smartphone camera to begin recording.

## **## CAMERA POSITION**

After the lens is uncovered, the smartphone is approximately **\*\*15–20 cm** above the clothing**\*\***.

Close view, but **\*\*NOT macro and NOT extreme close-up\*\***.

The framing continues showing visible portions of **\*\*ALL THREE garments\*\***.

## ## CLOTHING — ABSOLUTE REFERENCE LOCK

The three garments remain **\*\*EXACTLY identical to the reference image\*\***.

Preserve exactly:

- \* colors
- \* prints/patterns
- \* fabric texture
- \* shape
- \* stitching
- \* seams
- \* labels
- \* proportions
- \* folds
- \* placement
- \* every original detail

Never add, remove, duplicate, redesign or modify any garment.

## ## EXACTLY ONE HAND

**\*\*ONLY ONE HUMAN HAND appears during the entire video.\*\***

The hand covering the camera at the beginning is the **\*\*SAME EXACT HAND\*\*** that interacts with the fabric and covers the camera at the end.

No second hand.

No duplicated hand.

Exactly five fingers with realistic anatomy and natural proportions.

## ## FABRIC INTERACTION

After uncovering the lens, the same hand naturally lowers toward the clothing.

It gently pinches a small section of fabric between the fingers.

The fingers then **\*\*rub, massage and softly squeeze the fabric\*\***, using short natural movements as if checking:

- \* softness
- \* thickness
- \* cotton quality
- \* flexibility
- \* texture

The fabric reacts naturally with believable compression, folds, wrinkles and cloth physics.

The movement should feel casual and spontaneous, like authentic TikTok Shop / UGC footage.

## ## CAMERA MOVEMENT

While the hand examines the fabric, the smartphone camera slowly and naturally travels across the three garments.

Use subtle realistic handheld smartphone movement.

Show the fabric texture, stitching, seams and finishing while keeping the three garments recognizable.

**\*\*NO DIGITAL ZOOM.\*\***

Maintain approximately the same physical distance between the smartphone and clothing.

## ## ENDING — COVER CAMERA AGAIN

During the final seconds, the hand stops rubbing the fabric.

The SAME hand lifts naturally from the clothing and moves directly toward the camera lens.

The palm progressively becomes larger due only to physical perspective.

No zoom.

No morphing.

No deformation.

The hand continues approaching until the palm **\*\*COMPLETELY COVERS 100% OF THE CAMERA LENS AGAIN.\*\***

## ## FINAL FRAME — ABSOLUTE REQUIREMENT

The **\*\*LAST FRAME MUST BE 100% COVERED BY THE SAME PALM\*\***, matching the practical transition style used at the beginning.

No clothing visible.

No background visible.

No gaps around the hand.

The frame becomes dark/almost completely filled by the palm.

## ## MOVEMENT TIMELINE — DO NOT CHANGE

**\*\*FIRST FRAME:\*\*** lens already 100% covered by palm.

**\*\*OPENING:\*\*** palm moves away → camera progressively uncovers → three garments appear.

**\*\*MIDDLE:\*\*** same hand reaches fabric → pinches → rubs → massages → feels fabric while camera moves naturally across all three garments.

**\*\*ENDING:\*\*** same hand releases fabric → moves directly toward lens → palm progressively fills frame.

**\*\*LAST FRAME:\*\*** lens 100% covered by palm again.

## ## HARD RULES

Exactly ONE hand throughout the entire video.

No additional hands or duplicated limbs.

No cuts.

No scene changes.

No artificial transitions.

No digital zoom.

No macro shot.

No extreme camera shake.

No clothing modifications.

No additional garments.

No disappearing garments.

No altered colors, prints, labels or textures.

No hand morphing.

PROMTP - Prompt para Flow (Português - Brasil):

Vídeo vertical 9:16, 10 segundos, ultra realista, qualidade 4K, gravado como se fosse com um smartphone, iluminação natural suave, sem filtros, sem legendas, sem textos na tela, sem música, apenas sons ambientes e do tecido da camiseta.

POV (primeira pessoa). A câmera está posicionada acima de uma cama clara, onde a camiseta personalizada está perfeitamente estendida. O produto deve permanecer 100% idêntico à imagem de referência, sem alterar estampa, foto, cores, costura, tecido, gola, caimento ou proporções.

Uma mão feminina com unhas naturais entra suavemente no quadro e passa a mão lentamente sobre a camiseta, alisando o tecido de forma delicada para destacar a qualidade do material.

Em seguida, a mesma mão segura a camiseta pela parte superior, levanta levemente a peça e aproxima a estampa da câmera. A câmera realiza um close suave, focando perfeitamente na estampa personalizada e na foto impressa, revelando os detalhes com nitidez. A camiseta permanece estável, sem deformações.

Depois, a mão abaixa a camiseta novamente, colocando-a cuidadosamente de volta sobre a cama exatamente na posição inicial.

Por fim, as duas mãos entram no quadro e fazem um coração com os dedos centralizado em frente à estampa da camiseta por aproximadamente 2 segundos, encerrando o vídeo.

Regras importantes:

Não alterar absolutamente nada da camiseta.

Não modificar a foto impressa.

Não adicionar ou remover elementos.

Movimentos lentos, naturais e elegantes.

Sem tremidos, sem cortes, sem transições, sem zooms bruscos.

Foco constante na camiseta e na estampa.

Aparência de gravação real feita por uma pessoa, ideal para anúncio de TikTok Shop.

PROMPT -Use the provided reference image as the exact first frame and as the sole authoritative source for every garment visible in the scene.

Create one continuous ultra-photorealistic vertical 9:16 fashion product demonstration video.

The scene contains one or more garments arranged on a real surface, such as a bed, table, sofa, rug, linen backdrop or another surface already visible in the reference.

Before beginning the action, visually identify every physically distinct garment in the image.

Select exactly one real garment from the reference to present.

The selected garment must be one complete physically distinct piece.

Do not combine parts of different garments.

Do not select a decorative prop, accessory, shoe, bag, belt, book, flower or background object.

If the image contains only one garment, select that garment.

If the image contains several garments, select only one of them.

Prefer a garment that is clearly visible, sufficiently separated from the others and can be lifted without disturbing the entire composition.

#### RANDOMIZED SELECTION LOGIC:

When several garments are available, do not always select the first, largest, nearest or most central garment.

Choose among the real garments using varied selection behavior.

Across separate generations, vary the selected garment whenever the generation system allows variation.

Avoid repeatedly selecting the same garment by default.

Do not use a fixed preference based only on color, position or size.

The selected piece may be:

- a top;
- blouse;
- cropped top;
- bodysuit;
- vest;
- dress;
- skirt;
- shorts;
- trousers;
- cardigan;
- shirt;
- or another real garment present in the reference.

#### ABSOLUTE PRODUCT FIDELITY LOCK:

The selected garment must remain identical to the reference.

Preserve exactly:

- the garment category;
- the exact color;
- the exact color placement;
- the exact print;
- the exact print position;
- the exact logo;
- the exact written elements;
- the exact neckline;
- the exact collar;

- the exact sleeve length;
- the exact straps;
- the exact buttons;
- the exact button count;
- the exact pockets;
- the exact seams;
- the exact embroidery;
- the exact bows;
- the exact zipper;
- the exact waistband;
- the exact hem;
- the exact garment proportions;
- the exact fabric texture;
- the exact visible construction;
- the exact folds that are not physically changed by handling.

Do not redesign, simplify, beautify or reinterpret the selected garment.

Do not convert the garment into a similar item.

Do not change its length, width, cut, neckline or proportions.

Do not alter the print while the garment approaches the camera.

Do not make the garment transform, regenerate or replace itself during the movement.

#### UNSELECTED GARMENTS LOCK:

Every garment not selected must remain exactly where it is throughout the entire shot.

Preserve their exact:

- position;
- orientation;
- folds;
- spacing;
- scale;
- colors;
- prints;
- contact shadows;
- relationship with the surface.

The hands must not drag, cover, lift, rotate or displace the unselected garments.

If the selected garment is partially overlapping another piece, lift it carefully and naturally without pulling the other garment.

No other garment may move as a consequence of the action, except for an extremely subtle physically plausible release where the selected garment was resting.

#### HANDS:

Only one pair of adult feminine hands may appear.

Both hands belong to the same woman.

The hands must remain visually consistent for the entire video.

#### Show:

- realistic adult female anatomy;
- exactly five fingers on each hand;
- natural finger spacing;
- realistic joints;
- subtle veins;
- fine skin lines;
- visible skin pores;
- realistic knuckles;
- clean cuticles;
- natural nail shapes;
- short-to-medium professionally manicured nails;
- discreet nude, pale pink or neutral nail polish.

No rings.

No bracelets.

No watch.

No artificial nail distortion.

No extra hands.

No third hand.

No duplicated fingers.

No fused fingers.

No detached wrists.

#### ACTION STRUCTURE:

The camera begins from the exact reference frame.

The scene pauses briefly so the complete arrangement is clearly visible.

The same pair of feminine hands enters naturally from the lower edge of the frame.

The hands move toward the chosen garment with clear intention.

One hand grips the left side of the garment and the other hand grips the right side.

The grip must occur at structurally safe areas such as:

- shoulder edges;
- side seams;
- waistband corners;
- upper corners;
- reinforced edges;
- sleeve openings;
- stable fabric areas.

Do not grip the garment by:

- a fragile strap alone;
- a button;
- a zipper pull;
- embroidery;
- decorative applique;
- loose bow;
- delicate lace;
- thin drawstring;
- print;
- hard ornament.

The hands first separate the selected garment gently from the surface.

Then they lift the garment upward toward the camera in one smooth, continuous movement.

The garment remains facing the camera as much as physically possible.

Keep the front design visible.

The hands maintain the garment open enough to reveal its real silhouette.

Do not stretch it excessively.

Do not pull it unnaturally flat.

Do not fold it in half.

Do not twist it.

Do not shake it.

As the garment rises, show realistic fabric physics:

- natural gravity;
- believable drape;
- gentle fold formation;
- realistic fabric weight;
- subtle movement at loose edges;
- physically correct seam tension;
- natural response to the hands;
- realistic shadow changes;
- accurate depth as the garment approaches the lens.

The selected garment becomes progressively larger in the frame because it is physically approaching the camera.

This must be a real lifting movement, not a digital zoom.

The hands bring the garment close to the camera without touching the lens.

Stop at a comfortable viewing distance where the fabric, stitching, neckline, print or primary design details are clearly visible.

Hold the garment steady near the camera for the final portion of the video.

The final frame must show a close, clear and faithful view of the selected garment.

ONE-WAY ACTION — NO LOOP:

The action occurs exactly once.

The hands enter once.

They select one garment once.

They lift it once.

They approach the camera once.

They hold it near the camera once.

They do not lower the garment back to the surface.

They do not repeat the movement.

They do not return to the initial frame.

They do not place the garment back down.

The final frame must be visually different from the first frame.

The video ends while the garment is still held near the camera.

No seamless loop.

No cyclic movement.

No reverse motion.

No repeated pickup.

No repeated camera approach.

CAMERA:

The camera remains fixed above the composition.

Use an overhead or near-overhead angle between approximately 80 and 90 degrees.

The camera itself does not zoom.

The camera does not orbit.

The camera does not move backward.

The perceived enlargement comes only from the garment physically approaching the lens.

Maintain stable high-quality smartphone or commercial-camera behavior.

Minimal lens distortion.

No fisheye.

No handheld shake.

No sudden focus loss.

Use a natural focus transition from the surface to the garment as it approaches the camera.

Keep the main garment details sharp in the final close-up.

Do not allow autofocus pulsing.

Do not blur the garment completely.

## LIGHTING:

Preserve the exact lighting established in the first frame.

Use stable soft natural daylight.

Maintain accurate product colors.

No flicker.

No moving light source.

No changing white balance.

No orange shift.

No blue shift.

No artificial glow.

No exposure pumping as the garment approaches the camera.

Allow only natural physically correct shadow changes caused by the garment being lifted.

## REALISM:

The movement must look like a real woman physically choosing one garment from a styled fashion composition and bringing it close to the camera for inspection.

Show:

- realistic hand pressure;
- natural fingertip contact;
- believable garment weight;
- realistic fabric response;
- accurate textile fibers;
- natural folds;
- physically plausible movement;
- subtle room ambience;
- authentic smartphone product-video realism.

Do not create a floating garment.

Do not make the clothing move before being touched.

Do not animate the print.

Do not make the garment rigid like cardboard.

Do not make the fabric liquid, rubbery or weightless.

STRICT NEGATIVE CONSTRAINTS:

No looping.

No return to the first frame.

No repeated action.

No lowering the garment after lifting.

No second garment being selected.

No garment switching during the lift.

No garment transforming into another piece.

No product replacement.

No duplicated garment.

No missing garment.

No altered colors.

No changed print.

No changing logo.

No mirrored writing.

No changing button count.

No changing neckline.

No changing sleeve length.

No changing straps.

No changing waistband.

No changing hem.

No fabric melting.

No floating clothing.

No excessive stretching.

No shaking.

No aggressive pulling.

No extra hands.

No extra fingers.

No fused fingers.

No deformed hands.

No person entering the frame.

No face.

No body.

No mannequin.

No text overlays.

No captions.

No watermark.

Background sounds: soft natural room ambience and realistic fabric movement.

Music: subtle elegant fashion instrumental without vocals, low volume.

Diálogo: nenhum.

PROMPT - Create a realistic overhead closing video using the provided image as the starting reference. Keep the camera completely fixed in a top-down position. Preserve the same carpet background, lighting, framing, feminine hands, white nails, bracelets, and the exact clothing arrangement.

The video starts with all clothing pieces already arranged in place. Then the hands begin removing the pieces one by one, not all at once. Each time, the hands pick up only one single piece, pull it smoothly out of the scene to the side, and then come back to remove the next one.

The process should continue step by step:

pick up one piece only

remove it from the frame

return the hands

pick up the next piece only

remove it from the frame

repeat until all pieces are gone

The movements should be smooth, elegant, controlled, and slightly slow. Never remove two pieces together. Never drag all the pieces at once. Each item must leave the scene separately.

The other pieces should remain in place until it is their turn to be removed. The hands should look natural and consistent the whole time.

By the end of the video, all clothing pieces must be removed from the frame, leaving only the empty background visible, creating a clean closing shot.

No camera movement, no zoom, no cuts, no transitions, no extra products, no distorted hands, no deformed fabric, and no removing multiple pieces at once.

PROMPT - Create a realistic overhead product video using the provided image as the main reference. Keep the camera completely fixed from a top-down view. Preserve the same

carpet background, lighting, framing, hands, skin tone, white nails, bracelets, and the exact arrangement of the clothing pieces.

The video should focus only on the top/front piece — the first visible piece on top. The hands gently pick up only this piece and hold it from both sides, showing the fabric clearly. Then the hands softly stretch the fabric outward in a natural way, not too hard, just enough to show the material and elasticity. Hold for a brief moment, then relax slightly, and stretch the same piece again. Repeat this same action smoothly during the video: stretch, hold, relax a little, and stretch again.

Only this single clothing piece should move. The other pieces underneath or behind it must remain in the same position the whole time and should not be touched, removed, or rearranged.

The motion must be slow, controlled, and natural, as if someone is demonstrating the quality of the fabric. Keep the same hands visible throughout the video. No sudden movements.

No camera movement, no zoom, no cuts, no transitions, no changing clothes, no extra products, no switching pieces, no distorted hands, no deformed fabric, and no movement in the other garments.

If needed, end with the piece still being held neatly in front of the other items, maintaining a clean product showcase

PROMPT - Use the approved bed product image as the exact first frame and the primary continuity reference.

Preserve exactly:

- the same garment;
- the same number of pieces;
- the same colors;
- the same print placement;
- the same seams;
- the same proportions;
- the same bed;
- the same bedroom;
- the same camera angle;
- the same lighting direction;
- the same white balance;
- the same product arrangement.

Create one continuous ultra-photorealistic vertical 9:16 overhead smartphone video.

The camera remains completely fixed directly above the bed at a true 90-degree top-down angle.

Only one pair of adult feminine hands enters naturally from the lower left and lower right edges of the frame.

Both hands belong to the same woman.

Maintain the exact same hand identity throughout the shot.

The hands must have:

- realistic adult female anatomy;
- exactly five fingers on each hand;
- natural finger spacing;
- realistic joints;
- subtle veins;
- fine skin lines;
- visible natural skin pores;
- realistic knuckles;
- clean cuticles;
- natural nail shape;
- short-to-medium professionally manicured nails;
- discreet nude or pale neutral nail polish.

No rings.

No bracelets.

No watch.

No hand tattoos.

The hands identify one real structurally appropriate elastic area based on the actual garment construction visible in the reference.

Possible areas include:

- an elastic waistband;
- a ribbed hem;
- a stretchable side panel;
- a central knit fabric section;
- an elastic cuff;
- a visibly stretchable area.

Do not stretch:

- buttons;
- zippers;
- rigid embroidery;
- printed applique;
- hard decorative elements;
- non-elastic seam areas;
- rigid denim;
- fragile trim.

The two hands gently grip opposite sides of the selected fabric area using thumbs and fingertips.

They slowly pull outward in opposite directions.

The stretch must be controlled, moderate and clearly visible.

The garment responds according to its apparent material.

Show realistic textile behavior:

- tension spreading naturally from the contact points;
- knit loops or fibers opening slightly under tension;
- seams remaining stable;
- print stretching together with the textile;
- nearby fabric shifting subtly on the bed;
- realistic bedding friction;
- realistic material resistance.

Do not exaggerate the elasticity.

Hold the stretched position briefly.

Then release the fabric gradually.

The material returns naturally toward its original size.

Show:

- believable elastic recovery;
- subtle residual ripples;
- small natural fabric movements;
- realistic settling against the bed.

The garment must preserve its original design, shape, size and colors after release.

No cuts.

No camera movement.

No zoom.

No extra hands.

No duplicated fingers.

No changing manicure.

No fabric tearing.

No seam breaking.

No permanent deformation.

No rubber-like recoil.

No product morphing.

No changes to the print.

No changes to the room.

Background sounds: soft room ambience and subtle realistic fabric movement.

Music: none.

## IMPORTANT HAND RULES

The hands MUST ONLY touch the OUTER EDGES of each product.

Never touch:

- the center
- printed areas

Animation

0.0s–3.5s

Both hands naturally approach the UPPER product.

Each hand pinches one outer side edge.

The product is lifted only a few centimeters.

The movement is slow and controlled.

Natural gravity affects the fabric.

The product gently sways.

The fabric bends naturally.

No excessive stretching.

The product is then carefully returned to exactly the original position.

---

3.5s–10.0s

Both hands move to the LOWER product.

Each hand grips ONLY one outer side edge.

The hands slowly pull outward horizontally.

Demonstrate the natural elasticity of the fabric.

Maintain realistic fabric tension.

The stretch is smooth and controlled.

After reaching maximum extension, the hands slowly release.

The fabric naturally returns to its original shape with realistic rebound.

PROMPT - Reference image is the absolute truth. Preserve the garments exactly as shown.

Ultra-realistic POV product demonstration. Two realistic female hands naturally pick up only the cropped top by both side edges and immediately bring it very close to the camera until the fabric fills most of the frame. The hands perform four quick stretch-and-release movements, each lasting less than half a second. The fabric visibly stretches with realistic elasticity and instantly returns to its original shape after every pull. The top is smoothly placed back in its original position.

Without cutting, the hands immediately pick up only the shorts by both sides of the waistband and bring them close to the camera. Four quick stretch-and-release demonstrations are performed in the same realistic manner. The waistband, drawstring and fabric react naturally with accurate cloth physics before the shorts are placed back exactly where they started.

Fast confident influencer movements, realistic gravity, premium fabric simulation, continuous single take, ultra-photorealistic, no cuts, no text.

PROMPT- Ultra-realistic POV video, vertical 9:16, 4K, cinematic lighting, natural human motion.

Point of view shot as if the viewer is holding the product. A woman's hands enter the frame naturally — feminine hands with smooth skin and glossy red painted nails (deep red, elegant finish).

The hands gently interact with the product (exactly identical to the reference image):

- Slowly sliding fingers across the fabric to show texture
- Lightly pinching the material to demonstrate softness
- Lifting a small section and letting it fall naturally
- Adjusting straps and edges with delicate movements
- Tracing the printed details (cow pattern and bows) with fingertips

Movements must feel organic, spontaneous, and realistic — no exaggeration, no robotic motion.

Camera behavior:

- Subtle handheld micro-movements (POV realism)
- Slight natural sway, very smooth
- Focus shifts gently between hands and fabric

Lighting:

- Soft natural light from the side
- Realistic shadows following hand movement
- Fabric texture highlighted with subtle sheen

Details:

- Highly detailed fabric fibers and stitching
- Natural folds forming as the hands move
- Accurate colors, no distortion

Scene:

- Clean, minimal background (bed or neutral surface)
- No face visible, only hands
- No text, no logos, no distractions

Style:

- Premium e-commerce / TikTok Shop style

PROMPT - Create an ultra-realistic cinematic first-person POV video using the uploaded references.

REFERENCE ASSETS

#Environment: Uploaded background/environment.

#Product: Uploaded clothing item(s), reproduced exactly.

OBJECTIVE

Generate a realistic first-person POV video in which a person naturally picks up, holds, adjusts, rotates, and showcases the uploaded clothing inside the uploaded environment. The result must look like genuine handheld footage recorded with a real camera or smartphone, never CGI or AI-rendered.

PRODUCT ACCURACY

The clothing must remain identical to the reference, preserving colors, logos, prints, embroidery, labels, stitching, fabric texture, proportions, and materials. No redesigns, missing details, added graphics, or alterations.

OPENING HOOK

Start with a dynamic first-person shot where the clothing is thrown downward and out of frame. Within the first second, perform a hard cut so the garment instantly appears perfectly held in both hands, creating a fast, satisfying transition.

HAND INTERACTION

Show realistic human hands with natural finger movement, grip pressure, wrist motion, and subtle adjustments. Continuously hold, lift, rotate, lightly stretch, and present the garment while highlighting logos, seams, stitching, and fabric texture.

FABRIC REALISM

The clothing must behave like real fabric, with accurate draping, folds, wrinkles, weight, gravity, and movement. Avoid stiff, floating, or artificial cloth simulation.

CAMERA

Maintain a true first-person handheld perspective with subtle body sway, breathing motion, micro-shake, and natural framing adjustments, as if someone is carefully examining the product.

LIGHTING & ENVIRONMENT

Use physically accurate lighting with realistic shadows, highlights, reflections, exposure, and consistent environmental integration. The clothing must match the scene's scale, depth, perspective, and lighting.

PRODUCT SHOWCASE

Bring the garment close to the camera, rotate it naturally, and clearly display the front, logos, fabric texture, stitching, sleeves, collar, cuffs, and hems. Every movement should emphasize quality and craftsmanship.

QUALITY

Ultra-realistic,lor

NEGATIVE PROMPT

Avoid CGI appearance, AI-generated look, cartoons, unrealistic fabric physics, floating objects, deformed hands, extra fingers, distorted clothing, incorrect logos or colors, artificial lighting, over-sharpening, plastic-looking fabric, robotic movements, low-detail textures, flickering, and temporal inconsistencies.

PROMTP - POV LOOK NA CAMA

- enviar imagem de referência + prompt

Cinematic close-up video of a product placed naturally on top of a neatly made bed in a realistic bedroom environment. The product must remain 100% identical to the product shown in IMAGE 1. Preserve exactly the same product, same design, same shape, same color, same material, same texture, same size, same proportions, same seams, same straps, same details and every visible characteristic from IMAGE 1. Do not recreate, redesign, reinterpret, modify or transform the product in any way.

The video begins with the exact product from IMAGE 1 resting naturally on the bed. The camera slowly moves closer toward the product in a smooth, natural cinematic movement, gradually revealing its details.

As the camera gets closer, two realistic feminine hands naturally enter the frame. The hands gently pass over the exact product, naturally touching and smoothing the fabric. The hands then carefully pick up the exact product from the bed and bring it closer to the camera, holding it naturally to showcase its details.

The product must remain exactly the same as shown in IMAGE 1 during the entire video. It must not change shape, color, material, design, size or structure while being touched, lifted or held. The product must not transform into another object or clothing item.

Only the product, the bed, the bedroom environment and two realistic feminine hands are visible. No person is visible. No face, body or model appears at any moment. The camera itself is never visible. No smartphone is visible. No recording equipment is visible.

The hands move naturally and realistically, with accurate finger articulation, natural grip, realistic pressure and physically accurate interaction with the product. The fabric moves naturally according to its real material and structure.

A woman's voice speaks clearly and naturally in Brazilian Portuguese throughout the video:

COLOQUE AQUI SEU SCRIPT EX: "Gente, achei esse look aqui, é extremamente confortável, lindo. Decidi compartilhar aqui com vocês e tem várias cores."

Natural elegant hand movements, realistic fabric physics, realistic bedroom lighting, photorealistic textures, realistic depth of field, high-end product showcase aesthetic. No camera cuts. No scene changes. No transitions. One continuous uninterrupted shot. Vertical format 9:16, 10 seconds.

The exact product from IMAGE 1 must be preserved with absolute fidelity from beginning to end. No product alteration, no product redesign, no product transformation, no color change, no shape change, no material change, no invented details, no missing details, no different product, no extra hands, no extra fingers, no deformed hands, no person visible, no face, no body, no camera visible, no smartphone visible, no recording equipment, no text, no subtitles, no captions, no logos, no watermark.

- folds
- thickness

The T-shirt is a full-size adult men's T-shirt.

Never shrink it.

Never make it resemble a children's shirt.

Animation:

Both hands naturally grip the folded T-shirt inside the opened package.

Slowly pull the folded T-shirt completely out of the package while it naturally slides against the plastic opening.

Only after the shirt is completely outside the package do the hands begin unfolding it.

The hands gently separate while opening the shirt in one smooth continuous movement.

Hold the shirt by both shoulder corners.

PROMPT - Create a short, ultra-realistic vertical UGC product showcase video using the uploaded image as the exact reference.

The garment shown in the image must remain 100% identical throughout the video.

Do not modify the color, print, logo, graphics, stitching, texture, fabric, proportions, fit, shape, or any other visual detail.

The product is neatly displayed on a clean surface under soft natural lighting.

A realistic human hand naturally enters the frame and gently interacts with the garment by:

- lightly smoothing the fabric,
- pointing to important details,
- briefly lifting one edge a few centimeters,
- showing the texture,
- highlighting the stitching, collar, sleeves, hem, print (if present), and overall finish.

The interaction should automatically adapt to any T-shirt or garment shown in the reference image.

The movements are slow, smooth, realistic, and resemble a real customer casually presenting the product.

The camera remains above the product with subtle handheld smartphone movement and gentle micro-shake.

The framing keeps the entire garment visible throughout the video.

Natural soft lighting emphasizes the fabric quality and realistic material behavior.

No speech.

No narration.

No voiceover.

No lip-sync.

No music.

No sound effects.

No text, captions, subtitles, logos, watermarks, interface elements, graphics, or overlays.

The background remains unchanged.

The product must never deform, stretch, melt, flicker, morph, blur, change color, or move from its original position.

No additional objects or garments appear.

Ultra-realistic smartphone footage, authentic UGC style, premium commercial quality, 4K, natural human interaction, designed to work with any T-shirt or clothing item while preserving every detail of the original image.

PROMPT - Create a highly realistic 9:16 vertical POV video, as if naturally recorded by a real person using a smartphone.

Use the provided image as the exact visual reference.

Preserve the product, environment, lighting direction, colors, textures, proportions, scale, position, and all original details exactly as shown. Only natural camera movement and realistic interaction may be added.

POV CAMERA AND MOTION:

- First-person point of view only.
- The camera always represents the viewer's eyes.
- Natural handheld smartphone movement with subtle micro-shakes and gentle breathing rhythm.
- Small organic framing adjustments, as if a real person is repositioning the phone.
- No cinematic movements, dramatic angles, artificial stabilization, sudden zooms, cuts, or transitions.

- Keep the product clearly visible and correctly framed throughout the video.

#### REALISM AND VISUAL QUALITY:

- Natural lighting with realistic shadows and reflections.
- Accurate textures for skin, hands, fabric, metal, plastic, glass, wood, and other materials, depending on the product.
- Correct product weight, proportions, structure, and interaction physics.
- Clean and sharp image with natural depth of field.
- No filters, excessive blur, artificial cinematic effects, or over-processing.

#### HANDS AND PRODUCT INTERACTION:

- Realistic human hands may appear only when necessary to present or interact with the product.
- Movements adapt naturally to the product type, such as gently holding, lifting, rotating, adjusting, opening, pressing, testing, smoothing, or showing details.
- Grip pressure, speed, and hand position must be realistic and proportional.
- Movements should feel casual, controlled, and slightly imperfect.
- No exaggerated gestures, robotic motion, or perfect choreography.
- The hands must never pass through, deform, damage, or incorrectly interact with the product.

#### PRODUCT PRESERVATION:

- The product must remain 100% identical to the reference image throughout the entire video.
- Do not change its color, shape, size, texture, material, finish, stitching, print, logo, label, graphics, proportions, or construction.
- Do not add, remove, replace, duplicate, rearrange, or redesign any part of the product.
- No deformation, melting, morphing, stretching, flickering, floating, disappearing parts, texture crawling, or visual instability.

#### BEHAVIOR AND FEELING:

- The scene should feel like a real person casually examining and showing a real product.
- Calm, natural, confident, and slightly curious energy.
- Small pauses, subtle imperfections, and realistic timing.
- No acting, influencer performance, or exaggerated sales behavior.
- The interaction automatically adapts to the product while remaining simple and believable.

#### AUDIO:

- Completely silent.
- No speech.
- No narration.
- No voiceover.
- No lip-sync.
- No music.
- No sound effects.
- No ambient audio.

#### GENERAL RULES:

- POV only.
- Never show the person's face, eyes, mouth, or full body.
- No text, captions, subtitles, icons, buttons, logos, watermarks, interface elements, graphics, or overlays on screen.
- No additional people or unnecessary objects.
- No distortions, glitches, physics errors, or hallucinated details.
- The environment and lighting remain consistent throughout the video.

The final result must feel like authentic smartphone footage of a real person naturally presenting any product in a real moment.

PROMPT- The shirt hangs on a natural wooden hanger, initially positioned close to a shelf inside a clean, minimalist clothing store.

The shirt is perfectly aligned, hanging naturally, and remains fully visible throughout the entire video.

The video is completely silent (no audio).

A single realistic human hand with a natural bare forearm enters from the right side of the frame and gently holds the hanger.

The forearm has no tattoos, jewelry, watch, sleeves, or accessories.

The hand slowly pulls the hanger slightly forward and away from the shelf with a smooth, controlled motion, creating more visual space around the shirt while keeping it perfectly centered.

After the movement, the shirt remains suspended freely with a subtle, natural fabric sway, fully visible and away from the background.

Next, a second realistic hand with a natural bare forearm enters the frame and gently interacts with the shirt.

The second hand softly smooths the fabric, lightly adjusts the collar, sleeves, or hem, and naturally highlights the texture, fit, stitching, and overall quality of the garment without stretching or deforming it.

No more than two hands appear simultaneously.

All movements are slow, realistic, and purposeful, emphasizing the premium quality of the shirt.

The camera remains fixed with only a very subtle, smooth push-in, keeping the entire shirt visible throughout the video.

The lighting is soft, even, and professional, naturally emphasizing the fabric texture and garment details.

The minimalist store background remains clean, slightly out of focus, and unobtrusive, keeping the shirt as the clear focal point.

The shirt must remain 100% identical to the reference image.

Do not change the color, print, logo, graphics, stitching, texture, proportions, fabric, or shape.

Do not stretch, warp, blur, melt, morph, flicker, or deform the garment.

Natural human movements only, with subtle realism and no exaggerated gestures.

No text, captions, subtitles, logos, watermarks, interface elements, or graphics appear on screen.

PROMPT - Create a professional, cinematic product presentation animation using the attached image as the exact reference.

The garment must remain 100% identical to the reference image throughout the entire video.

Start with a medium shot showing the complete T-shirt, then smoothly transition into detailed close-ups of the garment.

Capture close-up and macro shots of:

- fabric texture
- stitching details
- collar
- sleeves
- hem
- seams
- print or graphics (if present)

- logo (if present)
- material thickness
- fabric structure
- finishing quality
- overall craftsmanship

Use slow cinematic camera movements, macro lens effect, shallow depth of field, and smooth focus transitions.

Natural camera angles should highlight the quality and construction of the garment without excessive movement.

Lighting should emphasize the fabric texture, stitching, depth, and premium finish using a combination of soft studio lighting and natural window light.

Show realistic fabric density, cotton weave (or appropriate material), subtle natural folds, seam depth, and realistic shadows.

Do not alter the garment in any way.

Do not change the color, print, logo, graphics, proportions, texture, stitching, material, or fit.

No morphing, stretching, melting, flickering, deformation, blur artifacts, or reconstruction.

The background and lighting remain consistent with the original image.

Ultra-realistic, commercial fashion videography, 4K quality, premium advertising style with smooth, elegant camera movement focused entirely on showcasing the garment.

PROMPT - First-person perspective (POV) animation, amateur smartphone video style, realistic handheld camera movement.

Top-down view of a bed in a realistic men's bedroom, natural light, casual setting.

The garment (use the image of the garment provided as a reference) is fully visible on the bed, as in a real product review, with small natural hand movements and slight tremors; the entire garment is visible in the image at all times.

A realistic human hand touches the fabric, gliding lightly to show the softness, thickness, and quality of the fabric.

Natural finger movements, subtle wrist rotations, realistic interaction with the fabric.

Highly detailed fabric texture, visible fibers, natural wrinkles and folds that react to touch.

Soft and natural shadows, realistic lighting changes caused by hand movement.

Very realistic appearance, no production, no commercial purposes.

Authentic TikTok shop aesthetic, casual, real, with the vibe of a handmade product review.

PROMPT- Prompt de Vídeo: Promoção Kit 3 Blusas Tapa Bumbum (Fitness)

1. Visão Geral:

Um vídeo promocional curto e objetivo, focado no produto (UGC - User Generated Content), apresentando um kit de três camisetas básicas de academia com design "tapa bumbum". O vídeo destaca a praticidade e as cores do kit.

2. Descrição das Peças (Produtos):

Item: Camiseta de manga curta estilo "tapa bumbum".

Design: Corte alongado com a barra arredondada (estilo "longline"), projetado para cobrir a região do quadril/glúteos durante exercícios físicos. Gola redonda clássica.

Cores do Kit: Uma blusa Branca (em destaque na frente), uma Preta (ao meio) e uma Vermelha (ao fundo).

Tecido: Tecido leve e maleável, típico de poliamida ou dry-fit para treinos.

3. Cenário e Estética:

Ambiente: As blusas estão estendidas sobre uma superfície escura e altamente reflexiva (balcão de granito ou vidro preto), próxima a uma grande janela.

Iluminação: Luz natural forte e lateral (sol de fim de tarde), criando reflexos intensos e sombras marcadas, destacando a textura do tecido.

Visual: Limpo e focado, com parte de uma cozinha moderna ou área externa visível no reflexo/fundo.

4. Elementos Visuais (Sobreposições):

Marca d'água: Pequeno logotipo "Veo" no canto inferior direito.

5. Sequência de Ações:

00:00 - 00:03: Uma mão feminina (com anéis e unhas feitas) entra em cena e alisa a blusa branca, mostrando o caimento do tecido e o detalhe da barra arredondada.

00:04 - 00:07: A mão aponta sucessivamente para a blusa preta e para a vermelha, enfatizando que o kit contém as três cores mostradas.

6. Script (Áudio Original em Português):

"Oi meninas, tá super barato esse kit com três blusas ideal para os seus treinos sem mostrar demais. Vou deixar o link abaixo, clique e confira!"

7. Estilo de Edição:

Câmera: Ângulo superior (High Angle), levemente inclinado.

Corte: Plano sequência único (sem cortes), com foco fixo no produto.

Vibe: Recomendação direta, estilo "achadinho" de internet

PROMPT - Base image:

Use the provided image as the starting frame. Keep the same environment, lighting, camera angle, and tattooed arm.

Perspective:

First-person POV. Add the second hand naturally (same person).

Shot style:

One continuous shot. No cuts. No transitions.

Action (elastic focus):

The second hand enters the frame

Both hands move toward the front shorts (beige pair)

One hand holds the waistband while the other supports the fabric

The person pulls and stretches the elastic waistband naturally

Holds briefly to show resistance and flexibility

Releases it, letting it return naturally

Then the hand runs across the waistband area

Lightly presses and adjusts the fabric

Subtly shows the drawstring (touching and adjusting it)

Movements must feel real, slow, and controlled, like checking product quality.

Camera movement (NO CUTS):

Slight natural lean-in toward the waistband

Hold focus on the elastic area

Subtle pull-back after interaction

Focus:

Elastic waistband (main focus)

Flexibility and structure

Drawstring detail

Fabric detail:

Tactel fabric (lightweight, smooth, slightly silky)

Constraints:

No cuts

No exaggerated movement

Realistic physics

Expected result:

A realistic POV video clearly showing the waistband elasticity and quality, with natural hand interaction.

Base image:

Use the provided image as the starting frame. Keep the same environment, lighting, camera angle, and tattooed arm.

Perspective:

First-person POV. Add the second hand naturally (same person).

Constraints:

No cuts

No exaggerated movement

Realistic physics

Expected result:

A realistic POV video clearly showing the waistband elasticity and quality, with natural hand interaction.

Base image:

Use the provided image as the starting frame. Maintain the same composition and environment.

Important detail:

The shorts underneath are exactly the same model and fabric as the top one (tactel) — only the color is different. This must be visually clear.

Perspective:

First-person POV. Tattooed arms visible. Add the second hand.

Shot style:

One continuous shot. No cuts. No transitions.

Action (reveal movement):

The second hand enters the frame

Both hands move to the top shorts (beige pair)

The person grabs the top shorts and slides it slightly to the side / lifts it partially revealing the shorts underneath

The movement is natural, not exaggerated

The camera subtly follows the motion

The underlying shorts are clearly visible and shown as:

same design, same tactel fabric, same structure — only different color

After revealing:

One hand briefly touches the second shorts

Slides across the fabric

Lightly pinches it to show it has the same tactel texture

Then the top shorts can be gently placed back or remain slightly shifted

Camera movement (NO CUTS):

Subtle lean-in during the reveal

Slight repositioning to show both layers clearly

No cuts or sudden motion

Focus:

Comparison between both shorts

Same model, different color

Tactel fabric consistency

Constraints:

No cuts  
No distortion  
Realistic movement

Expected result:

A natural POV video where the person reveals the shorts underneath, clearly showing it is the same model in a different color, reinforcing product variation.

Integridade do produto:

O item deve ser idêntico em todos os aspectos: cor, estampa, etiqueta, formato, material, textura, brilho e proporções.

Nenhuma modificação visual é permitida.

Experiência visual:

Simule uma gravação em primeira pessoa, como se a câmera estivesse nas mãos do criador.

O vídeo deve parecer espontâneo, contínuo e natural, sem cortes, transições, zoom ou efeitos artificiais.

Interação e movimento:

As duas mãos masculina segura o produto de forma firme e realista.

Ele passa a mão no produto mostrando o tecido

O produto se aproxima levemente da câmera.

Os movimentos devem ser suaves, estáveis e críveis, sem tremores irreais.

Sem áudio e fala de venda:

Uma das mãos desliza pela gola, ajustando e evidenciando o acabamento. Depois, a mão passa suavemente sobre a estampa, pressionando levemente para demonstrar a qualidade da impressão e que a estampa não sai ao toque. Movimentos lentos, firmes e contínuos, focados em destacar a qualidade do tecido e da estampa. Sem fala, sem áudio, sem aparecer pessoas — apenas as mãos interagindo com a camiseta.

Restrições técnicas essenciais:

O produto não pode desaparecer, distorcer, deformar, derreter ou perder qualidade

Nenhuma mudança de brilho, textura ou estampa

A mão não pode atravessar o produto

A mão deve aparecer completa, sem falhas ou dedos extras

Não exibir rosto, olhos ou boca

Proibido filtros, glitches, distorções ou efeitos artificiais

Iluminação e estética:

Luz natural suave, realista e equilibrada

Visual limpo, profissional e focado totalmente no produto

Especificações finais:

Alta definição, nitidez elevada e aparência premium

Textura realista e sensação de gravação do mundo real

Somente duas mãos na cena

PROMPT- Crie um vídeo POV hiper realista, a partir da imagem enviada, preservando o produto exatamente como na foto original.

Integridade do produto:

O item deve ser idêntico em todos os aspectos: cor, estampa, etiqueta, formato, material, textura, brilho e proporções.

Nenhuma modificação visual é permitida.

Experiência visual:

Simule uma gravação em primeira pessoa, como se a câmera estivesse nas mãos do criador.

O vídeo deve parecer espontâneo, contínuo e natural, sem cortes, transições, zoom ou efeitos artificiais.

Interação e movimento:

As duas mãos masculina segura o produto de forma firme e realista.

Ele passa a mão no produto mostrando o tecido

O produto se aproxima levemente da câmera.

Os movimentos devem ser suaves, estáveis e críveis, sem tremores irreais.

Sem áudio e fala de venda:

Uma das mãos desliza pela gola, ajustando e evidenciando o acabamento. Depois, a mão passa suavemente sobre a estampa, pressionando levemente para demonstrar a qualidade da impressão e que a estampa não sai ao toque. Movimentos lentos, firmes e contínuos, focados em destacar a qualidade do tecido e da estampa. Sem fala, sem áudio, sem aparecer pessoas — apenas as mãos interagindo com a camiseta.

Restrições técnicas essenciais:

O produto não pode desaparecer, distorcer, deformar, derreter ou perder qualidade

Nenhuma mudança de brilho, textura ou estampa

A mão não pode atravessar o produto

A mão deve aparecer completa, sem falhas ou dedos extras

Não exibir rosto, olhos ou boca

Proibido filtros, glitches, distorções ou efeitos artificiais  
Iluminação e estética:  
Luz natural suave, realista e equilibrada  
Visual limpo, profissional e focado totalmente no produto  
Especificações finais:  
Alta definição, nitidez elevada e aparência premium  
Textura realista e sensação de gravação do mundo real  
Somente duas mãos na cena

PROMPT - Ultra-realistic vertical product video, 9:16, 2 seconds, UGC style for TikTok Shop.

A single delicate female hand with short, natural, unpainted nails and no tattoos enters the frame naturally. She gently picks up one ribbed shorts from the set, brings it closer to the camera, then lightly stretches the fabric horizontally to demonstrate its elasticity, softness, and premium texture. The movement is smooth, realistic, and controlled, with natural fabric behavior. The camera focuses on the ribbed texture, stitching, seams, waistband, and overall finish while maintaining sharp detail.

The remaining shorts stay softly blurred in the background on a light-colored bed or clean white tabletop. Natural daylight, soft shadows, realistic depth of field, cinematic smartphone-style product showcase, authentic hand movements, photorealistic 8K quality.

Maintain 100% fidelity to the original product. Do not alter the shape, color, fabric, stitching, proportions, texture, logo placement, or finish. No deformations, no morphing, no extra hands, no extra fingers, no floating objects, no visual artifacts, no text, no captions, no logos, no watermarks, no additional branding, and no inconsistent elements.

PROMPT- Ultra-realistic first-person POV product video, single continuous take, no cuts, no transitions, completely silent (mute), no speech, no voice, no narration, no dialogue, no lip movement, no audio generation.

Only two feminine hands are visible during the entire video. No face, no body, no arms above the wrists, no hair, no reflections, no shadows of a person.

The white long-sleeve blouse from the reference image is centered on a red quilt exactly as shown. Natural daylight, realistic home environment, smartphone camera, stable top-down view.

The camera remains fixed for almost the entire video.

The hands slowly enter from the bottom of the frame and gently touch both folded sleeves, making small natural adjustments to center the blouse.

The fingers softly glide over the collar, chest area and fabric, naturally highlighting the texture.

The hands gently stretch the fabric sideways at the waist with a very small movement to demonstrate elasticity, then release it smoothly.

The left sleeve is unfolded in one slow continuous motion. Immediately after, the right sleeve is unfolded in the same gentle manner.

The left cuff is lifted only a few centimeters and rotated slightly to reveal the stitching before being placed back down naturally.

The right cuff is demonstrated in exactly the same slow, controlled way.

Both hands then lightly smooth the sides of the blouse, removing small wrinkles and leaving the garment perfectly flat and symmetrical.

Only during the final second does the camera perform a very slow, subtle push-in toward the ruched waist area while the hands gently pull the fabric outward just enough to emphasize the shape, texture and finishing.

The movement of the hands must remain delicate, slow, continuous and realistic throughout the entire video. The blouse always remains fully visible.

Photorealistic smartphone footage, realistic fabric physics, soft natural lighting, stable image, organic movement, authentic product presentation.

PROMPT - Ultra-realistic product video, 9:16.

Two delicate, realistic female hands with short, natural, unpainted nails enter the frame simultaneously from opposite sides. They gently pick up the brown shorts first and remove them from the scene. Then they return, pick up the black shorts, and remove them. Finally, they return once more, pick up the pink shorts, and remove them from the frame. After each pickup, both the hands and the shorts completely exit the scene before the next pair is picked up.

Maintain 100% fidelity to the original product design at all times. Do not change the shape, color, fabric, stitching, texture, proportions, or finish. No deformation, morphing, stretching, or visual artifacts. No extra objects, no logos, no text on screen, no watermarks, no additional branding, no inconsistent elements. PROMPT -PROMPT PART 1 — 10s

Use the uploaded image as the exact first frame and the ONLY visual reference.

Create a single continuous ultra-photorealistic vertical video (9:16), filmed as if captured on a real smartphone inside a bright, modern clothing store.

The hoodie must remain absolutely identical to the uploaded reference throughout the entire video.

Do NOT modify, redraw, recreate, sharpen, restyle or reinterpret any part of the hoodie.

Preserve exactly:

- fabric color
- fabric texture
- stitching
- collar
- hood

- cuffs
- sleeves
- waistband
- wrinkles
- folds
- garment proportions
- print or artwork (if present)
- print colors
- print size
- print position
- distressed effects (if present)
- overall appearance

Never alter the design.

Never change the print.

Never replace any artwork.

Never add or remove graphics.

The hoodie remains hanging naturally on a plain black hanger with no text or logo.

Keep the clothing rack, surrounding garments, store lighting, reflections and background consistent with the uploaded reference.

## CAMERA

Realistic handheld smartphone POV.

Chest-height filming.

Natural handheld micro-movements only.

No cinematic movement.

No stabilization.

No floating camera.

No drone effect.

No zoom.

No cuts.

## MOVEMENT

Two realistic bare male hands remain in continuous visible contact with the hoodie.

Left hand:

Silver metal watch.  
Dark floral forearm tattoo.

Right hand:  
Thin silver bracelet.

Natural skin texture.  
Correct anatomy.  
Five fingers only.  
Short nails.

00:00–00:02

Both hands already hold the hoodie by the shoulder area.

They perform a quick, firm pull toward the camera, creating realistic fabric tension and natural shifting folds.

The camera reacts with a subtle handheld forward movement as if the person filming instinctively moved closer.

00:02–00:06

The left hand maintains its grip.

The right hand slowly slides across the fabric while maintaining continuous contact.

It gently pinches and compresses the material to demonstrate thickness, softness and quality.

Visible finger pressure creates realistic folds, small indentations and immediate fabric response.

The camera naturally follows the hand with subtle handheld micro-adjustments.

00:06–00:10

The right hand continues holding the center area of the hoodie.

The left hand gently stretches the opposite side outward to demonstrate the fabric structure and stability.

The stretch remains realistic and controlled.

The camera slightly slows for less than half a second to showcase the garment details, fabric texture, stitching and any printed artwork (if present).

The video ends with the hoodie slightly tilted forward under natural fabric tension while both hands remain holding the garment.

REALISM

Ultra-photorealistic.

Real smartphone recording.

Natural HDR.

Visible fabric fibers.

Realistic cotton behavior.

Natural lighting.

No CGI appearance.

No AI artifacts.

No morphing.

No flickering.

No garment changes.

The hoodie must remain perfectly identical to the uploaded reference during the entire video.

PROMPT -

Continue from the exact final frame of Part 1: same BECO SHOP store, same lighting, same glossy black hanger with unchanged "Beco Shop" gold-beige text, same camera distance, same hand positions, same sideways fabric tension and identical long-sleeve camouflage UV50 dry-fit shirt.

Both bare male hands maintain uninterrupted contact. The left tattooed forearm with silver metal watch keeps the left shoulder secured while the right hand with thin silver bracelet makes a quick pinch-and-fold beside the zipper, visibly compressing the dry-fit fabric to show density and finishing. The hands then brisk tilt the hanger and shirt slightly toward the white chest symbol and short zipper, creating a premium product-window angle while the handheld camera reacts naturally because the product moves toward it (that's where the camera is).

Keep the exact camouflage colors, sharp print, collar, zipper, symbol and proportions unchanged.

During the final second, both hands fast extend the shirt directly toward the lens, keeping firm pressure and natural folds. The product nearly fills the vertical frame, angled like it is being handed to the customer. Hold this final offer gesture only for the last 0.5 second, with the hanger text still visible near the top. Quick movement, brisk physical response, fast commercial pacing, continuous contact throughout.

PROMPT -

Direct continuous continuation from Part 1 with no reset or jump.

Maintain the exact same vertical 9:16 handheld smartphone POV, the same clothing store environment, identical lighting, the same plain black hanger with no text or logo, the same garment, identical hand positions, hanger angle, fabric tension, and background.

The garment must remain absolutely identical to the uploaded reference.

Do NOT modify, redraw, recreate, sharpen or reinterpret any part of the garment.

Preserve exactly:

- fabric color
- fabric texture
- stitching
- collar
- hood (if present)
- sleeves
- cuffs
- waistband (if present)
- wrinkles
- folds
- garment proportions
- print or artwork (if present)
- print colors
- print size
- print position
- distressed effects (if present)
- overall appearance

Never alter the design.

Never change the print.

Never replace any artwork.  
Never add or remove graphics.

Both realistic bare male hands remain in continuous visible contact.

Left hand:  
Silver metal watch.  
Dark floral forearm tattoo.

Right hand:  
Thin silver bracelet.

Natural skin texture.  
Correct anatomy.  
Five fingers only.  
Short nails.

00:00–00:02

Starting from the exact stretched position at the end of Part 1, both hands quickly compress the center area of the garment, pressing the fabric naturally between the fingers to demonstrate thickness, softness and structure.

Visible finger pressure creates realistic folds while keeping any printed artwork perfectly unchanged.

The camera naturally moves slightly closer due to the hands bringing the garment toward the smartphone.

00:02–00:04.5

Without breaking contact, both hands quickly reposition to the side edges and gently pull the garment outward, presenting the front in a clean, premium way.

The hanger tilts slightly forward so the front of the garment remains fully visible.

Natural fabric weight, tension and realistic movement remain visible throughout.

00:04.5–00:05

Both hands smoothly extend the garment toward the camera as if presenting it directly to the customer.

The garment naturally fills most of the frame while remaining perfectly sharp.

Any artwork or print stays centered, unchanged and clearly visible.

Hold this final presentation only for the last half second.

No speech.  
No music.  
No subtitles.

## REALISM

Ultra-photorealistic.

Real smartphone recording.

Natural HDR.

Visible fabric fibers.

Realistic fabric physics.

Natural lighting.

No CGI appearance.

No AI artifacts.

No morphing.

No flickering.

No garment changes.

The garment must remain perfectly identical to the uploaded reference during the entire video.

Create a single continuous ultra-photorealistic vertical video (9:16) filmed from a pure first-person smartphone POV inside a bright, modern clothing store.

The garment remains naturally hanging on a plain glossy black hanger with no text, logo or branding.

Keep the store environment consistent with the uploaded reference, including clothing racks, flooring, lighting, reflections and surrounding garments.

The garment must remain absolutely identical to the uploaded reference.

Do NOT modify, redraw, recreate, sharpen or reinterpret any part of the garment.

Preserve exactly:

- fabric color
- fabric texture
- stitching
- collar
- hood (if present)
- sleeves
- cuffs
- waistband (if present)
- wrinkles
- folds
- garment proportions
- print or artwork (if present)
- print colors
- print size
- print position
- distressed effects (if present)
- overall appearance

Never alter the design.

Never change the print.

Never replace any artwork.

Never add or remove graphics.

Two realistic bare male hands enter the frame from below already gripping both shoulder areas.

Left hand:

- silver metal watch
- dark floral forearm tattoo

Right hand:

- thin silver bracelet

Natural skin texture.

Correct anatomy.

Five fingers only.

Short nails.

### 00:00–00:02

Create a strong opening hook.

Both hands perform a quick, firm outward pull on the shoulder areas, naturally tightening the fabric and producing realistic folds and tension.

The smartphone reacts with a subtle handheld forward micro-jolt as the garment moves closer to the camera.

### 00:02–00:06

The right hand maintains a firm grip.

The left hand slowly slides across the fabric without losing contact.

It gently pinches and compresses the material to demonstrate thickness, softness, elasticity and construction quality.

Show realistic fingertip pressure, fabric indentation, natural wrinkles and immediate rebound.

The camera naturally follows the hand with subtle handheld micro-adjustments.

### 00:06–00:10

Both hands maintain continuous contact.

They gently tilt the hanger slightly to one side while bringing the front of the garment closer to the camera.

The left hand pinches an area near the center of the garment while the right hand firmly supports the opposite shoulder.

Slightly reduce the movement speed for less than half a second to clearly showcase the fabric texture, stitching and any printed artwork without changing or covering it.

End with the garment naturally tilted toward the camera under visible fabric tension, both hands still holding it, ready for a seamless continuation.

REALISM

Ultra-photorealistic.

Real smartphone recording.

Natural HDR.

Visible fabric fibers.

Realistic fabric physics.

Natural lighting.

No CGI appearance.

No AI artifacts.

No morphing.

No flickering.

No extra hands.

No extra fingers.

No garment changes.

The garment must remain perfectly identical to the uploaded reference throughout the entire video.

PROMPT – Use the uploaded image as the exact first frame and visual reference.

Create an ultra-realistic vertical 9:16 smartphone POV product video inside the same store environment.

Preserve exactly the same black shorts, hanger, hands, tattoos, lighting, background, logo placement, fabric texture and camera perspective.

The person holds the shorts firmly with both hands and presents the full front view. One hand lightly pulls the right side of the shorts outward to show the shape and fit, then releases naturally. Keep the product facing the camera the entire time.

Use quick, realistic seller motion, subtle handheld camera movement, slight push-in, realistic fabric response, accurate finger contact and natural motion blur.

No dialogue.

Negative prompt: changing product shape, changing logo, changing color, extra labels, rotating to the back, floating hands, fake contact, fused fingers, extra fingers, distorted tattoos, CGI look, stiff motion, background changes, warped hanger text.

PROMPT -Create an ultra-photorealistic 8K vertical image (9:16).

IMPORTANT

The uploaded image is the ONLY reference.

Recreate the exact same T-shirt exactly as shown.

Do NOT redesign, redraw, enhance, reinterpret or recreate any part of the artwork.

Preserve every visible detail exactly.

PRESERVE EXACTLY

- fabric color
- fabric texture
- vintage wash
- collar shape
- sleeve length
- stitching
- wrinkles
- folds
- print size
- print position
- illustration
- text
- colors
- distressed effects
- shadows
- proportions
- overall appearance

Never modify the artwork.

Never sharpen the print.

Never replace any graphic.

Never change the colors.

## SCENE

The T-shirt is lying naturally on the very edge of a rustic premium solid wooden table.

Approximately half of the T-shirt rests flat on the tabletop, while the lower half naturally hangs over the edge due to gravity.

The hanging portion drapes realistically with soft natural folds and fabric tension.

The table occupies most of the frame.

Beautiful natural wood grain.

Warm natural daylight coming from a nearby window.

Soft realistic shadows.

Luxury lifestyle atmosphere.

No additional objects.

No decorations.

No logos.

No text overlays.

No cups.

No plants.

No accessories.

## CAMERA

Ultra-realistic smartphone photo.

Top-down angle with a slight natural perspective.

The camera is positioned directly above the table.

The T-shirt fills most of the frame.

Professional product photography.

Extremely realistic lighting.

Natural HDR.

High micro-detail.

FABRIC

Visible cotton texture.

Realistic stitching.

Natural wrinkles.

Soft draping caused by gravity where half of the shirt hangs over the table edge.

No floating fabric.

HAND

Exactly ONE realistic human right hand.

Natural skin texture.

Correct anatomy.

The right hand gently smooths the fabric on the portion of the T-shirt resting on the table.

The hand looks natural and proportional.

No extra fingers.

No duplicated hands.

No left hand.

No jewelry.

No watches.

No bracelets.

No rings.

No tattoos.

REALISM

Looks like a genuine smartphone product photo taken for TikTok Shop.

Ultra-photorealistic.

Extremely high detail.

Natural colors.

No CGI appearance.

No AI artifacts.

No distortions.

No duplicated elements.

No changes to the garment.

PROMPT = Create a single continuous ultra-photorealistic vertical video (9:16), 4K, 10 seconds.

Use the uploaded image as the first frame.

Preserve the clothing exactly as shown.

Do NOT modify:

- the garment
- colors
- fabric
- stitching
- texture

- print
- logo
- embroidery
- proportions
- fit
- length
- sleeves
- collar
- any visible detail

The clothing must remain pixel-perfect throughout the entire video.

## SUBJECT

The matte black mannequin gradually comes to life and moves exactly like a professional fashion model.

The mannequin remains completely matte black.

Do not add facial features.

Do not add hair.

Do not add makeup.

Do not add fingernails.

Do not add jewelry.

Do not add accessories.

The mannequin always keeps the same body proportions.

## MOVEMENT

Every movement must be smooth, elegant and anatomically correct.

Natural human balance.

Realistic weight shifting.

Subtle breathing motion.

Soft shoulder movement.

Natural arm swing.

Relaxed wrists.

Slight head movements.

Tiny posture adjustments.

No robotic movement.

No sudden acceleration.

No exaggerated posing.

No impossible joint rotations.

The mannequin behaves exactly like a professional clothing model.

## SEQUENCE

00:00–00:02

The mannequin is standing naturally facing the camera.

Small breathing movement.

Tiny weight shift from one leg to the other.

00:02–00:04

Take two slow natural steps toward the camera while maintaining eye-level posture.  
Arms swing naturally.

00:04–00:06

Stop naturally.

Place one hand softly near the hip without covering the garment.

Turn the torso about 30 degrees to show the side fit of the clothing.

00:06–00:08

Rotate smoothly to approximately 180 degrees to reveal the back of the garment.

Pause briefly so the entire back design is fully visible.

00:08–00:10

Rotate back toward the front.

Finish in a relaxed fashion-model pose.

Maintain natural breathing and posture until the video ends.

## CAMERA

Realistic handheld smartphone camera.

Vertical 9:16.

Eye level.

Natural handheld micro-movements only.

No zoom.

No cuts.

No transitions.

No cinematic camera moves.

No focus hunting.

Natural stabilization.

## BACKGROUND

PROMPT - Create a single continuous ultra-realistic vertical 9:16 video.

Use the uploaded image as the first frame.

Preserve the image exactly.

Do NOT modify the bed, bedding, pillows, lighting, camera angle, perspective, background, or the uploaded products.

## PRODUCT PRESERVATION

Every uploaded product must remain absolutely identical to the reference image.

Do NOT redesign, recreate, reinterpret, enhance or regenerate any product.

Preserve the exact:

- shape
- dimensions

- proportions
- scale
- colors
- materials
- textures
- fabric
- stitching
- seams
- folds
- embroidery
- logos
- labels
- tags
- prints
- graphics
- illustrations
- typography
- icons
- patches
- patterns
- packaging
- accessories
- finishes
- reflections
- transparency
- every visible detail

Never alter the artwork.

Never alter the print.

Never alter the logo.

Never alter the text.

Never alter the font.

Never alter the placement of any graphic element.

Never alter the size of any graphic element.

Never alter the spacing between graphic elements.

Never alter the layout or composition of the design.

Never simplify the design.

Never recreate the design.

Never replace the design with a similar version.

Never hallucinate missing details.

Never invent new details.

Maintain the exact appearance of every uploaded product throughout the entire video.

## CAMERA

Top-down overhead smartphone camera.

Natural handheld micro-movements only.

No cuts.

No transitions.

No zoom.

No focus hunting.

Natural stabilization.

## SPEED

Generate the animation with movements approximately 3× faster than normal human motion, similar to a sped-up TikTok product showcase.

The fast motion must be physically realistic and smooth.

Do not simulate slow motion.

Do not create jitter.

Do not skip frames.

Do not create unrealistic acceleration.

Prioritize smoothness while maintaining the appearance of a true 3× speed recording.

## HANDS

Exactly TWO human hands must exist during the entire video.

Never generate a third hand.

Never generate extra hands.

Never duplicate hands.

Never create ghost hands.

Never create mirrored hands.

Never create floating hands.

Never allow hands to appear or disappear.

The same two hands must remain visible and consistent from beginning to end.

Do not replace or swap the hands during the video.

Maintain identical skin tone, proportions, fingernails, wrists and overall appearance throughout every frame.

## FINGERS

Each hand must always have exactly five fingers.

Never generate extra fingers.

Never generate missing fingers.

Never generate fused fingers.

Never generate split fingers.

Never deform fingers.

Maintain realistic joints.

Maintain realistic knuckles.

Maintain realistic fingernails.

Maintain realistic finger proportions.

Finger anatomy must remain perfectly consistent throughout the entire video.

## OBJECT INTERACTION

The hands behave like someone naturally filming a product showcase for social media.

Depending on the uploaded products, naturally perform actions such as:

- picking up one product
- presenting it toward the camera
- rotating it
- flipping it
- smoothing fabric
- gently stretching flexible materials
- running fingers across the surface
- lightly tapping the product
- pointing at important details
- placing the product back on the bed
- selecting another product
- arranging products neatly
- separating products for better visibility

If multiple products are present (2, 3, 4 or more):

Only ONE product may be manipulated at a time.

All remaining products must remain completely still.

Never accidentally move neighboring products.

Maintain realistic spacing throughout the video.

Never overlap products in a way that hides important details.

While manipulating flexible products, never stretch, warp or distort any printed area.

Never distort any logo.

Never distort any artwork.

Never distort typography.

Never distort graphics.

The printed design must remain perfectly preserved even while the fabric moves naturally.

## PRODUCTS

The uploaded products may include clothing, underwear, shoes, bags, accessories, cosmetics, electronics, phones, watches, perfumes, toys, books, stationery, kitchen utensils, home goods, tools, collectibles or any other retail products.

Always adapt the hand movements naturally to the object's size, weight, shape and material.

Maintain the exact scale relationship between the hands and every product.

Never enlarge any product.

Never shrink any product.

Never change product proportions.

## PHYSICS

Realistic contact between fingers and products.

Correct cloth physics for fabrics.

Correct rigid-body physics for solid objects.

Natural grip pressure.

Natural shadows.

Realistic collisions.

No clipping.

No floating objects.

No impossible movement.

No deformation unless the product material is naturally flexible.

## TEMPORAL CONSISTENCY

Maintain perfect consistency across every frame.

No flickering.

No morphing.

No anatomy changes.

No disappearing fingers.

No duplicated fingers.

No duplicated hands.

No identity changes.

No texture changes.

No logo changes.

No artwork changes.

No print changes.

No typography changes.

No color shifts.

No layout changes.

## CONSISTENCY

The uploaded products must remain pixel-faithful throughout the video.

Every frame must preserve the exact visual identity of every uploaded product.

The position of logos, graphics, prints and text must remain identical to the original image.

## FINAL RESULT

The final video should look like authentic smartphone UGC recorded by a real person naturally presenting products for TikTok, Instagram Reels or online shopping.

The entire sequence should feel like a genuine handheld product showcase filmed by a creator, while perfectly preserving the original products, artwork, logos, layouts, colors and details from the uploaded image.

PROMPT - Ultra-realistic fashion showcase photography, vertical 9:16, 8k resolution, cinematic lighting, high detail, professional retail environment.

The scene takes place inside a luxury clothing store with warm ambient lighting, polished marble floor, and elegant wooden wall panels. Clothing racks with neatly arranged garments are softly blurred in the background, creating depth.

A matte black mannequin is centered in the frame, standing upright and facing forward. The mannequin is wearing the clothing from the reference image. The clothing must be EXACTLY identical to the reference image in every aspect: same color, print, texture,

proportions, stitching and all design details. No modifications, no reinterpretation, no stylization, no added or removed elements.

A masculine hand with realistic skin texture and detailed tattoos is visible interacting naturally with the mannequin, one hand resting on the shoulder and the other lightly adjusting the lower part of the clothing, adding a sense of realism and human interaction. The clothing occupies around 60–70% of the frame, with natural fabric draping and subtle folds. Soft directional lighting enhances texture and depth without harsh shadows. Clean composition, centered framing, slight depth of field keeping the clothing sharp while softly blurring the background.

No text, no interface elements, no logos or overlays. Professional, realistic, high-end fashion presentation style.

Recreate the clothing exactly as provided, preserving its color, fabric, stitching, texture, proportions, fit, print, logo (if any), labels, seams, buttons, zippers, and every visible detail.

SCENE

A clean overhead flat-lay shot on a soft light beige bed sheet with natural fabric wrinkles.

Only the bed sheet, the product(s), and a single feminine hand are visible.

No pillows.

No blankets.

No furniture.

No decorations.

No additional objects.

No text.

No logos.

No watermarks.

## HAND

A single feminine hand with realistic skin texture.

Elegant proportions.

Short-to-medium almond-shaped nude nails.

Natural relaxed movements.

The hand must always remain perfectly proportional to the clothing.

## PRODUCT SCALE

The size of every garment must remain completely realistic relative to the hand.

Never enlarge or shrink the clothing unnaturally.

The hand should reinforce the perceived scale of the product exactly as in a real product showcase.

## MULTIPLE PRODUCTS

If multiple clothing items are present (for example panties, socks, tops, T-shirts, shorts, bikinis, etc.), each item must behave independently.

When picking up one garment, all remaining garments must stay completely still.

Never lift, drag, pull, fold, move, or disturb any other item.

Only the selected piece may move.

No garment should stick to another.

No overlapping movement.

## PRODUCT MOVEMENT

The hand gently reaches toward one clothing item.

Using natural finger movements, the hand lightly pinches the garment by an appropriate area depending on the product.

The hand slowly lifts only that single item a few centimeters above the bed.

The fabric naturally hangs under gravity.

The hand gently rotates the garment slightly left and right to reveal its texture, stitching, and shape.

Movement remains slow, smooth, and realistic.

The hand then gently places the garment back onto the bed.

The clothing settles naturally with realistic fabric physics.

## CAMERA

PROMTP - Use the uploaded image as the EXACT first frame, exact environment and exact product reference.

Create a 10-second ultra-photorealistic vertical 9:16 cookware product demonstration.

#### ABSOLUTE PHYSICS RULE:

EVERY cookware piece must obey realistic gravity at all times.

A pot or pan can NEVER float, hover, levitate or remain suspended by itself.

If a cookware piece is touching the countertop, its full weight must visibly rest on the countertop.

If a cookware piece leaves the countertop, TWO HUMAN HANDS MUST BE CLEARLY VISIBLE physically holding and supporting it continuously.

NEVER show a pot in the air without hands supporting it.

#### SCENE 1 — COMPLETE SET

Start with the EXACT cookware arrangement from the uploaded reference.

Every pot, pan and lid remains resting naturally on the countertop.

Keep the exact number of cookware pieces.

Nothing disappears.

Nothing changes position by itself.

#### SCENE 2 — REMOVE ONLY ONE LID

Two realistic feminine hands enter naturally.

One hand grips ONLY the wooden knob of ONE glass lid.

The other hand does NOT lift or touch the pot.

Lift ONLY the glass lid vertically upward.

The selected pot remains completely stationary and physically resting on the countertop.

ONLY THE LID MOVES.

The camera performs a subtle push-in toward the open pot to clearly show its interior, rim and speckled finish.

All other cookware remains visible and stationary in the background.

The hand MUST continuously hold the removed lid while it is in the air.

The lid can NEVER float by itself.

Then gently place the SAME lid back onto the SAME pot.

### SCENE 3 — COMPLETE SET AGAIN

Camera smoothly pulls back.

Show the COMPLETE cookware set again.

Every original pot, pan and lid must still exist and be in its correct position.

### SCENE 4 — REALISTIC TWO-HAND LIFT

Two feminine hands physically grab ONE smaller pot.

IMPORTANT:

BEFORE the pot leaves the countertop, BOTH HANDS must already have a secure visible grip on its side handles.

Left hand firmly holds the left handle.

Right hand firmly holds the right handle.

ONLY AFTER both hands have a secure grip, lift the pot naturally from the countertop.

The hands remain attached to the handles during the ENTIRE lift.

The pot NEVER floats.

The pot NEVER moves independently from the hands.

The hands visibly support its weight with realistic fingers, grip pressure, wrist position and natural arm movement.

Bring the pot closer to the camera WHILE BOTH HANDS CONTINUE HOLDING IT.

Gently tilt it a few degrees to show the beige color, exact speckled texture, glass lid, brown handles, rim and finish.

Do NOT release the pot while it is in the air.

At no point can the pot remain suspended without both hands.

REALISTIC PHYSICS LOCK:

Countertop = supports cookware.

Hands = support cookware when lifted.

NO invisible support.

NO floating.

NO hovering.

NO levitation.

NO hands disappearing while holding an object.  
NO pot moving before hands touch it.  
NO pot continuing to move after hands release it.  
NO lid floating.  
NO teleportation.  
NO object morphing.

#### PRODUCT LOCK:

Preserve the EXACT:

- number of cookware pieces
- beige color
- speckled texture
- shapes
- proportions
- brown handles
- glass lids
- lid knobs
- rims
- materials

NO disappearing pots.  
NO disappearing lids.  
NO duplicated pieces.  
NO additional cookware.  
NO changing handles.  
NO changing colors.  
NO changing proportions.

All movements must look physically believable, heavy and natural, as if a real person is handling real cookware in a real kitchen.

Ultra-photorealistic hands.  
Anatomically correct fingers.  
Realistic grip and weight.  
Natural contact shadows.  
Realistic glass reflections.  
Soft natural daylight.

SUBJECT:

The exact same influencer from Attachment 1.

Preserve her exact recognizable facial identity, facial geometry, apparent age, skin tone, eye anatomy, nose, lips, hairstyle, hairline, body proportions and all distinctive characteristics.

She behaves like a real Brazilian content creator casually showing a product she genuinely uses.

BACKGROUND:

Maintain exactly the same premium clean functional Brazilian kitchen from the starting frame.

Preserve:  
countertop geometry,  
cabinetry,  
appliances,  
sink,  
faucet,  
background objects,  
window/light direction,  
product position,  
and overall spatial layout.

Do not reconstruct or redesign the kitchen between frames.

#### PRODUCT:

The exact same physical product from the attached reference begins naturally resting on the countertop exactly where it appears in the starting frame.

Preserve its exact:

shape,  
scale,  
package proportions,  
colors,  
material,  
label orientation,  
cap/lid,  
logo placement,  
and physical structure.

The product behaves like a real object with mass.

It must obey gravity, inertia, friction and contact mechanics.

#### ACTION:

The video begins exactly from the supplied image.

For the first moment, the influencer naturally looks toward the camera while the product remains physically resting on the countertop.

She breathes naturally and makes a tiny spontaneous facial movement before speaking.

She then naturally shifts her attention toward the product.

Her eyes move first, followed by a subtle physically natural head movement.

She reaches toward the product using a relaxed anatomically correct hand.

The reach follows real shoulder, elbow, wrist and finger biomechanics.

Her hand approaches through continuous physical space.

No instantaneous repositioning.

No teleportation.

Her fingers open naturally before contact.

Physical contact happens BEFORE the product moves.

Only after her fingers actually touch the packaging does she establish a secure grip.

The skin of her fingers shows subtle compression at contact points.

Her fingers wrap according to the real geometry and dimensions of the product.

The product responds to her grip according to its weight and material.

She gently lifts it from the countertop.

The product must visibly lose its countertop contact shadow only AFTER leaving the physical surface.

The movement has subtle realistic inertia.

She naturally brings the product toward approximately chest level, positioning it where the camera can see it without creating an unnatural advertising pose.

She briefly glances at the product and then returns her gaze toward the camera.

She makes a small natural presentation gesture while speaking.

Her movements remain relaxed, imperfect and conversational rather than choreographed.

#### UGC PERFORMANCE:

She should NOT behave like a television commercial actress.

Natural Brazilian creator energy.

Friendly.

Confident.

Relaxed.

Spontaneous.

Warm.

Include:

natural blinking,

subtle breathing,

tiny eyebrow movement,

micro facial expressions,

minor posture corrections,

small natural head movements,

realistic eye tracking,

subtle hand adjustments.

HANDS:

Every visible hand must contain exactly five anatomically correct fingers:  
one thumb and four fingers.

Finger lengths remain stable throughout every frame.

Correct joints.

Correct tendons.

Natural knuckles.

Realistic nails.

Visible cuticles.

Natural wrist articulation.

The grip must physically match the product geometry.

No fingers may disappear behind the product in anatomically impossible ways.

No extra fingers.

No fused fingers.

No duplicated fingers.

No hand morphing.

No product intersection.

No impossible grip.

PHYSICAL PRODUCT INTERACTION:

Contact must precede movement.

Grip must precede lifting.

Lifting must overcome gravity.

The product must have believable weight.

When placed back onto the countertop, if this occurs, physical surface contact must happen before her fingers release.

Contact shadow must return naturally.

No digital transformation before physical contact.

No product teleportation.

No product morphing.

No label morphing.

No package resizing.

No floating.

#### MATERIAL REALISM:

Preserve actual material characteristics from the product reference.

Plastic, glass, metal, cardboard, flexible packaging, liquid, cream or other materials must behave according to real physical properties.

Highlights and reflections change naturally as the product rotates relative to the kitchen light.

Never illuminate the product independently from the room.

#### SKIN:

Preserve visible pores, micro skin texture, subtle imperfections, fine facial hairs, natural skin oil reflections and realistic tonal variation.

Skin texture must remain temporally stable between frames.

No beauty-filter activation during movement.

No face smoothing when she speaks.

No wax skin.

No CGI skin.

#### HAIR:

Individual hair strands react subtly to her head and body movement.

Natural inertia.

No hair morphing.

No hair clipping through face, shoulders or clothing.

#### CAMERA:

Premium vertical Brazilian UGC footage.

9:16 composition.

Camera remains primarily fixed on a small smartphone tripod or creator stand at approximately eye/chest level.

Allow only tiny realistic stabilization micro-movements.

No impossible cinematic orbit.

No drone movement.

No artificial camera teleportation.

Maintain natural smartphone/creator-camera perspective.

Keep influencer and product visually readable.

LIGHTING:

Maintain exactly the same natural daylight direction established by the starting frame.

Realistic Brazilian daytime interior light.

Soft window illumination.

Natural bounce light.

Physically correct shadows.

Realistic product reflections.

Natural exposure behavior.

No sudden lighting changes.

No artificial spotlight.

No fake HDR.

SOUND:

Authentic quiet Brazilian residential kitchen ambience.

Very subtle room tone.

Possible distant outdoor ambience.

Soft fabric movement.

Natural hand/product contact sounds.

If the packaging creates a subtle physical sound when touched or lifted, reproduce it realistically according to its material.

No exaggerated sound effects.

MUSIC:

No music, or extremely subtle low-volume contemporary background music only if necessary.

The influencer's natural voice must remain dominant and perfectly intelligible.

VOICE:

Native Brazilian Portuguese.

Young natural Brazilian female voice matching the influencer's apparent identity.

Warm, spontaneous, conversational UGC delivery.

No announcer voice.

No robotic cadence.

No exaggerated sales tone.

Natural breathing and tiny pauses.

STRICT CONTINUITY LOCK:

same woman,  
same face,  
same apparent age,  
same body,  
same hair,  
same clothing,  
same product,  
same packaging,  
same product scale,  
same kitchen,  
same countertop,  
same lighting direction,  
same color temperature,  
same camera characteristics.

## STRICT ANTI-BUG LOCK:

no facial morphing,  
no identity drift,  
no product morphing,  
no product duplication,  
no changing labels,  
no floating objects,  
no teleportation,  
no hand deformation,  
no extra fingers,  
no missing fingers,  
no fused fingers,  
no broken wrists,  
no impossible grip,  
no object penetration,  
no product passing through hands,  
no product passing through countertop,  
no robotic movement,  
no artificial acceleration,  
no physics violations,  
no CGI appearance,  
no beauty-filter skin,  
no synthetic transitions,  
no background morphing,  
no kitchen reconstruction,  
no visible evidence of AI generation.

## FINAL RESULT:

The final video must look indistinguishable from authentic premium UGC filmed by a real Brazilian influencer in her real kitchen while naturally picking up and introducing a real physical product.

The viewer should believe that the product was physically present on the countertop and genuinely handled by the influencer.

## PROMPT -UNIVERSAL KITCHEN APPLIANCE VIDEO PROMPT — FUNCTIONALITY + B-ROLL / MAX FIDELITY / BRAZILIAN PHOTOREALISM

Use the attached appliance image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT appliance inside a real Brazilian kitchen, highlighting its scale, material, design, function and tactile details through mandatory B-roll cuts.

The appliance must remain visually identical to the reference during the entire video: same shape, same color, same size, same proportions, same buttons, same display, same doors, same handle, same vents, same finish, same material, same texture and same visible details. Do not redesign, replace, morph, recolor, simplify or alter the product.

### IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

### VIDEO STRUCTURE:

#### 0s–1.5s — HERO SHOT:

Show the exact appliance naturally placed inside a real Brazilian kitchen. The product is the hero, sharp, correctly scaled and clearly visible. The kitchen context confirms real size and functional use.

#### 1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up macro shot showing material and construction details: buttons, display, handle, door edge, control panel, stainless steel finish, plastic texture, glass surface, vents, cable, seams, rubber feet or product edges depending on the appliance type.

#### 3s–4.5s — FUNCTIONALITY SHOT:

Cut to the appliance being used naturally according to its real purpose: door opening, button being pressed, lid being lifted, blender jar being placed, air fryer basket sliding, microwave door opening, coffee being prepared, stove knob turning, fridge door opening, or another realistic functional action. Human interaction may appear only as realistic hands if necessary.

#### 4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up angle showing a different important feature: interior compartment, display activation, handle texture, control buttons, product reflection, surface finish, functional opening, container, panel, edge thickness or tactile material quality.

#### 6s–8s — FINAL HERO SHOT:

Return to a clean final hero shot of the appliance in the kitchen, stable, sharp, desirable and physically believable. The product must remain clearly visible and correctly scaled.

### SCENE:

Real Brazilian middle-class kitchen, clean, functional, organized and lived-in. Neutral tiles, ceramic or porcelain floor, countertop, sink, cabinets, stove, fridge, microwave, utensils or

everyday kitchen elements may appear naturally. No luxury showroom, no mansion kitchen, no fake studio.

#### AUTO-CONTEXT PLACEMENT:

Place the appliance naturally according to its function:

- refrigerator against a wall or near cabinets
- microwave on a counter, shelf or niche
- oven, cooktop or stove aligned with countertop
- air fryer, blender, mixer, coffee maker or small appliance on a realistic kitchen counter
- dishwasher or washing-related appliance near plumbing if appropriate

#### CAMERA:

Vertical 9:16, iPhone 15 Pro Max realism, 24mm to 26mm natural wide-angle feel, smooth handheld or stabilized movement, realistic depth of field, sharp product focus, natural smartphone optics, no excessive blur, no robotic motion.

#### LIGHTING:

Natural daylight from a kitchen window or soft practical kitchen lighting, balanced exposure, realistic shadows, accurate reflections on metal, glass, plastic, enamel, tile, stone and countertop. No harsh flash, no overexposed window, no fake studio glare.

#### AUDIO:

No dialogue. No voiceover. Natural kitchen room ambience only, subtle appliance handling sounds, button clicks, door movement, drawer or countertop sounds if applicable. Optional soft minimal music at low volume.

#### TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

#### STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not change color, geometry, buttons, display, doors, handle, vents, cable, material or proportions.

Functional action must match the real appliance.

Do not create fake features.

No product morphing.

No fake showroom.

#### ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered appliance, changed design, wrong scale, miniature appliance, oversized appliance, distorted geometry, warped buttons, warped display, changing handle, product morphing, floating appliance, hands clipping through

product, robotic motion, deformed hands, extra fingers, CGI, 3D render, cartoon, AI artifacts, fake kitchen, luxury showroom, mansion kitchen, harsh flash, blurry product, soft product focus, oversaturated colors, inconsistent lighting, impossible shadows, cluttered kitchen, dirty kitchen, missing parts, extra parts, unreadable product structure

PROMPT -Use este prompt. Ele trava completamente o aparelho de jantar para que o Grok não invente pratos ou copos diferentes.

\_\_\_\_\_

Vertical 9:16, 10 seconds, ultra-realistic cinematic smartphone POV video, first-person perspective, elegant modern dining room, premium wooden dining table, soft natural daylight, realistic human hands only, no person visible, no text, no subtitles, no watermark, one continuous shot, no cuts, no scene transitions.

CRITICAL PRODUCT LOCK (MANDATORY)

The dinnerware set in the reference image is the ONLY product allowed in the video.

Every single plate, bowl and cup must remain EXACTLY identical to the reference image.

Do NOT generate different ceramics.

Do NOT invent additional pieces.

Do NOT replace any plate.

Do NOT change the number of pieces.

Do NOT change the colors.

Do NOT change the glossy finish.

Do NOT change the printed design.

Do NOT change the rim thickness.

Do NOT change the diameter.

Do NOT change the ceramic texture.

Do NOT change the handle shape of the cups.

Do NOT change proportions.

Do NOT change reflections.

Do NOT create another dinnerware set.

The AI must only animate the original product shown in the reference.

Scene

0.0–1.5s

The complete dinnerware set is stacked exactly like the reference image.

The camera slowly moves forward.

1.5–3.5s

The right hand picks up the exact large dinner plate from the reference, rotates it slowly in front of the camera showing both sides and the thickness, then places it on the table.

3.5–5.5s

The hand picks up the exact dessert plate from the reference, rotates it naturally and places it centered on top of the large plate.

5.5–7.0s

The hand picks up the exact cup from the reference image, rotates it slowly showing the handle, interior and printed design, then places it in the upper-right position of the place setting.

7.0–9.0s

The hands continue using only the original pieces from the reference image to complete a beautiful restaurant-style place setting. Every piece remains identical to the reference.

9.0–10.0s

The camera slowly approaches the completed table setting while the right hand points downward beneath the finished arrangement and holds the gesture until the end.

#### Hard Constraints

- \* Use only the plates, cups and bowls shown in the reference image.
- \* Preserve the exact quantity of pieces.
- \* Preserve every color exactly.
- \* Preserve every print exactly.
- \* Preserve every ceramic shape exactly.
- \* Preserve every cup handle exactly.
- \* Preserve every edge exactly.
- \* Preserve every glossy reflection.
- \* No morphing.
- \* No redesign.
- \* No deformation.
- \* No replacements.
- \* No extra dinnerware.
- \* No missing pieces.
- \* No scene changes.
- \* No cuts.
- \* Only realistic human hands with five fingers.
- \* Ultra-realistic 4K.
- \* Premium TikTok Shop commercial quality.

PROMPT - Prompt (10 segundos | neutro | sem fala | compatível com qualquer gerador de vídeo):

Animate the scene as a real handheld product presentation while preserving the reference image with absolute accuracy. Keep the folded bedding set in both hands exactly as shown, without changing its print, colors, folds, texture, size, position or proportions. Preserve the bed, pillows, blanket, furniture, lighting and entire room exactly as they appear. Start with the index finger gently touching the pattern on the folded bedding, bringing it slightly closer to the camera for a natural close-up without digital zoom. Then smoothly move toward the bed while still holding the folded bedding, revealing the pillow details. The free hand lightly touches the pillow for a brief moment as if presenting the fabric. Next, return the focus to the folded bedding held with both hands. Finish by holding it steadily and naturally pointing downward with one finger. Ultra-realistic human movements, natural handheld camera,

smooth cinematic motion, no object deformation, no added elements, no text, no audio, no scene changes.

PROMPT -UNIVERSAL POV TOOL STORE VIDEO PROMPT — SPOKEN BRAZILIAN PORTUGUESE / ALL TOOL CATEGORIES / ABSOLUTE PRODUCT FIDELITY / REAL HUMAN HANDS / NO AI LOOK

Use the attached product image as the only and absolute visual reference.

Create one ultra-photorealistic vertical 9:16 first-person POV sales video inside a real Brazilian tool store.

The camera represents the natural perspective of a real Brazilian customer inspecting and presenting the exact attached product while speaking from behind the camera.

The speaker's face is never visible.

The exact product must remain the dominant subject throughout the video.

FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

Exactly four separate product-focused scenes.

Professional 4K-grade appearance.

Clean editorial cuts.

No subtitles.

No text overlays.

#### REFERENCE RESET RULE:

At the beginning of every scene, re-anchor the product directly to the original attached reference.

Each scene must independently preserve the original product identity.

Do not carry visual errors from one scene into the next.

#### ABSOLUTE PRODUCT LOCK:

Preserve exactly:

same product category,  
same quantity,  
same model,  
same dimensions,  
same proportions,  
same geometry,  
same colors,  
same materials,  
same finish,  
same packaging,

same branding,  
same labels,  
same letters,  
same spelling,  
same handles,  
same controls,  
same switches,  
same wheels,  
same batteries,  
same chargers,  
same cables,  
same hoses,  
same accessories,  
and every visible construction detail.

Do not redesign, replace, simplify, recolor, mirror, duplicate, morph, enlarge, shrink, or reconstruct the product.

Do not reveal hidden sides that require invented details.

Do not place similar products near the hero item.

#### PRODUCT-SIZE ADAPTATION:

Small products may be held naturally in one or two hands.

Medium products must receive realistic two-hand support or remain supported on a counter.

Large or heavy products must remain grounded on the floor, reinforced display, stand, or workbench.

For large products, the POV hand may touch, indicate, or inspect one visible external feature.

Never lift a heavy product.

#### MANDATORY FOUR-SCENE STRUCTURE:

SHOT 1 — 0.0s TO 2.0s — POV PRODUCT DISCOVERY:

Approach the exact product in its correct store section.

Frame it immediately as the main subject.

Begin the spoken line naturally.

SHOT 2 — 2.0s TO 4.0s — POV HANDLING:

For small products, pick it up with a physically correct grip.

For medium products, support it on the counter.

For large products, touch one visible handle, work surface, control area, wheel, panel, or external structure.

Continue speaking naturally.

SHOT 3 — 4.0s TO 6.0s — POV DETAIL:

Show a closer first-person view of one real visible detail:

grip,  
finish,  
button,  
switch,  
handle,  
connection,  
label,  
logo,  
battery area,  
cable,  
hose,  
wheel,  
drawer,

guard,  
blade,  
disc,  
or material texture.

Do not invent details.

The product remains stable and recognizable.

SHOT 4 — 6.0s TO 8.0s — FINAL POV HERO:

Return to a clean product-focused POV angle.

Keep the main product face visible.

Finish the spoken line naturally.

End with the exact product sharp, stable, useful, and commercially desirable.

POV HAND REALISM:

Show natural adult hands with:

five fingers,  
correct thumb placement,  
natural finger lengths,  
real joints,  
skin pores,  
fine hair when visible,  
natural nails,  
correct wrist position,  
realistic grip pressure,  
and accurate contact shadows.

No extra fingers.

No fused fingers.

No hand morphing.

No floating hands.

No object clipping.

#### SPEECH PERFORMANCE:

Use one natural Brazilian Portuguese voice from the camera operator.

The voice must sound:

human,  
friendly,  
enthusiastic,  
clear,  
spontaneous,  
and commercially convincing.

This is spoken dialogue, not narration recorded later.

Do not sing.

Do not chant.

Do not use melody.

Do not use a jingle.

Do not elongate syllables.

Do not use a robotic voice.

Do not invent specifications, power, measurements, capacity, performance, compatibility, guarantees, or technical claims not confirmed by the reference.

#### STORE ENVIRONMENT:

Use one coherent real Brazilian tool store appropriate to the product category.

Keep the background stable, organized, readable, and secondary.

No duplicate hero product.

No visually similar item directly beside or behind the featured product.

#### CAMERA:

Natural adult eye-level POV.

Professional full-frame or premium action-camera realism without fisheye distortion.

Use restrained natural hand and head movement.

No aggressive camera shake.

No orbit.

No impossible floating-camera motion.

#### FOCUS — NO BLUR:

Keep the exact product sharply focused and readable.

Use deep realistic focus.

No portrait mode.

No artificial background blur.

No strong bokeh.

No focus pulsing.

No blurred labels, controls, hands, or product details.

#### LIGHTING:

Use neutral store lighting with realistic shadows, reflections, and true product colors.

No harsh flash.

No fake HDR.

No artificial glow.

No colored lighting.

#### AUDIO:

Clear Brazilian Portuguese speech from the camera operator.

Subtle synchronized store ambience.

Natural hand and product-contact sounds.

No background music.

No additional dialogue.

No subtitles.

No captions.

CLEAN FRAME:

Outside legitimate branding and printed product details, generate no prices, promotional text, floating labels, social-media interface, banners, stickers, or watermarks.

NEGATIVE PROMPT:

changed product, replacement product, similar model, product morphing, altered packaging, changed label, misspelled text, mirrored logo, changed colors, wrong scale, duplicate product, similar product in background, unsupported heavy product, floating product, invented function, unsafe operation, extra fingers, fused fingers, deformed hands, hand clipping, robotic POV, excessive camera shake, fisheye, artificial blur, strong bokeh, CGI, 3D render, AI artifacts, robotic voice, singing, melodic speech, subtitles, captions, text overlays, watermark.

FINAL OUTPUT:

One ultra-photorealistic 8-second vertical first-person POV sales video inside a real Brazilian tool store, with the exact attached product naturally inspected and presented through realistic hands while one human voice speaks in natural Brazilian Portuguese, preserving absolute product fidelity, correct physical scale, deep focus, and zero visible AI traits.

Select only one sentence according to the visibly identified product category.

For a hand tool or power tool:

“Olha só essa ferramenta. O acabamento é muito bem feito e ela é uma opção prática para facilitar o trabalho no dia a dia.”

For a machine, compressor, generator, workbench, cabinet, storage system, or large technical product:

PROMPT - UNIVERSAL LIVING ROOM APPLIANCE VIDEO PROMPT —  
FUNCTIONALITY + B-ROLL / MAX FIDELITY / BRAZILIAN PHOTOREALISM

Use the attached appliance image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT appliance inside a real Brazilian living room, highlighting its real scale, function, material quality and tactile details through mandatory B-roll cuts.

The appliance must remain visually identical to the reference during the entire video: same structure, same shape, same color, same size, same proportions, same screen, same display, same buttons, same grille, same vents, same base, same cable, same finish, same texture and same visible design details. Do not redesign, replace, morph, recolor, simplify or alter the product.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO SHOT:

Show the exact appliance naturally positioned inside a real Brazilian living room. The product is the hero of the frame, sharp, correctly scaled and visually dominant, with enough room context to prove real-world size.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up shot of material and design details: screen edge, control buttons, vents, grille, display, cable, base, rubber feet, plastic texture, metal finish, glass surface, fabric grille or product seams depending on the appliance type.

3s–4.5s — FUNCTIONALITY SHOT:

Cut to the appliance being used naturally according to its real purpose: turning on, pressing a button, adjusting a setting, screen activating, fan oscillating, purifier light turning on, humidifier mist starting, robot vacuum moving slowly, TV or soundbar being activated, or another realistic function. Human interaction may appear only as realistic hands if necessary.

#### 4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing a different feature: airflow vent, display detail, reflective surface, operating light, texture, cable connection, base support, speaker grille, wheel, sensor, control panel or tactile surface.

#### 6s–8s — FINAL HERO SHOT:

Return to a clean final product shot in the living room. The appliance remains sharp, stable, desirable, correctly scaled and clearly integrated into the real home environment.

#### SCENE:

Real Brazilian middle-class living room, clean, functional, organized and lived-in. Sofa, TV panel, rack, curtains, center table, side table, neutral walls, ceramic or laminate flooring and everyday decor may appear naturally. No luxury mansion, no foreign showroom, no empty studio.

#### AUTO-CONTEXT PLACEMENT:

Place the appliance naturally according to its function:

- TV on wall, panel or rack
- soundbar near TV area
- air purifier, humidifier, heater or fan on floor or side furniture
- robot vacuum on the floor near furniture
- portable appliance placed where a real person would use it

#### CAMERA:

Vertical 9:16, iPhone 15 Pro Max realism, 24mm to 26mm natural wide-angle feel, smooth handheld or stabilized movement, realistic depth of field, sharp product focus, natural smartphone image quality, no excessive blur, no robotic motion.

#### LIGHTING:

Real natural daylight from a window or soft practical living room lighting, balanced exposure, realistic shadows and accurate reflections on plastic, glass, metal, screen, furniture and floor. No harsh flash, no overexposed windows, no fake studio lighting.

#### AUDIO:

No dialogue. No voiceover. Natural living room ambience only, subtle appliance operation sound, button click, airflow, soft electronic beep or gentle movement if appropriate. Optional soft minimal music at low volume.

#### TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

#### STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not change color, screen, buttons, display, vents, grille, base, geometry, material or proportions.

Functional action must match the real appliance.

Do not invent fake features.

No product morphing.

No fake showroom.

#### ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered appliance, changed design, wrong scale, miniature appliance, oversized appliance, distorted geometry, warped screen, warped buttons, changing display, product morphing, floating appliance, hands clipping through product, robotic motion, deformed hands, extra fingers, CGI, 3D render, cartoon, AI artifacts, fake living room, luxury showroom, empty studio, harsh flash, blurry product, soft image, oversaturated colors, inconsistent lighting, impossible shadows, cluttered room, missing parts, extra parts, product not in focus

#### PROMPT -UNIVERSAL LIVING ROOM APPLIANCE VIDEO PROMPT — FUNCTIONALITY + B-ROLL / MAX FIDELITY / BRAZILIAN PHOTOREALISM

Use the attached appliance image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT appliance inside a real Brazilian living room, highlighting its real scale, function, material quality and tactile details through mandatory B-roll cuts.

The appliance must remain visually identical to the reference during the entire video: same structure, same shape, same color, same size, same proportions, same screen, same display, same buttons, same grille, same vents, same base, same cable, same finish, same

texture and same visible design details. Do not redesign, replace, morph, recolor, simplify or alter the product.

#### IMPORTANT EDITING RULE:

This video **MUST** include clear B-roll scenes. Do not create only one continuous shot.

#### VIDEO STRUCTURE:

##### 0s–1.5s — HERO SHOT:

Show the exact appliance naturally positioned inside a real Brazilian living room. The product is the hero of the frame, sharp, correctly scaled and visually dominant, with enough room context to prove real-world size.

##### 1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up shot of material and design details: screen edge, control buttons, vents, grille, display, cable, base, rubber feet, plastic texture, metal finish, glass surface, fabric grille or product seams depending on the appliance type.

##### 3s–4.5s — FUNCTIONALITY SHOT:

Cut to the appliance being used naturally according to its real purpose: turning on, pressing a button, adjusting a setting, screen activating, fan oscillating, purifier light turning on, humidifier mist starting, robot vacuum moving slowly, TV or soundbar being activated, or another realistic function. Human interaction may appear only as realistic hands if necessary.

##### 4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing a different feature: airflow vent, display detail, reflective surface, operating light, texture, cable connection, base support, speaker grille, wheel, sensor, control panel or tactile surface.

##### 6s–8s — FINAL HERO SHOT:

Return to a clean final product shot in the living room. The appliance remains sharp, stable, desirable, correctly scaled and clearly integrated into the real home environment.

#### SCENE:

Real Brazilian middle-class living room, clean, functional, organized and lived-in. Sofa, TV panel, rack, curtains, center table, side table, neutral walls, ceramic or laminate flooring and everyday decor may appear naturally. No luxury mansion, no foreign showroom, no empty studio.

#### AUTO-CONTEXT PLACEMENT:

Place the appliance naturally according to its function:

- TV on wall, panel or rack
- soundbar near TV area
- air purifier, humidifier, heater or fan on floor or side furniture
- robot vacuum on the floor near furniture
- portable appliance placed where a real person would use it

#### CAMERA:

Vertical 9:16, iPhone 15 Pro Max realism, 24mm to 26mm natural wide-angle feel, smooth handheld or stabilized movement, realistic depth of field, sharp product focus, natural smartphone image quality, no excessive blur, no robotic motion.

#### LIGHTING:

Real natural daylight from a window or soft practical living room lighting, balanced exposure, realistic shadows and accurate reflections on plastic, glass, metal, screen, furniture and floor. No harsh flash, no overexposed windows, no fake studio lighting.

#### AUDIO:

No dialogue. No voiceover. Natural living room ambience only, subtle appliance operation sound, button click, airflow, soft electronic beep or gentle movement if appropriate. Optional soft minimal music at low volume.

#### TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

#### STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not change color, screen, buttons, display, vents, grille, base, geometry, material or proportions.

Functional action must match the real appliance.

Do not invent fake features.

No product morphing.

No fake showroom.

#### ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered appliance, changed design, wrong scale, miniature appliance, oversized appliance, distorted geometry, warped screen, warped buttons, changing display, product morphing, floating appliance, hands clipping through product, robotic motion, deformed hands, extra fingers, CGI, 3D render, cartoon, AI artifacts, fake living room, luxury showroom, empty studio, harsh flash, blurry product, soft image, oversaturated colors, inconsistent lighting, impossible shadows, cluttered room, missing parts, extra parts, product not in focus

UNIVERSAL KITCHEN APPLIANCE VIDEO PROMPT — FUNCTIONALITY + B-ROLL /  
MAX FIDELITY / BRAZILIAN PHOTOREALISM

Use the attached appliance image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT appliance inside a real Brazilian kitchen, highlighting its scale, material, design, function and tactile details through mandatory B-roll cuts.

The appliance must remain visually identical to the reference during the entire video: same shape, same color, same size, same proportions, same buttons, same display, same doors, same handle, same vents, same finish, same material, same texture and same visible details. Do not redesign, replace, morph, recolor, simplify or alter the product.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO SHOT:

Show the exact appliance naturally placed inside a real Brazilian kitchen. The product is the hero, sharp, correctly scaled and clearly visible. The kitchen context confirms real size and functional use.

#### 1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up macro shot showing material and construction details: buttons, display, handle, door edge, control panel, stainless steel finish, plastic texture, glass surface, vents, cable, seams, rubber feet or product edges depending on the appliance type.

#### 3s–4.5s — FUNCTIONALITY SHOT:

Cut to the appliance being used naturally according to its real purpose: door opening, button being pressed, lid being lifted, blender jar being placed, air fryer basket sliding, microwave door opening, coffee being prepared, stove knob turning, fridge door opening, or another realistic functional action. Human interaction may appear only as realistic hands if necessary.

#### 4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up angle showing a different important feature: interior compartment, display activation, handle texture, control buttons, product reflection, surface finish, functional opening, container, panel, edge thickness or tactile material quality.

#### 6s–8s — FINAL HERO SHOT:

Return to a clean final hero shot of the appliance in the kitchen, stable, sharp, desirable and physically believable. The product must remain clearly visible and correctly scaled.

#### SCENE:

Real Brazilian middle-class kitchen, clean, functional, organized and lived-in. Neutral tiles, ceramic or porcelain floor, countertop, sink, cabinets, stove, fridge, microwave, utensils or everyday kitchen elements may appear naturally. No luxury showroom, no mansion kitchen, no fake studio.

#### AUTO-CONTEXT PLACEMENT:

Place the appliance naturally according to its function:

- refrigerator against a wall or near cabinets
- microwave on a counter, shelf or niche
- oven, cooktop or stove aligned with countertop
- air fryer, blender, mixer, coffee maker or small appliance on a realistic kitchen counter
- dishwasher or washing-related appliance near plumbing if appropriate

#### CAMERA:

Vertical 9:16, iPhone 15 Pro Max realism, 24mm to 26mm natural wide-angle feel, smooth handheld or stabilized movement, realistic depth of field, sharp product focus, natural smartphone optics, no excessive blur, no robotic motion.

#### LIGHTING:

Natural daylight from a kitchen window or soft practical kitchen lighting, balanced exposure, realistic shadows, accurate reflections on metal, glass, plastic, enamel, tile, stone and countertop. No harsh flash, no overexposed window, no fake studio glare.

#### AUDIO:

No dialogue. No voiceover. Natural kitchen room ambience only, subtle appliance handling sounds, button clicks, door movement, drawer or countertop sounds if applicable. Optional soft minimal music at low volume.

#### TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

#### STRICT RULES:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

#### VIDEO STRUCTURE:

##### 0s–1.5s — HERO SHOT:

Show the exact appliance naturally placed inside a real Brazilian kitchen. The product is the hero, sharp, correctly scaled and clearly visible. The kitchen context confirms real size and functional use.

##### 1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up macro shot showing material and construction details: buttons, display, handle, door edge, control panel, stainless steel finish, plastic texture, glass surface, vents, cable, seams, rubber feet or product edges depending on the appliance type.

##### 3s–4.5s — FUNCTIONALITY SHOT:

Cut to the appliance being used naturally according to its real purpose: door opening, button being pressed, lid being lifted, blender jar being placed, air fryer basket sliding, microwave door opening, coffee being prepared, stove knob turning, fridge door opening, or another realistic functional action. Human interaction may appear only as realistic hands if necessary.

##### 4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up angle showing a different important feature: interior compartment, display activation, handle texture, control buttons, product reflection, surface finish, functional opening, container, panel, edge thickness or tactile material quality.

##### 6s–8s — FINAL HERO SHOT:

Return to a clean final hero shot of the appliance in the kitchen, stable, sharp, desirable and physically believable. The product must remain clearly visible and correctly scaled.

#### SCENE:

Real Brazilian middle-class kitchen, clean, functional, organized and lived-in. Neutral tiles, ceramic or porcelain floor, countertop, sink, cabinets, stove, fridge, microwave, utensils or everyday kitchen elements may appear naturally. No luxury showroom, no mansion kitchen, no fake studio.

#### AUTO-CONTEXT PLACEMENT:

Place the appliance naturally according to its function:

- refrigerator against a wall or near cabinets
- microwave on a counter, shelf or niche
- oven, cooktop or stove aligned with countertop
- air fryer, blender, mixer, coffee maker or small appliance on a realistic kitchen counter
- dishwasher or washing-related appliance near plumbing if appropriate

#### CAMERA:

Vertical 9:16, iPhone 15 Pro Max realism, 24mm to 26mm natural wide-angle feel, smooth handheld or stabilized movement, realistic depth of field, sharp product focus, natural smartphone optics, no excessive blur, no robotic motion.

#### LIGHTING:

Natural daylight from a kitchen window or soft practical kitchen lighting, balanced exposure, realistic shadows, accurate reflections on metal, glass, plastic, enamel, tile, stone and countertop. No harsh flash, no overexposed window, no fake studio glare.

#### AUDIO:

No dialogue. No voiceover. Natural kitchen room ambience only, subtle appliance handling sounds, button clicks, door movement, drawer or countertop sounds if applicable. Optional soft minimal music at low volume.

#### TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

#### STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not change color, geometry, buttons, display, doors, handle, vents, cable, material or proportions.

Functional action must match the real appliance.

Do not create fake features.

No product morphing.

No fake showroom.

#### ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered appliance, changed design, wrong scale, miniature appliance, oversized appliance, distorted geometry, warped buttons, warped display, changing handle, product morphing, floating appliance, hands clipping through product, robotic motion, deformed hands, extra fingers, CGI, 3D render, cartoon, AI artifacts, fake kitchen, luxury showroom, mansion kitchen, harsh flash, blurry product, soft product focus, oversaturated colors, inconsistent lighting, impossible shadows, cluttered kitchen, dirty kitchen, missing parts, extra parts, unreadable product structure

PROMPT -UNIVERSAL BATHROOM APPLIANCE VIDEO PROMPT — FUNCTIONALITY +  
B-ROLL / MAX FIDELITY / BRAZILIAN PHOTOREALISM

Use the attached appliance image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT appliance inside a real Brazilian bathroom, highlighting its real scale, material quality, function and tactile details through mandatory B-roll cuts.

The appliance must remain visually identical to the reference during the entire video: same shape, same color, same dimensions, same proportions, same buttons, same display, same cable, same handle, same nozzle, same tank, same vents, same door, same finish, same material and same visible details. Do not redesign, replace, morph, recolor, simplify or alter the product.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO SHOT:

Show the exact appliance naturally placed inside a real Brazilian bathroom. The product is sharp, correctly scaled and clearly visible, with enough bathroom context to confirm real-world placement.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up showing material and construction details: handle, button, display, cable, nozzle, tank, vent, door, panel, plastic texture, metal finish, water-resistant surface, seam, edge or product finish depending on the appliance type.

3s–4.5s — FUNCTIONALITY SHOT:

Cut to the appliance being used naturally according to its real purpose: hair dryer being held and activated, electric brush being picked up, washing appliance door opening, button being pressed, appliance placed near sink counter, electric shower area shown if relevant, or another realistic bathroom-use function. Human interaction may appear only as realistic hands if necessary.

#### 4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing a different detail: control area, air vent, label area, cable texture, handle grip, water-resistant finish, door edge, compartment, button movement, nozzle angle or tactile material surface.

#### 6s–8s — FINAL HERO SHOT:

Return to a clean final hero shot of the appliance in the bathroom, stable, sharp, realistic and desirable. The product must remain the main visual focus.

#### SCENE:

Real Brazilian middle-class bathroom, clean, functional, organized and lived-in. Ceramic tiles, porcelain floor, sink, mirror, bathroom cabinet, towel rack, hanging towel, shower area or box and subtle toiletries may appear naturally. No luxury spa, no hotel showroom, no empty studio.

#### AUTO-CONTEXT PLACEMENT:

Place the appliance naturally according to its function:

- grooming appliance on sink counter, shelf or near mirror
- washing appliance near plumbing area if appropriate
- wall-mounted appliance installed at realistic height
- portable appliance placed safely and logically
- product must feel usable and physically supported

#### CAMERA:

Vertical 9:16, iPhone 15 Pro Max realism, 24mm to 26mm natural wide-angle feel, smooth handheld or stabilized movement, realistic bathroom depth, sharp product focus, natural smartphone optics, no excessive blur, no artificial softness.

#### LIGHTING:

Real bathroom lighting, neutral or slightly warm practical light, balanced exposure, realistic reflections on tiles, mirror, glass, metal, plastic and water-resistant surfaces. No harsh flash, no blown highlights, no fake studio glare.

#### AUDIO:

No dialogue. No voiceover. Natural bathroom room tone only, subtle handling sounds, button clicks, small motor sound, airflow or soft appliance operation sound if appropriate. Optional soft minimal music at low volume.

#### TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

#### STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not change design, color, proportions, buttons, display, cable, handle, nozzle, tank, door, vents, material or finish.

Functional action must match the real appliance.

No product morphing.

No fake showroom.

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered appliance, changed design, wrong scale, miniature appliance, oversized appliance, distorted geometry, warped buttons, warped display, changing cable, product morphing, floating appliance, hands clipping through product, robotic motion, deformed hands, extra fingers, CGI, 3D render, cartoon, AI artifacts, fake bathroom, luxury spa, hotel bathroom, empty studio, harsh flash, blurry product, soft image, oversaturated colors, inconsistent lighting, impossible shadows, cluttered bathroom, dirty bathroom, missing parts, extra parts

PROMPT - UNIVERSAL POV TOOL STORE VIDEO PROMPT — ALL TOOL CATEGORIES / 5 PRODUCT-FOCUSED B-ROLL SCENES / NO NARRATION / ABSOLUTE PRODUCT FIDELITY / BRAZILIAN PHOTOREALISM

Use the attached product image as the only and absolute visual reference.

If an approved store image is also provided, use it as the environment, lighting, scale, and composition reference while keeping the original product attachment as the absolute product identity reference.

Create one ultra-photorealistic vertical 9:16 first-person POV sales video inside a real Brazilian tool store.

The camera represents the natural eye-level perspective of a real customer inspecting the exact attached product.

No narration.

No dialogue.

No voice-over.

The exact product must remain the absolute hero in all scenes.

## FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

Exactly five separate B-roll scenes.

Professional 4K-grade appearance.

Clean editorial cuts.

No subtitles.

No text overlays.

## REFERENCE RESET RULE:

At the beginning of every new B-roll scene, re-anchor the product directly to the original attached product reference.

Never use the generated appearance of the previous scene as the reference for the next scene.

Every scene must independently preserve the exact original product identity.

## ABSOLUTE PRODUCT LOCK:

Preserve exactly in every scene:

- same category,
- same quantity,
- same model,
- same shape,
- same geometry,
- same dimensions,
- same proportions,
- same colors,
- same materials,
- same packaging,
- same branding,
- same logos,
- same labels,
- same printed text,
- same typography,
- same handles,

same grips,  
same controls,  
same switches,  
same wheels,  
same supports,  
same batteries,  
same chargers,  
same cables,  
same hoses,  
same connectors,  
same motors,  
same guards,  
same blades,  
same discs,  
same accessories,  
and every visible construction detail.

Do not redesign, replace, simplify, recolor, mirror, duplicate, enlarge, shrink, or morph the product.

Do not invent hidden components.

Do not reveal unsupported hidden sides.

Do not place a similar product in the background.

#### PRODUCT-SIZE ADAPTATION:

For small or lightweight tools:

the POV hands may naturally pick up and hold the product.

For medium products:

use two hands when physically appropriate or keep the product supported on a technical counter.

For large or heavy products:

never lift the product.

Keep it fully supported on the floor, reinforced display, stand, or workbench while the POV hands touch, point to, or inspect visible external features.

#### MANDATORY FIVE-SCENE STRUCTURE:

SHOT 1 — 0.0s TO 1.5s — POV APPROACH:

Show the exact product in its correct tool-store section.

The customer approaches it naturally from a realistic eye-level POV.

The product immediately becomes the dominant subject.

Do not begin with a wide store establishing shot.

SHOT 2 — 1.5s TO 3.0s — POV HANDLING OR CONTACT:

For a small product, one or two realistic hands pick it up safely.

For a medium product, the hands support it correctly on or above the counter.

For a large product, one hand touches a clearly visible handle, work surface, control area, wheel, drawer front, or external structure while the product remains grounded.

Use correct hand anatomy and believable weight.

SHOT 3 — 3.0s TO 4.5s — DETAIL INSPECTION:

Cut to a closer POV view of one detail clearly visible in the reference, such as:

grip texture,  
finish,  
button,  
switch,  
handle,  
control,  
connection,  
label,  
logo,  
battery area,  
cable,  
hose,  
wheel,  
drawer front,  
guard,  
blade,  
disc,  
or material texture.

Do not invent a detail.

Keep the selected area sharp and structurally accurate.

SHOT 4 — 4.5s TO 6.2s — SAFE FUNCTIONAL DEMONSTRATION:

Show one safe action based only on the product's clearly visible purpose.

Possible actions include:

testing the grip;

pressing a visible non-dangerous control while the product remains inactive;

opening one visibly supported drawer;

checking a visible adjustment;

placing the tool on a compatible workbench;

comparing its real size with the hand;

or demonstrating one obvious safe function.

Do not invent technical operation.

Do not create unsafe cutting, drilling, grinding, sparks, smoke, or aggressive movement inside the store.

SHOT 5 — 6.2s TO 8.0s — FINAL POV SALES HERO:

Show the exact product clearly from a strong frontal three-quarter POV angle.

For small products, hold it steadily with the main face visible.

For large products, leave the hand naturally resting near one visible external feature.

End with the product fully recognizable, sharp, physically real, and commercially desirable.

POV HAND REALISM:

Show only the camera-holder's hands and forearms when necessary.

Hands must have:

five fingers,  
correct thumb placement,  
realistic joints,  
natural nails,  
skin pores,  
fine hair when visible,  
correct wrist alignment,  
physically believable grip,  
and accurate contact shadows.

No extra fingers.

No hand morphing.

No floating hands.

No object clipping.

No gloves unless the product or action clearly requires them.

#### STORE ENVIRONMENT:

Use one coherent real Brazilian tool store with:

organized category-appropriate shelving,  
practical counters,  
clean industrial or commercial flooring,  
neutral technical lighting,  
restrained graphite, black, gray, dark-blue, white, wood, and metal tones,  
and believable commercial activity.

Keep the store stable between scenes.

Do not generate duplicate hero products.

Do not allow background tools to replace the product.

#### CAMERA AND FOCUS:

Natural adult eye-level POV.

Professional full-frame or premium action-camera realism without fisheye distortion.

Deep readable focus.

No portrait mode.

No artificial blur.

No strong bokeh.

No focus pulsing.

No excessive camera shake.

Use subtle natural head and hand movement only.

## AUDIO:

No narration.

No dialogue.

No voice-over.

Use synchronized natural sounds only:

subtle store ambience,  
soft footsteps,  
natural hand contact,  
light packaging or material handling,  
small switch or button sounds when visibly appropriate,  
and distant restrained commercial activity.

No dramatic music.

No cinematic impacts.

No jingle.

## CLEAN FRAME:

No subtitles.

No captions.

No prices.

No promotional overlays.

No social-media interface.

No watermark.

## NEGATIVE PROMPT:

changed product, replacement product, similar model, product morphing, altered packaging, changed branding, misspelled label, mirrored logo, missing component, extra component, invented accessory, duplicated hero product, similar background product, product disappearing, product leaving frame, product shrinking, product enlarging, unsupported heavy product, floating product, dangerous store operation, excessive sparks, smoke, dust, robotic hands, extra fingers, fused fingers, hand clipping, artificial POV, fisheye, extreme camera shake, blurred product, artificial bokeh, portrait-mode blur, changing store, CGI, 3D render, AI artifacts, narration, dialogue, subtitles, text overlays, watermark.

## FINAL OUTPUT:

One ultra-photorealistic 8-second vertical first-person POV sales video with exactly five product-focused B-roll scenes inside a real Brazilian tool store, showing the exact attached product being naturally inspected and safely handled with absolute visual fidelity, correct physical scale, realistic human hands, deep focus, no narration, and no visible AI traits.

PROMPT - UNIVERSAL PARTY DECOR SALES VIDEO PROMPT — PARTY BACKDROP / PARTY TABLE KIT / BALLOON ARCH / TOTEMS / DECOR SET / 5 B-ROLL SCENES / ABSOLUTE PRODUCT FIDELITY / NO NARRATION / BRAZILIAN PHOTOREALISM

Use the attached product image as the only and absolute visual reference for the featured party decoration setup.

Create one ultra-photorealistic vertical 9:16 premium sales video showing the EXACT party backdrop, party table kit, balloon arch, totems, stands, tables, and decorative structure in a real Brazilian event environment.

This must be a polished commercial B-roll video with exactly five separate scenes.

No narration.

No dialogue.

No voice-over.

The result must feel like a real professional event-decoration sales video filmed in Brazil, with maximum realism, correct scale, believable materials, true event ambience, and zero visible AI traits.

REFERENCE RESET RULE — CRITICAL:

At the start of each new scene, re-anchor the product directly to the original attached reference.

Do not allow scene-to-scene product drift.

Do not let one generated shot reinterpret the next.

Every B-roll scene must preserve the exact original setup identity independently.

ABSOLUTE PRODUCT LOCK:

Preserve exactly in all scenes:

- same setup type
- same quantity of pieces
- same backdrop panels
- same tables
- same totems
- same stands
- same balloon arch identity
- same colors
- same proportions
- same decorative arrangement
- same printed graphics
- same letters if physically part of the product
- same supports
- same materials
- same structure
- same visual composition of the kit
- same visible construction details

Do not redesign the setup.

Do not replace the setup.

Do not simplify it.

Do not add decorations.

Do not remove decorations.

Do not change the color palette.

Do not create a similar party setup.

VIDEO FORMAT:

- vertical 9:16
- 8 seconds
- 24 fps
- exactly 5 separate B-roll scenes
- premium commercial realism
- no narration
- no subtitles
- no text overlays

BRAZILIAN EVENT ENVIRONMENT:

Use one coherent real Brazilian event setting such as:

- real salão de festas
- real buffet room
- real decorated party room
- real event hall corner
- real home celebration area
- real covered party area

The environment must feel:

- Brazilian
- real
- festive
- organized
- clean
- beautiful
- premium but accessible
- commercially convincing

Avoid:

- giant empty hall
- luxury palace
- foreign ballroom
- fake showroom
- empty studio
- artificial 3D-render environment

#### MANDATORY 5-SCENE STRUCTURE:

##### SHOT 1 — 0.0s to 1.5s — HERO FULL SETUP

Show the exact full party setup clearly assembled in the space.

Use a frontal or frontal three-quarter composition.

The setup must dominate the frame and immediately look desirable and complete.

Use a subtle slow push-in or gentle lateral camera drift.

##### SHOT 2 — 1.5s to 3.0s — BALLOON ARCH / BACKDROP DETAIL

Cut to a closer detail of the balloon arch and backdrop area.

Show:

- balloon texture
- balloon size variation
- printed backdrop or panel detail
- edge finishing
- visual richness of the composition

Keep the product exact and recognizable.

##### SHOT 3 — 3.0s to 4.6s — TABLE / TOTEM / DISPLAY DETAIL

Cut to a closer shot of the decorated table area, totems, stands, and visible support pieces.

Show:

- real surface texture
- stands and totems
- decorative balance
- stable structure
- practical display area

Do not invent new pieces.

SHOT 4 — 4.6s to 6.2s — HIGH-ANGLE OR SIDE FUNCTIONAL BEAUTY SHOT

Cut to an elevated or side angle showing how the full kit works together spatially.

Reveal:

- real scale
- how the pieces relate
- table spacing
- balloon arch presence
- backdrop structure
- overall event-readiness

Do not create a fake flatlay.

Do not distort the setup.

SHOT 5 — 6.2s to 8.0s — FINAL SALES HERO

Return to a polished hero composition of the full setup.

End with the exact product looking:

- complete
- beautiful
- grounded
- festive
- premium
- physically real
- ready for a party

CAMERA:

Professional full-frame commercial realism.

Vertical 9:16.

4K-grade appearance.

Lens feel:

- 28mm to 35mm for hero shots
- 50mm to 85mm for details
- natural event-camera perspective
- no fisheye

- no extreme distortion
- no exaggerated cinematic sweep

#### FOCUS — NO BLUR:

Keep the setup clear and readable.

Use deep realistic focus.

No portrait mode.

No artificial background blur.

No strong bokeh.

No soft haze.

Everything important must remain clear:

- balloons
- panels
- tables
- totems
- stands
- printed details
- materials
- floor contact

#### LIGHTING:

Use realistic event lighting.

Possible sources:

- ambient indoor light
- soft practical event light
- window light if appropriate
- balanced event-fill light

Keep:

- real colors
- balanced highlights
- realistic shadows
- believable reflections

Avoid:

- harsh flash
- fake HDR
- glow
- colored lighting that changes product colors

#### MATERIAL REALISM:

- balloons must look like real balloons
- panels must look like real panels
- stands must look structurally supported
- tables must look stable and real
- printed surfaces must remain readable and faithful
- acrylic, wood, MDF, and metal must behave like real materials

No floating balloons.  
No melted geometry.  
No fake reflections.  
No synthetic textures.

#### AUDIO:

No narration.  
No dialogue.

Use only subtle natural party-space ambience, such as:

- soft room tone
- faint event ambience
- subtle indoor atmosphere

Optional very soft premium background music may be used, but it must remain discreet and secondary.

No captions.  
No subtitles.  
No voice-over.

#### CLEAN FRAME:

Outside legitimate printed graphics physically part of the product, generate no:

- text overlays
- captions
- promotional text
- prices
- interface elements
- watermarks

#### STRICT RULES:

- exact product fidelity
- exact setup preserved in all 5 scenes
- no redesign
- no setup drift
- no similar setup substitution
- no narration
- no subtitles

- no blur
- no AI look
- no CGI look
- strong visual desirability

#### NEGATIVE PROMPT:

single continuous take, no B-roll, changed setup, generic party decoration, altered balloon arch, altered panel design, wrong tables, wrong totems, wrong scale, miniature setup, oversized setup, floating balloons, melted geometry, fake materials, duplicated setup, similar setup in background, fake event hall, luxury ballroom, empty studio, 3D render, CGI, AI look, artificial blur, soft focus, portrait blur, distorted prints, extra decorations, missing decorations, subtitles, text overlays, watermark.

#### FINAL OUTPUT:

One ultra-photorealistic 8-second vertical premium sales B-roll video with exactly five separate scenes, showing the EXACT attached party backdrop, decorated table kit, balloon arch, totems, and event setup inside a real Brazilian event environment, with maximum physical realism, no narration, deep focus, strong material fidelity, and absolutely no visible AI traits.

PROMPT - Create an ultra-photorealistic vertical image (9:16) showing the EXACT product from the attached reference image being presented to the camera in a natural first-person POV. The scene must feel human, real, spontaneous, and believable, as if someone is simply showing the product to the camera with one hand.

#### ABSOLUTE PRIORITY:

The attached product must be reproduced with maximum fidelity and zero redesign.

Preserve exactly all visible characteristics from the reference image:

- packaging shape
- bottle / jar / box / container structure
- label design
- typography
- colors
- logo placement
- cap / lid / nozzle / pump details
- material finish
- reflections

- transparency
- proportions
- print alignment
- all visual details

Do not simplify, reinterpret, beautify, replace, invent, or alter any part of the product. The final product must look exactly like the attached reference.

#### MAIN COMPOSITION:

- true POV / first-person feeling
- only ONE hand visible
- no second hand
- no full person
- no face
- no body
- no selfie framing
- no person "showing" the product in the scene
- only the hand and, if necessary, a small part of the forearm may appear
- the product is held naturally and shown directly to the camera
- product close to the camera, clearly visible, hero of the frame
- label/front side turned toward the camera whenever physically possible
- framing should look organic and human, not staged like a studio ad

#### HAND / PRODUCT REALISM:

- grip must be anatomically correct
- hand posture must match the real size and shape of the product
- scale must be accurate: the product cannot look too big or too small in the hand
- fingers must wrap around the product naturally
- skin texture must be realistic
- nails natural
- no tattoos unless present in the reference or explicitly requested
- no rings, watches, bracelets, or accessories unless necessary and subtle
- never generate extra fingers
- never generate multiple hands
- never deform the hand or forearm

#### ENVIRONMENT:

Place the scene in a realistic, functional, believable environment that matches the product category naturally, but keep the environment secondary. The AI should infer the ideal setting based on the product itself.

Examples:

- perfume / skincare / cosmetics → vanity, bathroom, bedroom dresser
- food / drink / supplement → kitchen, dining table, pantry, desk
- tech / electronics → desk, office, bedroom setup
- fashion accessory → wardrobe area, mirror area, neutral indoor setting
- home / cleaning product → kitchen, laundry area, utility space

The environment must be:

- photorealistic
- natural
- functional
- clean but lived-in
- believable
- softly secondary
- never luxurious showroom
- never empty studio
- never fake CGI background

#### VISUAL STYLE:

- ultra photorealistic
- natural smartphone realism
- authentic iPhone-style look
- slight shallow depth of field
- sharp focus on the product and main label
- natural lighting or realistic indoor light
- realistic reflections and shadows
- subtle natural grain allowed
- organic social-media realism
- not overly polished
- not artificial advertising style

#### CAMERA:

- iPhone 15 Pro Max rear camera look
- 24mm wide-angle feel
- handheld POV realism
- natural perspective
- slight edge distortion acceptable
- vertical 9:16 composition

#### FOCUS HIERARCHY:

1. exact product fidelity
2. label consistency and readability
3. correct hand anatomy
4. correct product-to-hand proportion
5. realistic environment coherence
6. natural human POV feeling

#### STRICT RULES:

- use the attached product as the exact visual reference
- do not change any product features
- do not create a generic version
- do not replace the packaging
- do not hide the main label
- do not distort text
- do not create fake branding
- do not show multiple hands

- do not show the person
- do not create a mirror selfie
- do not crop the product awkwardly
- do not oversaturate colors
- do not stylize
- do not turn the image into CGI or illustration

#### ANTI-BUG / NEGATIVE PROMPT:

multiple hands, two hands, extra fingers, extra limbs, duplicated hand, deformed hand, broken anatomy, warped fingers, melted skin, visible face, visible person, visible body, selfie pose, mirror selfie, altered packaging, changed label, wrong logo, fake text, unreadable text, distorted typography, changed colors, changed cap, wrong material, oversized product, undersized product, floating product, unrealistic grip, blurry product, low quality, CGI, 3D render, illustration, cartoon, studio background, luxury showroom, fake reflections, overprocessed image, harsh flash, overexposed highlights, cluttered background, inconsistent scale, warped container, bent bottle, stretched packaging

#### OUTPUT GOAL:

Generate a flawless universal POV image where a single realistic hand naturally shows the exact attached product to the camera, preserving maximum fidelity, consistency, correct scale, and ultra-realistic detail, with zero margin for error.

#### PROMPT - UNIVERSAL LIVING ROOM APPLIANCE VIDEO PROMPT — FUNCTIONALITY + B-ROLL / MAX FIDELITY / BRAZILIAN PHOTOREALISM

Use the attached appliance image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT appliance inside a real Brazilian living room, highlighting its real scale, function, material quality and tactile details through mandatory B-roll cuts.

The appliance must remain visually identical to the reference during the entire video: same structure, same shape, same color, same size, same proportions, same screen, same display, same buttons, same grille, same vents, same base, same cable, same finish, same texture and same visible design details. Do not redesign, replace, morph, recolor, simplify or alter the product.

#### IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

## VIDEO STRUCTURE:

### 0s–1.5s — HERO SHOT:

Show the exact appliance naturally positioned inside a real Brazilian living room. The product is the hero of the frame, sharp, correctly scaled and visually dominant, with enough room context to prove real-world size.

### 1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up shot of material and design details: screen edge, control buttons, vents, grille, display, cable, base, rubber feet, plastic texture, metal finish, glass surface, fabric grille or product seams depending on the appliance type.

### 3s–4.5s — FUNCTIONALITY SHOT:

Cut to the appliance being used naturally according to its real purpose: turning on, pressing a button, adjusting a setting, screen activating, fan oscillating, purifier light turning on, humidifier mist starting, robot vacuum moving slowly, TV or soundbar being activated, or another realistic function. Human interaction may appear only as realistic hands if necessary.

### 4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing a different feature: airflow vent, display detail, reflective surface, operating light, texture, cable connection, base support, speaker grille, wheel, sensor, control panel or tactile surface.

### 6s–8s — FINAL HERO SHOT:

Return to a clean final product shot in the living room. The appliance remains sharp, stable, desirable, correctly scaled and clearly integrated into the real home environment.

## SCENE:

Real Brazilian middle-class living room, clean, functional, organized and lived-in. Sofa, TV panel, rack, curtains, center table, side table, neutral walls, ceramic or laminate flooring and everyday decor may appear naturally. No luxury mansion, no foreign showroom, no empty studio.

## AUTO-CONTEXT PLACEMENT:

Place the appliance naturally according to its function:

- TV on wall, panel or rack
- soundbar near TV area
- air purifier, humidifier, heater or fan on floor or side furniture
- robot vacuum on the floor near furniture
- portable appliance placed where a real person would use it

## CAMERA:

Vertical 9:16, iPhone 15 Pro Max realism, 24mm to 26mm natural wide-angle feel, smooth handheld or stabilized movement, realistic depth of field, sharp product focus, natural smartphone image quality, no excessive blur, no robotic motion.

## LIGHTING:

Real natural daylight from a window or soft practical living room lighting, balanced exposure, realistic shadows and accurate reflections on plastic, glass, metal, screen, furniture and floor. No harsh flash, no overexposed windows, no fake studio lighting.

AUDIO:

No dialogue. No voiceover. Natural living room ambience only, subtle appliance operation sound, button click, airflow, soft electronic beep or gentle movement if appropriate. Optional soft minimal music at low volume.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not change color, screen, buttons, display, vents, grille, base, geometry, material or proportions.

Functional action must match the real appliance.

Do not invent fake features.

No product morphing.

No fake showroom.

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered appliance, changed design, wrong scale, miniature appliance, oversized appliance, distorted geometry, warped screen, warped buttons, changing display, product morphing, floating appliance, hands clipping through product, robotic motion, deformed hands, extra fingers, CGI, 3D render, cartoon, AI artifacts, fake living room, luxury showroom, empty studio, harsh flash, blurry product, soft image, oversaturated colors, inconsistent lighting, impossible shadows, cluttered room, missing parts, extra parts, product not in focus

PROMPT - UNIVERSAL BABY / KIDS BEDROOM APPLIANCE VIDEO PROMPT —

## FUNCTIONALITY + B-ROLL / MAX FIDELITY / COMFORTABLE BRAZILIAN MIDDLE-CLASS REALISM

Use the attached appliance image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT appliance inside a real comfortable Brazilian middle-class unisex baby room or children's bedroom, highlighting its functionality, real scale, material and tactile details through mandatory B-roll cuts.

The appliance must remain visually identical to the reference during the entire video: same shape, same color, same dimensions, same proportions, same buttons, same display, same vents, same grille, same base, same wheels, same handle, same cable, same plug, same panel, same tank, same lid, same light, same screen, same sensor, same material, same texture, same finish and same visible design identity. Do not redesign, replace, morph, recolor, simplify or alter the product.

### IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

### VIDEO STRUCTURE:

#### 0s–1.5s — HERO SHOT:

Show the exact appliance naturally placed in a comfortable Brazilian middle-class unisex baby room or children's bedroom. The product is sharp, correctly scaled, physically present and clearly visible. The environment confirms real size and safe functional use without stealing focus.

#### 1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of material and construction details: button, display, indicator light, vent, grille, mesh, handle, base, cable, plug, wheel, panel, tank, lid, plastic texture, metal finish, rubber foot, seam or product edge depending on the appliance type.

#### 3s–4.5s — FUNCTIONALITY SHOT:

Cut to the appliance being used naturally according to its real purpose:

- humidifier turning on with subtle realistic mist
- air purifier being activated with a soft indicator light
- fan starting to rotate gently
- heater panel being turned on safely
- air conditioner shown installed and operating subtly
- night light glowing softly
- small appliance being placed on a dresser, shelf or bedside table
- button being pressed or setting being adjusted

Human interaction may appear only as realistic adult hands if necessary. The movement must be physically believable, smooth, safe and natural.

#### 4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing a different important detail: airflow vent, display activation, control panel, indicator light, tank surface, lid fit, cable placement, base stability, rubber foot, sensor area, material texture, product reflection or tactile surface quality.

#### 6s–8s — FINAL HERO SHOT:

Return to a clean final hero shot of the appliance inside the nursery or children's bedroom, stable, realistic and desirable, showing correct scale, safe functional placement, cozy atmosphere and premium physical presence. The product must remain the clear focus.

#### SCENE:

Real comfortable Brazilian middle-class unisex baby room or kids bedroom, clean, functional, organized, finished, cozy and lived-in. Neutral palette with soft beige, off-white, cream, warm white, light gray, greige, sand, light wood and natural wood tones. Ceramic, porcelain, laminate wood or wood-look flooring. Painted wall, subtle wallpaper, neutral wall panel, soft curtain, rug, basket, books, plush items, small lamp, crib, dresser, changing table, wall shelf, toys or nursery decor may appear naturally.

The environment must feel like a real well-kept Brazilian home, not poor, not improvised, not abandoned, not luxury mansion and not a fake showroom.

#### BRAZILIAN COMFORTABLE MIDDLE-CLASS NURSERY STYLE:

- good finishing
- clean surfaces
- organized layout
- realistic home maintenance
- neutral unisex baby/kids decor
- warm wood and soft textile details
- safe, cozy and functional atmosphere
- comfortable but not luxury
- no poverty look
- no unfinished construction
- no dirty cement floor
- no broken walls
- no improvised room
- no abandoned room
- no luxury mansion
- no premium showroom
- no hotel nursery
- no foreign catalog look

#### AUTO-CONTEXT PLACEMENT:

Place the appliance naturally according to its function:

- humidifier on a dresser, shelf, bedside table or safe elevated surface
- air purifier on the floor near wall, crib area or room corner
- fan near bed, crib, dresser or room corner with safe spacing
- heater on the floor with realistic distance from textiles
- air conditioner installed high on the wall in a realistic position
- baby monitor, night light or small appliance on shelf, dresser or bedside table
- product must feel usable, stable, correctly supported and physically present

#### CAMERA:

Vertical 9:16.  
iPhone 15 Pro Max realism.  
24mm to 26mm natural wide-angle feel.  
Smooth handheld or naturally stabilized movement.  
Realistic depth of field.  
Sharp product focus.  
Natural smartphone optics.  
No excessive blur.  
No robotic motion.  
No fake cinematic effects.  
No CGI movement.

#### LIGHTING:

Real natural daylight from a bedroom window.  
Soft, cozy and balanced exposure.  
Realistic shadows.  
Accurate material texture.  
Natural highlights on plastic, metal, glass, rubber, fabric, wood, MDF, rug and wall surfaces.  
No harsh flash.  
No overexposed window.  
No artificial studio lighting.  
No HDR exaggeration.  
No dramatic luxury lighting setup.

#### AUDIO:

No dialogue.  
No voiceover.  
Natural quiet bedroom ambience only.  
Subtle appliance operation sounds such as airflow, button click, soft electronic beep, gentle motor hum, subtle humidifier mist sound, light switch click or soft handling sounds if applicable.  
Optional soft minimal music at low volume.

#### TECHNICAL PARAMETERS:

model: veo-3  
length: 8 seconds  
resolution: 1080x1920  
framerate: 24fps  
aspect\_ratio: 9:16

#### STRICT RULES:

Mandatory B-roll cuts.  
Keep the exact product consistent in every shot.  
Maintain real-world scale.  
Do not change color, geometry, buttons, display, vents, grille, base, wheels, handle, cable, plug, panel, tank, lid, light, screen, sensor, material or proportions.  
Functional action must be physically realistic, safe and product-specific.  
Do not invent fake features.

No product morphing.  
No fake showroom.  
No poor or improvised setting.  
No luxury mansion setting.  
The product must remain visible and recognizable in every scene.  
No baby, child or person should appear unless specifically requested; only adult hands may appear for functionality shots if necessary.

#### ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, missing B-roll, altered appliance, changed design, wrong scale, giant appliance, miniature appliance, distorted geometry, warped buttons, warped display, warped vents, changing handle, changing cable, changing product light, product morphing, floating appliance, hands clipping through product, robotic motion, deformed hands, extra fingers, CGI, 3D render, cartoon, AI artifacts, fake nursery, poor bedroom, unfinished construction, dirty cement floor, broken wall, improvised room, abandoned room, poverty look, luxury mansion, premium showroom, hotel nursery, empty studio, harsh flash, overexposed window, blurry product, soft image, oversaturated colors, inconsistent lighting, impossible shadows, cluttered room, unsafe baby room layout, product not in focus, missing parts, extra parts

Vertical 9:16, iPhone 15 Pro Max realism, 24mm to 26mm natural wide-angle feel, smooth handheld or stabilized movement, realistic depth of field, sharp product focus, natural smartphone optics, no excessive blur, no robotic motion.

#### LIGHTING:

Natural daylight from a kitchen window or soft practical kitchen lighting, balanced exposure, realistic shadows, accurate reflections on metal, glass, plastic, enamel, tile, stone and countertop. No harsh flash, no overexposed window, no fake studio glare.

#### AUDIO:

No dialogue. No voiceover. Natural kitchen room ambience only, subtle appliance handling sounds, button clicks, door movement, drawer or countertop sounds if applicable. Optional soft minimal music at low volume.

#### TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

#### STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not change color, geometry, buttons, display, doors, handle, vents, cable, material or proportions.

Functional action must match the real appliance.

Do not create fake features.

No product morphing.

No fake showroom.

#### ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered appliance, changed design, wrong scale, miniature appliance, oversized appliance, distorted geometry, warped buttons, warped display, changing handle, product morphing, floating appliance, hands clipping through product, robotic motion, deformed hands, extra fingers, CGI, 3D render, cartoon, AI artifacts, fake kitchen, luxury showroom, mansion kitchen, harsh flash, blurry product, soft product focus, oversaturated colors, inconsistent lighting, impossible shadows, cluttered kitchen, dirty kitchen, missing parts, extra parts, unreadable product structure

PROMPT — DESKS / OFFICE CHAIRS / WORKSTATIONS / CABINETS / RECEPTION COUNTERS / MEETING TABLES / STORAGE SYSTEMS / 5 FUNCTIONAL B-ROLL SCENES / ABSOLUTE PRODUCT FIDELITY / BRAZILIAN PHOTOREALISM

Use the attached product image as the only and absolute visual reference for the featured office furniture.

If an approved generated scene is also provided:

use the approved scene as the environment, lighting, wardrobe, scale, and composition reference;

use the original product image as the absolute reference for furniture identity, geometry, colors, materials, dimensions, and visible components.

Create one ultra-photorealistic vertical 9:16 premium sales video featuring the EXACT attached office furniture inside a real Brazilian professional office appropriate to its function.

The video must clearly demonstrate:

the product's correct real-world scale;  
its materials and finish;  
its primary function;  
its comfort, storage, organization, accessibility, or productivity benefit;  
its integration into a real professional workflow;  
and why the viewer would want it inside their own office.

This must be a professionally edited video with exactly five separate B-roll scenes.

Do not create one continuous take.

Do not create five decorative shots with no practical purpose.

Do not create a generic architectural office video.

The exact furniture must remain the hero in every scene.

**REFERENCE RESET RULE — CRITICAL:**

Generate every B-roll scene independently from the original attached furniture reference.

At the beginning of each new scene, reset the product to the exact original reference.

Never use the altered appearance of the previous generated scene as the reference for the next scene.

Each shot must independently preserve the original furniture's:

identity,  
model,  
structure,  
geometry,  
dimensions,  
proportions,  
scale,

colors,  
materials,  
finish,  
components,  
branding,  
and visible construction details.

The office, lighting, people, and editing must remain visually coherent, but product fidelity must always come directly from the original attachment.

#### ABSOLUTE PRODUCT LOCK:

Preserve exactly in all five scenes:

the same furniture category,  
same quantity,  
same model,  
same structure,  
same geometry,  
same real dimensions,  
same proportions,  
same physical volume,  
same colors,  
same color distribution,  
same wood or MDF tone,  
same laminate,  
same metal finish,  
same paint,  
same plastic parts,  
same rubber parts,  
same upholstery,  
same fabric,  
same mesh,  
same leather or synthetic material,  
same tabletop,  
same countertop,  
same drawers,  
same drawer count,  
same doors,  
same door count,  
same shelves,  
same shelf count,  
same handles,  
same panels,  
same partitions,  
same legs,  
same feet,  
same wheels,

same casters,  
same armrests,  
same backrest,  
same seat,  
same headrest,  
same base,  
same cable openings,  
same controls,  
same adjustment mechanisms visibly present,  
same supports,  
same accessories physically included,  
same branding,  
same labels,  
same printed details,  
and every visible construction element.

Do not redesign the furniture.

Do not replace it with another model.

Do not modernize it.

Do not simplify it.

Do not change its color.

Do not change its dimensions.

Do not change the number or position of components.

Do not invent drawers, doors, shelves, armrests, headrests, controls, wheels, cable openings, supports, or accessories.

Do not mirror the furniture.

Do not duplicate the hero furniture.

Do not place another identical or visually similar item in the background.

REAL-SCALE RULE:

The furniture must maintain correct real-world size in every scene.

Use adult humans, office equipment, doors, walls, windows, computers, documents, floor tiles, and surrounding architecture to confirm realistic scale.

Desks must preserve practical working height, tabletop depth, legroom, and structural support.

Office chairs must preserve realistic seat height, backrest proportions, armrest positions, caster size, and human sitting scale.

Cabinets must preserve believable storage depth, wall scale, drawer dimensions, and door movement.

Meeting tables must preserve real seating capacity, circulation space, and tabletop scale.

Reception counters must preserve correct customer-side and operator-side heights.

Workstations must preserve desk spacing, privacy panels, cable zones, and movement space.

Do not shrink large furniture for close-up scenes.

Do not enlarge compact products.

Do not distort proportions between cuts.

ONE HERO PRODUCT RULE:

Use one hero unit or one exact furniture set according to the original reference.

When the original reference contains a complete modular set, preserve the complete set as one product.

Do not separate components that are sold or shown as one complete system.

Do not duplicate the hero furniture.

Background furniture must be visibly different in:

shape,  
color,  
scale,  
structure,  
and design.

Do not allow a background chair, desk, cabinet, or workstation to replace the hero product between cuts.

OFFICE ENVIRONMENT AUTO-SELECTION:

Automatically choose one real Brazilian office environment appropriate to the product.

Possible environments include:

a clean corporate office;  
a professional administrative room;  
an accessible-premium executive office;  
a real home office;  
a reception area;  
a meeting room;  
a coworking workspace;  
a clinic administration office;  
a professional studio;  
a customer-service office;  
a commercial back office;  
or another credible Brazilian workplace.

Use one coherent establishment throughout the five scenes.

Different scenes may show different angles or functional zones inside the same office.

The office must feel:

real,  
Brazilian,  
organized,  
comfortable,  
productive,  
human,  
clean,  
professional,  
premium-accessible,  
and commercially convincing.

Use restrained professional materials such as:

neutral painted walls;  
wood or MDF accents;  
graphite or black details;  
clean white surfaces;  
glass used sparingly;  
ceramic, porcelain, laminate, vinyl, carpet tile, or light wood flooring;  
real windows;  
blinds;  
office lighting;  
electrical outlets;  
air-conditioning elements;  
computers;  
documents;  
and practical office accessories.

Do not create:

a luxury corporate tower;  
a mansion office;  
a hotel lobby;  
a futuristic office;  
a synthetic coworking showroom;  
an empty photographic studio;  
an excessively large architectural space;  
or a sterile CGI environment.

#### MANDATORY FIVE-SCENE SALES STRUCTURE:

##### SHOT 1 — 0.0s TO 1.5s — STRONG OFFICE HERO INTRODUCTION:

Show the exact furniture naturally installed inside its correct office environment.

Use a close or medium-close frontal three-quarter composition.

The product must occupy approximately 65% to 80% of the frame.

Show enough environment to establish real function and scale without making the furniture look distant.

Use a subtle controlled push-in or a short professional lateral slider movement.

Show all important structural and functional areas.

The first scene must immediately communicate:

professional quality,  
correct scale,  
solid construction,  
practical use,  
comfort or organization,  
and purchase desirability.

Do not show excessive ceiling or empty floor.

Do not begin with a wide office establishing shot.

##### SHOT 2 — 1.5s TO 3.0s — MATERIAL AND CONSTRUCTION DETAIL:

Hard cut to a close-up of one important visible furniture detail.

Select only a detail clearly present in the original product reference, such as:

wood grain;  
MDF edge;

laminate texture;  
tabletop thickness;  
painted metal structure;  
handle;  
drawer front;  
drawer slide area;  
hinge;  
shelf edge;  
caster;  
chair mesh;  
upholstery texture;  
stitching;  
armrest;  
backrest;  
seat contour;  
base;  
cable opening;  
partition;  
support;  
joint;  
fastener;  
logo;  
or product label.

Show realistic microtexture:

wood fibers,  
laminate variation,  
paint texture,  
metal grain,  
fabric fibers,  
mesh weave,  
stitching,  
upholstery grain,  
plastic molding,  
small production marks,  
and real edge behavior.

Do not invent mechanisms, materials, logos, engravings, or text.

Do not reveal a hidden side that requires unsupported reconstruction.

SHOT 3 — 3.0s TO 4.7s — PRIMARY FUNCTIONAL USE:

Hard cut to the furniture performing one clear real-world office function.

Choose the action according to the product category.

## OFFICE DESKS:

show one real professional using the desk naturally:

typing on a keyboard;  
reviewing a document;  
writing;  
placing one notebook;  
using the work surface;  
or organizing one restrained office item.

Keep the desk structure visible.

Do not hide the product behind excessive equipment.

## OFFICE CHAIRS:

show one adult sitting down naturally or already seated with realistic posture, supported feet, correct back contact, natural arm placement, and believable weight on the seat.

A subtle swivel, seat-height use, armrest use, or recline may appear only when that mechanism is clearly visible and supported by the reference.

Do not invent controls.

## CABINETS AND FILING UNITS:

show one visible drawer or door opening naturally, one document folder being placed or removed, or one storage area being accessed.

Preserve the exact drawer count, door count, handles, proportions, and exterior geometry.

## BOOKCASES AND SHELVING:

show one professional placing or removing a folder, book, or office box from a visible shelf.

Do not hide the product.

## MEETING TABLES:

show a restrained real meeting moment with notebooks or laptops while keeping the full table identity readable.

## RECEPTION COUNTERS:

show one receptionist naturally using the rear work surface while the front product structure remains visually dominant.

## WORKSTATIONS:

show one or two professionals performing a real office task with correct spacing, posture, desk contact, and panel visibility.

## MOBILE DRAWER PEDESTALS:

show one existing drawer opening, one office item being organized, or the unit moving only a few centimeters on its real casters when mobility is visibly supported.

## LARGE MODULAR OFFICE SYSTEMS:

show one real work zone in use while preserving the complete system's scale and structure.

The action must be:

simple,  
clear,  
human,  
physically believable,  
and commercially useful.

Do not invent hidden functions.

Do not transform the furniture while demonstrating use.

## SHOT 4 — 4.7s TO 6.3s — SECONDARY BENEFIT OR HIGH-ANGLE UTILITY VIEW:

Hard cut to a different sales-focused view showing another practical benefit.

This scene must not repeat shot 3.

Possible benefits include:

work surface area;  
legroom;  
drawer organization;  
document storage;  
cable management visibly present;  
shelf access;  
chair ergonomics;  
backrest support;  
armrest placement;  
caster mobility;  
meeting capacity;  
reception workflow;  
workstation organization;  
or material durability.

## FOR DESKS, TABLES, WORKSTATIONS, AND RECEPTION COUNTERS:

use a natural elevated three-quarter angle showing the real work surface, organization, equipment placement, and human accessibility.

## FOR CHAIRS:

use a slightly elevated side or three-quarter view showing seat depth, back support, armrest placement, caster contact, and natural seated posture.

## FOR CABINETS, FILING UNITS, AND BOOKCASES:

use a high-angle or closer frontal three-quarter view showing the visible storage layout and real access.

## FOR LARGE MODULAR FURNITURE:

do not shrink the complete product into an artificial flat lay.

Show one real functional zone while keeping enough of the full product visible to preserve identity and scale.

Use only office items appropriate to the visible function.

Do not invent accessories.

Do not overcrowd the product.

## SHOT 5 — 6.3s TO 8.0s — FINAL SALES HERO IN REAL USE:

Hard cut to a polished final hero composition.

Show the exact furniture installed, stable, functional, and professionally desirable.

The product must remain clearly recognizable and sharply focused.

Include one subtle result of real use, such as:

- an organized work surface;
- a correctly closed drawer;
- a professional comfortably seated;
- a document stored;
- a clean meeting setup;
- a receptionist working naturally;
- a workstation ready for the next task;
- or a hand leaving the product after interaction.

Use a restrained push-in, short pull-back, or subtle slider movement.

End with the furniture as the dominant subject.

Do not end on a person's face.

Do not end on the office environment alone.

Do not end on another furniture item.

#### FUNCTIONAL RICHNESS RULE:

The five scenes must collectively show:

- one complete hero view;
- one premium material or construction detail;
- one primary real office function;
- one secondary organization, comfort, accessibility, or productivity benefit;
- and one final sales-focused hero result.

At least two scenes must demonstrate practical use.

Do not use only decorative camera movement.

Do not use only close-ups.

Do not show the furniture standing unused in all five scenes.

#### HUMAN INTERACTION:

Use one real adult Brazilian professional when human use is appropriate.

Use two or three people only for meeting tables or collaborative workstations.

Keep people secondary to the furniture.

Use realistic business-casual clothing such as:

- plain polo shirts;
- button-up shirts;
- simple blouses;
- neutral tops;
- tailored trousers;
- dark jeans;
- modest skirts;
- and clean professional shoes.

No fashion styling.

No visible luxury branding.

No influencer acting.

No theatrical gestures.

No exaggerated smiles.

HUMAN ANATOMY:

Every visible person must maintain:

- correct body proportions;
- realistic head size;
- natural shoulder width;
- correct arm and leg lengths;
- realistic posture;
- proper seated mechanics;
- correct foot contact;
- natural weight distribution;
- and physically coherent interaction with the furniture.

Hands must have:

- five fingers;
- correct thumb placement;
- natural joints;
- realistic nails;
- skin creases;
- correct wrist alignment;
- and believable grip or surface contact.

For seated people:

- the thighs must rest on the seat;
- the back must relate naturally to the backrest;
- the feet must touch the floor or a real support;
- the knees must bend correctly;
- the chair must carry body weight realistically.

No body clipping.

No floating seated person.

No mannequin movement.

No robotic posture.

## PHYSICAL FURNITURE BEHAVIOR:

All movement must obey:

gravity,  
weight,  
friction,  
resistance,  
rotation,  
surface contact,  
structural support,  
mechanical limits,  
and real material behavior.

Drawers must move along their real axis.

Doors must rotate from their real hinge side.

Casters must rotate around their real axle.

Chairs must swivel only around their real central base.

Height adjustment may occur only when a visible compatible mechanism exists.

Armrests, backrests, headrests, and supports must remain attached to their real positions.

Desk legs and cabinet supports must remain grounded.

Tabletops must not flex unnaturally.

Cabinets must not move independently.

Furniture must not morph during operation.

Do not allow components to multiply, disappear, bend, melt, or change design.

## CAMERA:

Professional full-frame commercial camera realism.

Vertical 9:16.

8 seconds.

24 fps.

4K-grade visual detail.

Use:

35mm to 50mm for hero scenes;  
50mm to 85mm for functional medium close-ups;  
70mm to 100mm macro-style framing for material details;  
and 35mm to 50mm for elevated utility views.

Use controlled tripod, slider, stabilized handheld, or restrained professional camera movement.

No fisheye.

No extreme wide angle.

No exaggerated low angle.

No aggressive orbit.

No reverse angle that requires invented hidden geometry.

No floating camera movement.

No digital zoom transitions.

DEEP FOCUS — NO ARTIFICIAL BLUR:

Keep the furniture sharply focused in every scene.

People using the product must remain clearly detailed.

The office environment must remain readable and credible.

Use realistic deep optical focus.

Do not use portrait mode.

Do not use extreme bokeh.

Do not blur the product during transitions.

Do not create focus pulsing.

Do not blur furniture edges.

Do not create artificial cutout separation around chairs, desks, hands, hair, or product components.

Close-up scenes may use restrained optical depth, but the selected product detail must remain completely sharp and structurally readable.

#### LIGHTING:

Use real Brazilian office lighting.

Possible sources include:

natural daylight through real windows;  
neutral office ceiling fixtures;  
LED office panels;  
desk lamps;  
commercial ambient lighting;  
or restrained professional fill light that belongs naturally to the environment.

Preserve exact product colors.

Preserve natural skin tones.

Maintain consistent light direction, exposure, white balance, shadows, and reflections across all scenes.

No dramatic blue-and-orange grading.

No neon color wash.

No harsh flash.

No fake HDR.

No artificial glow.

No overexposed windows.

No changing lighting between cuts.

#### AUDIO:

No dialogue.

No voice-over.

Use synchronized natural office sounds, such as:

subtle room tone;  
keyboard typing;  
soft mouse click;

paper handling;  
pen contact;  
drawer sliding;  
door hinge movement;  
chair caster movement;  
subtle chair swivel;  
notebook placement;  
quiet footsteps;  
air-conditioning ambience;  
and restrained distant office activity.

Use only sounds corresponding to visible actions.

Optional low-volume premium instrumental music may be used, but it must remain secondary to real product and office sounds.

#### EDITING:

Use exactly five clear editorial cuts.

Every scene must introduce a meaningful new:

angle,  
scale,  
material detail,  
function,  
comfort benefit,  
organization benefit,  
or final product result.

Use clean hard cuts or very short natural editorial cuts.

No glitch transitions.

No morph transitions.

No flash transitions.

No whip-pan transitions.

No social-media templates.

No chaotic montage.

No artificial motion blur.

#### CLEAN FRAME:

Outside legitimate branding, labels, and printed details physically present on the exact furniture, generate no:

subtitles,  
captions,  
promotional phrases,  
technical claims,  
prices,  
floating labels,  
arrows,  
icons,  
stickers,  
social-media interface,  
search bars,  
reaction buttons,  
banners,  
watermarks,  
borders,  
or text overlays.

#### TECHNICAL PARAMETERS:

model: veo-3  
duration: 8 seconds  
aspect ratio: 9:16  
resolution: 1080x1920  
master appearance: professional 4K-grade detail  
frame rate: 24 fps  
editing: exactly 5 separate B-roll scenes  
dialogue: none  
audio: synchronized office and product-use sounds

#### STRICT RULES:

Exactly five visibly separate B-roll scenes.

The furniture must be re-anchored to the original attachment in every scene.

The exact same furniture must appear in all scenes.

At least two scenes must demonstrate practical office use.

One scene must show rich material or construction detail.

One scene must show a secondary comfort, storage, organization, access, or productivity benefit.

One scene must end with a strong sales-focused hero composition.

The furniture must remain visually dominant.

The office must remain secondary and functionally appropriate.

Do not duplicate the product.

Do not introduce similar background furniture.

Do not invent components or mechanisms.

Do not change the furniture while showing functionality.

Do not replace real utility with decorative camera movement.

Do not use artificial blur.

#### NEGATIVE PROMPT:

single continuous take, no B-roll, fewer than five scenes, more than five scenes, static catalog video, decorative scenes only, no practical use, repeated identical angles, furniture standing unused in every scene, changed furniture, replacement product, similar model, furniture morphing, geometry drift, changed proportions, changed scale, changed color, altered wood tone, altered MDF tone, changed upholstery, changed materials, changed finish, missing drawer, extra drawer, missing door, extra door, changed handles, changed shelves, changed panels, altered legs, altered casters, changed armrests, changed backrest, invented headrest, invented adjustment mechanism, invented cable opening, altered branding, misspelled label, mirrored logo, duplicated furniture, similar background furniture, background furniture replacing hero, miniature office furniture, oversized office furniture, floating desk, unstable cabinet, impossible support, warped tabletop, fake drawer movement, fake door movement, impossible caster movement, impossible chair swivel, body clipping through chair, floating seated person, incorrect human scale, extra fingers, missing fingers, fused fingers, deformed hands, robotic movement, mannequin posture, cloned workers, CGI, 3D render, illustration, cartoon, collage, video-game graphics, AI artifacts, melted geometry, fake wood, fake MDF, fake fabric, fake mesh, fake leather, fake plastic, fake metal, changing office, inconsistent lighting, changing white balance, inconsistent shadows, fake reflections, blurred furniture, blurred background, artificial bokeh, portrait-mode cutout, focus pulsing, fisheye, extreme wide angle, chaotic editing, glitch transition, morph transition, flash transition, digital zoom transition, artificial motion blur, subtitles, text overlays, watermark.

#### FINAL OUTPUT:

One ultra-photorealistic 8-second vertical premium sales video with exactly five purposeful B-roll scenes showing the EXACT attached office desk, office chair, workstation, executive desk, meeting table, reception counter, filing cabinet, drawer pedestal, bookcase, storage unit, modular office system, or other professional office furniture.

The video must demonstrate real office utility, comfort, organization, accessibility, material quality, construction detail, correct physical scale, anatomically believable human use, and strong purchase desirability while preserving the furniture's exact identity in every scene with no reconstruction drift, substitution, deformation, artificial blur, or visible AI traits.

PROMPT -- - FUNCTIONALITY + B-ROLL / MAX FIDELITY / COMFORTABLE  
BRAZILIAN MIDDLE-CLASS REALISM

Use the attached baby or kids bedroom furniture image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT furniture inside a real comfortable Brazilian middle-class unisex nursery or children's bedroom, highlighting its functionality, real scale, material and tactile details through mandatory B-roll cuts.

The furniture must remain visually identical to the reference during the entire video: same shape, same color, same dimensions, same proportions, same wood tone, same MDF tone, same paint finish, same doors, same drawers, same shelves, same niches, same rails, same crib bars, same legs, same handles, same cushions, same panels, same material, same texture, same construction details and same visible design identity. Do not redesign, replace, morph, recolor, simplify or alter the product.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO SHOT:

Show the exact baby or kids furniture naturally placed in a comfortable Brazilian middle-class unisex nursery or children's bedroom. The product is sharp, correctly scaled, physically present and clearly visible. The environment confirms real size and functional use without stealing focus.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of material and finish: wood grain, MDF texture, painted surface, crib rail, drawer line, shelf edge, handle, hinge, panel joint, bed frame, changing top, cushion seam, fabric texture, leg support or visible construction detail depending on the product type.

3s–4.5s — FUNCTIONALITY SHOT:

Cut to the furniture being used naturally according to its real function:

- drawer opening softly

- cabinet door opening
- crib side, rail or mattress area being shown
- changing table surface being demonstrated
- shelf being accessed or organized
- Montessori bed detail being shown
- toy organizer being used
- rocking chair cushion being lightly pressed
- wardrobe storage being opened

Human interaction may appear only as realistic adult hands if necessary. The movement must be physically believable, smooth, safe and natural.

#### 4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing a different important detail: edge finish, drawer depth, rail spacing, panel thickness, handle alignment, shelf stability, wood texture, MDF finish, fabric weave, cushion volume, hinge movement, leg support, mattress fit or tactile material quality.

#### 6s–8s — FINAL HERO SHOT:

Return to a clean final hero shot of the furniture in the nursery or children's bedroom, stable, realistic and desirable, showing correct scale, functional placement, cozy atmosphere and premium physical presence. The product must remain the clear focus.

#### SCENE:

Real comfortable Brazilian middle-class unisex baby room or kids bedroom, clean, functional, organized, finished, cozy and lived-in. Neutral palette with soft beige, off-white, cream, warm white, light gray, greige, sand, light wood and natural wood tones. Ceramic, porcelain, laminate wood or wood-look flooring. Painted wall, subtle wallpaper, neutral wall panel, soft curtain, rug, basket, books, plush items, small lamp, wall shelf, toys or nursery decor may appear naturally.

The environment must feel like a real well-kept Brazilian home, not poor, not improvised, not abandoned, not luxury mansion and not a fake showroom.

#### BRAZILIAN COMFORTABLE MIDDLE-CLASS NURSERY STYLE:

- good finishing
- clean surfaces
- organized layout
- realistic home maintenance
- neutral unisex baby/kids decor
- warm wood and soft textile details
- safe, cozy and functional atmosphere
- comfortable but not luxury
- no poverty look
- no unfinished construction
- no dirty cement floor
- no broken walls
- no improvised room
- no abandoned room
- no luxury mansion

- no premium showroom
- no hotel nursery
- no foreign catalog look

#### AUTO-CONTEXT PLACEMENT:

Place the furniture naturally according to its function:

- crib against a wall with safe spacing
- dresser or changing table near a wall, crib or care corner
- wardrobe against a wall with realistic ceiling clearance
- Montessori bed or kids bed aligned naturally in the room
- toy organizer near a play corner
- shelf installed at practical and safe height
- rocking chair or nursing chair near crib, window or reading corner
- product must feel usable, stable, correctly supported and physically present

#### CAMERA:

Vertical 9:16.

iPhone 15 Pro Max realism.

24mm to 26mm natural wide-angle feel.

Smooth handheld or naturally stabilized movement.

Realistic depth of field.

Sharp product focus.

Natural smartphone optics.

No excessive blur.

No robotic motion.

No fake cinematic effects.

No CGI movement.

#### LIGHTING:

Real natural daylight from a bedroom window.

Soft, cozy and balanced exposure.

Realistic shadows.

Accurate material texture.

Natural highlights on wood, MDF, lacquer, fabric, metal, mirror, glass, rug and wall surfaces.

No harsh flash.

No overexposed window.

No artificial studio lighting.

No HDR exaggeration.

No dramatic luxury lighting setup.

#### AUDIO:

No dialogue.

No voiceover.

Natural quiet bedroom ambience only.

Subtle drawer movement, cabinet door, soft fabric touch, cushion press, wood contact, hinge movement or surface sounds if applicable.

Optional soft minimal music at low volume.

#### TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

#### STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not change color, geometry, wood tone, MDF tone, fabric, rails, crib bars, legs, handles, drawers, doors, shelves, cushions, panels, material or proportions.

Functional action must be physically realistic, safe and product-specific.

No product morphing.

No fake showroom.

No poor or improvised setting.

No luxury mansion setting.

The product must remain visible and recognizable in every scene.

No baby, child or person should appear unless specifically requested; only adult hands may appear for functionality shots if necessary.

#### ANTI-CRASH / NEGATIVE PROMPT:

PROMPT - FUNCTIONALITY + B-ROLL / MAX FIDELITY / COMFORTABLE BRAZILIAN MIDDLE-CLASS REALISM

Use the attached outdoor furniture image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT outdoor furniture inside a real

comfortable Brazilian middle-class outdoor area, covered varanda, balcony, finished backyard, garage patio, modest gourmet corner or functional home exterior environment, highlighting its functionality, real scale, material and tactile details through mandatory B-roll cuts.

The furniture must remain visually identical to the reference during the entire video: same shape, same color, same dimensions, same proportions, same wood, metal, aluminum, rattan, wicker, rope, fabric, canvas, glass, stone, plastic, cushions, legs, arms, table top, frame, umbrella canopy, pole, base, ribs, seams, texture, finish and visible details. Do not redesign, replace, morph, recolor, simplify or alter the product.

#### IMPORTANT EDITING RULE:

This video **MUST** include clear B-roll scenes. Do not create only one continuous shot.

#### VIDEO STRUCTURE:

##### 0s–1.5s — HERO SHOT:

Show the exact outdoor furniture naturally placed in a comfortable Brazilian middle-class outdoor area. The product is sharp, correctly scaled, physically present and clearly visible. The environment confirms real size and functional use without stealing focus.

##### 1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of material and finish: wood grain, aluminum frame, metal joint, rattan weave, wicker texture, rope weave, outdoor fabric, cushion seam, stitching, tabletop edge, glass surface, stone texture, umbrella canvas, canopy rib, pole, crank, base, leg support or visible construction detail depending on the product type.

##### 3s–4.5s — FUNCTIONALITY SHOT:

Cut to the furniture being used naturally according to its real function:

- chair being gently pulled or adjusted
- cushion being lightly pressed to show softness
- table being touched or used with a simple everyday object
- ombrelone being opened, adjusted, tilted or stabilized
- lounge chair being reclined or touched
- outdoor sofa seating detail being shown
- bench or set being naturally arranged

Human interaction may appear only as realistic hands if necessary. The movement must be physically believable, smooth and natural.

##### 4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing a different important detail: edge finish, frame thickness, leg stability, cushion volume, fabric weave, stitching, screw/joint detail, table surface, umbrella base, canopy texture, pole connection, rattan pattern, material reflection or tactile surface quality.

##### 6s–8s — FINAL HERO SHOT:

Return to a clean final hero shot of the furniture in the outdoor environment, stable, realistic and desirable, showing correct scale, functional placement and premium physical presence. The product must remain the clear focus.

#### SCENE:

Real comfortable Brazilian middle-class outdoor or semi-outdoor home area, clean, functional, organized, finished and lived-in. Covered varanda, organized balcony, finished backyard, clean garage patio, modest gourmet corner, service/outdoor area or semi-open home space. Ceramic, porcelain, polished cement, neutral outdoor tile, stone-like floor, painted walls, textured wall, clean tiled wall, glass sliding door, aluminum window, simple plants, wall lights, outdoor cabinet or practical home details may appear naturally.

The environment must feel like a real well-kept Brazilian home, not poor, not improvised, not abandoned, not luxury mansion and not a fake showroom.

#### BRAZILIAN COMFORTABLE MIDDLE-CLASS STYLE:

- good finishing
- clean surfaces
- organized layout
- realistic home maintenance
- pleasant outdoor atmosphere
- functional and human
- comfortable but not luxury
- no poverty look
- no unfinished construction
- no dirty cement backyard
- no broken walls
- no improvised area
- no abandoned area
- no luxury resort
- no mansion backyard
- no premium architectural showroom
- no foreign catalog look

#### AUTO-CONTEXT PLACEMENT:

Place the furniture naturally according to its function:

- table and chairs arranged with realistic spacing
- ombrelone placed through a table opening or with a proper weighted base
- lounge chair in a logical outdoor relaxation position
- outdoor sofa or armchair in a social seating area
- bench along a wall, garden corner or varanda
- balcony set with realistic walking clearance
- furniture must feel usable, stable, correctly supported and physically present

#### CAMERA:

Vertical 9:16.

iPhone 15 Pro Max realism.

24mm to 26mm natural wide-angle feel.

Smooth handheld or naturally stabilized movement.  
Realistic depth of field.  
Sharp product focus.  
Natural smartphone optics.  
No excessive blur.  
No robotic motion.  
No fake cinematic effects.  
No CGI movement.

#### LIGHTING:

Real natural daylight or soft covered outdoor light.  
Balanced exposure.  
Realistic shadows.  
Accurate material texture.  
Natural highlights on wood, aluminum, metal, glass, fabric, canvas, rattan, wicker, rope, plastic, stone, tile and outdoor surfaces.  
No harsh flash.  
No overexposed sky.  
No artificial studio lighting.  
No HDR exaggeration.  
No dramatic luxury lighting setup.

#### AUDIO:

No dialogue.  
No voiceover.  
Natural outdoor/home ambience only.  
Subtle chair movement, fabric touch, cushion press, table contact, umbrella adjustment, metal joint, wood or surface sounds if applicable.  
Optional soft minimal music at low volume.

#### TECHNICAL PARAMETERS:

model: veo-3  
length: 8 seconds  
resolution: 1080x1920  
framerate: 24fps  
aspect\_ratio: 9:16

#### STRICT RULES:

Mandatory B-roll cuts.  
Keep the exact product consistent in every shot.  
Maintain real-world scale.  
Do not change color, geometry, fabric, frame, legs, arms, cushions, tabletop, canopy, pole, base, material or proportions.  
Functional action must be physically realistic and product-specific.  
No product morphing.  
No fake showroom.  
No poor or improvised setting.  
No luxury mansion setting.

The product must remain visible and recognizable in every scene.

**ANTI-CRASH / NEGATIVE PROMPT:**

single continuous shot only, no B-roll, missing B-roll, altered furniture, changed design, wrong scale, giant furniture, miniature furniture, distorted geometry, warped table legs, warped chair legs, distorted cushion, changing fabric, changing frame, changing umbrella canopy, bent umbrella pole, product morphing, floating furniture, hands clipping through furniture, robotic motion, deformed hands, extra fingers, CGI, 3D render, cartoon, AI artifacts, fake outdoor area, poor backyard, unfinished construction, broken wall, dirty cement floor, improvised area, abandoned area, poverty look, luxury resort, mansion backyard, premium showroom, empty studio, harsh flash, overexposed sky, blurry product, soft image, oversaturated colors, inconsistent lighting, impossible shadows, cluttered area, product not in focus, missing parts, extra parts

PROMPT - UNIVERSAL PRODUCT VIDEO PROMPT — WITH MANDATORY B-ROLL CUTS / MAX FIDELITY / ULTRAREALISM

Use the attached product image as the absolute visual reference. Create an ultra-photorealistic vertical video showing the EXACT product in a real, natural, functional environment.

The product must remain visually identical to the reference during the entire video: same shape, same color, same label, same packaging, same material, same proportions, same texture, same details. Do not redesign, replace, morph, simplify, or alter the product.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot. The video must be edited as a short premium product video with multiple natural cutaway shots.

VIDEO STRUCTURE WITH B-ROLL:

0s–1.5s — HERO SHOT:

Show the product clearly in its real environment. The product is centered or naturally framed, sharp, realistic, and visually dominant.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up macro shot showing the product material, surface texture, label, stitching, fabric, cap, edge, handle, finish, or construction detail depending on the product type.

3s–4.5s — B-ROLL FUNCTIONALITY SHOT:

Cut to the product being used naturally according to its real purpose. Show a real physical action: opening, closing, touching, applying, pouring, folding, lifting, pressing, sliding, wearing, placing, organizing, or interacting with the product in a human and believable way.

4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up angle showing a different important detail: texture, seam, logo, label, material reflection, edge finish, fabric movement, handle, drawer, zipper, sole, stitching, packaging, or tactile surface.

#### 6s–8s — FINAL PRODUCT SHOT:

Return to a clean final hero shot of the product in the environment, stable and beautiful, reinforcing quality, functionality, and desire.

#### B-ROLL STYLE:

The B-roll must feel like a real edited product video, not one single camera movement. Use smooth natural cuts, soft transitions, detail inserts, close-up shots, and functional cutaways.

The editing should feel premium, human, organic, and professional, but not robotic or artificial.

Every B-roll shot must show the same exact product with perfect consistency.

#### FUNCTIONALITY AUTO-INTERPRETATION:

The AI must infer the correct use based on the product category:

- clothing: touching fabric, showing seams, folding, hanging, wearing detail
- footwear: holding shoe, showing sole, stepping, leather or fabric texture
- furniture: opening drawers, showing handles, surface texture, real scale in room
- perfume/cosmetics: cap, bottle, label, application ritual, vanity details
- bedding/towels: smoothing fabric, folding, close-up of softness and stitching
- food/drink: opening, pouring, serving, label and packaging close-ups
- electronics: holding, turning on, tapping, ports, screen or button details
- home products: practical use in the correct environment

#### CAMERA:

Vertical 9:16, iPhone 15 Pro Max realism, natural handheld or stabilized movement, realistic depth of field, sharp product focus, close-up detail shots, smooth push-ins, no excessive blur, no fake cinematic effects.

#### STYLE:

Ultra-photorealistic, real human lifestyle realism, tactile physical interaction, visible microtexture, natural lighting, realistic shadows, authentic environment, no AI look, no CGI look, no robotic motion.

#### AUDIO:

No dialogue unless requested.

Use subtle real ambient sound and product handling sounds.

Optional soft premium background music, low volume.

#### TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

#### STRICT RULES:

- mandatory B-roll cuts
- do not make a single continuous shot
- product must stay consistent in every shot
- do not change product identity
- do not change label, shape, color, size, texture, material, or proportions
- all functional actions must match the real product
- movements must be human, natural, tactile, and believable
- keep the product visible and recognizable in every scene
- do not hide the product during transitions

#### ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, missing B-roll, no cutaway shots, changed product, altered packaging, changed label, changed color, wrong scale, product morphing, inconsistent product between shots, fake branding, unreadable text, distorted typography, floating product, product disappearing, product leaving frame, object clipping through hands, robotic motion, stiff movement, extra fingers, deformed hands, bad anatomy, CGI, 3D render, cartoon, illustration, AI artifacts, blurry product, low quality, harsh flash, oversaturated colors, chaotic editing, glitch transitions, unrealistic overlays, fake texture, warped material, inconsistent lighting

PROMPT -Prompt (10 segundos | neutro | sem fala | compatível com qualquer gerador de vídeo):

Animate the scene as a real handheld product presentation while preserving the reference image with absolute accuracy. Keep the folded bedding set in both hands exactly as shown, without changing its print, colors, folds, texture, size, position or proportions. Preserve the bed, pillows, blanket, furniture, lighting and entire room exactly as they appear. Start with the index finger gently touching the pattern on the folded bedding, bringing it slightly closer to the camera for a natural close-up without digital zoom. Then smoothly move toward the bed while still holding the folded bedding, revealing the pillow details. The free hand lightly touches the pillow for a brief moment as if presenting the fabric. Next, return the focus to the folded bedding held with both hands. Finish by holding it steadily and naturally pointing downward with one finger. Ultra-realistic human movements, natural handheld camera, smooth cinematic motion, no object deformation, no added elements, no text, no audio, no scene changes.

PROMPT - — Create a hyper-realistic 8-second vertical commercial video (9:16, 4K, cinematic) based strictly on the reference image.

The storage bag must remain EXACTLY the same as shown in the reference image. Preserve the exact color shown in the photo, whatever it is. Do not change the fabric, stitching, zipper, transparent front window, shape, size, proportions, texture, seams, or any visible detail. The product must remain 100% identical throughout the entire video.

The scene takes place inside a bright, realistic, lived-in bedroom with soft natural daylight. The room is slightly messy, with clothes, blankets, or towels scattered naturally around the floor, creating a realistic "before organization" atmosphere.

The storage bag is already open on the floor. A pair of realistic human hands naturally enters the frame and gently folds clothes, blankets, comforters, towels, or other soft household fabrics before placing them inside the storage bag one piece at a time. The contents should match the type of items being stored.

Each item is folded naturally and carefully placed inside. Through the transparent front window, the folded items become neatly stacked, demonstrating the storage capacity. As the

bag fills, the surrounding clutter gradually decreases, making the room visibly more organized.

Once the storage bag is full, both hands gently press the contents to compress them naturally. The fabric responds with realistic compression and subtle wrinkles. The hands then slowly pull the zipper around the lid until the storage bag is completely closed.

After closing it, both hands naturally grasp the storage bag from its left and right sides near the bottom, supporting its weight from underneath, and carefully lift it. The bag is carried a short distance and neatly placed inside a wardrobe, under the bed, on a shelf, or in another organized storage space appropriate for the room. The product always maintains its original shape and proportions during the lift.

The camera follows the movement with smooth cinematic handheld motion before slowly revealing the transformed room. The floor is now clean, the space feels brighter, calmer, and more organized, while the storage bag remains clearly visible in its final position.

Ultra-photorealistic product advertisement with premium e-commerce quality. Authentic human movement, realistic body mechanics, natural fabric physics, cinematic lighting, realistic household environment, shallow depth of field, highly detailed textures, smooth continuous motion.

Important: Never modify the storage bag. Preserve the exact color visible in the reference image, whatever it is. Do not add handles, logos, labels, text, accessories, extra compartments, or any new details. Do not deform, stretch, morph, or replace the product. Keep the product identical from beginning to end.

No speech. No audio. No subtitles. No text on screen. No logos. No watermarks. No object morphing. No unrealistic motion. No duplicated hands, fingers, or objects. Continuous natural movement with no cuts.

PROMPT - Use the sofa photo provided as the reference.

The sofa must remain IDENTICAL to the reference image: same color, same fabric, same stitching, same cushions, same proportions, same texture, same shape, and same details.

Do not alter anything about the sofa.

Scene:

- First-person perspective (POV), as if I were walking up to the sofa and presenting it naturally.
- Setting: a modern living room matching the reference image.
- Natural, realistic, everyday home video aesthetic.
- Slightly blurred background with realistic depth of field.

#### Camera:

- The camera slowly approaches the sofa with natural handheld movement.
- It gently pans from one side to the other, highlighting the armrests, seat cushions, backrest, fabric texture, stitching, and overall design.
- The movement feels like a real person proudly showing the sofa to someone.
- No hands, arms, reflections, or body parts appear in the video.

#### Lighting:

- Soft natural daylight with realistic indoor lighting.
- No exaggerated reflections or dramatic effects.

#### Format:

- Vertical 1080×1920.

#### Spoken in Portuguese (Brazil):

"Olha esse sofá... além de lindo, ele é muito confortável e combina com qualquer ambiente. O acabamento é de excelente qualidade e deixa a sala muito mais elegante. Vou deixar o link aqui para vocês aproveitarem porque o custo-benefício está excelente."

Cinematic product showcase.

No text on screen: no captions, subtitles, labels, logos, trademarks, watermarks, user interface elements, or graphics. Absolutely nothing written appears in the video.

No transitions of any kind.

#### Anti-bug rules:

- The sofa must never change color, shape, texture, stitching, or proportions.
- The cushions must remain stable and realistic.
- The fabric must not melt, stretch, wrinkle unnaturally, shimmer, or deform.
- The camera must never clip through the sofa.
- No people, faces, eyes, mouths, hands, or reflections appear.
- No distortions, filters, or hallucinated objects.
- The room lighting and furniture remain consistent throughout the video.
- The entire video should look like authentic handheld smartphone footage recorded inside a real living room.

PROMPT - Use the attached image as the exact scene reference and base frame.

Transform the image into a realistic cinematic video, as if filmed by a person holding a camera, without showing any part of the body (no hands, no arms, no reflections).

The bed remains exactly as shown, with the bedspread perfectly arranged and unchanged.

The camera performs a natural handheld home décor product showcase, with subtle organic movement, slight sway, micro-adjustments, and realistic human filming imperfections.

The video explores the bedspread through smooth, non-repetitive camera movements, creating a premium and engaging presentation.

Camera behavior should include a combination of:

- a slow forward push-in toward the center of the bed
- subtle lateral movements (left/right) to reveal texture and volume
- gentle tilt movements from the pillows toward the foot of the bed
- soft upward reframing to emphasize the complete bedding arrangement
- smooth focus transitions between the overall bed and close fabric details
- slight diagonal viewing angles for depth and realism

The camera should naturally highlight:

- the overall appearance of the bedspread
- the fabric texture
- the quilting or stitching
- folds and drape
- pillow coordination
- premium finish and craftsmanship

The movement sequence should vary slightly each generation, avoiding repetitive camera paths while remaining smooth and visually satisfying.

The pacing should resemble a luxury bedding commercial or premium home décor advertisement.

The camera must never get excessively close to avoid perspective distortion.

Important constraints:

Do NOT change, recreate, redesign, or modify the bedspread in any way.

The bedspread must remain 100% identical to the original image at all times.

Do NOT alter:

- the bed
- the pillows
- the sheets
- the bedspread
- the bedroom
- the furniture
- the lighting
- the colors
- the textures
- the stitching
- the proportions

No object in the scene should move or change besides the camera.

The lighting must remain perfectly consistent, preserving the original room atmosphere.

Hyper-realistic footage, professional home décor videography, realistic camera physics, natural motion blur, cinematic depth of field, premium interior styling.

8-second premium product video designed for high-conversion social media advertising.

Preserve the EXACT sneakers from the reference image throughout the entire video. Do not change their design, shape, proportions, colors, materials, texture, stitching, sole, laces, details, or appearance in any way.

The person naturally moves their feet and legs, creating subtle, realistic sneaker movements against the concrete surface. Include small foot rotations, slight lifting and lowering of the heels, gentle toe movements, natural ankle flexing, and realistic weight shifts.

The sneakers must remain firmly attached to the feet and move naturally with the legs, maintaining realistic anatomy, gravity, contact, friction, and perspective.

Preserve the exact original environment, concrete textures, urban atmosphere, lighting, camera angle, framing, clothing, body proportions, and composition from the reference image.

Keep the movement smooth, casual, authentic, and realistic, like a natural streetwear footwear showcase captured on a smartphone.

A cena inicia exatamente no enquadramento da imagem de referência, com as mãos já segurando a capinha muito próxima da câmera. A câmera permanece completamente fixa durante toda a animação.

As mãos começam movimentando a capinha lentamente, revelando seus detalhes de forma extremamente natural e humana. A capinha é inclinada suavemente para a esquerda, depois para a direita, levemente para cima e para baixo, mostrando seus relevos, textura, acabamento e todos os detalhes do desenho sob diferentes ângulos, sempre muito próxima da lente.

Em seguida, uma das mãos desliza delicadamente a ponta dos dedos sobre a superfície da capinha, percorrendo todo o desenho de forma lenta e natural, como alguém apreciando a qualidade do material. O toque deve transmitir a sensação de textura premium, sem esconder o produto em nenhum momento.

Durante toda a sequência, a capinha permanece totalmente visível e é sempre o centro da atenção. Os movimentos das mãos devem ser suaves, contínuos e extremamente realistas, com pequenas microvariações naturais dos dedos e dos punhos, exatamente como uma pessoa faria ao mostrar um produto para alguém.

Não existem movimentos bruscos, acelerações, tremores artificiais, deformações nas mãos ou mudanças de enquadramento. As mãos mantêm anatomia perfeita, dedos proporcionais, unhas perfeitamente preservadas e pegada consistente durante toda a animação.

O foco permanece extremamente nítido na capinha, destacando sua textura, acabamento e qualidade, enquanto o fundo permanece desfocado, preservando o aspecto premium de um vídeo UGC profissional.

Movimentos totalmente humanos, naturais e realistas, sem qualquer aparência robótica ou gerada por IA.

PROMPT -UNIVERSAL BOOK TABLE B-ROLL VIDEO PROMPT — BOOK ONLY / NO PEOPLE / 5 PREMIUM PRODUCT SHOTS / ABSOLUTE COVER FIDELITY

Use the attached book image as the only and absolute visual reference.

Create one ultra-photorealistic vertical 9:16 premium sales video showing only the EXACT attached book on a real table inside a Brazilian reading environment.

No people.

No hands.

No narration.

No dialogue.

FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

Exactly five separate B-roll scenes.

Clean editorial cuts.

4K-grade professional appearance.

ABSOLUTE BOOK LOCK:

Preserve the exact book in all five scenes:

same edition,  
same quantity,  
same dimensions,  
same proportions,  
same thickness,  
same cover,  
same title,  
same author,  
same artwork,  
same colors,  
same typography,  
same spine,  
same binding,  
and same visible page block.

At every cut, re-anchor the book directly to the original attachment.

Do not redesign, mirror, replace, recolor, duplicate, open, or morph the book.

MANDATORY FIVE-SCENE STRUCTURE:

SHOT 1 — 0.0s TO 1.5s — TABLE HERO:

Show the complete book resting naturally on the table.

Use a slightly elevated frontal three-quarter angle and a subtle push-in.

SHOT 2 — 1.5s TO 3.0s — COVER DETAIL:

Cut to a closer view of the title, artwork, cover finish, and typography.

Keep all visible text faithful.

SHOT 3 — 3.0s TO 4.5s — SPINE AND THICKNESS:

Cut to a low side-frontal angle showing the real spine thickness, binding, corners, and page block.

Do not reveal an invented back cover.

SHOT 4 — 4.5s TO 6.2s — HIGH-ANGLE TABLE VIEW:

Cut to a natural high-angle composition showing the exact book and a restrained reading context.

Do not create an artificial flat lay.

Use at most one or two subtle secondary objects.

SHOT 5 — 6.2s TO 8.0s — FINAL SALES HERO:

Return to a polished frontal three-quarter shot.

Use a restrained slider movement.

End with the complete exact cover sharply readable.

CAMERA:

Professional full-frame realism.

50mm to 85mm equivalent lenses.

Natural deep focus.

No fisheye.

No extreme blur.

No focus pulsing.

#### LIGHTING:

Use consistent soft daylight or believable residential ambient light.

Preserve exact cover colors and realistic table shadows.

#### AUDIO:

No narration.

No dialogue.

Use subtle room tone only.

Optional very soft paper or table ambience.

No dramatic music.

#### CLEAN FRAME:

No subtitles.

No captions.

No promotional text.

No interface elements.

No watermark.

#### NEGATIVE PROMPT:

single continuous shot, missing B-roll, changed book, altered cover, mirrored text, misspelled title, invented back cover, open book, duplicated book, floating book, excessive props, competing books, blurred cover, focus pulsing, CGI, 3D render, AI artifacts, narration, subtitles, text overlays, watermark.

#### FINAL OUTPUT:

One ultra-photorealistic 8-second vertical premium product video with exactly five B-roll scenes showing only the exact attached book resting on a real table, with absolute cover fidelity, realistic material detail, deep focus, no narration, and no visible AI traits.

PROMPT - UNIVERSAL SUITCASE-ONLY SALES VIDEO PROMPT — AUTOMATIC  
BRAZILIAN TRAVEL SCENE / 5 PREMIUM B-ROLL SHOTS / ABSOLUTE PRODUCT  
FIDELITY / NO PEOPLE / NO NARRATION

Use the attached suitcase image as the only and absolute visual reference.

Create one ultra-photorealistic vertical 9:16 premium sales video showing only the EXACT  
attached travel suitcase inside a real Brazilian travel-preparation environment automatically  
selected according to its category, size, and visual style.

Show no people, no hands, and no body parts.

The exact suitcase must remain the hero in every scene.

FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

Exactly five separate B-roll scenes.

Clean editorial cuts.

Professional 4K-grade appearance.

No narration.

No dialogue.

No subtitles.

No text overlays.

REFERENCE RESET RULE — CRITICAL:

At the beginning of every new scene, reset the suitcase directly to the original attached  
reference.

Never use the generated appearance of the previous scene as the reference for the next  
scene.

Each scene must independently preserve the original suitcase identity.

ABSOLUTE SUITCASE LOCK:

Preserve exactly in all five scenes:

same category;

same quantity;  
same model;  
same dimensions;  
same proportions;  
same geometry;  
same shell or fabric structure;  
same colors;  
same materials;  
same surface finish;  
same branding;  
same lettering;  
same prints;  
same pockets;  
same seams;  
same zippers;  
same locks;  
same top handle;  
same side handle;  
same telescopic handle;  
same wheel count;  
same wheel structure;  
same feet;  
same corners;  
same included accessories;  
and every visible construction detail.

Do not redesign, recolor, replace, mirror, duplicate, open, enlarge, shrink, or morph the suitcase.

Do not invent its interior.

Do not reveal a hidden side that requires unsupported reconstruction.

#### MANDATORY FIVE-SHOT STRUCTURE:

##### SHOT 1 — 0.0s TO 1.5s — FULL SUITCASE HERO:

Show the complete suitcase upright or naturally positioned in the travel environment.

Use a frontal three-quarter angle and a restrained push-in.

Keep the complete silhouette, wheels, handles, and main product face visible.

##### SHOT 2 — 1.5s TO 3.0s — MATERIAL AND FINISH DETAIL:

Cut to a close-up of one detail already visible in the reference, such as:

hard-shell texture;

fabric weave;  
stitched panel;  
printed pattern;  
reinforced corner;  
edge finish;  
or brand mark.

Keep the exact material and color stable.

SHOT 3 — 3.0s TO 4.5s — HANDLE, LOCK, OR ZIPPER DETAIL:

Cut to one second close-up showing a visible:

top handle;  
side handle;  
telescopic-handle structure;  
zipper path;  
zipper pull;  
lock;  
external pocket;  
or structural joint.

Do not invent a mechanism.

Do not activate a hidden feature.

SHOT 4 — 4.5s TO 6.2s — WHEELS AND BASE UTILITY VIEW:

Cut to a low or elevated technical angle showing:

wheel construction;  
floor contact;  
base shape;  
corner reinforcement;  
and real stability.

The suitcase remains stationary.

Do not make it move by itself.

Do not change the wheel count or structure.

SHOT 5 — 6.2s TO 8.0s — FINAL SALES HERO:

Return to a polished full-product composition.

Use a very subtle lateral slider movement or restrained pull-back.

End with the suitcase sharp, stable, grounded, fully recognizable, and desirable.

#### PRODUCT PHYSICS:

The suitcase remains physically supported throughout the video.

No self-moving wheels.

No opening by itself.

No telescopic handle extending without human contact.

No floating suitcase.

No straps or tags moving without physical cause.

#### CAMERA:

Professional full-frame realism.

Use:

50mm to 70mm for hero shots;  
70mm to 100mm macro-style framing for details;  
and 50mm to 70mm for wheel and base views.

No fisheye.

No aggressive orbit.

No reverse angle requiring hidden geometry.

#### FOCUS:

Keep each selected product detail sharply readable.

No portrait-mode blur.

No artificial bokeh.

No focus pulsing.

No blurred product during cuts.

#### LIGHTING:

Use coherent real lighting across all scenes.

Preserve exact suitcase colors and material finish.

Use realistic floor shadows and hardware reflections.

AUDIO:

No narration.

No dialogue.

Use only subtle natural ambience:

soft residential room tone;  
restrained travel-preparation ambience;  
and very subtle material or wheel sounds only when physically visible.

Optional low-volume premium instrumental music may be used.

CLEAN FRAME:

No subtitles.

No captions.

No prices.

No promotional overlays.

No airline logos.

No watermark.

NEGATIVE PROMPT:

single continuous shot, missing B-roll, changed suitcase, replacement suitcase, product morphing, geometry drift, changed handle, changed wheel count, altered branding, misspelled lettering, invented interior, suitcase opening by itself, telescopic handle moving by itself, wheels rotating without movement, floating suitcase, duplicated product, artificial blur, focus pulsing, CGI, 3D render, AI artifacts, narration, dialogue, subtitles, text overlays, watermark.

FINAL OUTPUT:

One ultra-photorealistic 8-second vertical premium sales video with exactly five B-roll scenes showing only the EXACT attached travel suitcase inside a real Brazilian travel-preparation environment, preserving absolute product identity, real scale, material quality, construction details, deep focus, and zero visible AI traits.

PROMPT - UNIVERSAL POV PRODUCT VIDEO PROMPT — ONE HAND ONLY / MAX FIDELITY / ULTRAREALISM / ANTI-BUGS

Use the attached reference image as the absolute product reference. Create an ultra-photorealistic POV video where ONLY ONE human hand presents the exact product to the camera in a natural, realistic, and believable way.

ABSOLUTE PRIORITY:

The product must remain максимально faithful to the attached reference image. Preserve with maximum consistency and zero redesign:

- exact packaging shape
- bottle / box / tube / jar / container format
- exact label
- typography
- logo placement
- colors
- cap / lid / pump / dispenser details
- proportions
- print alignment
- transparency
- reflections
- finish and materials
- all visible design elements

Do not alter, simplify, replace, reinterpret, beautify, invent, or distort any product detail.

SCENE CONCEPT:

A true first-person POV video, as if the viewer is holding the product and showing it naturally to the camera with one hand only. The movement should feel organic, human, spontaneous, and real — never robotic, never overly cinematic, never artificial.

MAIN ACTION:

One realistic human hand holds the product and presents it directly to the camera. The hand may make subtle natural movements: slightly bringing the product closer to the camera, slightly tilting it to show the front, gently adjusting the angle, softly stabilizing the grip, subtly revealing the label and packaging details. The product must remain the hero of the video at all times.

VERY IMPORTANT RULES:

- ONLY ONE HAND visible during the entire video
- NEVER show two hands
- NEVER show extra fingers
- NEVER show a person, face, body, reflection, or mirror selfie
- NEVER let the product leave the frame abruptly

- NEVER deform the product
- NEVER distort the label
- NEVER switch product identity between frames
- NEVER generate generic packaging
- NEVER generate a fake version of the brand/product
- NEVER make the grip anatomically impossible

#### HAND RULES:

- one single realistic human hand only
- natural anatomy
- correct finger count
- realistic joints
- realistic skin texture
- natural nails
- no deformities
- no duplicated fingers
- no extra thumb
- no merged fingers
- no floating fingers
- no unnatural bending
- no warped wrist
- no broken forearm
- no accessories unless subtle and natural
- no tattoos unless explicitly requested
- grip must match the actual size and geometry of the product

#### SCALE AND PROPORTION RULE:

The AI must analyze the real-world size of the attached product and hold it with correct proportion relative to the hand. Small products must look small in hand, medium products must fit naturally in the palm, large products must be held in a believable way. Never oversized, undersized, stretched, flattened, or warped.

#### ENVIRONMENT RULE:

Place the product in the most appropriate real-life environment for its category, but keep the environment secondary. The setting must be realistic, functional, clean, believable, Brazilian middle-class everyday context, natural and lived-in, softly blurred, not luxurious showroom, not sterile studio, not fake CGI.

Examples:

- perfume / skincare / beauty → vanity, bathroom, dresser
- food / beverage / snack → kitchen, dining table, pantry
- tech / gadget → desk, office, bedroom setup
- fashion accessory → wardrobe area, neutral room
- personal care → bathroom counter, sink area
- home product → laundry, kitchen, utility area

#### CAMERA STYLE:

- true first-person POV
- vertical 9:16

- iPhone 15 Pro Max rear camera look
- 24mm wide-angle feel
- handheld but stable
- natural micro movements
- realistic smartphone dynamic range
- slight natural lens distortion at the edges
- social-media native realism

#### VIDEO STYLE:

- ultra photorealistic
- natural product presentation
- organic UGC feeling
- authentic TikTok / Reels style
- subtle realism
- not overproduced
- not ad-like in an artificial way
- not stiff
- not robotic

#### LIGHTING:

- realistic natural or indoor practical lighting
- soft shadows
- balanced exposure
- no harsh flash
- no overexposed highlights
- no crushed blacks
- realistic reflections on packaging
- readable front label
- clean lighting that respects the material of the product

#### FOCUS:

- primary focus on the product front
- label must remain readable whenever visible in the reference
- hand slightly secondary but still realistic
- background softly blurred
- no excessive blur on the product
- no focus hunting
- no frame-to-frame inconsistency

#### DIALOGUE:

No dialogue. No voiceover. No spoken words.

#### BACKGROUND SOUNDS:

Soft ambient sound only, matching the environment. Subtle natural handling sound. No distracting noise.

#### MUSIC:

Optional minimal soft background music, low volume, elegant and unobtrusive.

#### TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect\_ratio: 9:16

#### ANTI-BUG / NEGATIVE PROMPT:

two hands, multiple hands, extra fingers, extra thumb, missing fingers, fused fingers, deformed hand, broken wrist, warped arm, duplicated hand, visible person, visible face, visible body, reflection of person, mirror selfie, altered product, changed packaging, wrong label, fake logo, distorted typography, unreadable text, inconsistent branding, product morphing, changing bottle shape, stretched packaging, flattened product, floating product, unrealistic grip, wrong scale, oversized product, undersized product, blurred product, focus hunting, frame inconsistency, shaky motion, robotic movement, stiff animation, CGI, 3D render, cartoon, illustration, fake reflections, oversaturated colors, harsh flash, luxury showroom, studio background, sterile background, cluttered scene, irrelevant environment, product leaving frame, cropped label, bent bottle, melted plastic, warped container

#### OUTPUT GOAL:

Generate a flawless ultra-realistic POV product video where one single human hand naturally presents the exact attached product to the camera, preserving maximum fidelity, correct proportions, packaging consistency, and believable real-world realism with zero margin for error.

PROMPT -Create an ultra-photorealistic vertical image (9:16) showing the EXACT product from the attached reference image being presented to the camera in a natural first-person POV. The scene must feel human, real, spontaneous, and believable, as if someone is simply showing the product to the camera with one hand.

#### ABSOLUTE PRIORITY:

The attached product must be reproduced with maximum fidelity and zero redesign.

Preserve exactly all visible characteristics from the reference image:

- packaging shape
- bottle / jar / box / container structure
- label design
- typography

- colors
- logo placement
- cap / lid / nozzle / pump details
- material finish
- reflections
- transparency
- proportions
- print alignment
- all visual details

Do not simplify, reinterpret, beautify, replace, invent, or alter any part of the product. The final product must look exactly like the attached reference.

#### MAIN COMPOSITION:

- true POV / first-person feeling
- only ONE hand visible
- no second hand
- no full person
- no face
- no body
- no selfie framing
- no person "showing" the product in the scene
- only the hand and, if necessary, a small part of the forearm may appear
- the product is held naturally and shown directly to the camera
- product close to the camera, clearly visible, hero of the frame
- label/front side turned toward the camera whenever physically possible
- framing should look organic and human, not staged like a studio ad

#### HAND / PRODUCT REALISM:

- grip must be anatomically correct
- hand posture must match the real size and shape of the product
- scale must be accurate: the product cannot look too big or too small in the hand
- fingers must wrap around the product naturally
- skin texture must be realistic
- nails natural
- no tattoos unless present in the reference or explicitly requested
- no rings, watches, bracelets, or accessories unless necessary and subtle
- never generate extra fingers
- never generate multiple hands
- never deform the hand or forearm

#### ENVIRONMENT:

Place the scene in a realistic, functional, believable environment that matches the product category naturally, but keep the environment secondary. The AI should infer the ideal setting based on the product itself.

Examples:

- perfume / skincare / cosmetics → vanity, bathroom, bedroom dresser
- food / drink / supplement → kitchen, dining table, pantry, desk

- tech / electronics → desk, office, bedroom setup
- fashion accessory → wardrobe area, mirror area, neutral indoor setting
- home / cleaning product → kitchen, laundry area, utility space

The environment must be:

- photorealistic
- natural
- functional
- clean but lived-in
- believable
- softly secondary
- never luxurious showroom
- never empty studio
- never fake CGI background

VISUAL STYLE:

- ultra photorealistic
- natural smartphone realism
- authentic iPhone-style look
- slight shallow depth of field
- sharp focus on the product and main label
- natural lighting or realistic indoor light
- realistic reflections and shadows
- subtle natural grain allowed
- organic social-media realism
- not overly polished
- not artificial advertising style

CAMERA:

- iPhone 15 Pro Max rear camera look
- 24mm wide-angle feel
- handheld POV realism
- natural perspective
- slight edge distortion acceptable
- vertical 9:16 composition

FOCUS HIERARCHY:

1. exact product fidelity
2. label consistency and readability
3. correct hand anatomy
4. correct product-to-hand proportion
5. realistic environment coherence
6. natural human POV feeling

STRICT RULES:

- use the attached product as the exact visual reference
- do not change any product features
- do not create a generic version

- do not replace the packaging
- do not hide the main label
- do not distort text
- do not create fake branding
- do not show multiple hands
- do not show the person
- do not create a mirror selfie
- do not crop the product awkwardly
- do not oversaturate colors
- do not stylize
- do not turn the image into CGI or illustration

#### ANTI-BUG / NEGATIVE PROMPT:

multiple hands, two hands, extra fingers, extra limbs, duplicated hand, deformed hand, broken anatomy, warped fingers, melted skin, visible face, visible person, visible body, selfie pose, mirror selfie, altered packaging, changed label, wrong logo, fake text, unreadable text, distorted typography, changed colors, changed cap, wrong material, oversized product, undersized product, floating product, unrealistic grip, blurry product, low quality, CGI, 3D render, illustration, cartoon, studio background, luxury showroom, fake reflections, overprocessed image, harsh flash, overexposed highlights, cluttered background, inconsistent scale, warped container, bent bottle, stretched packaging

#### OUTPUT GOAL:

Generate a flawless universal POV image where a single realistic hand naturally shows the exact attached product to the camera, preserving maximum fidelity, consistency, correct scale, and ultra-realistic detail, with zero margin for error.

PROMPT -8-second ultra-realistic cinematic devotional book presentation.

Use the uploaded reference images as the absolute references.

Reference Image 1 = Front Cover

Reference Image 2 = Interior Pages

The book must remain 100% identical throughout the entire video.

---

## STYLE

Ultra photorealistic.

Luxury lifestyle commercial.

Premium bookstore advertisement.

Warm, elegant and peaceful atmosphere.

Vertical 9:16.

One continuous shot.

No cuts.

No transitions.

No morphing.

---

## BOOK LOCK

Preserve exactly:

- cover artwork
- title
- colors
- floral design

- typography
- paper texture
- page thickness
- page proportions
- devotional content
- interior page
- binding
- page edges
- shadows
- reflections

Never recreate or redesign the book.

The cover and interior pages must remain identical to the uploaded references.

---

## MODEL

Only feminine hands appear.

Natural skin.

Soft nude manicure.

No jewelry.

Elegant movements.

Confident and calm presentation.

---

## CAMERA

Professional cinema camera.

Vertical 9:16.

85mm lens.

Natural handheld stabilization.

Very subtle handheld movement.

Beautiful shallow depth of field.

Natural autofocus.

Soft window daylight.

---

## ACTION

0.0–1.0 s

The model is already holding the devotional book with both hands.

She slowly tilts it left and right so the light naturally reveals the premium finish of the cover and the gold lettering.

---

1.0–2.0 s

She gently slides her fingertips across the cover, lightly tracing the floral artwork and title.

She slowly brings the book closer to the camera, creating a premium close-up without covering the title.

---

2.0–3.5 s

Using her thumb, she naturally opens the front cover.

She slowly flips through the first few pages exactly like someone browsing a new book in a bookstore.

The pages move independently with realistic paper physics.

---

3.5–5.5 s

She stops exactly on the uploaded devotional spread.

She holds the book open with both hands.

Her fingers gently smooth the pages from the center outward.

She lightly taps one devotional section, then slowly glides her fingertips across the page margins to emphasize the premium paper quality.

The camera performs a subtle cinematic push-in.

---

5.5–6.8 s

She slowly turns one page forward and immediately turns it back, returning naturally to the same devotional spread.

The page movement is soft, realistic and elegant, like someone previewing the contents before buying.

---

6.8–8.0 s

She gently closes the book.

As the cover closes, she rotates it back toward the camera.

She gives one final soft stroke across the cover while bringing it slightly closer to the lens.

The video ends with the cover perfectly centered, filling most of the frame.

---

## MOVEMENT

Natural bookstore presentation.

Realistic page weight.

Soft page bending.

Individual page movement.

Natural thumb grip.

Natural wrist rotation.

Elegant finger placement.

Realistic page friction.

Premium product demonstration.

---

## LIGHTING

Soft morning window light.

Warm premium tones.

Natural highlights.

Beautiful realistic shadows.

Luxury commercial look.

---

#### NEGATIVE PROMPT

No AI artifacts.

No incorrect pages.

No changing the devotional content.

No changing typography.

No fake text.

No page distortion.

No stiff hands.

No extra fingers.

No deformed anatomy.

No page clipping.

No pages sticking together.

No unrealistic page physics.

No flickering.

No jump cuts.

No camera shake.

No blur.

No morphing.

No CGI appearance.

No plastic skin.

No overprocessed image.

No subtitles.

No watermark.

No logos.

The final result must look exactly like a high-end bookstore commercial, with authentic page handling, realistic paper movement, and a premium cinematic presentation from beginning to end.

PROMPT- HELMET LOCK — ABSOLUTE RULE:

The helmet must remain COMPLETELY CLOSED throughout the entire video.

The visor stays FULLY CLOSED, DARK, and MIRRORED from the first frame to the last frame.

NEVER open the visor.

NEVER lift the visor.

NEVER partially open the visor.

NEVER remove the helmet.

NEVER reveal the rider's face, eyes, mouth, or facial features through the visor.

NEVER make the visor transparent.

The helmet must remain exactly identical to the reference in shape, color, design, accessories, reflections, and position.

During the playful blowing-kiss gesture, the helmet and visor remain COMPLETELY CLOSED. She expresses the blowing-kiss gesture ONLY through a quick hand gesture toward the camera — her mouth is never visible.

The helmet stays securely fitted on her head while riding, with no deformation, movement, opening, disappearance, or transformation.

ABSOLUTE CONTINUITY:

CLOSED HELMET → CLOSED MIRRORED VISOR → QUICK HAND KISS GESTURE →  
HANDS RETURN TO HANDLEBARS → CONTINUES RIDING.

At NO point does the helmet or visor open.

PROMPT - ``text

Use the reference image as the single and immutable visual reference for the entire video.  
Preserve exactly the same model, helmet, riding suit, body proportions, motorcycle, camera  
position, environment, lighting, colors, perspective, and visual identity shown in the  
reference.

Create ONE continuous, ultra-realistic, dynamic action shot at NORMAL REAL-TIME  
SPEED.

IMPORTANT COMPOSITION:

The MOTORCYCLE IS FACING THE CAMERA.

The MODEL IS ALSO FACING THE CAMERA.

The model begins BEHIND the motorcycle, aligned directly with the motorcycle.

The motorcycle is positioned between the model and the camera.

The model must remain behind the motorcycle at the beginning.

ACTION SEQUENCE:

The model RUNS FORWARD from behind the motorcycle, directly toward it while facing the  
camera.

She quickly reaches the motorcycle and performs a fast, stylish TRANSITION-STYLE JUMP  
directly onto the motorcycle.

RUN → JUMP ONTO THE MOTORCYCLE → LAND ALREADY IN RIDING POSITION →  
START THE ENGINE → RIDE FORWARD TOWARD THE CAMERA.

The jump must feel like a smooth social-media transition: quick, visually satisfying, fluid and energetic.

She DOES NOT stop before jumping.

She uses the momentum of the run to jump directly onto the motorcycle.

During the jump, her body passes naturally over the motorcycle and she lands DIRECTLY on the seat in the correct riding position.

The landing itself creates the visual transition from running to riding.

There must be NO pause between running, jumping and sitting.

As soon as she lands on the motorcycle, she is already correctly seated, facing forward, with both legs naturally positioned around the motorcycle.

She immediately places both hands correctly on the handlebars.

She STARTS THE MOTORCYCLE immediately.

The engine visibly comes alive with subtle realistic motorcycle vibration.

Immediately afterward, she accelerates and RIDES THE MOTORCYCLE FORWARD TOWARD THE CAMERA.

FRONT VIEW IS ABSOLUTELY CRITICAL:

The model must ALWAYS be shown FROM THE FRONT.

The motorcycle must ALWAYS be shown FROM THE FRONT while she rides.

DO NOT show her back.

DO NOT show the rear of the motorcycle.

DO NOT rotate the motorcycle away from the camera.

DO NOT change to a side view.

DO NOT orbit around the motorcycle.

The motorcycle starts facing the camera and then travels STRAIGHT FORWARD toward the camera.

The rider remains facing the camera throughout the entire riding portion.

CAMERA:

The camera stays positioned directly IN FRONT OF the motorcycle.

During the initial running and jumping transition, keep the original frontal composition.

After she starts riding, maintain a continuous FRONTAL VIEW of the motorcycle and rider.

The motorcycle approaches the camera while remaining centered and facing directly toward the lens.

The camera may smoothly move backward ONLY as necessary during the riding portion to maintain the frontal composition and prevent the motorcycle from leaving the frame.

The camera must NEVER move to the side.

No side tracking.

No rear tracking.

No orbiting.

No side angle.

No rear angle.

The visual axis must remain:

CAMERA → FRONT OF MOTORCYCLE → MODEL.

MOTION:

The run is short and fast.

The jump is quick and fluid.

The landing is immediate.

The engine starts immediately.

She accelerates naturally.

The motorcycle moves straight forward toward the camera.

Everything happens as ONE FLUID TRANSITION without cuts.

REALISTIC PHYSICS:

Natural running motion.

Realistic jump momentum.

Realistic body weight.

Realistic landing suspension compression.

Correct hand placement on handlebars.

Correct seated riding posture.

Realistic motorcycle startup vibration.

Realistic acceleration.

Realistic wheel rotation.

Realistic tire contact with the road.

Natural movement of clothing and hair.  
Physically correct shadows.

#### ABSOLUTE RULES:

- One continuous shot.
- Normal speed.
- No slow motion.
- No cuts.
- No teleportation.
- No transformation effect.
- No artificial morphing.
- Model starts BEHIND the motorcycle.
- Motorcycle is between model and camera.
- Model runs directly toward the motorcycle.
- Model faces the camera.
- Motorcycle faces the camera.
- She jumps directly onto the motorcycle.
- The jump itself works as the transition.
- She lands already seated in riding position.
- No stopping before the jump.
- No second jump.
- No climbing onto the motorcycle from the side.
- No walking around the motorcycle.
- No side mounting.
- No floating.
- No acrobatics or flips.
- She immediately starts the motorcycle.
- She immediately rides forward.
- Motorcycle travels directly toward the camera.
- ALWAYS show the FRONT of the motorcycle.
- ALWAYS show the model from the FRONT.
- Never show the motorcycle from behind.
- Never show the model from behind.
- Never change to a side angle.
- Preserve the exact motorcycle.
- Preserve the exact helmet.
- Preserve the exact black-and-pink riding suit.
- Preserve the exact model.
- No duplicated motorcycle.
- No duplicated rider.
- No extra limbs.
- No motorcycle deformation.
- Anatomically correct body movement.
- Realistic motorcycle physics.

#### FINAL VISUAL FLOW:

MODEL RUNNING TOWARD CAMERA BEHIND THE MOTORCYCLE  
→ QUICK JUMP DIRECTLY ONTO THE MOTORCYCLE  
→ INSTANT TRANSITION INTO SEATED RIDING POSITION  
→ HANDS ON HANDLEBARS  
→ ENGINE STARTS  
→ MOTORCYCLE ACCELERATES STRAIGHT FORWARD  
→ MODEL RIDES DIRECTLY TOWARD THE CAMERA  
→ CAMERA CONTINUES SHOWING MODEL AND MOTORCYCLE FROM THE FRONT.

The entire sequence must feel like a real, impressive motorcycle transition video: RUN → JUMP → LAND → START → RIDE, with the rider and motorcycle ALWAYS PRESENTED FROM THE FRONT.

PROMPT -Ultra-realistic 10-second continuous selfie-style video, vertical 9:16, completely silent, no dialogue.

MOST IMPORTANT CAMERA RULE: Throughout the ENTIRE 10-second video, the model is continuously holding and filming with the SAME smartphone using the SAME hand. She NEVER releases the phone, NEVER switches hands and NEVER uses the filming hand for gestures.

The smartphone itself is completely outside the camera frame and must NEVER become visible. The filming arm remains naturally extended toward the camera and outside the visible frame during the entire video. All camera movements must physically correspond to the movement of this same arm holding the invisible smartphone.

0–2 seconds: While already filming herself, she looks directly into the selfie camera and smiles. Keeping the filming hand permanently holding the invisible smartphone, she uses ONLY her other free hand to make a clear and natural “come with me” gesture, curling her fingers toward herself 2–3 times.

She NEVER releases or changes the position of the hand holding the phone.

2–7 seconds: She immediately accelerates into a FAST, STRONG, REALISTIC RUN, covering a clearly noticeable distance. This must be genuine fast running, NOT jogging, NOT a light run and NOT running in place.

She continues holding the invisible smartphone firmly with the SAME hand while running.

Without ever releasing the phone, she naturally moves that filming arm to change the selfie angle: first slightly higher and angled downward to showcase the upper part of the outfit, then smoothly lowers the filming angle to clearly showcase the waist and lower part of the outfit.

She briefly changes the angle while running to show the side profile of the lower outfit.

7–10 seconds: Still running fast and still holding the smartphone continuously with the exact same hand, she raises the selfie angle back toward her face.

She smiles naturally, gives one playful wink, and uses ONLY her free hand to blow a kiss toward the camera.

ABSOLUTE OUTFIT AND SCENERY PRESERVATION: Preserve the model, face, body, hair, clothing, accessories, shoes and entire original environment exactly as in the reference image. ZERO modifications to colors, prints, logos, fabric, texture, seams, fit, length or proportions.

One uninterrupted take. Realistic fast-running biomechanics, strong forward displacement, natural body momentum, realistic wind, authentic hair and fabric movement, realistic selfie camera shake synchronized with footsteps.

STRICT NEGATIVE: never release the smartphone, never switch filming hands, never use the filming hand for gestures, no visible smartphone, no visible camera, no floating camera, no impossible camera movement, no jogging, no running in place, no outfit changes, no scenery changes, no face changes, no extra limbs, no deformed hands, no cuts, no dialogue, no text.

PROMPT- Ultra realistic 10-second video. Preserve EVERYTHING from the original reference image exactly: same woman, same face, same body, same clothes, same motorcycle, same helmet, same colors, same proportions, same graphics, same print and same accessories. Never redesign or modify the helmet.

The motorcycle is completely stationary before the model gets off.

The model performs a simple, natural and physically accurate motorcycle dismount. She places one foot firmly on the ground, shifts her body weight naturally, passes the opposite leg completely over the rear of the seat and stands beside the motorcycle. No teleportation, no body deformation, no extra limbs and no body parts passing through the motorcycle.

Only after she is completely standing beside the motorcycle, she walks toward the camera.

She carefully removes the SAME helmet. Her facial identity must remain exactly the same after removing it. Her hair falls naturally, she gives her hair a subtle shake, gently fixes it with her hand and smiles.

#### IMPORTANT PRODUCT SHOWCASE:

She holds the helmet securely in her hand and brings it closer to the camera.

First, she presents the helmet DIRECTLY FROM THE FRONT, naturally holding it upright and centered in front of the camera for a clear product view.

Then, WITHOUT changing or replacing the helmet, she slowly ROTATES THE SAME HELMET SIDEWAYS WITH HER HAND.

The rotation must be a continuous physical movement of the real helmet in her hand.

She turns it enough to clearly reveal the SIDE OF THE HELMET AND ITS ORIGINAL PRINT/GRAPHIC DESIGN.

The side print must remain 100% identical to the reference image — same position, same colors, same proportions and same design. Do not invent, redraw, mirror or modify the print.

The camera smoothly moves closer while she rotates the helmet: front view → three-quarter angle → clear side view.

She slightly adjusts the angle of the helmet with her hand so the side print catches the light naturally and becomes clearly visible.

FINAL SHOT: extreme realistic close-up of the SIDE OF THE HELMET, with the original print/design completely visible and in sharp focus. The helmet fills most of the frame while the model remains naturally blurred in the background.

The removed helmet must ALWAYS be completely EMPTY. No head, no face, no hair, no skin and no body parts inside the helmet.

No speech, no voice, no subtitles and no text on screen.

No helmet transformation.

No different helmet.

No disappearing graphics.

No changing print.

No mirrored print.  
No face change.  
No head inside helmet.  
No extra fingers or limbs.  
No sudden teleportation.

Vertical 9:16, ultra realistic smartphone footage, realistic human biomechanics, realistic hand interaction, smooth product rotation, natural reflections on the visor and helmet surface, cinematic depth of field, natural motion blur, 4K photorealism.

PROMPT -Título: Prompt de movimento ultra realista — Moto em alta velocidade com transições dinâmicas

Ultra realistic cinematic motion video, 10 seconds duration. Preserve the original model exactly as shown in the reference image: same face, same body, same clothing, same motorcycle, same helmet model, same colors, same stickers and every original detail. Do not change, replace or generate a different helmet. The exact same helmet must remain throughout the entire video.

The model is riding a motorcycle on a real Brazilian highway (BR) at a noticeably higher speed, creating a dynamic action feeling. The motorcycle movement must look physically realistic: strong but natural wind effect, realistic road vibration, authentic body balance, natural riding posture, subtle camera shake and real highway motion.

The video should look like a real selfie recording, as if she is filming herself with a phone outside the frame. The cellphone must never appear.

Create dynamic camera movements like a professional action camera transition:

- camera slightly above her angle, showing the helmet from a higher perspective;
- camera moves slightly to the side while riding;
- camera changes angles smoothly from front to side views;
- cinematic transitions revealing the helmet details from different perspectives.

The model smiles naturally while riding and turns her head to one side, then to the other side, showing the SAME helmet from multiple angles. Highlight the helmet details, side design, top area and visor without changing any part of the original helmet.

She gently passes her hand over the helmet, sliding her fingers across the surface to showcase the material and details while maintaining realistic motorcycle control.

Near the end, the camera transitions into a frontal close-up view. The shot gets closer to the helmet and face, creating a premium product showcase feeling.

In the final moment:

- she looks directly at the camera;
- with exactly two fingers, she lifts the helmet visor upward;
- she smiles naturally;
- gives a playful wink with one eye;
- lowers the visor back down;
- sends a kiss toward the camera;
- points downward with her hand as a natural call-to-action gesture.

No speech, no voice, no subtitles, no text on screen.

Maintain ultra realistic human movement, realistic hand anatomy, authentic visor mechanics, real motorcycle physics, cinematic smartphone/action camera quality.

No CGI appearance, no distortion, no changes to the model, no changes to the motorcycle, no changes to the helmet.

Vertical 9:16, hyper realistic, 4K, realistic motion blur, dynamic camera transitions, realistic depth of field, professional action camera style. Sem trocar o modelo do capacete

PROMPT - # Prompt de movimento ultra realista para vídeo no Grok — 58291

Ultra realistic cinematic POV video of a woman riding a jet ski on the ocean. The jet ski moves naturally and realistically across the water, creating authentic waves, water splashes, reflections and dynamic movement. The camera perspective is like she is recording a selfie video with her own hand, but the smartphone never appears in the scene. The framing feels like a real handheld selfie recording.

The woman remains in the exact same outfit from the reference image. Do not change, modify, replace or distort any detail of the clothing. Preserve the original fabric texture,

colors, patterns, seams, shape and fit. The video must clearly showcase the complete outfit, always revealing both the upper part and the lower part of the piece naturally while she moves on the jet ski.

Maintain realistic body proportions, natural movement, wind interacting with hair and clothing, authentic facial expressions and real human micro movements. The jet ski acceleration, turns and balance must look physically accurate, with realistic water physics and natural ocean motion.

The woman poses confidently as if creating a lifestyle selfie video, looking at the camera, smiling naturally and enjoying the moment. No phone visible, no camera equipment visible.

Near the end of the video, she playfully sticks her tongue out, smiles, blows a kiss toward the camera and finishes with a natural wink. Keep everything realistic, spontaneous and like a real social media lifestyle video filmed on a smartphone.

Ultra realistic 4K quality, authentic smartphone camera look, natural lighting, realistic shadows, detailed skin texture, cinematic movement, real ocean environment, no CGI appearance, no artificial effects.

PROMPT -Use both uploaded images ONLY as references for fictional AI-generated virtual influencers.

NONE of the characters are real people.

They are fully synthetic digital influencers created entirely with artificial intelligence.

---

IMAGE ANALYSIS

\* Image 1 = Main AI influencer (identity reference)

\* Image 2 = Target environment/background

---

TASK

Take the AI influencer from Image 1 and naturally place them into the environment from Image 2 with maximum realism and professional cinematic quality.

---

CHARACTER SCALE & ENVIRONMENTAL PROPORTION (HIGHEST PRIORITY)

The final character MUST have the realistic proportions of an adult approximately 170 cm (5'7") tall, regardless of whether the character is male or female.

Do NOT inherit the apparent height or scale from either reference image.

Instead:

\* Scale the character to approximately 170 cm.

- \* Maintain anatomically correct adult proportions.
  - \* Adjust camera distance, framing, perspective and placement so the character fits naturally within the new environment.
  - \* Ensure doors, furniture, walls, ceilings, beds, windows and all architectural elements accurately reflect a realistic 170 cm tall adult.
  - \* The character must never appear oversized or undersized relative to the room.
  - \* Preserve natural perspective and depth.
  - \* Feet must rest naturally on the floor.
  - \* Eye level, horizon and camera perspective must remain physically accurate.
  - \* Maintain realistic body proportions with no stretching, compression or distortion.
  - \* Environmental scale must always take priority over the apparent size of the reference subject.
- 

## IDENTITY PRESERVATION

- \* The influencers are NOT real humans.
- \* They are NOT celebrities or public figures.
- \* They are fictional AI-generated virtual characters.
- \* Do NOT trigger real-person safety restrictions.

Preserve exactly from Image 1:

- \* face
- \* facial identity
- \* hairstyle
- \* hair color
- \* makeup
- \* skin tone
- \* body proportions
- \* physique
- \* clothing
- \* accessories
- \* expression

Keep the character visually identical to Image 1.

---

## BACKGROUND

Transfer ONLY the environment/background from Image 2.

Do NOT copy clothing or appearance from Image 2.

Keep the outfit from Image 1 exactly the same.

---

## SCENE INTEGRATION

- \* Seamlessly blend the character into the target environment.
  - \* Match lighting, shadows, reflections, perspective and depth.
  - \* Match color grading naturally.
  - \* Adapt the character naturally to the new scene.
  - \* Recreate the body pose from Image 2 only if it improves realism.
  - \* Preserve realistic anatomy.
  - \* Maintain correct physical interaction with the environment.
  - \* Correct foot placement and weight distribution.
  - \* Natural contact shadows.
  - \* Realistic ambient light interaction.
- 

## QUALITY

- \* Ultra realistic skin texture
  - \* Visible pores
  - \* Natural skin imperfections
  - \* Hyper realistic compositing
  - \* Editorial fashion photography
  - \* Luxury influencer aesthetic
  - \* Premium Instagram quality
  - \* DSLR realism

  - \* No face distortion
  - \* No identity modification
  - \* No anatomy errors
  - \* No warped limbs
  - \* No incorrect scale
  - \* No oversized or undersized character
- 

## FOCUS

Maximum realism, flawless identity preservation, physically accurate environmental scaling, perfectly proportioned 170 cm adult character, seamless environmental integration, and premium high-end commercial photography quality.

---

## CAMERA STYLE

85mm lens, shallow depth of field, cinematic framing, natural ambient lighting, realistic shadows, editorial fashion photography, ultra detailed textures, premium luxury photography aesthetic, physically accurate perspective, realistic environmental scale, true-to-life proportions.

Prompt para Kling 2.5:

Ultra realistic clothing advertisement. A young athletic male model stands facing the camera wearing the featured jersey. He grabs the bottom sides of the shirt with both hands and gently pulls the fabric forward to showcase the material. He releases the fabric and smooths the chest area with both hands. Then he slowly turns around to display the back of the jersey, holding the sides near the waist. The camera captures the full back view for a moment. He turns back toward the camera, relaxes, and gives a confident smile. Smooth natural body movement, realistic cloth physics, product showcase, professional fashion advertisement, cinematic camera, ultra realistic, photorealistic, shallow depth of field, no text, no subtitles, no audio.

Se quiser ficar ainda mais parecido com vídeo viral de loja:

Front view. Model grabs the bottom of the jersey with both hands, stretches the fabric slightly, releases it, rubs the chest area, turns around to show the back print, pauses for one second, turns back to the camera and smiles. Natural human motion, realistic fabric movement, clothing brand commercial, ultra realistic, no text, no audio.

PROMPT- Use a imagem de referência para preservar EXATAMENTE rosto, corpo, roupa, pacote, iluminação, enquadramento e ambiente.

A câmera permanece 100% FIXA durante todo o vídeo. Plano-sequência único, sem cortes, transições, zoom ou mudança de enquadramento.

O vídeo começa com o rapaz SEM NENHUM OBJETO NAS MÃOS. Ele olha para a própria camiseta, segura levemente a barra inferior com as duas mãos, faz um pequeno ajuste no tecido e demonstra uma expressão discreta de dúvida.

Em seguida, olhando para a camiseta, faz claramente o gesto universal de desaprovação: levanta UMA mão, fecha os dedos e mantém SOMENTE O POLEGAR ESTENDIDO PARA BAIXO (THUMBS DOWN) por aproximadamente 1 segundo.

IMPORTANTE: é obrigatoriamente um THUMBS DOWN. NÃO apontar para baixo com o dedo indicador.

Imediatamente depois, UM ÚNICO PACOTE entra rapidamente no enquadramento vindo de fora da câmera, como se tivesse sido lançado por alguém que nunca aparece.

O rapaz segura imediatamente o pacote com as duas mãos, em um movimento contínuo e natural, sem deixá-lo cair.

O pacote permanece EXATAMENTE O MESMO OBJETO durante toda a ação. Preservar tamanho, formato, cor, textura, etiqueta, impressão e todas as informações visíveis. Não alterar, deformar, substituir ou duplicar.

Sem pausa, ele leva fisicamente O MESMO PACOTE diretamente em direção à câmera.

O pacote se aproxima progressivamente da lente, aumentando naturalmente pela perspectiva, até ENCOSTAR FISICAMENTE NA CÂMERA E COBRIR 100% DO ENQUADRAMENTO.

O último frame deve ficar completamente preenchido pelo pacote, sem nenhuma parte do cenário ou personagem visível.

Sem fala e sem áudio.

REGRAS:

- Câmera 100% fixa.
- Um único take.
- Ele começa sem pacote.
- Apenas o pacote entra; quem lança nunca aparece.
- Exatamente UM pacote.
- Thumbs down com POLEGAR, nunca indicador.
- Pacote não muda, desaparece ou duplica.
- Sem teleportes.
- Sem mãos, braços ou dedos extras.
- Não deformar rosto, corpo, camiseta, mãos ou embalagem.
- Final obrigatório: O MESMO PACOTE cobre fisicamente 100% da lente.

Movimentos rápidos, fluidos e humanos. Física natural, aparência UGC premium gravada com smartphone, ultra-realista 4K, sem aparência de IA.

PROMPT- A câmera permanece completamente fixa, mantendo exatamente o enquadramento da imagem de referência. A iluminação, o cenário e todos os elementos permanecem exatamente iguais durante toda a animação.

O homem inicia completamente fora do enquadramento, ainda dentro do quarto. Após um breve instante, ele caminha lentamente em direção à câmera, entrando na cena de forma extremamente natural, tranquila e confiante, como alguém que acabou de encontrar uma peça de roupa que chamou sua atenção.

Durante todo o vídeo ele nunca solta o cabide. A peça permanece pendurada no mesmo cabide do início ao fim, mantendo exatamente o mesmo formato, tecido, estampa, caimento e posição.

Ao chegar próximo da câmera, ele baixa naturalmente o olhar para a peça, observando seus detalhes com expressão discreta de aprovação. Mantendo uma das mãos segurando firmemente o cabide, ele gira suavemente o cabide alguns graus em direção ao próprio corpo, apenas para analisar melhor a estampa.

Em seguida, ele aproxima levemente a peça do peito, levanta delicadamente a barra alguns centímetros para visualizar melhor o desenho completo e, com a mão livre, desliza lentamente a ponta dos dedos sobre a estampa, percorrendo-a de cima para baixo como quem aprecia a qualidade do tecido e da impressão.

Enquanto faz esse movimento, surge um leve sorriso de satisfação. Ele faz um pequeno movimento positivo com a cabeça, como se tivesse gostado da peça, mantendo uma postura relaxada, elegante e totalmente espontânea.

Ao final, ele aproxima discretamente a peça da câmera para destacar os detalhes da estampa, mantendo-a sempre totalmente visível. Ele então olha rapidamente para a câmera, sorri de forma sutil e permanece segurando o cabide naturalmente até o fim da animação.

IMPORTANTE:

Sem fala.

Sem áudio.

Sem lip sync.

Plano sequência único.

Nenhum corte.

Nenhum zoom.  
Nunca soltar o cabide.  
Nunca trocar de mão de forma brusca.  
Nunca deformar mãos, dedos, braços ou cabide.  
Nunca alterar a peça de roupa, sua estampa, modelagem ou proporções.  
A peça permanece sempre totalmente visível.  
Movimentos lentos, fluidos, sensuais de forma discreta e naturais.  
Caminhada realista, sem acelerações ou aparência robótica.  
Expressões faciais humanas e espontâneas.  
Aparência UGC premium, ultra-realista, qualidade cinematográfica 4K, sem qualquer aparência de IA.

PROMPT -Comece exatamente da pose da imagem, sem alterar o rosto, corpo, proporções, roupa, iluminação ou cenário. O vídeo deve ser uma continuação perfeita da cena, sem cortes, sem troca de personagem, sem duplicação do modelo, sem deformações, sem braços extras e sem mudanças na camisa.

O movimento deve ser totalmente contínuo, natural e humano. Primeiro, ele caminha um único passo em direção à câmera, reduzindo naturalmente a distância entre ele e a lente. Somente quando estiver muito próximo da câmera, ele estende o braço na proporção correta do corpo e cobre completamente a lente com a palma da mão, ocupando 100% da imagem. Não pode parecer que o braço esticou artificialmente nem que ficou desproporcional. A câmera permanece fixa; quem se aproxima é apenas o modelo.

Em seguida, ele retira a mão da lente e dá um passo para trás, voltando aproximadamente para a posição inicial. Sem cortes e sem teletransporte, ele cruza os braços de forma elegante e confiante, mantendo um olhar intenso e sensual para a câmera. Depois gira levemente o tronco para um lado, volta ao centro, gira suavemente para o outro lado e retorna novamente ao centro.

Por fim, ele descruza os braços e faz um único ajuste natural na parte inferior da camisa: segura discretamente a barra com as duas mãos, puxa levemente para baixo para esticar o tecido e solta imediatamente. O movimento deve ser rápido, elegante e realista, sem exageros.

Restrições importantes: nenhuma troca de roupa, nenhuma mudança no rosto, nenhuma alteração da camisa, nenhum braço extra, nenhuma mão surgindo do nada, nenhuma deformação, nenhum corte de cena, nenhuma aceleração exagerada, nenhuma aparência robótica. Todos os movimentos devem ter física realista, continuidade perfeita e qualidade cinematográfica, como um vídeo gravado por uma pessoa real em uma única tomada.

PROMPT -Utilize a imagem de referência apenas para preservar exatamente o rosto, corpo, cabelo, iluminação, enquadramento, ambiente e a peça de roupa apoiada sobre o ombro. Nunca alterar a roupa, o corpo ou o cenário.

A câmera permanece completamente fixa durante toda a cena.

O rapaz inicia entrando naturalmente no enquadramento com a peça já apoiada sobre o ombro exatamente como na imagem de referência.

Ele caminha poucos passos em direção à câmera com um olhar confiante e natural.

Sem parar e sem mudar a posição das mãos, ele simplesmente retira a peça do ombro usando a MESMA mão que já está segurando a roupa desde o início.

A outra mão nunca toca na roupa.

No exato momento em que a peça sai do ombro, o mesmo movimento continua diretamente para a frente até cobrir completamente a lente da câmera.

Não existe pausa entre retirar a roupa e cobrir a câmera.

Não existe preparação.

Não existe troca de mão.

Não existe segunda pegada.

Não existe abertura da roupa.

Não existe reposicionamento da peça.

É apenas um único movimento contínuo:  
entrar → aproximar → retirar do ombro → cobrir imediatamente a câmera.

A peça cobre 100% da lente e encerra a cena.

Sem fala.

Sem áudio.

IMPORTANTE:

- Apenas um único rapaz durante todo o vídeo.
- Nunca criar uma segunda pessoa ou duplicar o personagem.
- Nunca criar mãos, braços ou dedos extras.
- Nunca trocar a mão que segura a roupa.
- A roupa permanece exatamente igual durante toda a animação.
- Movimento rápido, contínuo, humano e totalmente natural.
- Plano sequência único.
- Nenhum corte.
- Nenhum teleporte.
- Aparência UGC premium, ultra-realista.

PROMPT -Use the uploaded image as the ONLY character reference.

VERTICAL 9:16. ULTRA-REALISTIC. ONE CONTINUOUS VIDEO.

CRITICAL RULE — ABSOLUTE CHARACTER PRESERVATION:

KEEP THE ORIGINAL MODEL FROM THE INPUT IMAGE PIXEL-CONSISTENT.

This is NOT a new character after the transition.

This is NOT a face recreation.

This is NOT a face generation.

It is the EXACT SAME ORIGINAL MODEL continuing the SAME video.

NEVER change, regenerate, reinterpret, enhance, beautify, reconstruct, or replace the model's face, head, hair, skin, body, or identity.

THE MODEL MUST REMAIN VISUALLY IDENTICAL TO THE INPUT IMAGE BEFORE AND AFTER THE HAND TRANSITION.

ONLY HIS CLOTHES ARE ALLOWED TO CHANGE.

ACTION:

The original model stands beside the mannequin.

He smiles naturally, briefly touches his head/hair, then points at the outfit displayed on the mannequin.

He then walks directly toward the FIXED camera.

As he gets close to the camera, he raises his open palm directly toward the lens.

He moves his hand VERY CLOSE to the physical camera lens until his palm COMPLETELY COVERS 100% OF THE LENS.

MANDATORY:

His palm must cover the ENTIRE 9:16 frame.

ALL FOUR CORNERS COVERED.

ALL EDGES COVERED.

ZERO BACKGROUND VISIBLE.

His palm gets so close to the lens that the image naturally becomes completely dark.

FULL LENS OCCLUSION.

While the lens is completely covered, keep tracking and preserving the SAME ORIGINAL MODEL behind the hand.

DO NOT GENERATE A NEW PERSON BEHIND THE HAND.

While hidden behind the hand, ONLY replace the clothing worn by the original model with an exact duplicate of the clothing currently displayed on the mannequin.

Then the SAME ORIGINAL MODEL removes his hand from the lens.

The moment the hand moves away, reveal THE EXACT SAME ORIGINAL MODEL, with his ORIGINAL FACE UNCHANGED, now wearing the mannequin's outfit.

His face after the transition must be IDENTICAL to his face at the beginning of the source image.

SAME FACE.

SAME HEAD.  
SAME HAIR.  
SAME SKIN.  
SAME DISTINCTIVE SKIN DETAILS.  
SAME BODY.  
SAME PERSON.  
SAME IDENTITY.

ONLY THE CLOTHES HAVE CHANGED.

He then walks naturally backward and returns beside the mannequin.

IMPORTANT:

The mannequin MUST KEEP its original outfit throughout the entire video.

Do not remove the outfit from the mannequin.

Duplicate the outfit onto the model.

At the end:

MODEL = original model, original face, wearing a duplicate of the outfit.

MANNEQUIN = still wearing the original outfit.

DO NOT CHANGE THE MODEL TO MATCH THE MANNEQUIN.  
ONLY CHANGE HIS CLOTHING.

DO NOT use a different face after lens occlusion.  
DO NOT generate a new human after lens occlusion.  
DO NOT reconstruct the face after the black frame.  
DO NOT face-swap.  
DO NOT change facial features.  
DO NOT change hairstyle.  
DO NOT change skin details.  
DO NOT change body proportions.  
DO NOT change identity.  
DO NOT change the mannequin.  
DO NOT change the environment.  
DO NOT move the camera.  
DO NOT zoom.  
DO NOT use cuts.

MOST IMPORTANT INSTRUCTION:

Treat the model as a LOCKED, UNEDITABLE CHARACTER LAYER from the original input image.

THE CHARACTER LAYER NEVER CHANGES.

ONLY THE CLOTHING LAYER CHANGES.

If the system cannot change the clothing without altering the original model's identity, KEEP THE ORIGINAL MODEL'S IDENTITY AND FACE INSTEAD.

9:16.

Fixed camera.

One continuous take.

Ultra-realistic smartphone video.

Exact source-character preservation.

PROMPT -AUDIO SETTINGS

Generate VIDEO ONLY. No audio, voice, speech, narration, music, ambient sound, lip sync or jaw movement. Output must be completely silent.

CRITICAL PRESERVATION

Use the uploaded reference image as the only source of truth. Preserve identical identity, body proportions, hairstyle, clothing, accessories, lighting, reflections, environment, framing and camera angle.

GARMENT LOCK

The shirt is the primary reference. Preserve exactly the same back print, graphics, colors, stitching, seams, texture, fabric, fit, proportions, sleeves, collar, hem and every original detail. Never recreate or modify any garment element.

CORE IDEA

The subject remains facing away from the camera throughout the entire video. He naturally finishes pulling the shirt down until it settles perfectly over his torso, fully revealing the back print. He gently holds the bottom corners of the shirt with both hands, pulls them outward once and releases them, allowing the fabric to return naturally. He subtly shifts his weight from one leg to the other, brushes one hand across the shoulder as if smoothing the fabric, then holds a relaxed final pose with the complete back print centered in the frame.

## GENERAL MOTION

Natural breathing, relaxed shoulders, realistic weight transfer, authentic fabric physics and subtle posture adjustments.

## BODY LANGUAGE

Natural, relaxed and authentic. No dancing. No exaggerated posing.

## CAMERA

Fixed smartphone camera. Vertical 9:16. Stable framing. No zoom.

## REALISM

Perfect temporal consistency. Preserve identical clothing, print, lighting and background.

## RESTRICTIONS

Never reveal the face or side profile. No clothing morphing. No print distortion. No color changes. No body deformation. No extra fingers. No AI artifacts.

## FINAL RESULT

A hyper-realistic smartphone fashion video naturally showcasing the complete back of the shirt while preserving every garment detail exactly as in the reference image.

PROMPT = The camera remains completely FIXED during the opening moments, maintaining exactly the same framing, angle, perspective, and composition as the reference image.

The entire animation takes place in ONE SINGLE CONTINUOUS SHOT, with no cuts, no scene changes, no transitions, and no teleportation.

NO dialogue.

NO audio.

NO lip-sync.

Both people remain KNEELING with their BACKS FACING THE CAMERA, holding hands throughout the entire scene.

Without EVER letting go of his hand, the woman slowly tilts her head and gently rests her face against the man's shoulder, conveying affection, peace, connection, and togetherness.

The man responds only by subtly tilting his head toward hers while maintaining his kneeling prayer posture.

Immediately afterward, while still holding hands, they slowly raise their JOINED HANDS together a few centimeters above waist level, creating a subtle gesture of surrender, gratitude, faith, and praise.

Their hands remain connected at ALL TIMES.

All movements must be extremely gentle, synchronized, subtle, natural, and physically realistic, with no exaggerated gestures.

#### CAMERA MOVEMENT:

After these initial actions, the camera begins an EXTREMELY SLOW, SMOOTH, CONTINUOUS CINEMATIC MOVEMENT.

First, the camera gently moves closer toward the upper back of the MAN.

His back print becomes centered, prominent, completely visible, sharp, and readable, while part of the woman remains naturally visible beside him.

The camera holds this composition briefly, clearly showcasing the man's shirt print without changing or distorting it.

Then, WITHOUT CUTTING and WITHOUT CHANGING THE CAMERA ANGLE, the camera slowly and smoothly glides to the RIGHT toward the upper back of the WOMAN.

The movement must feel like one continuous physical camera slide.

The camera gently approaches her upper back until her shirt print becomes centered, prominent, completely visible, sharp, and readable with the same visual emphasis previously given to the man's print.

During the entire camera movement, the couple remains in the same kneeling position, still holding hands, with the woman's head gently resting against the man's shoulder.

They remain almost completely still, showing only subtle natural breathing and tiny organic body movements.

The scene ends after both shirt prints have been clearly and naturally showcased, conveying a peaceful feeling of faith, unity, affection, gratitude, and connection.

#### ABSOLUTE RULES:

- ONE single continuous shot.
- NO cuts.
- NO transitions.
- NO teleportation.
- NO scene changes.
- Preserve the exact original environment.

- Preserve the exact lighting.
- Preserve the exact clothing.
- Preserve the exact shirt prints.
- NEVER alter, rewrite, distort, replace, or remove the prints.
- Preserve the exact faces, hairstyles, body proportions, and accessories.
- Both people remain kneeling throughout the entire scene.
- Both remain with their backs facing the camera.
- NEVER turn their faces toward the camera.
- NEVER partially rotate their bodies toward the camera.
- NEVER stand up.
- NEVER separate their hands.
- Their hands remain connected throughout the entire sequence.
- The woman ONLY gently rests her head against his shoulder.
- The man only subtly tilts his head toward hers.
- Their joined hands rise together slowly and synchronously.
- NO exaggerated gestures.
- NO sudden movements.
- NO robotic movements.
- NO unnatural anatomy.
- Camera movement must be extremely slow, smooth, stable, continuous, and cinematic.
- Camera approaches the MAN'S print FIRST.
- Camera then smoothly slides toward the WOMAN'S print.
- NO cut between the two prints.
- NO change of environment.
- NO sudden change of perspective.
- NO abrupt reframing.
- Keep both prints perfectly consistent with the reference.
- Natural human breathing and subtle micro-movements only.
- Ultra-realistic human motion and realistic fabric physics.
- Authentic cinematic 4K UGC footage.

#### FINAL SEQUENCE:

BOTH KNEELING WITH BACKS TO CAMERA, HOLDING HANDS

→ WOMAN GENTLY RESTS HER HEAD ON HIS SHOULDER

→ MAN SLIGHTLY TILTS HIS HEAD TOWARD HERS

→ THEIR JOINED HANDS SLOWLY RISE TOGETHER

→ CAMERA SLOWLY MOVES CLOSER TO THE MAN'S BACK PRINT

→ HOLDS THE PRINT CLEARLY IN FRAME

→ CAMERA SMOOTHLY GLIDES RIGHT TOWARD THE WOMAN

→ HER BACK PRINT BECOMES CLEARLY FEATURED

→ BOTH REMAIN KNEELING, CONNECTED, PEACEFUL, AND HOLDING HANDS UNTIL THE END.

PROMPT - Create a single ultra-realistic 10-second vertical video (9:16), 4K, filmed as if captured on a real smartphone. One continuous take. No cuts, no zoom, no slow motion, no text, no subtitles, no music.

Use the uploaded reference image as the absolute source of truth. Preserve the exact identities, faces, hairstyles, body proportions, clothing, colors, textures, prints, lighting and environment. Never replace or modify the clothing.

The camera recording this video remains fixed.

The couple stays approximately 2.5–3 meters away from the recording camera so both are always fully visible.

IMPORTANT:

The man is NOT filming the recording camera.

He is filming ONLY the woman with his own smartphone.

His smartphone must always remain pointed directly at the woman.

His eyes must remain focused on the woman or on his phone screen while recording her.

He never looks toward the recording camera.

The movement sequence below is mandatory.

00:00–00:01.5 — The man is crouching slightly to the woman's left side, turned about 45° toward her. He holds a smartphone vertically with both hands, aiming it directly at her as if recording a real TikTok try-on. He smiles naturally while watching only her.

00:01.5–00:04.5 — The woman walks two relaxed steps toward HIS phone, not toward the recording camera. She remains fully visible and never blocks him. While smiling, she gently smooths the front of the garment, lightly stretches the fabric once, then places one hand on her waist before brushing her hair behind her ear. She keeps looking naturally toward HIS phone camera, exactly like a real influencer recording a try-on.

00:04.5–00:06.5 — She turns about 30° to one side and then back to the front, naturally showing the fit of the clothing while continuing to face his phone. The man keeps filming her, making tiny handheld adjustments with realistic smartphone movement while smiling proudly and admiring her.

00:06.5–00:07.8 — She walks back toward him with two relaxed steps while smiling. He continues filming her until she reaches him, then gently lowers the phone.

00:07.8–00:08.8 — They look at each other. He blows her a playful kiss. She smiles and laughs softly.

00:08.8–00:10.0 — He stands up naturally. Standing side by side, they both make small finger-heart gestures toward each other, then turn the finger hearts toward the recording camera while smiling warmly until the end.

Natural human biomechanics only.

Realistic skin pores.

Subtle breathing.

Natural blinking.

Realistic fabric movement.

Authentic handheld smartphone movement.

No robotic motion.

No exaggerated poses.

No improvisation.

The interaction must feel exactly like a real couple recording TikTok content together.

PROMPT - ALTERNATIVE ENDING — COUPLE HEART (VERSION 3)

10.20–10.80s

Standing close together, the man naturally wraps one arm around the woman's waist while she lightly rests one hand on his shoulder. They exchange a quick smile before both look toward the camera.

10.80–11.50s

The woman is the first to raise one hand toward the center of her chest. A brief moment later, the man lifts his matching hand. Their timing is slightly offset, creating natural human movement.

11.50–12.30s

Their fingertips meet to create a heart between them. Before holding the pose, they make small natural finger adjustments until the heart looks comfortable and relaxed instead of perfectly symmetrical.

12.30–13.10s

Still holding the heart, they lean their heads slightly closer together. The woman smiles toward the camera while the man briefly glances at her before returning his gaze forward.

13.10–13.60s

Without breaking the heart shape, they extend their joined hands halfway toward the camera, making the heart appear slightly larger while keeping their bodies relaxed.

13.60–14.00s

They gently release the heart, naturally open both hands, give one small friendly wave together, then slowly move their palms toward the lens until the camera is completely covered, ending like a real couple's TikTok recording.

#### MICRO DETAILS

- Completely natural human biomechanics.
- Slight timing differences between both people.
- Relaxed fingers.
- Natural breathing.
- Micro blinking.
- Soft body sway.
- Relaxed shoulders.
- Genuine smiles.
- Small finger readjustments while forming the heart.
- Brief affectionate glance between the couple.
- Natural weight shifts.
- Realistic smartphone recording feeling.
- Authentic couple chemistry.

#### NEGATIVE PROMPT

No slow motion.  
No robotic synchronization.  
No exaggerated smiles.  
No dance.  
No cinematic acting.  
No floating hands.  
No distorted fingers.  
No malformed heart shape.  
No morphing.  
No body deformation.  
No AI artifacts.  
No unnatural symmetry.  
No frozen poses.  
No exaggerated gestures.  
No stiff hands.

## VIDEO SCRIPT

0.0–1.8s

The woman smiles naturally and lightly points toward the man's shirt with an open hand, as if complimenting it. The man looks down at his shirt with a playful surprised expression, then looks back at her with a genuine smile.

1.8–3.8s

The man gently smooths the front of his shirt with both hands and lightly stretches the fabric once to show the fit. As he finishes, the woman naturally repeats the same movement on her own shirt. The fabric reacts with realistic weight and elasticity.

3.8–5.8s

They exchange a warm look and laugh silently together. At the same moment, both give a relaxed thumbs-up toward the camera while maintaining natural posture and soft smiles.

5.8–8.0s

They each take one small relaxed step forward together, naturally leaning their shoulders slightly toward each other. They finish side by side, smiling confidently at the camera with relaxed breathing and subtle blinking.

## MOVEMENT

- Smooth continuous movement.
- Natural human biomechanics.
- Relaxed posture.

0.0–1.8s

The woman gently brushes one hand across the front of her shirt while smiling naturally at the camera. The man notices her, smiles with admiration and gives a subtle approving nod.

1.8–3.8s

The man casually smooths the front of his own shirt with one hand, then lightly opens the sides of the fabric once to show the fit. The woman watches with a playful smile before turning her attention back to the camera.

3.8–5.8s

They both take one relaxed step toward each other. The woman naturally turns about 30° to one side and then returns to face the camera while lightly brushing her hair behind her ear. The man remains relaxed beside her, smiling naturally.

5.8–8.0s

Standing shoulder to shoulder, they briefly glance at each other, exchange a soft smile, then simultaneously point downward with one hand while maintaining eye contact with the camera. They hold the final pose naturally until the video ends.

PROMPT - Create a single ultra-realistic 8-second vertical 9:16 smartphone video.

Use only the reference image. Preserve the exact facial identities, hairstyles, body proportions, clothing, colors, textures, background, lighting and camera angle. Do not replace or redesign any clothing.

VIDEO SCRIPT

00.0–02.0s

The man gently grips both sides of his t-shirt near the waist and lightly stretches the fabric outward about 3–5 cm, then releases it naturally. He smiles confidently while looking toward the camera. The woman immediately turns her head toward him with a naturally impressed smile and relaxed posture.

02.0–04.5s

The woman takes one small natural step forward. She gently smooths the front of her t-shirt with one hand from top to bottom, then slowly rotates her torso about 30 degrees to one side to naturally highlight the fit before returning to a comfortable stance. The man remains relaxed, watching her with a subtle smile.

04.5–06.5s

Both look at each other, laugh naturally and briefly compare their shirts using relaxed approving gestures, lightly pointing toward each other's shirts without exaggeration. Their body language is casual, friendly and authentic.

06.5–08.0s

They each take one small step closer until their shoulders lightly touch. They smile warmly, briefly look at each other, then both naturally turn their gaze back toward the camera while maintaining relaxed posture.

Movement Requirements:

Smooth continuous motion.

Natural human biomechanics.

Relaxed body language.

Authentic couple chemistry.

Subtle eye contact.

Natural blinking.

Natural breathing.

Realistic fabric physics.

Visible shirt elasticity.

Realistic clothing wrinkles.

Natural weight shifts.

00.0–02.0s

Both stand naturally facing the mirror with relaxed posture. The man slowly crosses his arms while smiling confidently. At the same time, the woman places one hand lightly on her waist and smiles naturally. Both maintain natural breathing and subtle blinking.

02.0–04.5s

They simultaneously relax their poses. Each gently smooths the front of their own shirt with one hand from top to bottom, naturally showing the fabric and fit. Clothing wrinkles respond realistically.

04.5–06.5s

They look at each other, smile, laugh naturally, then lean slightly toward each other without stepping or changing their position. Their shoulders move a little closer while maintaining relaxed posture.

06.5–08.0s

Together they raise one hand each and form a small heart gesture between them. They briefly look at each other, then back toward the mirror, holding the pose with warm smiles until the end.

PROMPT - Create a single continuous ultra-realistic 10-second vertical video (9:16), 4K, filmed as if captured on a real smartphone.

## REFERENCE ORDER

Image 1 = First frame (the mirror selfie). This image is the absolute source of truth for the scene, pose, identities, elevator and camera framing.

Image 2 = Man's T-shirt reference.

Use this image ONLY to preserve every visible detail of the man's T-shirt, including both the front and back designs.

Image 3 = Woman's T-shirt reference.

Use this image ONLY to preserve every visible detail of the woman's oversized T-shirt, including the exact front chest logo, placement, proportions, colors and print.

Do NOT mix the shirts.

Do NOT transfer prints from one shirt to the other.

Do NOT redesign any logo.

Do NOT recreate the clothing from memory.

The reference shirt images override any ambiguity from the first frame.

## IDENTITY

Preserve both people's exact identities.

Do not change faces.

Do not change tattoos.

Do not change hair.

Do not change body proportions.

Do not change skin tones.

## CLOTHING LOCK

Lock both T-shirts exactly as shown in the reference images.

Maintain identical:

- fit
- length
- sleeves
- collar
- folds
- fabric
- thickness
- texture
- stitching
- colors
- logo placement
- print size
- print orientation

The man's shirt must always remain the man's shirt.

The woman's shirt must always remain the woman's shirt.

Never copy the woman's chest logo onto the man's shirt.

Never invent a front print for the man.

Never modify the back artwork.

Never stretch or warp any print during movement or zoom.

## BODY LOCK

The embrace remains exactly the same during the entire video.

The man keeps both arms in exactly the same position.

He never releases her.

He never adjusts his grip.

He never turns around.

He never lifts his head.

Only subtle breathing and tiny natural body sway are allowed.

The woman's pose also remains unchanged.

No arm repositioning.

No finger deformation.

No extra fingers.

No missing fingers.

No fused limbs.

CAMERA

00:00–00:05

Show the entire couple in the mirror.

Only tiny natural breathing.

Very subtle body sway.

Natural blinking.

No pose changes.

00:05–00:10

The woman performs a smooth smartphone digital zoom while leaning slightly closer to the mirror.

The zoom gradually centers on the logo on the FRONT of HER T-shirt.

Only the camera moves.

The people remain almost perfectly still.

The logo stays perfectly sharp throughout the zoom.

LIGHTING

Keep the exact elevator lighting and reflections.

QUALITY

Ultra-photorealistic.

Real smartphone footage.

No AI artifacts.

No clothing changes.

No logo distortion.

No print morphing.

No face morphing.

No identity drift.

No arm deformation.

The final result must look exactly like a real mirror selfie video where only the camera slowly zooms in on the woman's chest logo while the couple remains naturally embracing. **PHONE LOCK**

The smartphone must remain visible during the entire video.

Never crop the phone out of the frame.

Never hide the phone behind the woman's hand.

Never replace the phone with a different model.

Preserve the exact smartphone from the first frame.

Maintain the exact:

- size
- position
- orientation
- angle
- color
- camera lenses
- reflections

The woman's hand must keep holding the phone exactly as in the first frame.

The phone always remains naturally in front of her face.

## CAMERA MOVEMENT

During the first 5 seconds, the entire couple remains visible while the phone stays fully inside the frame.

During the last 5 seconds, the smartphone performs a smooth digital zoom toward the logo on the woman's chest.

The zoom must simulate the phone's camera zoom only.

The phone itself must remain visible in the mirror reflection throughout the entire zoom.

The framing may become tighter, but the smartphone must never leave the frame.

Do not crop the phone.

Do not hide the phone.

Do not change its position in the woman's hand.

PROMPT - Create a single ultra-realistic 10-second vertical video (9:16), 4K, filmed as if captured on a real smartphone. One continuous take. No cuts, no zoom, no slow motion, no text, no subtitles, no music.

Use the uploaded reference image as the absolute source of truth. Preserve the exact identities, faces, hairstyles, body proportions, clothing, colors, textures, prints, lighting and environment. Never replace or modify the clothing.

The camera remains fixed during the entire video. Both people must always remain fully visible inside the frame.

The movement sequence below is mandatory. Follow it exactly.

00:00–00:03.0 — Standing side by side, they naturally begin dancing a light pagode together. Small side-to-side steps, relaxed shoulders, subtle hip movement, smiling and laughing naturally. The man lightly holds the woman's hand once, then briefly places one hand on her waist before releasing it. The dance must feel casual and spontaneous, like a real couple enjoying the music. No exaggerated choreography.

00:03.0–00:05.5 — Without stopping the natural rhythm, they slow the dance. The woman takes two relaxed steps toward the camera while the man stays slightly behind her, smiling proudly at her. She naturally presents the clothing by gently smoothing the front with both hands, lightly stretching the fabric once and turning about 30° to each side to show the fit. She then brushes her hair behind her ear with a soft smile. The focus remains on the couple, not only on the clothing.

00:05.5–00:07.5 — She walks back beside him. They exchange a warm smile, briefly look at each other, then back to the camera. The man gives a subtle nod of approval while maintaining a relaxed posture.

00:07.5–00:10.0 — Standing close together, they simultaneously point downward with one hand while smiling naturally. They hold the pose for the final second, maintaining eye contact with the camera.

Ultra-realistic human movement only. Realistic skin texture, subtle breathing, natural blinking, authentic facial micro-expressions, realistic hair and fabric physics. No robotic movement. No runway walk. No exaggerated dance. No improvisation. The interaction must feel exactly like a real couple recording content for social media

PROMPT- Create a single ultra-realistic 10-second vertical video (9:16), 4K, filmed as if captured on a real smartphone. One continuous shot. No cuts, no zoom, no slow motion, no text, no subtitles, no music. Preserve the exact identities, faces, hairstyles, body proportions, clothing, colors, prints, lighting and environment from the reference image. Do not modify or replace any clothing.

The movement sequence below is mandatory. Follow it exactly. Natural human biomechanics only. No exaggerated modeling poses. Natural smiles, subtle blinking and relaxed breathing throughout.

00:00–00:01.2 — Both are already facing the camera. Simultaneously, they quickly release the edges of their shirts as if they had just been lightly stretching the fabric. The movement is fast, synchronized and natural, creating a strong visual hook. The camera itself never appears.

00:01.2–00:02.5 — The man's right hand naturally rests on the woman's waist. Together they take one relaxed step backward while maintaining eye contact with the camera and smiling softly.

00:02.5–00:04.0 — The woman takes one small step forward, stopping slightly ahead of him. She places one hand naturally on her waist while smiling confidently, subtly presenting herself without emphasizing only the shirt. The man remains just behind her, relaxed and smiling.

00:04.0–00:05.3 — She returns naturally to stand beside him. Her arms relax alongside her body with a soft smile. The man casually places both hands inside his pockets, striking a relaxed, human and effortless pose.

00:05.3–00:07.0 — The man gently takes one of her hands and raises it above her head. She performs one smooth, natural, slow 360-degree twirl. Her hair follows the motion

realistically with natural physics. He keeps his posture relaxed and smiles while watching her.

00:07.0–00:08.8 — As the spin finishes, they naturally move close together. He continues holding one of her hands while she softly brushes her hair behind her ear with her free hand. They exchange a warm smile and briefly look into each other's eyes before looking back toward the camera.

00:08.8–00:10.0 — They lean gently toward each other and share a short, natural, affectionate kiss lasting about one second. They remain close together, smiling softly as the video ends.

Maintain realistic fabric physics, natural body weight shifts, authentic facial expressions, subtle breathing and true smartphone camera realism throughout. No robotic motion. No improvisation. Follow the sequence exactly as described.

PROMPT - Use the original reference image as the exact identity reference for both people. Preserve the exact same faces, hairstyles, body proportions, clothing, colors, accessories, lighting and background. Preserve the exact same outfit throughout the entire video. Vertical 9:16. Authentic TikTok UGC. Smartphone recording. No cinematic effects. No slow motion. Real human speed. No talking. Every movement must feel spontaneous and effortless.

STYLE

The video should look exactly like a viral TikTok couple showing matching outfits, never like actors posing or models doing a fashion shoot. Their chemistry is playful, affectionate and genuine. The clothing is always the visual focus, while their interaction naturally highlights the outfit.

SCENE

0.0–0.7s

The recording begins with both people already standing in their final positions behind the smartphone camera before the recording starts. From the very first frame, both of their open palms are already pressed flat directly against the camera lens, physically touching the lens and completely covering 100% of the screen. There must be no animation of the hands moving toward the camera and no floating hands. The video starts with the lens already fully covered.

0.7–1.4s

Without any pause, they simultaneously pull their hands straight backward away from the camera lens in one smooth continuous motion while naturally taking one small step backward. Their faces and matching outfits are gradually revealed as the hands move away. The movement should feel exactly like a real TikTok transition where the recording begins with the hands already on the lens. As soon as their hands lower naturally, the woman immediately begins smoothing the front of her shirt with both hands while smiling softly. The man naturally looks at her outfit with an impressed expression before briefly looking at her face and then back at the camera.

1.4–3.0s

The woman naturally becomes the focus first. She gently smooths the front of her shirt with both hands, adjusts the fabric around her waist and lightly brushes one side of her shorts. She keeps a soft closed-mouth smile and makes subtle, natural facial expressions. The man remains beside her, casually watching her with an admiring expression, then briefly returns his gaze to the camera.

3.0–4.5s

The man reaches for one of her hands. Without stopping, he gently guides her through one relaxed, natural 360° spin at normal human speed. The spin is only to naturally show the outfit from every angle, never like dancing. During the turn she lightly touches the hem of her shirt and lets her hair move naturally. She finishes facing the camera again with a relaxed smile.

4.5–6.0s

Now the attention naturally shifts to him. He casually places one hand inside his shorts pocket while using his free hand to smooth the front of his shirt once. He lightly adjusts the collar and naturally runs his fingers through his hair one time. The woman watches him with an amused smile.

6.0–7.2s

She looks at him with playful fake jealousy. She smiles, gently nudges his shoulder and lightly pulls him closer as if saying, "You're mine." Both laugh naturally with genuine facial expressions.

7.2–8.5s

They stand shoulder to shoulder while both naturally adjust the front of their shirts once more, subtly showing the fit of the matching outfits. They briefly look at each other's outfits before looking back at the camera.

8.5–9.5s

They naturally move closer together and share one quick, soft, spontaneous kiss. The kiss lasts less than one second and feels completely genuine.

9.5–11.0s

Immediately after the kiss, he gently lifts her into his arms for a brief moment. She laughs naturally, wraps one arm around his neck and lightly adjusts her shirt with her free hand. Their clothing and hair react naturally to the movement.

11.0–12.0s

Still holding her, they both look directly into the camera with genuine smiles. He looks at her with affection, then both return their eyes to the camera while smiling naturally. The video ends with both comfortably displaying the matching outfits.

## REQUIREMENTS

- The very first frame must already start with both palms physically touching the camera lens.
- Both palms must completely cover 100% of the frame.
- No floating hands.
- No hand movement toward the camera.
- The only movement is pulling the hands away from the lens.
- The reveal must feel exactly like a real TikTok transition.
- Clothing is always the visual focus.
- Every interaction should naturally highlight the outfit.
- Real human speed.
- Absolutely NO slow motion.
- Absolutely NO pauses.
- Continuous fluid movement.
- Natural blinking.
- Natural breathing.
- Natural eye contact.
- Natural weight shifts.
- Relaxed shoulders.
- Realistic hair movement.
- Realistic clothing physics.
- No robotic movement.
- No fashion runway posing.
- No exaggerated romance.
- Affection should feel spontaneous.
- One continuous shot.
- No cuts.
- No morphing.
- No digital zoom.
- No cinematic camera movement.
- The couple should feel like real TikTok creators casually showing matching clothes rather than professional models.

The beginning of their hand should be literally very close to the camera to give a cool transition! So the beginning will be like this! And the end makes him taking her in his lap naturally feeling her weight! When she's cute, she makes her giving half a turn only and throwing hair only that!

Vertical 9:16. Authentic TikTok UGC. Smartphone recording. No cinematic effects. No slow motion. No talking. Real human speed. One continuous shot.

## STYLE

The video should feel like a real couple who genuinely loves recording TikTok videos together showing matching outfits and cute finds. They are playful, comfortable, affectionate and always smiling naturally. Nothing should feel scripted, modeled or like an advertisement. The clothing is always the visual focus while their chemistry naturally makes the video engaging.

## SCENE

0.0–1.2s

The video starts with both already standing naturally side by side, smiling softly at the camera. The woman immediately smooths the front of her shirt with both hands while slightly adjusting the fabric around her waist. The man glances at her outfit with an impressed smile before briefly looking back at the camera.

1.2–2.6s

The woman takes one small natural step forward, lightly brushes one side of her shorts and gently turns about 30 degrees to show the side of the outfit. She returns to face the camera with a relaxed smile. The man watches her with an admiring expression as if thinking, "she looks beautiful."

2.6–4.2s

The man naturally becomes the focus. He casually slides one hand into his pocket while smoothing the front of his shirt with the other hand. He lightly adjusts his collar, runs one hand through his hair once and smiles confidently at the camera. The woman looks at him with an amused expression.

4.2–5.8s

She walks closer to him, gently grabs his hand and guides him one small step toward the camera. Together they briefly look down at their matching outfits, smile at each other and then back at the camera as if proudly showing the set.

5.8–7.5s

Holding hands, he gently guides her through one relaxed 360-degree spin. The spin is slow enough to naturally show the outfit but still at real human speed. During the turn her hair and shirt move naturally with realistic fabric physics.

7.5–8.8s

She finishes the turn and naturally laughs. She playfully fixes the front of his shirt with one hand while he smiles at her. He lightly places one arm around her waist. Both briefly adjust their own shirts, naturally highlighting the outfits.

8.8–10.0s

They stand shoulder to shoulder, exchange a quick affectionate look and share one soft, spontaneous kiss lasting less than one second. Immediately afterward they laugh together while maintaining eye contact.

10.0–11.2s

The woman suddenly laughs and playfully jumps onto his back in one smooth natural movement. He instinctively catches her under her legs, supporting her comfortably in a piggyback position. She wraps both arms around his shoulders while laughing. Their clothing and hair react naturally to the movement.

11.2–12.5s

Still carrying her on his back, he takes two small relaxed steps forward while both smile directly at the camera. She gently rests her head near his shoulder, then lightly smooths the front of her shirt once more while laughing. They finish looking happy, relaxed and completely natural, clearly showing the matching outfits.

## REQUIREMENTS

- The matching outfits are always the visual focus.
- Every interaction should naturally highlight the clothing.
- Real human speed.
