Casa Pov | Fronha

PROMPT IMAGEM - Hyper-realistic POV style product photography, first-person point of view.

Looking down at a soft and cozy bed. The exact pair of pillowcases from the reference image is neatly placed on the bed, slightly overlapping or side by side, centered in the frame.

The bed has clean, soft bedding with natural wrinkles and a comfortable, inviting look. Soft natural daylight coming through a window, creating gentle shadows and a warm, serene atmosphere. Shallow depth of field, the background softly blurred.

PRODUCT LOCK (absolute rules):

- Use the exact pair of pillowcases from the reference image with 100% fidelity.
- Do not change pattern, colors, fabric texture, ties, shape, size, proportions or any visible detail.
- Do not redesign, stylize, improve or reinterpret the pillowcases in any way.
- The products must remain perfectly identical and clearly identifiable.

Style: ultra-photorealistic, clean and cozy bedroom aesthetic, soft natural lighting, high detail, 8k quality, authentic intimate POV looking at the two pillowcases on the bed.

Casa Pov | Duas Mãos Fronha

PROMPT DA IMAGEM - Hyper-realistic POV style product photography, first-person point of view.

Looking down at a soft and cozy bed. The exact pair of pillowcases from the reference image is neatly placed on the bed, slightly overlapping or side by side, centered in the frame.

The bed has clean, soft bedding with natural wrinkles and a comfortable, inviting look. Soft natural daylight coming through a window, creating gentle shadows and a warm, serene atmosphere. Shallow depth of field, the background softly blurred.

PRODUCT LOCK (absolute rules):

- Use the exact pair of pillowcases from the reference image with 100% fidelity.
- Do not change pattern, colors, fabric texture, ties, shape, size, proportions or any visible detail.
- Do not redesign, stylize, improve or reinterpret the pillowcases in any way.
- The products must remain perfectly identical and clearly identifiable.

Style: ultra-photorealistic, clean and cozy bedroom aesthetic, soft natural lighting, high detail, 8k quality, authentic intimate POV looking at the two pillowcases on the bed.

PROMPT VIDEO SEM FALA - Hyper-realistic cinematic video in pure POV style, first-person point of view.

Start looking down at a soft and cozy bed. The exact pair of pillowcases from the reference image is placed on the bed. Soft natural daylight.

Two realistic hands enter the frame. Both hands carefully pick up one of the pillowcases, lift it naturally and hold it up toward the camera, slowly turning and adjusting it to clearly show the fabric, pattern and details. Movements are smooth, realistic and gentle.

After showing it, the hands can lightly place it back or continue holding it.

PRODUCT LOCK (mandatory – do not break):

- The pillowcases must be 100% identical to the reference image in every single detail.
- Do not change the pattern, colors, fabric texture, bows, ties, shape, size, proportions, stitching or any visible element.
- Do not redesign, restyle, improve, simplify or reinterpret the pillowcases in any way.
- Keep the exact same design and appearance from the reference.

No text, subtitles or watermarks. No speech. Ultra-realistic lighting, shallow depth of field, premium quality, 4K, vertical 9:16, natural cinematic motion.

- apenas uma mão visível;
- cinco dedos;
- dedos proporcionais;
- articulações naturais;
- pequenas variações anatômicas;
- postura relaxada;
- dedos levemente curvados;
- movimento natural;
- aparência espontânea.

A mão deve parecer uma mão humana real fotografada de perto.

NÃO criar segunda mão.

NÃO criar dedos extras.

NÃO remover dedos.

NÃO fundir dedos.

NÃO deformar dedos.

=====

NAILS — RED NAIL LOCK

=====

As unhas devem ser VERMELHAS.

A cor vermelha deve permanecer claramente visível em todas as unhas.

Manter:

- esmalte vermelho;
- acabamento natural;
- brilho suave;
- pequenas imperfeições naturais;
- bordas levemente irregulares;
- aparência de manicure real;
- comprimento curto a médio;
- formato natural das unhas.

O vermelho deve parecer esmalte real, e não uma textura digital.

Não trocar o vermelho por nude.

Não trocar o vermelho por rosa.

Não trocar o vermelho por branco.

Não trocar o vermelho por preto.

Não criar unhas artificiais exageradamente longas.

Não criar unhas perfeitamente idênticas.

Não aplicar brilho plástico excessivo.

=====

RINGS — MAIN FOCUS

=====

Os ANÉIS são o principal foco visual da imagem.

Os anéis devem parecer joias reais fotografadas em uma mão humana.

Preservar:

- escala realista em relação aos dedos;
- proporção natural;
- encaixe correto nos dedos;
- espessura física realista;
- metal realista;
- reflexos naturais;
- pequenas micro-riscas;
- pequenas irregularidades;
- brilho não uniforme;
- textura física realista.

Caso exista uma imagem de referência dos anéis, reproduzir EXATAMENTE os anéis da referência:

- mesmo design;
- mesmo formato;
- mesmo metal;
- mesma cor;
- mesmas pedras;
- mesma quantidade;
- mesmas proporções;
- mesmos detalhes;
- mesma posição.

NÃO redesenhar os anéis.

NÃO alterar o design.

NÃO aumentar o tamanho.

NÃO adicionar pedras.

NÃO remover pedras.

NÃO transformar os anéis em joias genéricas.

=====

STONES

=====

Caso os anéis possuam pedras:

As pedras devem apresentar reflexos naturais causados pela iluminação real.

Utilizar pequenas variações naturais de luz.

Sem brilho artificial.

Sem efeito de estrela.

Sem sparkle exagerado.

Sem aparência de joia digital.

As pedras devem parecer materiais físicos reais.

=====

SKIN REALISM

=====

A pele da mão deve apresentar:

- poros visíveis;
- linhas naturais;
- pequenas rugas;
- textura real;
- variações sutis de tonalidade;
- pequenas imperfeições;
- aparência humana natural.

NÃO suavizar excessivamente a pele.

NÃO aplicar filtro de beleza.

NÃO criar pele de plástico.

NÃO criar pele de porcelana.

NÃO remover completamente as linhas naturais das mãos.

=====

POSE

=====

POV close-up de uma única mão.

A mão deve estar relaxada, com os dedos levemente curvados.

A pose deve parecer espontânea, como se a pessoa estivesse mostrando seus anéis para uma amiga ou gravando um conteúdo casual para o Instagram.

Evitar pose rígida.

Evitar dedos completamente esticados.

Evitar simetria perfeita.

Evitar aparência de catálogo.

=====

ENVIRONMENT

=====

Ambiente residencial real.

Pode ser:

- quarto;
- closet;
- penteadeira;
- área de vestir;
- banheiro elegante;
- quarto com decoração discreta.

O ambiente deve parecer realmente habitado.

Adicionar discretamente pequenas características naturais de um ambiente real.

Não deixar o cenário perfeitamente produzido.

Não criar estúdio.

=====

BACKGROUND

=====

Fundo suavemente desfocado.

Profundidade de campo natural.

Elementos do ambiente apenas como contexto visual.

A mão e os anéis permanecem claramente em primeiro plano.

=====

LIGHTING

=====

Luz natural entrando por uma janela.

Iluminação suave.

Sombras naturais.

Highlights realistas sobre a pele e os metais.

Os reflexos dos anéis devem responder fisicamente à direção da luz.

Não usar:

- flash;
- iluminação de estúdio;
- luz colorida;
- brilho artificial;
- glow;
- reflexos impossíveis.

=====

CAMERA

=====

Sensação de câmera handheld de smartphone.

Lente equivalente a aproximadamente 50mm.

Close-up.

Profundidade de campo rasa.

Foco preciso nos anéis e dedos.

Leve imperfeição natural de fotografia handheld.

Não parecer fotografia profissional de joalheria.

=====

STYLE

=====

Realistic Jewelry UGC.

POV feminino.

Instagram Story aesthetic.

Natural.

Casual.

Elegante.

Descolado.

Autêntico.

Fotografia real de smartphone.

A imagem deve transmitir:

"olha como ficou lindo esse anel na mão"

e não:

"fotografia profissional de catálogo de joias".

=====
ABSOLUTE PRIORITY
=====

1. SOMENTE UMA MÃO.
2. UNHAS VERMELHAS.
3. ANÉIS COMO FOCO PRINCIPAL.
4. ANÉIS COM ESCALA E PROPORÇÕES REALISTAS.
5. PELE REALISTA.
6. REFLEXOS NATURAIS NOS METAIS.
7. AMBIENTE REAL.
8. FORMATO 9:16 PARA INSTAGRAM STORIES.
9. APARÊNCIA DE UGC REAL.
10. ZERO APARÊNCIA DE CGI.

PROMPT VIDEO SEM FALA - Create an ultra-photorealistic vertical image (9:16) showing the EXACT product from the attached reference image being presented to the camera in a natural first-person POV. The scene must feel human, real, spontaneous, and believable, as if someone is simply showing the product to the camera with one hand.

ABSOLUTE PRIORITY:

The attached product must be reproduced with maximum fidelity and zero redesign.

Preserve exactly all visible characteristics from the reference image:

- packaging shape
- bottle / jar / box / container structure
- label design
- typography
- colors
- logo placement
- cap / lid / nozzle / pump details
- material finish
- reflections
- transparency
- proportions
- print alignment
- all visual details

Do not simplify, reinterpret, beautify, replace, invent, or alter any part of the product. The final product must look exactly like the attached reference.

MAIN COMPOSITION:

- true POV / first-person feeling
- only ONE hand visible
- no second hand
- no full person
- no face
- no body
- no selfie framing
- no person "showing" the product in the scene
- only the hand and, if necessary, a small part of the forearm may appear
- the product is held naturally and shown directly to the camera
- product close to the camera, clearly visible, hero of the frame
- label/front side turned toward the camera whenever physically possible
- framing should look organic and human, not staged like a studio ad

HAND / PRODUCT REALISM:

- grip must be anatomically correct
- hand posture must match the real size and shape of the product
- scale must be accurate: the product cannot look too big or too small in the hand
- fingers must wrap around the product naturally
- skin texture must be realistic

- nails natural
- no tattoos unless present in the reference or explicitly requested
- no rings, watches, bracelets, or accessories unless necessary and subtle
- never generate extra fingers
- never generate multiple hands
- never deform the hand or forearm

ENVIRONMENT:

Place the scene in a realistic, functional, believable environment that matches the product category naturally, but keep the environment secondary. The AI should infer the ideal setting based on the product itself.

Examples:

- perfume / skincare / cosmetics → vanity, bathroom, bedroom dresser
- food / drink / supplement → kitchen, dining table, pantry, desk
- tech / electronics → desk, office, bedroom setup
- fashion accessory → wardrobe area, mirror area, neutral indoor setting
- home / cleaning product → kitchen, laundry area, utility space

The environment must be:

- photorealistic
- natural
- functional
- clean but lived-in
- believable
- softly secondary
- never luxurious showroom
- never empty studio
- never fake CGI background

VISUAL STYLE:

- ultra photorealistic
- natural smartphone realism
- authentic iPhone-style look
- slight shallow depth of field
- sharp focus on the product and main label
- natural lighting or realistic indoor light
- realistic reflections and shadows
- subtle natural grain allowed
- organic social-media realism
- not overly polished
- not artificial advertising style

CAMERA:

- iPhone 15 Pro Max rear camera look
- 24mm wide-angle feel
- handheld POV realism
- natural perspective
- slight edge distortion acceptable

- vertical 9:16 composition

FOCUS HIERARCHY:

1. exact product fidelity
2. label consistency and readability
3. correct hand anatomy
4. correct product-to-hand proportion
5. realistic environment coherence
6. natural human POV feeling

STRICT RULES:

- use the attached product as the exact visual reference
- do not change any product features
- do not create a generic version
- do not replace the packaging
- do not hide the main label
- do not distort text
- do not create fake branding
- do not show multiple hands
- do not show the person
- do not create a mirror selfie
- do not crop the product awkwardly
- do not oversaturate colors
- do not stylize
- do not turn the image into CGI or illustration

ANTI-BUG / NEGATIVE PROMPT:

multiple hands, two hands, extra fingers, extra limbs, duplicated hand, deformed hand, broken anatomy, warped fingers, melted skin, visible face, visible person, visible body, selfie pose, mirror selfie, altered packaging, changed label, wrong logo, fake text, unreadable text, distorted typography, changed colors, changed cap, wrong material, oversized product, undersized product, floating product, unrealistic grip, blurry product, low quality, CGI, 3D render, illustration, cartoon, studio background, luxury showroom, fake reflections, overprocessed image, harsh flash, overexposed highlights, cluttered background, inconsistent scale, warped container, bent bottle, stretched packaging

OUTPUT GOAL:

Generate a flawless universal POV image where a single realistic hand naturally shows the exact attached product to the camera, preserving maximum fidelity, consistency, correct scale, and ultra-realistic detail, with zero margin for error.

PROMPT VIDEO SEM FALA UNIVERSAL POV VIDEO PROMPT — LINGERIE / CAMISOLA ON BED / HANDS SHOWING THE PIECE / SOFT ZOOM / MAX CONSISTENCY / ANTI-CRASH

Use the attached reference image as the absolute visual source for the lingerie or camisola. Create an ultra-photorealistic vertical POV video where the exact product is shown on top of a bed, while two realistic human hands gently present the piece and the camera performs a soft zoom into the fabric and detail areas.

ABSOLUTE PRIORITY:

The lingerie or camisola must remain visually identical to the attached reference during the entire video.

Do not redesign, reinterpret, replace, stylize, improve, simplify, or alter the piece in any way.

PRESERVE EXACTLY:

- exact garment model
- exact shape and proportions
- exact color
- exact lace / fabric / mesh / satin / cotton appearance
- exact stitching
- exact trims
- exact straps
- exact seams
- exact embroidery or lace pattern

- exact transparency level
- exact texture
- exact front design
- exact material behavior
- exact overall identity of the product

SUBJECT:

The exact lingerie or camisola from the reference is laid flat on a bed in a real bedroom. Two realistic human hands gently show the piece in a soft and natural way, lightly adjusting or touching the edges, straps, lace, fabric and seams without deforming the product. The garment is the absolute hero of the video.

SCENE:

A real medium-standard bedroom, natural and believable, with the garment placed on top of a neatly made bed.

Environment:

- real bedroom
- clean but lived-in
- neutral bedding
- soft pillows or duvet subtly visible
- natural functional home setting
- Brazilian middle-class bedroom aesthetic
- no luxury hotel look
- no boutique/store counter
- no studio backdrop

ACTION:

First-person POV video.

The garment is already laid flat on the bed.

Two realistic hands gently present the piece:

- lightly touching the sides
- softly smoothing small areas of the fabric
- subtly lifting a strap or edge only if needed
- carefully showing the shape without changing it
- keeping the garment laid on the bed the entire time

The camera performs a slow, elegant, soft zoom toward the garment, progressively emphasizing:

- fabric texture
- lace details
- seams
- trims
- straps
- embroidery
- finishing
- material quality

The movement must feel human, calm, natural, and believable.

No abrupt movement.
No aggressive pulling.
No folding.
No shaking.
No lifting the whole garment out of the bed.
No excessive hand interaction.

IMPORTANT FRAMING RULES:

- POV / first-person feel
- garment remains on top of the bed
- only the hands may appear
- no face
- no body
- no mirror selfie
- no model wearing the garment
- keep the piece centered or naturally framed
- keep important design details visible
- keep the garment fully readable
- keep the product in frame at all times

CAMERA:

- vertical 9:16
- iPhone-style realism
- natural handheld feel
- top-down or slightly angled POV
- subtle natural micro-movements
- smooth soft zoom in toward the fabric and details
- stable framing
- no shaky footage
- no fast motion
- realistic smartphone depth of field

STYLE:

Ultra-photorealistic, authentic human POV, natural product presentation, clean and real lifestyle content, detailed textile realism, soft and elegant visual rhythm, organic social-media realism, no AI look, no CGI feel, no artificial glossy ad look.

LIGHTING:

Soft natural daylight from a window or warm indoor ambient light, balanced exposure, realistic shadows, clear visibility of lace and fabric texture, no harsh flash, no overexposed whites, no dramatic studio shadows, natural skin tones, realistic material highlights.

HANDS / SKIN REALISM:

Two realistic human hands only, correct anatomy, natural finger count, realistic micro skin texture, visible pores, subtle natural skin folds, realistic nails, no extra fingers, no fused fingers, no deformed wrists, no warped forearms. Hands must not cover essential details too much.

DIALOGUE:

No dialogue.

No voiceover.

No talking.

BACKGROUND SOUNDS:

Soft room ambience only.

Subtle fabric handling sound.

MUSIC:

Optional very soft minimal ambient music, low volume and secondary.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

STRICT CONSISTENCY RULES:

- keep the exact same lingerie or camisola throughout the clip
- do not change the color between frames
- do not change lace, straps, seams, trims or fabric
- do not morph the product
- do not generate a similar piece
- do not switch to another version
- preserve the exact construction and design
- maintain realistic scale relative to the hands and bed
- keep the garment laid on the bed the whole time

ANTI-CRASH / NEGATIVE PROMPT:

changed garment, altered lingerie, altered camisola, different lace pattern, changed straps, changed trim, changed color, changed shape, wrong proportions, product morphing, inconsistent product, generic garment, fake fabric, plastic texture, blurry product, low quality, CGI, 3D render, cartoon, illustration, AI artifacts, overprocessed image, waxy hands, extra fingers, fused fingers, deformed hands, broken wrists, warped arms, visible face, visible body, model wearing product, mirror selfie, shaking camera, aggressive zoom, harsh flash, overexposed fabric, cluttered bedroom, messy bed, distorted lace, folded product, product lifted out of frame, product leaving frame, bad anatomy, inconsistent lighting

Copiar prompt de imagem - Use the uploaded image as the ****ABSOLUTE AND EXCLUSIVE REFERENCE FOR THE BED SHEET****.

Create an ultra-photorealistic vertical 9:16 lifestyle product photograph.

MAIN PRODUCT — LENÇOL DOBRADO NA MÃO

In the foreground, a ****single realistic feminine hand is holding and presenting the exact bed sheet from the reference image, neatly folded****.

The folded sheet must be clearly visible and easy to identify.

The woman is showing the folded fabric toward the camera as if presenting the product in a UGC product photograph.

The hand must hold the folded sheet naturally from the side or bottom, without covering its main visible area.

Feminine hand with realistic anatomy, natural skin texture and neatly manicured nails.

Only one hand.

No second hand.

No face.

No full body.

PRODUCT LOCK — CRITICAL

The folded sheet must be ****100% identical to the uploaded reference****.

Preserve exactly:

- * color
- * pattern
- * print
- * fabric texture
- * material
- * weave
- * borders

- * stitching
- * seams
- * thickness
- * finish
- * every visible detail

Do not redesign or reinterpret the sheet.

Do not change the colors.

Do not create a new pattern.

Do not add details.

Do not remove details.

The folded fabric must look like the ****exact same physical sheet from the reference image****, simply folded naturally.

BED IN THE BACKGROUND

In the background, show a realistic bed ****already made with the exact same sheet from the reference image****.

The bed must use ONLY the referenced sheet as the visible main bedding.

The sheet on the bed must have the ****same exact color, pattern, print, material and texture**** as the folded sheet being held in the foreground.

The pattern must remain consistent when unfolded.

Do not create a different sheet.

Do not use a different bedding set.

Do not introduce another color or pattern.

The sheet should naturally cover the mattress with realistic fabric folds and subtle wrinkles.

IMPORTANT PRODUCT RELATIONSHIP

The image must clearly communicate:

****THE WOMAN IS HOLDING THE EXACT SAME SHEET THAT IS CURRENTLY ON THE BED.****

The folded sheet in the hand and the sheet covering the bed must visually match perfectly.

SCENARIO

Create a beautiful, cozy and sophisticated bedroom.

Neutral elegant interior with soft beige, cream and warm white tones.

Natural daylight coming through a window.

Minimal wooden furniture.

Clean, organized and realistic bedroom.

Keep the background slightly blurred, but make the sheet on the bed recognizable.

COMPOSITION

Vertical 9:16.

POV smartphone lifestyle photography.

The folded sheet in the feminine hand is the ****main foreground focus****.

The bed with the same referenced sheet is clearly visible behind it.

Natural perspective.

Realistic depth of field.

Authentic UGC product photography.

LIGHTING

Soft natural daylight.

Consistent exposure.

Natural shadows.

Realistic highlights.

No artificial glow.

No excessive HDR.

PHOTOREALISM

Ultra-photorealistic.

Realistic feminine hand.

Realistic fabric texture.

Natural folds and creases.

Physically accurate fabric behavior.

Authentic smartphone photograph.

The final image should look like a real person showing a folded sheet while standing beside the bed where the same sheet is already being used.

ABSOLUTE NEGATIVE RULES

NO different sheet on the bed.

NO different pattern.

NO different color.

NO different fabric.

NO additional bedding covering the referenced sheet.

NO blanket hiding the sheet.

NO duvet hiding the sheet.

NO second sheet.

NO unrelated fabric.

NO altered product.

NO invented pattern.

NO distorted pattern.

NO plastic-looking fabric.

NO extra hands.

NO extra fingers.

NO face.

NO full body.

NO text.

NO watermark.

****THE UPLOADED SHEET IS THE SOURCE OF TRUTH.** The folded sheet in the feminine hand and the sheet covering the bed must be the EXACT SAME PRODUCT with identical visual characteristics. ******

Copiar prompt de vídeo sem fala - Use the uploaded reference image as the ****ABSOLUTE FIRST FRAME AND ABSOLUTE PHYSICAL TRUTH****.

Create a realistic vertical 9:16 UGC product video.

MOST IMPORTANT RULE — NEVER RELEASE THE PRODUCT

The person is ****HOLDING THE FOLDED BEDDING SET WITH BOTH HANDS FROM THE FIRST FRAME UNTIL THE LAST FRAME.****

****THE PRODUCT MUST NEVER BE RELEASED.****

****THE HANDS MUST NEVER LET GO.****

****THE HANDS MUST NEVER LEAVE THE PRODUCT.****

****THE GRIP MUST REMAIN CONTINUOUS FOR THE ENTIRE VIDEO.****

There is NO moment in the video where the product is released, dropped, placed down, transferred, exchanged or held by another hand.

The exact same two hands remain physically attached to and gripping the folded bedding throughout the entire video.

HAND + PRODUCT PHYSICAL LOCK

Treat the ****two hands and the folded bedding as ONE SINGLE PHYSICAL UNIT****.

The hands and product must move together naturally.

If the hands move forward, the product moves forward with them.

If the hands move backward, the product moves backward with them.

If the hands move slightly upward, the product moves upward with them.

If the hands remain still, the product remains still.

****THE PRODUCT MUST NEVER MOVE INDEPENDENTLY FROM THE HANDS.****

The fingers must maintain continuous physical contact with the fabric.

The fingers must remain wrapped around the same areas of the folded bedding.

Do not change the grip during the video.

Do not reposition the fingers.

Do not open the hands.

Do not loosen the grip.

Do not release even one side of the product.

HAND PRESERVATION

Preserve the exact hand arrangement from the reference image.

Maintain:

- * exactly two hands
- * same finger count
- * same finger positions
- * same grip
- * same wrist orientation
- * same relationship between hands and fabric

No extra fingers.

No missing fingers.

No additional hands.

No disappearing hands.

No hand transformation.

No hand teleportation.

No fingers passing through the fabric.

No fabric passing through the fingers.

PRODUCT MOVEMENT

The folded bedding remains securely held by both hands.

The person makes only ****very small natural presentation movements****.

Gently move the folded bedding a few centimeters closer toward the camera while BOTH HANDS MOVE FORWARD TOGETHER WITH IT.

Pause briefly.

Then gently return the folded bedding to its original position while BOTH HANDS MOVE BACK TOGETHER WITH IT.

The movement should feel like someone naturally presenting the product to a camera.

****DO NOT CREATE ANY ACTION WHERE THE HANDS LEAVE THE PRODUCT.****

IMPORTANT — NO PILLOW INTERACTION

Do NOT touch the pillow.

Do NOT touch the bed.

Do NOT use a free hand.

Do NOT move either hand away from the bedding.

Do NOT perform any secondary action.

****BOTH HANDS MUST REMAIN HOLDING THE FOLDED BEDDING FOR THE ENTIRE VIDEO.****

The background bed remains completely stationary.

FABRIC PHYSICS

The bedding behaves like real folded fabric.

Maintain the exact folded shape from the reference.

Allow only extremely subtle natural fabric movement caused by the hands.

The fabric must not unfold.

The fabric must not open.

The fabric must not stretch.

The fabric must not deform.

The fabric must not change thickness.

The pattern remains physically printed on the fabric and moves naturally with it.

PRODUCT IDENTITY LOCK

The folded bedding must remain ****100% IDENTICAL**** to the uploaded reference throughout every frame.

Preserve exactly:

- * color
- * print
- * pattern
- * texture
- * material
- * folds
- * seams
- * borders
- * proportions
- * dimensions
- * every visible detail

Do not redesign.

Do not recreate.

Do not reinterpret.

Do not add details.

Do not remove details.

Do not change the pattern.

Do not change the colors.

CAMERA

Vertical 9:16.

Realistic smartphone POV/UGC.

Very subtle natural handheld movement.

The camera may move slightly closer and slightly backward, but must maintain approximately the same viewing angle.

No digital zoom.

No artificial zoom.

No camera spin.

No 360-degree rotation.

No dramatic perspective change.

No cuts.

No transitions.

No scene changes.

ENVIRONMENT

Keep the bedroom exactly as shown in the reference.

Preserve:

- * bed
- * pillows
- * blanket
- * furniture
- * curtains
- * walls
- * lighting
- * background
- * room composition

Nothing in the environment moves.

The only movement is the subtle natural movement of the person's hands holding the folded bedding and the corresponding camera movement.

LIGHTING LOCK

Maintain identical lighting from the first frame to the last.

Constant brightness.

Constant exposure.

Constant color temperature.

Constant shadows.

Constant highlights.

NO flickering.

NO exposure pumping.

NO brightness fluctuations.

NO changing shadows.

AUDIO

Generate video only.

Completely silent.

No speech.

No voiceover.

No music.

No sound effects.

ABSOLUTE NEGATIVE PROMPT

NO releasing the product.

NO dropping the product.

NO putting the product down.

NO transferring the product.

NO changing hands.

NO free hand.

NO hand leaving the product.

NO opening the hands.

NO loosening the grip.

NO touching the pillow.

NO touching the bed.

NO independent product movement.

NO floating fabric.

NO floating product.

NO fabric teleportation.

NO hand teleportation.

NO fingers passing through fabric.

NO fabric passing through fingers.

NO extra fingers.

NO missing fingers.

NO extra hands.

NO disappearing hands.

NO deformed hands.

NO product deformation.

NO product morphing.

NO unfolding.

NO stretching.

NO pattern changes.

NO color changes.

NO texture changes.

NO altered folds.

NO added elements.

NO removed elements.

NO scene changes.

NO lighting changes.

NO camera spin.

NO 360 rotation.

NO digital zoom.

NO text.

NO watermark.

FINAL COMMAND

****BOTH HANDS MUST HOLD THE FOLDED BEDDING CONTINUOUSLY FROM FRAME 1 UNTIL THE FINAL FRAME.****

****THE PRODUCT IS NEVER RELEASED FOR ANY REASON.****

****DO NOT CREATE ANY ACTION THAT REQUIRES A HAND TO LET GO OF THE PRODUCT.****

****PRODUCT AND HANDS MUST MOVE TOGETHER AS ONE PHYSICALLY CONNECTED UNIT.****

If any requested movement could cause the product to be released or the hand-to-product connection to break, ****DO NOT PERFORM THE MOVEMENT. Keep the hands holding the product securely instead.****

****PHYSICAL HAND-TO-PRODUCT CONNECTION AND PRODUCT PRESERVATION HAVE ABSOLUTE PRIORITY OVER ALL OTHER MOTION.****

Copiar prompt de vídeo sem fala - Use the uploaded image as the exact first frame.
The t-shirts must remain a perfect identical copy of the reference in every single frame. Zero deformation, zero morphing, zero changes allowed.

Realistic POV style product video, first-person point of view.
Looking from a natural height over a clean white bed sheet. The exact stack of t-shirts from the reference image is centered in the frame.

A hand enters the frame and very carefully takes one t-shirt at a time, starting from the front (the t-shirt closest to the camera). It lifts each shirt slowly and minimally upward, just enough to remove it, without stretching, wrinkling or changing its shape.

PRODUCT LOCK (absolute rules):

- Use the exact t-shirts from the reference image with 100% fidelity.
- Do not change colors, logo, text, icon, fabric, fit, proportions or any visible detail.
- Do not redesign, stylize, stretch, deform or reinterpret the shirts in any way.
- Each t-shirt must stay perfectly identical in shape and appearance at all times.

Style: ultra-photorealistic, clean commercial product video, soft natural lighting, high detail.
8-second vertical video (9:16). Camera stays completely stable. No text, no subtitles, no watermark.

POV | Perfume na penteadeira

Copiar prompt de vídeo sem fala – Create an ultra-photorealistic vertical image (9:16) showing the EXACT perfume from the attached reference image being naturally picked up and held by ONE adult feminine hand in a true first-person POV.

ABSOLUTE PRODUCT PRIORITY:

The attached perfume reference is the ONLY source of truth.

Reproduce the EXACT perfume with maximum visual fidelity.

Do NOT redesign, reinterpret, beautify, simplify, correct or modify the perfume in any way.

Preserve EXACTLY:

- bottle shape
- bottle proportions
- bottle height and width
- glass structure
- glass thickness
- transparency
- liquid color
- perfume color
- cap shape
- cap size
- cap material
- nozzle
- spray mechanism
- label
- typography
- logo
- logo position
- text
- graphics
- decorative elements
- reflections

- finish
- texture
- all visible details

If a detail is not visible in the reference, DO NOT invent it.

The perfume must remain instantly recognizable as the EXACT same product.

MAIN ACTION — NATURAL PICKUP:

The perfume is resting naturally on a realistic surface such as a bedroom vanity, dresser or bathroom counter.

One adult feminine hand naturally reaches toward the perfume and picks it up.

The action should look spontaneous and effortless, like a real woman casually picking up her perfume.

ACTION:

1. The perfume starts resting naturally on the surface.
2. One feminine hand enters the frame naturally.
3. The fingers gently wrap around the perfume bottle according to its REAL shape and size.
4. The hand lifts the perfume naturally from the surface.
5. The perfume is brought slightly closer to the camera.
6. The hand naturally holds the perfume in front of the camera.
7. The front label remains facing the camera whenever physically possible.
8. The final position feels like someone casually showing the perfume they just picked up.

Do NOT make the hand pose like a commercial model.

Do NOT squeeze the bottle.

Do NOT rotate the perfume unnecessarily.

Do NOT turn the perfume upside down.

Do NOT shake the perfume.

Do NOT toss or throw the perfume.

Do NOT make exaggerated movements.

HAND — FEMININE WITH LONG RED NAILS:

- One adult feminine hand only
- Natural feminine hand proportions
- Long, elegant fingernails
- Nails painted vivid classic red
- Realistic glossy red nail polish
- Natural nail shape
- Realistic skin texture

- Visible natural pores
- Subtle skin imperfections
- Anatomically correct fingers
- Natural wrist and forearm

The fingers must naturally adapt to the real shape of the perfume.

The red nails should be clearly visible but must NOT cover the main label or important product details.

No rings.

No bracelets.

No watch.

No tattoos.

Only ONE hand.

PRODUCT + HAND INTERACTION:

The grip must feel physically real.

The fingers must touch the actual bottle surface.

The bottle must have realistic weight.

The hand must support the perfume correctly.

No floating product.

No fingers passing through the bottle.

No fingers merging with the glass.

No distorted reflections caused by the hand.

No deformation of the bottle.

No change in bottle geometry.

The perfume must remain rigid and physically stable.

ENVIRONMENT:

Use a realistic Brazilian bedroom vanity or dresser appropriate for a perfume.

The environment should feel:

- Brazilian
- middle-class
- clean
- organized
- lived-in
- realistic

- feminine
- natural

Include subtle realistic elements such as:

- vanity surface
- mirror partially visible
- small beauty items
- cosmetics
- neutral decor
- bedroom elements

Keep everything secondary.

The perfume must remain the visual hero.

LIGHTING:

Soft natural daylight coming from a nearby window.

Realistic indoor ambient light.

Preserve the EXACT original perfume colors.

Do not use colored lighting.

Do not change the liquid color.

Do not change the glass appearance.

Do not overexpose the label.

Realistic glass reflections and shadows.

CAMERA:

- Vertical 9:16
- iPhone 15 Pro Max rear camera look
- 24mm wide-angle feel
- True first-person POV
- Natural handheld smartphone perspective
- Camera approximately at chest/waist level
- Slight natural handheld micro-movement
- No dramatic camera movement
- No zoom
- No fisheye
- No excessive lens distortion

FOCUS:

Priority 1 — EXACT perfume

Priority 2 — label and branding

Priority 3 — feminine hand and red nails

Priority 4 — realistic environment

The perfume must remain sharp and readable.

No artificial blur over the product.

No focus pulsing.

No excessive bokeh.

REALISM:

The final image must look like an authentic smartphone photograph captured by a real woman in her home.

Use:

- realistic skin texture
- realistic glass reflections
- realistic shadows
- realistic hand anatomy
- realistic product weight
- realistic depth
- realistic environmental imperfections
- natural smartphone dynamic range

No beauty filter.

No artificial skin smoothing.

No CGI appearance.

NO PRODUCT MODIFICATION:

The perfume must NOT:

- change color
- change shape
- change size
- change proportions
- change label
- change logo
- change typography
- change cap
- change nozzle
- change liquid
- gain additional details
- lose existing details
- become more luxurious
- become cleaner than the reference
- become a different perfume

NEGATIVE PROMPT:

different perfume, generic perfume bottle, altered bottle, redesigned bottle, changed bottle shape, changed proportions, changed color, changed liquid color, changed cap, changed nozzle, changed label, changed logo, fake logo, invented typography, unreadable label, missing details, extra details, distorted bottle, warped glass, melted bottle, bent bottle, oversized bottle, undersized bottle, floating bottle, transparent hand, fingers through bottle, merged fingers, deformed hand, extra fingers, missing fingers, male hand, masculine hand, short nails, unpainted nails, different nail color, black nails, multiple hands, rings, bracelets, watch, tattoo, face, full body, mirror selfie, exaggerated pose, commercial modeling pose, CGI, 3D render, illustration, plastic skin, artificial reflections, harsh flash, oversaturated colors, excessive blur, extreme bokeh, fisheye, camera distortion, watermark, text overlay

FINAL RESULT:

A highly realistic Brazilian POV lifestyle photograph of an adult woman naturally picking up the EXACT perfume from the reference with ONE feminine hand featuring long red nails, gently lifting it from a vanity and naturally presenting it toward the camera. The action must feel spontaneous and real, while the perfume remains completely unchanged and 100% faithful to the reference.

Copiar prompt de imagem – ultra realistic image of a woman wearing earrings, natural appearance, minimal makeup, visible skin texture and imperfections

earrings clearly visible on one or both ears, correct scale and physically attached

natural hair partially framing the face without hiding the earrings completely

environment: home interior (bedroom, closet or dressing space), neutral tones, slightly lived-in

lighting: natural window light, soft shadows and realistic highlights

camera: 85mm lens, shallow depth of field

style: natural lifestyle photo, not studio, not overproduced

negative: plastic skin, perfect face, CGI look, floating earrings, exaggerated glow

Copiar prompt de vídeo sem fala — front/side camera shot of a woman in a home environment, framed to show only one side of the face with the earring visible

the other side of the face must remain hidden throughout the entire video

the earring must remain identical in all frames, preserving exact design and scale

the head remains stable with minimal movement, no turning or revealing the second ear

action: subtle natural expression and very slight head movement, keeping the earring always visible

hair naturally covering the opposite side

focus locked on the earring, shallow depth of field

lighting: natural window light, stable highlights

camera: fixed angle, no movement, no zoom

background sounds: subtle ambient

music: minimal soft instrumental

"4.0-6.0s: Switches hands and points down with the other, maintaining a fun and energetic expression. Small rhythmic shoulder bounce.",

"6.0-8.0s: Final pose pointing down with both hands, big smile, holding still and steady."

**same category,
same quantity,
same size,
same proportions,
same shape,**

same colors,
same materials,
same packaging,
same branding,
same legitimate printed text,
same graphics,
same labels,
same closures,
same functional components,
and the same visible construction details.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, or invent any product detail.

Generate the exact attached product, not a similar variation.

PLACEMENT:

Choose one physically appropriate support according to the product:

a Brazilian home kitchen counter,
a clean wooden table,
a stone countertop,
a pet-shop checkout counter,
a grooming station,
or another realistic bench appropriate to the product.

The product must rest naturally on the surface with:

correct scale,
believable weight,
stable support,
realistic material texture,
natural packaging folds when applicable,
accurate reflections,
coherent contact shadows,
and physically correct perspective.

Do not make the product float, tilt without support, appear pasted onto the surface, or look artificially rigid.

COMPOSITION:

Keep the exact product as the unmistakable main subject.

Use a natural three-quarter frontal angle that clearly shows its shape, depth, packaging, label, or main functional area.

The background must remain secondary, organized, and visually calm.

Do not add hands, people, pets, or additional product units.

BRAZILIAN ENVIRONMENT:

Use a real Brazilian middle-class comfortable home or accessible-premium pet shop.

The environment must feel:

**clean,
organized,
functional,
attractive,
real,
lived-in,
and commercially useful without appearing luxurious.**

Use finished walls, practical proportional furniture, clean ceramic, porcelain, stone, laminate, or light wood surfaces, natural daylight or believable commercial ambient lighting, and restrained decoration.

CAMERA:

Shot as if captured with an iPhone 15 Pro or a similar modern smartphone.

Vertical 9:16.

24mm to 28mm equivalent main camera.

Standard photo mode.

Natural handheld framing.

Broad readable focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle smartphone processing.

No portrait mode.

No strong background blur.

No artificial bokeh.

No excessive HDR.

CLEAN FRAME:

Legitimate branding, text, graphics, and illustrations may remain only when physically printed on the exact product.

Outside the product itself, generate no added:

**text,
letters,
numbers,
logos,
symbols,
icons,
captions,
stickers,
price graphics,
social-media interface,
camera controls,
promotional banners,
or watermarks.**

NEGATIVE CONSTRAINTS:

**no altered product,
no similar replacement product,
no duplicated product,
no extra product units,
no changed packaging,
no changed branding,
no distorted label,
no invented text,
no people,
no hands,
no pets,
no floating object,
no artificial studio,**

no CGI,
no 3D render,
no collage effect,
no text overlays,
no watermark,
no borders.

FINAL OUTPUT:

One clean ultra-realistic vertical iPhone-style photograph of the exact attached pet product naturally resting on a real counter, table, or bench inside an appropriate Brazilian home or accessible-premium pet shop, with complete product fidelity, correct physical support, and natural commercial realism.

Copiar prompt de vídeo sem fala - **Use the uploaded first frame as an immutable visual anchor and the exclusive source of truth for the pet product, surface, environment, lighting, camera angle, and composition.**

Create an 8-second ultra-photorealistic vertical smartphone B-roll video of the exact pet product naturally positioned on a real counter, table, or bench.

FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

One continuous uninterrupted take.

No cuts.

No transitions.

No scene changes.

ABSOLUTE PRODUCT LOCK:

Preserve the exact product throughout every frame:

same category,
same quantity,
same dimensions,
same proportions,
same shape,

same colors,
same materials,
same packaging,
same branding,
same legitimate printed text,
same graphics,
same labels,
same closures,
same functional components,
same visible folds,
and the same construction details.

Treat the product as a real physical object already represented correctly in the uploaded first frame.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, complete, or reconstruct it.

Do not reveal hidden sides or invent unseen details.

The product must not morph, change size, rotate independently, change label, gain parts, lose parts, or move from its original support.

PRODUCT POSITION:

The product remains stationary and fully supported by the same counter, table, or bench throughout the video.

Maintain realistic:

weight,
surface contact,
material texture,
packaging folds,
reflections,
friction,
contact shadows,
and perspective.

Do not lift, touch, open, squeeze, rotate, or reposition the product.

CAMERA ACTION:

Begin with the exact framing of the uploaded first frame.

Perform one slow and subtle handheld movement:

**a gentle push-in toward the product,
combined with a very small lateral drift of only a few centimeters.**

The movement may reveal slightly more depth, surface texture, packaging thickness, or one visible functional detail without exposing hidden sides.

Maintain the same visible product face and camera axis.

Do not orbit around the product.

Do not use aggressive zoom.

Do not change lenses.

Do not move close enough to force reconstruction of the label or unseen geometry.

ENVIRONMENT:

Preserve or create an appropriate Brazilian setting consistent with the first frame:

**a home kitchen counter,
a clean wooden table,
a stone countertop,
a pet-shop checkout counter,
a grooming station,
or another realistic commercial or domestic support.**

The environment must feel:

**Brazilian,
clean,
organized,
functional,
comfortable,
realistic,
and commercially attractive without appearing luxurious.**

The background must remain stable, secondary, and visually calm.

CAMERA QUALITY:

Shot as if recorded with an iPhone 15 Pro or a similar modern smartphone.

24mm to 28mm equivalent main camera.

Standard smartphone video mode.

Broad natural focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle handheld micro-movement.

Restrained smartphone processing.

No portrait mode.

No cinematic artificial depth simulation.

No strong bokeh.

No excessive motion blur.

No fake HDR.

TEMPORAL CONSISTENCY:

Every frame must preserve the same:

**product identity,
product geometry,
packaging,
branding,
printed text,
graphics,
surface position,
environment layout,
lighting direction,
white balance,
focus behavior,
and exposure.**

The product must not morph.

The background must not change, multiply, disappear, or transform.

CLEAN FRAME:

Legitimate branding and text may remain only when physically printed on the exact product.

Outside the product itself, generate no:

floating text,
captions,
symbols,
icons,
hearts,
arrows,
stickers,
social-media interface,
camera controls,
price graphics,
promotional banners,
or watermarks.

AUDIO:

Natural synchronized room or store ambience only.

Include subtle:

indoor room tone,
distant household or store ambience,
and faint environmental sound appropriate to the location.

No dialogue.

No voice-over.

No music.

No artificial transition sounds.

NEGATIVE CONSTRAINTS:

no product movement,
no product rotation,
no product morphing,
no altered packaging,
no changed branding,
no changed printed text,

**no label drift,
no duplicated product,
no extra product units,
no people,
no hands,
no pets,
no floating object,
no scene change,
no CGI,
no 3D render,
no collage effect,
no subtitles,
no captions,
no text overlays,
no watermark,
no borders,
no glitch effects.**

FINAL OUTPUT:

One continuous 8-second ultra-realistic vertical iPhone-style B-roll video of the exact attached pet product resting naturally on a real counter, table, or bench inside an appropriate Brazilian environment, using only a subtle camera approach while preserving complete product identity and physical stability.

Copiar prompt de imagem - **UNIVERSAL OUTDOOR FURNITURE VIDEO PROMPT —
FUNCTIONALITY + B-ROLL / MAX FIDELITY / COMFORTABLE BRAZILIAN
MIDDLE-CLASS REALISM**

Use the attached outdoor furniture image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT outdoor furniture inside a real comfortable Brazilian middle-class outdoor area, covered varanda, balcony, finished backyard, garage patio, modest gourmet corner or functional

home exterior environment, highlighting its functionality, real scale, material and tactile details through mandatory B-roll cuts.

The furniture must remain visually identical to the reference during the entire video: same shape, same color, same dimensions, same proportions, same wood, metal, aluminum, rattan, wicker, rope, fabric, canvas, glass, stone, plastic, cushions, legs, arms, table top, frame, umbrella canopy, pole, base, ribs, seams, texture, finish and visible details. Do not redesign, replace, morph, recolor, simplify or alter the product.

IMPORTANT EDITING RULE:

This video **MUST** include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO SHOT:

Show the exact outdoor furniture naturally placed in a comfortable Brazilian middle-class outdoor area. The product is sharp, correctly scaled, physically present and clearly visible. The environment confirms real size and functional use without stealing focus.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of material and finish: wood grain, aluminum frame, metal joint, rattan weave, wicker texture, rope weave, outdoor fabric, cushion seam, stitching, tabletop edge, glass surface, stone texture, umbrella canvas, canopy rib, pole, crank, base, leg support or visible construction detail depending on the product type.

3s–4.5s — FUNCTIONALITY SHOT:

Cut to the furniture being used naturally according to its real function:

- chair being gently pulled or adjusted
- cushion being lightly pressed to show softness
- table being touched or used with a simple everyday object
- ombrelone being opened, adjusted, tilted or stabilized
- lounge chair being reclined or touched
- outdoor sofa seating detail being shown
- bench or set being naturally arranged

Human interaction may appear only as realistic hands if necessary. The movement must be physically believable, smooth and natural.

4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing a different important detail: edge finish, frame thickness, leg stability, cushion volume, fabric weave, stitching, screw/joint detail, table surface, umbrella base, canopy texture, pole connection, rattan pattern, material reflection or tactile surface quality.

6s–8s — FINAL HERO SHOT:

Return to a clean final hero shot of the furniture in the outdoor environment, stable, realistic and desirable, showing correct scale, functional placement and premium physical presence. The product must remain the clear focus.

SCENE:

Real comfortable Brazilian middle-class outdoor or semi-outdoor home area, clean, functional, organized, finished and lived-in. Covered varanda, organized balcony, finished backyard, clean garage patio, modest gourmet corner, service/outdoor area or semi-open home space. Ceramic, porcelain, polished cement, neutral outdoor tile, stone-like floor, painted walls, textured wall, clean tiled wall, glass sliding door, aluminum window, simple plants, wall lights, outdoor cabinet or practical home details may appear naturally.

The environment must feel like a real well-kept Brazilian home, not poor, not improvised, not abandoned, not luxury mansion and not a fake showroom.

BRAZILIAN COMFORTABLE MIDDLE-CLASS STYLE:

- good finishing
- clean surfaces
- organized layout
- realistic home maintenance
- pleasant outdoor atmosphere
- functional and human
- comfortable but not luxury
- no poverty look
- no unfinished construction
- no dirty cement backyard
- no broken walls
- no improvised area
- no abandoned area
- no luxury resort
- no mansion backyard
- no premium architectural showroom
- no foreign catalog look

AUTO-CONTEXT PLACEMENT:

Place the furniture naturally according to its function:

- table and chairs arranged with realistic spacing
- ombrelone placed through a table opening or with a proper weighted base
- lounge chair in a logical outdoor relaxation position
- outdoor sofa or armchair in a social seating area
- bench along a wall, garden corner or varanda
- balcony set with realistic walking clearance
- furniture must feel usable, stable, correctly supported and physically present

CAMERA:

Vertical 9:16.

iPhone 15 Pro Max realism.

24mm to 26mm natural wide-angle feel.

Smooth handheld or naturally stabilized movement.

Realistic depth of field.

Sharp product focus.

Natural smartphone optics.

No excessive blur.

No robotic motion.

No fake cinematic effects.

No CGI movement.

LIGHTING:

Real natural daylight or soft covered outdoor light.

Balanced exposure.

Realistic shadows.

Accurate material texture.

Natural highlights on wood, aluminum, metal, glass, fabric, canvas, rattan, wicker, rope, plastic, stone, tile and outdoor surfaces.

No harsh flash.

No overexposed sky.

No artificial studio lighting.

No HDR exaggeration.

No dramatic luxury lighting setup.

AUDIO:

No dialogue.

No voiceover.

Natural outdoor/home ambience only.

Subtle chair movement, fabric touch, cushion press, table contact, umbrella adjustment, metal joint, wood or surface sounds if applicable.

Optional soft minimal music at low volume.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not change color, geometry, fabric, frame, legs, arms, cushions, tabletop, canopy, pole, base, material or proportions.

Functional action must be physically realistic and product-specific.

No product morphing.

No fake showroom.

No poor or improvised setting.

No luxury mansion setting.

The product must remain visible and recognizable in every scene.

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, missing B-roll, altered furniture, changed design, wrong scale, giant furniture, miniature furniture, distorted geometry, warped table legs, warped chair legs, distorted cushion, changing fabric, changing frame, changing umbrella canopy, bent umbrella pole, product morphing, floating furniture, hands clipping through furniture, robotic motion, deformed hands, extra fingers, CGI, 3D render, cartoon, AI artifacts, fake outdoor area, poor backyard, unfinished construction, broken wall, dirty cement floor, improvised area, abandoned area, poverty look, luxury resort, mansion backyard, premium showroom, empty studio, harsh flash, overexposed sky, blurry product, soft image, oversaturated colors, inconsistent lighting, impossible shadows, cluttered area, product not in focus, missing parts, extra parts

Copiar prompt de vídeo sem fala - UNIVERSAL OUTDOOR FURNITURE VIDEO PROMPT — FUNCTIONALITY + B-ROLL / MAX FIDELITY / COMFORTABLE BRAZILIAN MIDDLE-CLASS REALISM

Use the attached outdoor furniture image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT outdoor furniture inside a real comfortable Brazilian middle-class outdoor area, covered varanda, balcony, finished backyard, garage patio, modest gourmet corner or functional home exterior environment, highlighting its functionality, real scale, material and tactile details through mandatory B-roll cuts.

The furniture must remain visually identical to the reference during the entire video: same shape, same color, same dimensions, same proportions, same wood, metal, aluminum, rattan, wicker, rope, fabric, canvas, glass, stone, plastic, cushions, legs, arms, table top, frame, umbrella canopy, pole, base, ribs, seams, texture, finish and visible details. Do not redesign, replace, morph, recolor, simplify or alter the product.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO SHOT:

Show the exact outdoor furniture naturally placed in a comfortable Brazilian middle-class outdoor area. The product is sharp, correctly scaled, physically present and clearly visible. The environment confirms real size and functional use without stealing focus.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of material and finish: wood grain, aluminum frame, metal joint, rattan weave, wicker texture, rope weave, outdoor fabric, cushion seam, stitching, tabletop edge, glass surface, stone texture, umbrella canvas, canopy rib, pole, crank, base, leg support or visible construction detail depending on the product type.

Copiar prompt de vídeo sem fala – **UNIVERSAL UGC VIDEO PROMPT — PRODUCT IN HAND / NEVER RELEASE**

Create an ultra-photorealistic vertical UGC video of a female influencer holding the exact product from the attached reference image in one hand while speaking in Brazilian Portuguese. Preserve the product with maximum fidelity: same

packaging, label, colors, logo placement, shape, cap, material, proportions, and all visible details.

The influencer holds the product naturally close to the camera and NEVER releases it during the entire video. The product must stay visible, stable, correctly scaled to the hand, and consistently the same in every frame. Natural human movement, authentic UGC style, realistic skin texture, correct hand anatomy, casual home or lifestyle environment, soft natural lighting, vertical 9:16, smartphone realism.

Anti-crash / negative prompt: product disappearing, product leaving frame, product passing through hand, floating product, hand clipping through product, altered packaging, changed label, fake logo, distorted text, product morphing, wrong scale, extra fingers, deformed hand, multiple hands, robotic movement, blurry product, CGI, cartoon, low quality, harsh lighting.

Technical parameters: model: veo-3, length: 8 seconds, resolution: 1080x1920, framerate: 24fps, aspect ratio: 9:16.

Copiar prompt de vídeo - **POV product showcase, ultra-realistic, 10 seconds, vertical 9:16, 4K, smartphone camera, soft natural lighting, premium e-commerce style.**

The camera remains completely stable in a true first-person POV. A pair of clean, well-groomed hands naturally enters the frame.

The lingerie set stays 100% identical to the reference image throughout the entire video. Do not alter the color, lace pattern, stitching, shape, hardware, straps, proportions, texture, elasticity, transparency, branding, labels or any design details.

Sequence:

0.0–2.5s – The hands gently glide over the bra with slow, natural movements, lightly tracing the lace and edges to highlight the fabric texture without covering important details.

2.5–5.0s – The hands immediately move to the panties, grasping both side straps and bringing them smoothly very close to the camera, filling most of the frame with the product while keeping it perfectly in focus.

5.0–6.5s – The hands gently stretch both sides of the panties once to demonstrate comfort and flexibility, then smoothly release the tension and place the panties back in their original position exactly as before.

6.5–8.5s – The hands repeat the same presentation with the bra, lifting it by both side straps toward the camera for a detailed close-up of the lace and construction.

8.5–10.0s – The hands gently stretch the bra once, showing light flexibility without deforming it, then release and carefully return it to its original position on the surface.

Maintain smooth natural hand movements, realistic physics, accurate fabric behavior, constant focus, no camera shake, no zoom, no cuts, no transitions, no added objects, no generated text, no watermark, no flickering, no anatomy errors, no duplicated fingers, no product deformation, and no background changes. The final result should look like a premium commercial product demonstration suitable for TikTok Shop and Shopee.

Embalagem pequena de ração ou produto PET em bancada

Copiar prompt de imagem – Use the attached image as the only and absolute reference for the pet product.

Create one ultra-realistic vertical 9:16 UGC-style iPhone photograph of the exact attached small pet food package or compact pet product naturally resting on a real table, kitchen counter, stone countertop, or wooden bench inside a comfortable Brazilian middle-class home.

The final image must look like a genuine casual smartphone photo taken by a real customer at home, not a professional studio advertisement, not CGI, and not a 3D render.

PRODUCT LOCK:

Preserve the exact product shown in the attached reference:

**same product category,
same quantity,
same size,
same proportions,
same packaging shape,
same colors,
same materials,
same branding,
same legitimate printed text,
same labels,
same graphics,
same seal,
same closures,
same folds,
same functional components,
and the same visible construction details.**

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, or invent any product detail.

Generate the exact attached product, not a similar variation.

Legitimate logos, text, illustrations, and graphics may remain only when physically printed on the exact product.

Do not duplicate, enlarge, extract, or place any part of the packaging artwork elsewhere in the scene.

PRODUCT SCALE:

Respect the real dimensions of the attached product.

A small food package, such as a 1 kg bag, must appear correctly scaled relative to the counter, furniture, and surrounding environment.

Do not make the product miniature, oversized, excessively inflated, rigid, empty, or unnaturally thick.

PRODUCT PLACEMENT:

Place the product naturally on one real household surface:

**a kitchen counter,
a dining table,
a stone countertop,
a wooden bench,
or another physically appropriate support.**

The product must remain fully supported by the surface.

Show realistic:

**weight,
bottom contact,
natural packaging folds,
subtle material tension,
correct perspective,
surface reflections,
and coherent contact shadows.**

The product must not float, tilt without support, appear pasted into the scene, or intersect with the counter.

UGC COMPOSITION:

Use a natural three-quarter frontal composition that clearly shows the main packaging face and the product's real depth.

The framing should feel casual and slightly imperfect, like a real customer quickly photographing the product at home.

Keep the product as the unmistakable main subject.

Do not add hands, people, pets, or extra product units.

BRAZILIAN HOME:

Use a real Brazilian middle-class comfortable home.

Choose a clean kitchen, dining area, pantry support area, or practical household counter with:

**finished neutral walls,
real cabinetry,
proportional furniture,
clean ceramic, porcelain, stone, laminate, or wood surfaces,
natural window daylight,
subtle ordinary household objects,
and restrained decoration.**

The environment must feel:

**Brazilian,
clean,
organized,
functional,
comfortable,
lived-in,
warm,
and naturally attractive without appearing luxurious.**

Do not create a mansion, fake showroom, artificial studio, luxury hotel kitchen, foreign-looking interior, unfinished area, or cluttered environment.

CAMERA:

Shot as if captured with an iPhone 15 Pro or a similar modern smartphone.

Vertical 9:16.

24mm to 28mm equivalent main camera.

Standard photo mode.

Natural handheld framing.

Broad readable focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle smartphone processing.

Slight natural asymmetry.

No portrait mode.

No extreme background blur.

No artificial bokeh.

No excessive HDR.

PHOTOGRAPHIC COHERENCE:

The product, counter, furniture, and room must share the same:

**lighting direction,
white balance,
perspective,
focus behavior,
exposure,
shadow softness,
reflections,
and photographic texture.**

The result must look like one genuine iPhone photograph captured in a single moment.

CLEAN FRAME:

**Outside legitimate text and branding physically printed on the exact product,
generate no added:**

**text,
letters,
numbers,
logos,
symbols,
icons,
captions,
stickers,
price labels,
social-media interface,
camera controls,
promotional graphics,
or watermarks.**

NEGATIVE CONSTRAINTS:

**no altered product,
no similar replacement product,
no duplicated product,
no extra product units,
no changed packaging,
no changed branding,
no distorted label,
no invented text,
no incorrect scale,
no floating package,
no rigid packaging,
no inflated packaging,
no pasted-in product,
no people,
no hands,
no pets,
no artificial studio,
no CGI,
no 3D render,
no collage effect,
no text overlays,
no watermark,
no borders.**

FINAL OUTPUT:

One clean ultra-realistic vertical UGC-style iPhone photograph of the exact attached small pet food package or compact pet product naturally resting on a real counter or table inside a comfortable Brazilian middle-class home, with complete product fidelity, realistic scale, natural packaging behavior, and authentic casual smartphone photography.

Copiar prompt de vídeo sem fala – Use the uploaded first frame as an immutable visual anchor and the exclusive source of truth for the pet product, supporting surface, environment, lighting, camera angle, and composition.

Create a 7-second ultra-photorealistic vertical UGC-style smartphone video of the exact small pet food package or compact pet product naturally resting on a real table or counter inside a comfortable Brazilian middle-class home.

Use the uploaded first frame as an immutable visual anchor and the exclusive source of truth for the pet product, supporting surface, environment, lighting, camera angle, and composition.

Create a 7-second ultra-photorealistic vertical UGC-style smartphone video of the exact small pet food package or compact pet product naturally resting on a real table or counter inside a comfortable Brazilian middle-class home.

The video must look like genuine casual iPhone footage recorded by a real customer at home, not a professional product commercial, not CGI, and not a 3D animation.

FORMAT:

Vertical 9:16.

7 seconds.

24 fps.

One continuous uninterrupted take.

No cuts.

No transitions.

No time jumps.

No scene changes.

ABSOLUTE PRODUCT LOCK:

Preserve the exact product shown in the uploaded first frame throughout every frame:

**same category,
same quantity,
same size,
same proportions,
same packaging shape,
same colors,
same materials,
same branding,
same legitimate printed text,
same labels,
same graphics,
same seal,
same closures,
same folds,
same functional components,
and the same visible construction details.**

Treat the product as a real physical object already represented correctly in the uploaded first frame.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, complete, reconstruct, or reinterpret it.

Do not reveal hidden sides or invent unseen details.

The packaging must not morph, inflate, deflate, change label, change text, lose details, gain parts, or alter its shape during the video.

PRODUCT POSITION:

The product remains stationary and fully supported by the same counter, table, or bench throughout the video.

Maintain realistic:

**weight,
surface contact,
packaging folds,
material tension,
friction,
reflections,
contact shadows,
and perspective.**

Do not lift, rotate, open, squeeze, crush, drag, or reposition the product.

HUMAN INTERACTION:

One real adult human hand may briefly enter the frame and perform one subtle action:

**lightly touch the side of the package,
gently touch the top edge,
or softly place two fingertips against one visible surface.**

The hand must not lift, rotate, squeeze, open, cover the main label, or deform the product.

The hand may remain outside the frame when a cleaner product-only result is more coherent with the uploaded first frame.

When visible, show exactly one hand with:

**five anatomically correct fingers,
natural nails,
realistic skin texture,
believable joints,
subtle pores,
and coherent contact shadows.**

CAMERA ACTION:

Begin with the exact framing and camera angle of the uploaded first frame.

Perform a very slow natural handheld approach of only a few centimeters.

Add a subtle lateral drift to reveal the product's real thickness, packaging texture, folds, and surface contact.

Maintain the same visible packaging face and camera axis.

Do not orbit around the product.

Do not reveal the opposite side.

Do not use aggressive zoom.

Do not change lenses.

Do not move close enough to force reconstruction of printed text or hidden packaging geometry.

BRAZILIAN HOME:

Preserve or create a real Brazilian middle-class comfortable home consistent with the first frame.

Use a clean:

**kitchen counter,
dining table,
stone countertop,
wooden bench,
or pantry support area.**

Include:

**finished neutral walls,
real cabinetry,
proportional furniture,
clean household surfaces,
natural window daylight,
subtle everyday objects,
and restrained decoration.**

The environment must feel clean, organized, functional, warm, lived-in, and naturally attractive without appearing luxurious or staged.

CAMERA QUALITY:

Shot as if recorded with an iPhone 15 Pro or a similar modern smartphone.

24mm to 28mm equivalent main camera.

Standard smartphone video mode.

Natural handheld framing.

Broad readable focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle sensor texture.

Restrained smartphone processing.

Slight authentic handheld micro-movement.

No portrait mode.

No cinematic artificial depth simulation.

No strong bokeh.

No artificial product isolation.

No excessive motion blur.

No fake HDR.

TEMPORAL CONSISTENCY:

Every frame must preserve the same:

product identity,

packaging geometry,
colors,
branding,
printed text,
graphics,
folds,
surface position,
hand anatomy when present,
environment layout,
lighting direction,
white balance,
focus behavior,
and exposure.

The product must not morph.

The hand must not morph.

The supporting surface and background must not change, multiply, disappear, or transform.

CLEAN FRAME:

Legitimate branding and text may remain only when physically printed on the exact product.

Outside the product itself, generate no:

floating text,
captions,
symbols,
icons,
hearts,
arrows,
stickers,
social-media interface,
camera controls,
price graphics,
promotional banners,

or watermarks.

AUDIO:

Natural synchronized home ambience only.

Include subtle:

**household room tone,
faint distant Brazilian neighborhood ambience,
minor package contact sound when the hand touches it,
and soft natural surface sound.**

No dialogue.

No voice-over.

No music.

No artificial transition sounds.

NEGATIVE CONSTRAINTS:

**no altered product,
no product morphing,
no changed packaging,
no changed branding,
no changed printed text,
no label drift,
no duplicated product,
no extra product units,
no floating package,
no product movement,
no lifting,
no opening,
no squeezing,**

**no aggressive rotation,
no deformed hand,
no extra fingers,
no second visible hand,
no people,
no pets,
no scene change,
no CGI,
no 3D render,
no collage effect,
no subtitles,
no captions,
no text overlays,
no watermark,
no borders,
no glitch effects.**

FINAL OUTPUT:

One continuous 7-second ultra-realistic vertical UGC-style iPhone video of the exact attached small pet food package or compact pet product resting naturally on a real Brazilian home counter or table, with a subtle handheld camera approach, optional gentle fingertip contact, complete packaging fidelity, realistic physical support, and no visual drift.

The video must look like genuine casual iPhone footage recorded by a real customer at home, not a professional product commercial, not CGI, and not a 3D animation.

FORMAT:

Vertical 9:16.

7 seconds.

24 fps.

One continuous uninterrupted take.

white balance,
focus behavior,
and exposure.**

The product must not morph.

The hand must not morph.

The supporting surface and background must not change, multiply, disappear, or transform.

CLEAN FRAME:

Legitimate branding and text may remain only when physically printed on the exact product.

Outside the product itself, generate no:

**floating text,
captions,
symbols,
icons,
hearts,
arrows,
stickers,
social-media interface,
camera controls,
price graphics,
promotional banners,
or watermarks.**

AUDIO:

Natural synchronized home ambience only.

Include subtle:

**household room tone,
faint distant Brazilian neighborhood ambience,
minor package contact sound when the hand touches it,
and soft natural surface sound.**

No dialogue.

No voice-over.

No music.

No artificial transition sounds.

NEGATIVE CONSTRAINTS:

**no altered product,
no product morphing,**

**no changed packaging,
no changed branding,
no changed printed text,
no label drift,
no duplicated product,
no extra product units,
no floating package,
no product movement,
no lifting,
no opening,
no squeezing,
no aggressive rotation,
no deformed hand,
no extra fingers,
no second visible hand,
no people,
no pets,
no scene change,
no CGI,
no 3D render,
no collage effect,
no subtitles,
no captions,
no text overlays,
no watermark,
no borders,
no glitch effects.**

FINAL OUTPUT:

One continuous 7-second ultra-realistic vertical UGC-style iPhone video of the exact attached small pet food package or compact pet product resting naturally on a real Brazilian home counter or table, with a subtle handheld camera approach, optional gentle fingertip contact, complete packaging fidelity, realistic physical support, and no visual drift.

Copiar prompt de imagem– UNIVERSAL POV FOOTWEAR IMAGE PROMPT — SHOE IN HAND / MAX FIDELITY / PHOTOREALISM / HUMAN NATURAL LOOK

Create an ultra-photorealistic vertical image (9:16) showing the EXACT footwear from the attached reference image being held in a natural first-person POV. The footwear must remain absolutely identical to the reference, with zero redesign, zero variation, and maximum visual consistency.

ABSOLUTE PRIORITY:

Use the attached footwear as the single source of truth.

Do not redesign, reinterpret, replace, stylize, improve, simplify, or alter the shoe in any way.

PRESERVE EXACTLY:

- exact footwear model
- exact shape and silhouette
- exact color
- exact leather / fabric / material appearance
- exact stitching
- exact sole shape and thickness
- exact toe shape
- exact heel shape
- exact laces / eyelets / straps / buckles
- exact proportions
- exact finish and wear level
- exact texture and all visible design details
- exact branding placement if visible

MAIN SCENE:

A realistic human hand is holding the exact footwear close to the camera in a first-person POV composition, as if the person is naturally showing the shoe to the viewer. The footwear is the absolute hero of the frame.

POV RULES:

- first-person POV feeling
- only one hand visible holding the shoe naturally
- a small part of the forearm may appear
- no face
- no full body
- no mirror selfie
- no extra person
- no distracting gestures
- the shoe must stay clearly visible and unobstructed

HAND REALISM:

The hand must look fully human, real, and natural:

- realistic anatomy
- correct number of fingers
- natural joints and grip
- realistic nails
- visible skin pores

- subtle veins
- natural skin folds
- real micro skin texture
- realistic palm and finger pressure on the shoe
- no beauty-filter look
- no waxy skin
- no AI-looking hand
- no extra fingers
- no deformities
- no fused fingers
- no broken wrist
- no warped forearm

PRODUCT SCALE RULE:

The shoe must have the correct real-world scale relative to the hand.

It must not look too large or too small.

The grip must match the actual dimensions and weight of the footwear naturally.

ENVIRONMENT:

Place the scene in a realistic, functional, believable environment that suits footwear naturally.

The background should be softly blurred and secondary, while still looking real and human.

Examples of suitable environments:

- bedroom corner
- sofa area
- armchair or chair
- closet area
- shoe store setting
- clean home interior
- neutral masculine or unisex room
- functional lifestyle setting

The environment must be:

- real
- photorealistic
- human
- natural
- functional
- clean but lived-in
- believable
- without AI-looking artifacts
- without fake studio feel unless very subtle
- softly secondary to the product

FOCUS:

The main focus must be the footwear.

The camera should emphasize:

- shape
- craftsmanship
- stitching
- material texture
- sole
- finish

- silhouette
- side profile
- front details if visible

STYLE:

- ultra-photorealistic
- no AI look
- no synthetic surfaces
- no illustration feel
- no CGI feel
- realistic smartphone or premium lifestyle photo
- natural depth of field
- crisp focus on the shoe
- subtle background blur
- premium but organic social-media realism
- human and authentic visual language

LIGHTING:

- soft natural or soft indoor lighting
- balanced exposure
- realistic shadows
- realistic reflections on leather, fabric, or rubber
- no harsh flash
- no blown highlights
- no exaggerated cinematic effects
- no fake overprocessed HDR
- natural skin tones
- realistic material rendering

COMPOSITION:

- vertical 9:16
- shoe centered or slightly off-center naturally
- hand holding the shoe in a believable position
- background visible but secondary
- keep the shoe fully readable
- do not crop important footwear details
- keep the product as the visual hero

STRICT RULES:

- do not change the footwear
- do not change the color
- do not change the material
- do not change the sole
- do not change the stitching
- do not generate a generic shoe
- do not create another similar model
- do not add random embellishments
- do not distort the proportions
- do not make the hand cover the important details
- do not create an unrealistic pose
- do not create artificial or "AI" looking skin
- do not create a fake showroom look unless subtle and believable

ANTI-BUG / NEGATIVE PROMPT:

changed shoe, altered footwear, different shoe model, inconsistent shape, changed color, changed leather, changed stitching, changed sole, changed laces, fake shoe, generic footwear, wrong proportions, oversized shoe, undersized shoe, floating shoe, deformed hand, extra fingers, fused fingers, broken wrist, warped arm, fake skin, waxy skin, plastic skin, CGI, 3D render, cartoon, illustration, AI artifacts, overprocessed image, low quality, blurry shoe, blurry hand, distorted texture, cluttered background, visible face, visible body, multiple hands, duplicate shoe, bad anatomy, unrealistic grip, harsh flash, oversaturated colors, fake reflections

**Copiar prompt de vídeo sem fala – UNIVERSAL POV FOOTWEAR VIDEO PROMPT —
SHOE IN HANDS / NO TALKING / MAX CONSISTENCY / ULTRAREALISM /
ANTI-CRASH**

Use the attached reference image as the absolute visual source for the footwear. Create an ultra-photorealistic vertical POV video where the exact footwear is shown to the camera by realistic human hands, with no talking and no visible person beyond the hands and a small part of the forearms.

ABSOLUTE PRIORITY:

The footwear must remain visually identical to the attached reference during the entire video.

Do not redesign, reinterpret, replace, stylize, or alter the shoe in any way.

PRESERVE EXACTLY:

- exact shoe / boot model
- exact shape and silhouette
- exact color
- exact leather / fabric / material appearance
- exact stitching
- exact toe shape
- exact sole shape and thickness
- exact laces / eyelets / straps / buckles
- exact texture and finish
- exact proportions
- exact visible branding if present
- exact left/right pair consistency if both shoes appear

SUBJECT:

The footwear is the absolute hero of the video. Only the shoe or pair of shoes is shown to the camera in a first-person POV style. Only the hands and a small part of the forearms may appear. No face, no full body, no torso focus, no hands covering important details too much.

ACTION:

First-person POV video. One or two realistic human hands naturally hold the footwear and present it to the camera in a calm, human, believable way.

The motion is subtle and organic:

- gently lifting the shoe
- slightly rotating it
- softly tilting it
- lightly adjusting the angle
- briefly showing the side, front, sole edge, and upper
- always keeping the footwear readable and visually clear

The movement must feel natural and controlled, like someone calmly showing the product to the viewer.

No exaggerated turning.

No shaking.

No fast motion.

No throwing.

No passing from hand to hand in a chaotic way.

IMPORTANT FRAMING RULES:

- POV / first-person feel
- show only the footwear and the hands
- no face
- no upper body
- no mirror selfie
- no extra person
- keep the footwear centered or slightly off-center naturally
- keep the product in frame at all times
- keep the main visible side of the footwear clear
- do not crop the shoe awkwardly
- if only one shoe is shown, it must stay consistent in every frame
- if both shoes appear, they must be an identical matching pair

CAMERA MOVEMENT:

The camera remains mostly stable and performs a subtle natural push-in / soft zoom toward the footwear during the clip.

The zoom must feel premium and smooth, helping emphasize:

- material texture
- stitching
- toe shape
- sole details
- craftsmanship
- silhouette

ENVIRONMENT:

Use a realistic neutral environment that suits any footwear:

- clean indoor room
- sofa area
- bedroom corner
- chair or bench area
- neutral home background
- subtle showroom-like corner if needed, but still realistic

The background must be secondary, softly blurred, clean, believable, and non-distracting.

STYLE:

Ultra-photorealistic vertical video, realistic smartphone or premium social-media product presentation, authentic human movement, subtle cinematic realism, soft depth of field, detailed material rendering, commercial product clarity, clean and elegant composition.

LIGHTING:

- soft natural or indoor warm-neutral lighting
- balanced exposure
- realistic shadows
- clear visibility of the shoe details
- no harsh flash
- no blown highlights
- no overly dark scene
- realistic leather / fabric reflections
- premium but natural look

DIALOGUE:

No dialogue.

No voiceover.

No talking.

BACKGROUND SOUNDS:

Soft ambient room tone only.

Optional subtle product handling sound.

MUSIC:

Optional minimal soft background music, very low volume, elegant and secondary.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

STRICT CONSISTENCY RULES:

- keep the exact same footwear throughout the entire clip
- do not morph the shoe
- do not change the color between frames
- do not change the leather texture
- do not change the laces or sole
- do not generate a generic shoe
- do not switch to another model
- keep pair consistency perfect if two shoes are visible
- maintain realistic scale relative to the hands
- preserve all visible design details from the reference

ANTI-CRASH / NEGATIVE PROMPT:

changed shoe, different footwear between frames, shoe morphing, altered shape, altered color, altered leather, altered sole, altered laces, inconsistent pair, wrong proportions, oversized shoe, undersized shoe, fake shoe, generic shoe, extra shoes, extra hands, extra fingers, fused fingers, deformed hands, broken wrists, warped forearms, visible face, visible body, selfie, mirror reflection, shaky camera, aggressive movement, fast spin, blurry footwear, cropped shoe, low quality, CGI, 3D render, cartoon, illustration, distorted sole, melted leather, floating shoe, unrealistic grip, inconsistent lighting, oversaturated colors, cluttered background, bad anatomy, product leaving frame, unreadable details, frame inconsistency

}

Copiar prompt de imagem— Hyper-realistic POV style jewelry photography, first-person point of view.

Looking down at a soft, fluffy plush fabric surface in a beautiful and elegant setting. The exact jewelry kit from the reference image is carefully placed on the fluffy cloth, centered in the frame.

Soft, luxurious lighting with gentle highlights reflecting on the stones and metal. The background is dreamy and refined, with subtle elegant elements that enhance the scene without distracting from the jewelry. Shallow depth of field, premium and romantic atmosphere.

PRODUCT LOCK (absolute rules):

- Use the exact jewelry kit from the reference image with 100% fidelity.

- Do not change shape, size, proportions, colors, materials, stones, metal finish, arrangement, earrings or any visible detail.
- Do not redesign, stylize, improve or reinterpret the jewelry in any way.
- The product must remain perfectly identical and clearly identifiable.

Style: ultra-photorealistic, luxurious, soft and elegant, high-end jewelry campaign, delicate natural lighting, creamy tones, 8k quality, intimate POV shot on fluffy fabric.

Copiar prompt de vídeo sem fala — **macro cinematic shots of a diamond necklace with true material realism**

cuts:

- extreme close-up of stones with irregular sparkle
- chain sliding naturally over fabric
- single hand touching chain lightly

focus on:

light refraction variation

metal micro scratches

non-uniform reflections

lighting: directional natural light, dynamic highlights

style: high-end jewelry commercial, real optics behavior

background sounds: subtle metal friction

music: minimal piano

Copiar prompt de vídeo sem fala — UNIVERSAL POV VIDEO PROMPT — CLOTHING ON HANGER / NEVER LET GO / PRODUCT IDENTITY LOCK

Create an ultra-photorealistic vertical 9:16 first-person POV smartphone video of a clothing item hanging from a hanger and being naturally presented directly to the camera.

The provided reference image is the ABSOLUTE SOURCE OF TRUTH for the garment.

PRODUCT IDENTITY LOCK — HIGHEST PRIORITY:

If a reference garment is provided, reproduce the EXACT SAME garment throughout the entire video.

Preserve with maximum fidelity:

- exact color
- exact shape
- exact silhouette
- exact proportions
- exact fabric
- exact texture
- exact print
- exact pattern
- exact logo, ONLY if present in the reference
- exact collar
- exact neckline
- exact sleeves
- exact cuffs
- exact seams
- exact stitching
- exact buttons
- exact zippers
- exact pockets
- exact trims
- exact labels, ONLY if present
- exact length
- exact hem
- exact construction
- exact material behavior

DO NOT redesign, reinterpret, beautify, simplify, replace, add or remove any part of the garment.

The garment must remain IDENTICAL from the first frame to the final frame.

No details may appear, disappear, merge, move, or transform during the video.

SCENE:

A realistic indoor environment appropriate for presenting clothing, such as a bedroom, closet, dressing area, home wardrobe or authentic clothing store.

The environment should feel real, clean, functional and naturally lived-in.

Use realistic neutral colors and believable everyday materials.

The background remains secondary to the product and is softly out of focus.

Do not create an exaggerated luxury showroom or artificial studio environment unless the reference image specifically requires it.

PRODUCT PRESENTATION:

The garment hangs naturally from ONE simple realistic hanger.

The hanger remains physically connected to the garment throughout the entire video.

The clothing remains on the hanger from the first frame until the final frame.

The garment must remain fully visible and centered enough to clearly understand its design.

The hanger must never be released.

The hanger must never fall.

The garment must never be removed from the hanger.

The garment must never be folded.

The garment must never be placed on a surface.

The garment must never be returned to a clothing rack.

The garment must never leave the frame completely.

HAND INTERACTION:

ONE realistic adult human hand holds the hanger continuously throughout the entire video.

The hand remains physically connected to the hanger.

The hand must have anatomically correct proportions, natural joints, realistic skin texture, five clearly separated fingers and natural fingernails.

The hand performs only subtle, controlled movements.

The hand may gently raise the hanger slightly, make a tiny natural adjustment to its position, and then return to a relaxed stable position.

IMPORTANT:

Do NOT repeatedly reposition the hanger.

Do NOT rotate the hanger excessively.

Do NOT pull the garment.

Do NOT stretch the fabric.

Do NOT squeeze the clothing.

Do NOT grab the garment itself.

Do NOT cover important details of the product.

Do NOT move the hand across the front of the garment.

The hand should remain primarily around the hanger and never interfere with the garment's identity.

CAMERA MOVEMENT:

Authentic handheld smartphone POV.

The camera remains relatively stable and close to the person holding the garment.

Use extremely subtle natural handheld micro-movements.

The camera may make a very slow, minimal forward approach toward the garment during the video, as if the person is naturally bringing the phone slightly closer to show fabric details.

No dramatic camera movement.

No fast movement.

No camera orbit.

No 360-degree movement.

No sudden rotation.

No aggressive zoom.

No digital zoom.

No cinematic camera tricks.

IMPORTANT:

THE CAMERA MOVES SLIGHTLY.

THE HAND REMAINS HOLDING THE HANGER.

THE HANGER REMAINS IN THE HAND.

THE GARMENT REMAINS ON THE HANGER.

THE GARMENT DOES NOT CHANGE.

TIMELINE — 8 SECONDS:

0.0–2.0s:

Start with the garment already hanging naturally from the hanger and clearly visible. The hand is already holding the hanger. Stable first-person POV. The product is centered and readable.

2.0–4.0s:

The person makes a very subtle natural adjustment to the hanger position while continuing to hold it. The garment remains stable and fully attached to the hanger.

4.0–6.5s:

The camera slowly moves slightly closer to the garment, naturally revealing fabric texture, stitching, print, collar, sleeves and other visible details.

The hand remains relaxed and does not touch or pull the garment.

6.5–8.0s:

The movement gradually stops. Hold the garment naturally in front of the camera for the final moment.

The garment remains centered, stable, completely recognizable and fully visible.

FABRIC PHYSICS:

The clothing behaves exactly like real physical fabric.

Natural gravity.

Natural folds.

Natural drape.

Natural fabric weight.

Natural textile texture.

Only extremely subtle fabric movement caused by the small movement of the hanger is allowed.

The garment must NOT:

- morph
- stretch
- shrink
- inflate
- melt
- ripple unnaturally
- change shape
- change length
- change proportions
- change texture
- change print
- change color

The garment must never appear liquid, rubber-like, plastic or digitally generated.

COMPOSITION:

The clothing is the absolute visual priority.

Keep the garment centered or slightly centered in the frame.

Show enough of the garment to understand its complete silhouette.

Avoid cropping important areas.

Do not allow the garment to leave the frame.

The hanger and hand can be visible, but they must remain secondary to the clothing.

STYLE:

Ultra-photorealistic smartphone footage.

Authentic first-person POV.

Natural UGC fashion presentation.

Organic TikTok-style product demonstration.

Realistic human movement.

Realistic skin.

Realistic fabric.

Realistic indoor lighting.

Natural smartphone sharpness.

Subtle smartphone sensor noise.

Natural depth of field.

Clean but believable environment.

No exaggerated cinematic effects.

No artificial commercial look.

The result should look like a real person casually recording themselves showing a piece of clothing to the viewer.

LIGHTING:

Natural indoor lighting appropriate to the environment.

Soft, realistic illumination.

Accurate shadows.

Natural highlights on the fabric.

Balanced exposure.

Preserve the exact color of the reference garment.

Do not alter the garment's color because of lighting.

No artificial glow.

No extreme contrast.

No overexposure.

No oversaturation.

AUDIO:

No dialogue.

No voiceover.

No talking.

No speech.

No lip movement.

Only subtle realistic environmental sound.

Very soft hanger handling sounds.

Very subtle natural fabric rustling.

Light indoor room ambience.

MUSIC:

Optional minimal, elegant and subtle background music at very low volume.

Music must never overpower the natural environmental sounds.

TECHNICAL PARAMETERS:

Model: Veo 3

Duration: 8 seconds

Resolution: 1080x1920

Frame rate: 24fps

Aspect ratio: 9:16

ABSOLUTE RULES:

- 1. The garment stays on the hanger for the ENTIRE video.**
- 2. The hand NEVER releases the hanger.**
- 3. The hanger NEVER falls.**
- 4. The hanger NEVER leaves the hand.**
- 5. The garment is NEVER removed from the hanger.**

6. The garment is NEVER placed on a surface.
7. The garment is NEVER folded.
8. The hanger is NEVER returned to a rack.
9. The garment is NEVER replaced.
10. The garment is NEVER redesigned.
11. The garment NEVER changes color.
12. The garment NEVER changes shape.
13. The garment NEVER changes proportions.
14. The garment NEVER changes material.
15. The garment NEVER changes print or pattern.
16. No additional clothing is created.
17. No duplicate garment is created.
18. No additional hanger is created.
19. No additional hands are created.
20. The product remains clearly visible throughout the entire clip.
21. The hand remains anatomically correct.
22. The camera movement remains subtle and realistic.
23. No person or face needs to be visible.
24. The product remains the absolute visual priority.

NEGATIVE PROMPT:

letting go of hanger, releasing hanger, hanger falling, hanger dropping, hanger floating, removing garment from hanger, garment falling, garment slipping off hanger, folding garment, placing garment on table, placing garment on bed, placing garment on floor, hanging garment back on rack, returning hanger to rack, removing hanger, changing hanger, changing garment, replacing garment, duplicated garment, duplicate hanger, extra clothing, extra hands, extra fingers, missing fingers, six fingers, fused fingers, malformed fingers, deformed hand, twisted wrist, broken anatomy, floating hand, disconnected hand, unrealistic hand, hand covering garment, hand grabbing garment, hand pulling garment, hand stretching fabric, hand squeezing fabric, excessive hand movement, garment morphing, garment deformation, garment stretching, garment shrinking, garment melting, fabric distortion, fabric warping, changing print, changing pattern, changing color, changing texture, changing material, altered proportions, altered silhouette, altered sleeves, altered collar, altered neckline, altered seams, altered stitching, altered buttons, altered pockets, missing details, invented details, face, head, visible person, full body, human model, body parts, robotic movement, unnatural movement, shaky camera, excessive camera shake, fast camera movement, camera orbit, 360 camera, dramatic rotation, aggressive zoom, digital zoom, sudden perspective change, looping motion, CGI, 3D render, cartoon, illustration, plastic texture, fake fabric, artificial skin, beauty filter, excessive smoothing, blurry product, cropped garment, garment out of frame, low resolution, poor lighting, harsh lighting, overexposure, oversaturation, unrealistic shadows, AI artifacts, text overlay, subtitles, watermark

Copiar prompt de imagem — Use the uploaded hat image as the exact product reference.

Ultra-photorealistic first-person POV photo in **9:16 vertical format**, inside a cozy, elegant realistic bedroom, with a neatly made bed behind the hat. Only one feminine hand is visible, naturally holding the hat. The hand has five anatomically correct fingers, short glossy red nails and a delicate realistic ring, with natural skin texture and believable grip. Preserve the hat EXACTLY: shape, proportions, color, material, texture, stitching, seams, band, logo, details and original design. No redesign or distortion. Keep the entire hat visible and sharply focused. Soft natural window daylight, neutral warm tones, realistic shadows, authentic smartphone/lifestyle photography, natural colors, cinematic but unstylized. Background slightly defocused but clearly recognizable as a bedroom. No countryside, farm, field, fence, barn, rural landscape, face, second hand, extra fingers, distorted anatomy, altered product, CGI, illustration, artificial lighting, text or watermark.

Copiar prompt de vídeo sem fala — Use the uploaded image as the exact first-frame reference. Create an ultra-realistic vertical 9:16 smartphone UGC video. Preserve the EXACT hat, hand, red nails, ring, bedroom, lighting and composition from the reference with zero visual changes.

The feminine hand naturally holds the hat near the bed, then slowly lifts and slightly tilts it toward the camera, allowing the hat's shape, texture, stitching and details to remain clearly visible. Make one gentle rotation of the hat to reveal its material and construction, then return it naturally to the original position. Movements must be slow, smooth and physically realistic, with natural finger adjustments and believable grip pressure.

Maintain exactly five fingers, glossy red nails and the same ring throughout the entire video. Natural handheld smartphone micro-movements, realistic depth, soft daylight, authentic fabric/material physics and subtle environmental motion.

No face, no second hand, no speaking, no audio, no lip movement, no product deformation, no changes to the hat, no extra fingers, no changing nails or ring, no camera zoom, no fast movements, no CGI, no artificial motion, no text or watermark.

Movimento | Gancho Interação

Copiar prompt de vídeo – **Animate the subject as a REAL person presenting clothing in a POV-style video.**

🔥 START OF ANIMATION (UPDATED):

- The subject starts at a natural distance from the camera
 - She calmly takes two small, natural steps forward toward the camera
 - While approaching, she gently touches and lightly holds the bow/lace detail on the chest area
 - The gesture is delicate, subtle and realistic, like naturally showing a clothing detail
 - No emphasis, no posing, no exaggeration
 - The movement feels spontaneous and casual
 - After briefly touching the bow, she naturally releases it
 - She takes a small step back to her original position
 - a– Smooth transition into the rest of the animation
-

GENERAL MOTION STYLE:

- Natural, confident, fluid movements
 - Not static
 - Not exaggerated
 - Not robotic
 - x– Real human timing
-

BODY MOVEMENTS:

- One hand naturally rests on the waist
 - Gentle hip movement (side-to-side, very subtle)
 - One foot forward, the other relaxed behind
 - Natural posture, relaxed shoulders
-

CLOTHING PRESENTATION:

- Small, natural movements to highlight the outfit
 - Slight torso rotation to show fit and fabric
 - No aggressive posing
 - No fashion runway exaggeration
 - Movements feel spontaneous and casual
-

ADDITIONAL NATURAL GESTURE (VERY SUBTLE):

- After the main body movement sequence:
 - The subject briefly raises one hand
 - Lightly brushes her hair backward near the side of the head
 - The gesture lasts approximately one second
 - The motion is casual and unintentional, like a natural self-adjustment
 - No emphasis, no posing

- The hand immediately returns to a relaxed neutral position
-

FACIAL EXPRESSION (VERY IMPORTANT – REAL HUMAN TIMING):

- The subject does NOT smile continuously
 - Facial expression alternates naturally throughout the video
 - While approaching the camera:
 - Neutral, relaxed expression
 - Lips softly closed
 - Calm, confident look
 - During the bow/lace touch:
 - A brief, subtle smile appears
 - Smile is soft and natural, not exaggerated
 - Slight cheek movement only
 - After releasing the bow:
 - Expression returns to neutral
 - Relaxed face, natural breathing
 - Later in the animation:
 - She gently turns her head slightly to one side
 - A short, warm smile appears again
 - Smile lasts briefly, then fades naturally
 - Smile behavior:
 - Appears and disappears naturally
 - No frozen smile
 - No constant grin
 - No exaggerated facial tension
-

PERSONALITY:

- Sympathetic
 - Approachable
 - Comfortable
 - Feels like a real person casually recording a video
-

CAMERA & POV:

- POV perspective, as if the phone is held by a person
 - Very subtle handheld micro-movements
 - No camera shake
 - No zoom
 - Camera remains at chest/face height
-

TIMING:

- Movements are continuous
 - No freezing
 - No looping poses
 - Smooth transitions between gestures
-

REALISM RULES:

- Preserve original facial identity
- Preserve skin texture
- Preserve hair movement (slight natural motion)
- Natural fabric physics
- No beauty filters
- No smoothing
- No stylization

x————

RESTRICTIONS:

- No talking
- No text
- xa– No UI
- No effects
- No exaggerated dance
- No influencer posing clichés

FINAL RESULT:

A hyper-realistic POV fashion video where the subject feels alive and human, with natural facial expression changes, occasional soft smiles, neutral moments in between, and subtle head turns — indistinguishable from a real casual phone recording.

Ponto de vista | Bolsa em destaque sozinha

-Copiar prompt de imagem — UNIVERSAL IMAGE PROMPT — BAG ONLY / AUTOMATIC
BRAZILIAN SCENE SELECTION / ABSOLUTE PRODUCT FIDELITY / EXTREME PHOTOREALISM
/ NO PEOPLE / NO AI LOOK

Use the attached bag image as the only and absolute visual reference.

Create one ultra-photorealistic vertical 9:16 premium commercial photograph showing the EXACT attached bag naturally positioned inside a real Brazilian environment automatically selected according to the bag's category, style, size, material, and intended use.

Show no people, no hands, and no body parts.

The exact bag must remain the absolute visual hero.

CORE OBJECTIVE:

The final result must look like a real premium product photograph captured in a real Brazilian location.

It must communicate:

the bag's exact design;

real dimensions;
material quality;
functional volume;
construction quality;
style;
practical use;
and purchase desirability.

The viewer must feel that the exact advertised bag is physically present in the scene.

ABSOLUTE BAG LOCK — HIGHEST PRIORITY:

Preserve exactly:

the same bag category;
same quantity;
same model;
same dimensions;
same height;
same width;
same depth;
same proportions;
same silhouette;
same body shape;
same base shape;
same opening;
same flap;
same handles;
same handle count;
same handle length;
same shoulder strap;
same crossbody strap;
same strap width;
same strap length;
same strap attachments;
same buckles;
same rings;
same chains;
same hooks;
same zippers;
same zipper pulls;
same buttons;
same magnetic closures;
same clasps;
same pockets;
same pocket count;
same seams;
same stitching;
same piping;
same borders;
same panels;
same folds;

same pleats;
same decorative pieces;
same charms when included;
same feet;
same metal hardware;
same logos;
same branding;
same lettering;
same spelling;
same typography;
same label placement;
same prints;
same patterns;
same illustrations;
same colors;
same color distribution;
same materials;
same texture;
same grain;
same gloss level;
same finish;
same lining only when already visible;
and every visible construction detail.

Do not redesign the bag.

Do not replace it with a similar model.

Do not create a generic bag from the same category.

Do not recolor it.

Do not change its shape.

Do not change the strap.

Do not alter hardware color.

Do not add or remove pockets, handles, chains, charms, clasps, zippers, or accessories.

Do not mirror the logo.

Do not rewrite printed text.

Do not invent hidden interior details.

Do not duplicate the hero bag.

If the reference contains a set of bags, preserve the exact set and exact quantity.

AUTOMATIC BAG CATEGORY ANALYSIS:

Identify whether the product is:

a handbag;
tote bag;
shoulder bag;
crossbody bag;
satchel;
hobo bag;
clutch;
mini bag;
backpack;
travel bag;
work bag;
laptop bag;
beach bag;
children's bag;
sports bag;
cosmetic case;
or another carrying product.

Select a scene that naturally matches the exact product.

AUTOMATIC BRAZILIAN ENVIRONMENT:

Choose one real Brazilian environment appropriate to the bag's use and visual language.

Possible contexts include:

an organized bedroom dressing area;
a real wardrobe corner;
a clean living room;
a home-office area;
an entryway console;
a practical office;
a real accessible-premium clothing store;
a real accessories boutique;
a travel-preparation area;
a child bedroom for children's bags;
a beach-home or veranda context for beach bags;
a professional workspace for business bags;
or another real environment directly related to the exact product.

The environment must feel:

Brazilian;
real;
clean;
organized;
human;
comfortable;
premium-accessible;
commercially attractive;

and physically believable.

Do not use:

- an empty studio;
- a fake showroom;
- a luxury palace;
- a foreign-looking hotel;
- a giant empty room;
- a futuristic space;
- an artificial catalog background;
- or excessive clutter.

PRODUCT PLACEMENT:

Place the bag naturally on an appropriate real surface, such as:

- a wooden console;
- a clean bench;
- a dresser;
- a wardrobe shelf;
- a stone countertop;
- a bedside bench;
- a real office desk;
- a boutique display table;
- a chair;
- a luggage bench;
- or another physically suitable support.

The bag must remain fully grounded.

The base must make real contact with the surface.

The straps must follow real gravity.

Handles must retain their natural structure.

Chains must hang with real weight.

Do not make the bag float.

Do not make straps remain suspended without support.

Do not overfill or collapse the bag unless that behavior matches the reference.

COMPOSITION:

The bag must occupy approximately 65% to 80% of the frame.

Use a close frontal three-quarter angle or a slightly elevated three-quarter angle that shows:

the main face;

real depth;
base;
handles;
strap;
hardware;
material;
and visible functional construction.

Do not place the bag far from the camera.

Do not crop important straps, handles, corners, pockets, or hardware.

Do not show excessive ceiling, floor, or empty environment.

Keep the scene visually restrained and sales-focused.

CAMERA:

Professional full-frame camera realism.

Vertical 9:16.

4K commercial image quality.

Use a natural 50mm to 70mm equivalent perspective.

Use 35mm to 50mm only for large travel bags or backpacks requiring more context.

Natural product-height camera position.

No fisheye.

No extreme wide-angle distortion.

No exaggerated low angle.

DEEP FOCUS — NO BLUR:

Keep the entire bag sharply readable.

Preserve clarity in:

branding;
letters;
stitching;
grain;
zippers;
hardware;
handles;
straps;
pockets;
edges;

corners;
and base.

The environment must remain readable.

No portrait mode.

No artificial background blur.

No strong bokeh.

No soft haze.

No depth-map cutout.

No blurred straps or product edges.

LIGHTING:

Use physically believable lighting appropriate to the selected environment.

Possible sources include:

soft daylight;
window light;
residential ambient light;
office lighting;
boutique ceiling lighting;
or restrained professional fill light naturally integrated into the scene.

Preserve exact bag colors.

Use natural shadows.

Use realistic metal reflections.

Maintain correct material response.

No harsh flash.

No artificial glow.

No fake HDR.

No colored lighting changing the product.

MATERIAL REALISM:

Show physically accurate material behavior.

Leather must show real grain, tension, seams, folds, and subtle reflection.

Synthetic leather must retain realistic coated texture and flexibility.

Fabric must show real fibers, weave, folds, and stitching.

Canvas must show weight and authentic textile texture.

Nylon must show real weave, slight sheen, and flexible structure.

Suede must show natural directional fibers.

Plastic must look like real molded plastic.

Metal hardware must show real thickness, weight, highlights, and reflections.

Chains must hang naturally.

Straps must show real thickness and gravity.

No plastic-looking leather.

No melted geometry.

No fake texture.

No synthetic reflections.

CLEAN FRAME:

Outside legitimate branding and lettering physically present on the exact bag, generate no:

captions;
promotional text;
prices;
floating labels;
arrows;
icons;
social-media interface;
banners;
watermarks;
or unrelated logos.

NEGATIVE PROMPT:

wrong bag, similar replacement bag, generic handbag, redesigned bag, changed model, changed quantity, changed shape, changed proportions, wrong scale, changed color, altered material, changed strap, missing strap, extra strap, changed handle count, altered hardware, wrong zipper, extra pocket, missing pocket, invented charm, removed charm, altered logo, mirrored logo, misspelled branding, duplicated bag, similar bag in background, floating bag, floating strap, impossible handle position, collapsed geometry, inflated bag, fake leather, fake fabric, fake metal, melted edges, blurred bag, artificial bokeh, portrait-mode blur, empty studio, fake showroom, luxury palace, CGI, 3D render, illustration, collage, AI artifacts, random text, watermark.

FINAL OUTPUT:

One ultra-photorealistic vertical 9:16 premium sales photograph showing only the EXACT attached bag, naturally positioned at correct real-world scale inside a real Brazilian environment automatically selected according to its category, with absolute product fidelity, true material microtexture, deep focus, strong purchase appeal, and absolutely no visible AI traits.

Copiar prompt de vídeo sem fala — **UNIVERSAL IMAGE-TO-VIDEO PROMPT — BAG ONLY**

FIXED PRODUCT POSITION / 5 PREMIUM CAMERA MOVEMENTS

ABSOLUTE PRODUCT FIDELITY / NO PEOPLE / NO HANDS

ULTRA-PHOTOREALISTIC / BRAZILIAN ENVIRONMENT / NO AI LOOK

=====
REFERENCE FRAME — ABSOLUTE SOURCE OF TRUTH
=====

Use the attached image as the EXACT FIRST FRAME and the ABSOLUTE visual reference for the entire video.

The bag shown in the attached image is the ONLY product that may appear.

The generated video must preserve the exact bag from the first frame until the final frame.

DO NOT redesign the bag.

DO NOT reinterpret the bag.

DO NOT replace the bag.

DO NOT generate a similar bag.

DO NOT change any physical characteristic of the bag.

The attached image always has priority over every textual instruction.

=====
CRITICAL RULE — CAMERA MOVES, BAG DOES NOT
=====

The bag must remain COMPLETELY STATIC throughout the entire video.

The bag must stay in EXACTLY THE SAME:

- position;

- orientation;
- height;
- angle;
- support surface;
- physical posture;
- shape;
- size;
- proportions.

DO NOT:

- rotate the bag;
- tilt the bag;
- move the bag;
- slide the bag;
- lift the bag;
- lay the bag down;
- turn the bag around;
- reposition the bag;
- open the bag;
- close the bag;
- change the bag's orientation.

ONLY THE CAMERA MAY MOVE.

The entire video should feel like a camera operator filming one real stationary bag from different subtle angles.

=====

PRODUCT IDENTITY LOCK

=====

Preserve EXACTLY the product from the reference image.

Maintain:

- same model;
- same category;
- same quantity;
- same dimensions;
- same proportions;
- same silhouette;
- same body shape;
- same base;
- same handles;
- same handle count;

- same handle length;
- same straps;
- same strap width;
- same strap length;
- same strap attachments;
- same buckles;
- same rings;
- same chains;
- same hooks;
- same zippers;
- same zipper pulls;
- same closures;
- same pockets;
- same seams;
- same stitching;
- same piping;
- same panels;
- same decorative elements;
- same charms;
- same hardware;
- same logo;
- same branding;
- same lettering;
- same spelling;
- same typography;
- same patterns;
- same prints;
- same colors;
- same color distribution;
- same materials;
- same texture;
- same grain;
- same gloss;
- same finish;
- every visible physical detail.

The product must remain visually identical throughout the video.

=====

COLOR LOCK

=====

Preserve the EXACT original colors from the reference image.

Do not:

- recolor;
- change hue;
- change saturation;
- increase contrast;
- reduce contrast;
- make the product warmer;
- make the product cooler;
- make it darker;
- make it lighter;
- change hardware color;
- change logo color;
- change material finish.

Lighting changes must NOT alter the perceived identity or color of the product.

=====

MATERIAL LOCK

=====

Maintain the exact material appearance from the reference.

Leather remains leather.

Fabric remains fabric.

Canvas remains canvas.

Nylon remains nylon.

Suede remains suede.

Synthetic leather remains synthetic leather.

Metal remains metal.

Preserve the same:

- grain;
- weave;
- texture;
- folds;
- seams;
- stitching;
- reflections;
- surface finish.

Do not make the material plastic-looking.

Do not create artificial texture.

=====

ENVIRONMENT LOCK

=====

Keep the EXACT SAME Brazilian environment shown in the attached image.

Do not change the location.

Do not change the furniture.

Do not replace the background.

Do not add unnecessary objects.

Do not transform the environment.

Maintain consistent:

- lighting direction;
- furniture;
- walls;
- surfaces;
- colors;
- background elements;
- overall atmosphere.

The environment should remain physically stable throughout the video.

=====

NO PEOPLE

=====

Absolutely NO:

- people;
- hands;
- arms;
- fingers;
- body parts;
- human reflections;
- human silhouettes;
- mannequins.

The bag is the ONLY subject.

=====

VIDEO FORMAT

=====

Vertical 9:16.

Duration: 8 seconds.

24 fps.

Ultra-photorealistic.

Premium commercial product video.

Natural cinematic motion.

No narration.

No dialogue.

No subtitles.

No text overlays.

=====

CAMERA MOVEMENT

=====

Use ONLY subtle professional camera movements.

The bag remains completely stationary.

The camera may perform:

- slow push-in;**
- subtle lateral slide;**
- slight elevation;**
- restrained pull-back;**
- subtle change in framing.**

Camera movements must be smooth, slow and controlled.

NO aggressive movement.

NO orbit around the product.

NO spinning camera.

NO dramatic parallax.

NO extreme perspective changes.

=====

SHOT 1 — HERO

0.0s–1.6s

=====

Begin exactly from the attached image.

Very subtle cinematic push-in toward the bag.

Keep the entire bag visible.

Do not crop:

- handles;
- straps;
- corners;
- base;
- logo;
- important hardware.

The bag remains completely static.

=====

SHOT 2 — MATERIAL DETAIL

1.6s–3.1s

=====

The camera slowly moves closer to the bag.

Reveal a naturally visible material detail.

Possible details:

- leather grain;
- fabric texture;
- stitching;
- piping;

- printed pattern;
- surface finish.

The bag does NOT move.

The camera moves toward the detail.

Keep the material and color identical to the reference.

=====

SHOT 3 — CONSTRUCTION / HARDWARE

3.1s–4.7s

=====

The camera makes a subtle lateral movement toward another visible construction detail.

Show:

- zipper;
- clasp;
- buckle;
- ring;
- chain;
- handle attachment;
- logo;
- stitching;
- or another detail already visible in the reference.

Do NOT rotate the bag to reveal another side.

Do NOT invent hidden details.

The bag remains completely stationary.

=====

SHOT 4 — ELEVATED VIEW

4.7s–6.3s

=====

The camera slowly rises slightly while maintaining the bag's exact physical position.

Create a subtle elevated three-quarter perspective.

IMPORTANT:

The bag itself DOES NOT rotate or tilt.

Only the camera changes elevation.

Do not lay the bag down.

Do not reveal unsupported geometry.

=====

SHOT 5 — FINAL HERO

6.3s–8.0s

=====

Slowly pull the camera back into a polished full-product composition.

The entire bag becomes visible again.

The final frame should show:

- exact bag;
- exact position;
- exact shape;
- exact colors;
- exact materials;
- exact environment.

End on a clean, stable premium product shot.

=====

FOCUS

=====

Keep the bag sharply readable.

No:

- focus pulsing;
- autofocus hunting;
- excessive motion blur;
- artificial bokeh;
- portrait-mode blur;
- blurred edges;
- disappearing details.

The product must remain sharp throughout the entire video.

=====

PHYSICAL REALISM

=====

The bag must behave like a real stationary physical object.

Gravity must remain consistent.

The bag must maintain realistic contact with its support surface.

Straps and handles must remain naturally positioned.

Chains, charms and loose elements must remain almost completely still unless extremely subtle natural movement is physically necessary.

No spontaneous movement.

No floating.

No deformation.

No morphing.

=====

LIGHTING

=====

Preserve the lighting from the original image.

Lighting should remain consistent throughout the video.

Natural shadows.

Natural reflections.

Realistic material response.

No color-changing light.

No artificial glow.

No dramatic lighting transitions.

=====

FINAL VISUAL STYLE

=====

Premium Brazilian UGC/product content.

Natural.

Elegant.

Commercial.

Realistic.

Desirable.

Sophisticated but believable.

The final result must look like a real camera filming a real bag in a real Brazilian environment.

It must NOT look AI-generated.

=====

NEGATIVE PROMPT

=====

**moving bag,
rotating bag,
tilting bag,
falling bag,
sliding bag,
floating bag,
lifting bag,
laying bag down,
bag changing position,
bag changing orientation,
bag changing shape,
bag morphing,
bag warping,
bag stretching,
bag shrinking,
bag deformation,
product replacement,
different bag,
similar bag,
generic bag,
changed model,**

**changed proportions,
changed silhouette,
changed handles,
changed straps,
changed hardware,
changed zipper,
changed pocket,
changed logo,
changed branding,

focus pulsing,
blurred product,
motion blur,
artificial bokeh,
CGI,
3D render,
cartoon,
AI artifacts,
unrealistic physics,
color filter,
heavy color grading,**

text,
captions,
subtitles,
watermark,
logo overlay.

=====

FINAL OUTPUT

=====

Generate ONE ultra-photorealistic 8-second vertical 9:16 product video.

Use the attached image as the exact first frame.

The bag remains in ONE SINGLE FIXED POSITION for the entire video.

ONLY THE CAMERA MOVES.

The product must remain 100% identical to the reference in every frame.

No people.

No hands.

No narration.

No text.

No product movement.

No product deformation.

The result must look like a real premium commercial video filmed with a professional camera in the exact same Brazilian environment.

Copiar prompt de imagem – Use the attached image as the only and absolute reference for the pet transport crate.

Create one ultra-realistic vertical 9:16 iPhone-style photograph of the exact attached transport crate naturally positioned in a real Brazilian outdoor residential area.

PRODUCT LOCK:

Preserve the exact product shown in the reference:

same quantity,
same shape,
same dimensions,
same proportions,
same colors,
same materials,
same upper and lower sections,
same door,
same ventilation openings,
same locks,
same hinges,
same handle,
same wheels when present,
same screws and structural details,
same branding,

same legitimate printed text,
and the same visible construction.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, or invent any part of the crate.

Generate the exact attached product, not a similar variation.

PLACEMENT:

Place the transport crate naturally on the ground in a real Brazilian:

covered patio,
clean backyard,
residential garage,
veranda,
quintal,
or travel-preparation area.

The crate must remain completely supported by the floor.

Show realistic:

product weight,
stable ground contact,
correct scale,
natural plastic or fabric texture,
accurate reflections,
coherent contact shadows,
and physically correct perspective.

The crate must not float, tilt without support, sink into the floor, or appear pasted into the environment.

DOOR AND STRUCTURE:

Preserve the exact door position shown in the reference.

Do not open, close, remove, enlarge, shrink, or redesign the door.

Maintain the correct placement and shape of:

ventilation holes,
grilles,
locks,
hinges,
handles,
wheels,
bases,
fasteners,
and structural joints.

Do not invent internal cushions, bowls, blankets, straps, or accessories unless they are clearly part of the attached product.

PET PRESENCE:

Include one compatible real domestic pet only as secondary context.

The pet may calmly:

- stand beside the crate,
- sit near it,
- look toward it,
- approach the entrance,
- or sniff near the door.

The pet must not block the product.

Keep the crate fully recognizable and visually dominant.

The animal must be correctly scaled relative to the crate.

PET REALISM:

The pet must have:

- correct anatomy,
- natural fur,
- realistic paws,
- proper joints,
- natural eyes,
- correct muzzle,
- realistic ears,
- believable body weight,
- and a calm domestic posture.

The pet must not float, deform, duplicate, or look like a plush toy.

BRAZILIAN OUTDOOR ENVIRONMENT:

Use a real Brazilian middle-class comfortable residential area with:

- finished painted walls,
- clean ceramic, porcelain, stone, or concrete flooring,
- subtle plants,
- practical outdoor furniture when appropriate,
- natural daylight,
- realistic residential proportions,
- and restrained everyday details.

The environment must feel:

- clean,
- organized,
- functional,

comfortable,
lived-in,
Brazilian,
and naturally attractive without appearing luxurious.

Do not create a mansion, luxury showroom, warehouse, fake airport, artificial studio, unfinished construction, or dirty abandoned area.

CAMERA:

Shot as if captured with an iPhone 15 Pro or a similar modern smartphone.

Vertical 9:16.

24mm to 28mm equivalent main camera.

Standard photo mode.

Natural standing-height or slightly lowered three-quarter framing.

Broad readable focus.

True-to-life colors.

Realistic daylight exposure.

Natural highlight rolloff.

Subtle smartphone processing.

No portrait mode.

No extreme background blur.

No artificial bokeh.

No excessive HDR.

PHOTOGRAPHIC COHERENCE:

The crate, pet, floor, walls, plants, and environment must share the same:

lighting direction,
white balance,
perspective,
focus behavior,
exposure,
shadow softness,
reflections,
and photographic texture.

The result must look like one genuine iPhone photograph captured in a single moment.

CLEAN FRAME:

Legitimate branding and text may remain only when physically present on the exact product.

Outside the product itself, generate no added text, logos, symbols, captions, stickers, interface elements, promotional graphics, price labels, or watermarks.

NEGATIVE CONSTRAINTS:

no altered crate,
no similar replacement product,
no duplicated crate,
no changed door,
no extra handle,
no invented wheels,
no altered ventilation holes,
no distorted geometry,
no floating product,
no incorrect scale,
no deformed pet,
no extra paws,
no missing limbs,
no artificial showroom,
no CGI,
no 3D render,
no collage effect,
no text overlays,
no watermark,
no borders.

FINAL OUTPUT:

One clean ultra-realistic vertical iPhone-style photograph of the exact attached pet transport crate naturally resting in a real Brazilian outdoor residential area, with one compatible domestic pet calmly standing, sitting, approaching, or sniffing nearby, complete product fidelity, correct physical scale, and realistic ground contact.

Copiar prompt de vídeo sem fala – **Use the uploaded first frame as an immutable visual anchor and the exclusive source of truth for the transport crate, pet, environment, lighting, camera angle, and composition.**

Create an 8-second ultra-photorealistic vertical smartphone video of the exact pet transport crate naturally presented in a real Brazilian outdoor residential area.

FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

One continuous uninterrupted take.

No cuts.

No transitions.

No scene changes.

ABSOLUTE PRODUCT LOCK:

Preserve the exact transport crate throughout every frame:

**same quantity,
same shape,
same dimensions,
same proportions,
same colors,
same materials,
same upper and lower sections,
same door,
same ventilation openings,
same locks,
same hinges,
same handle,
same wheels when present,
same screws and structural details,
same branding,
same legitimate printed text,
and the same visible construction.**

Treat the crate as a real physical object already represented correctly in the uploaded first frame.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, complete, or reconstruct it.

Do not reveal hidden sides or invent unseen components.

The crate must not morph, change size, change color, gain parts, lose parts, or alter its geometry during the video.

PRODUCT POSITION:

The crate remains stationary and fully supported by the same floor throughout the video.

Preserve realistic:

**weight,
ground contact,
friction,
material texture,
reflections,
contact shadows,
and perspective.**

The door, locks, hinges, ventilation openings, handle, and wheels must remain stable.

Do not open or close the door.

Do not move, drag, lift, rotate, tilt, or reposition the crate.

PET INTERACTION:

Include one compatible real domestic pet only when already present in the first frame or naturally appropriate to the scene.

Use one calm interaction sequence:

**the pet slowly approaches the crate,
sniffs near the door or one lower corner,
pauses briefly,
looks toward the crate or camera,
and remains calmly beside it.**

The pet must not:

**enter the crate,
jump onto it,
push it,
drag it,
bite it,
scratch it,
open the door,
or block the product.**

Keep the crate clearly visible throughout the video.

PET LOCK:

Preserve the same pet throughout every frame:

**same species,
same breed or physical type,
same size,
same fur color,
same markings,
same eyes,
same ears,
same muzzle,
same paws,
and same body proportions.**

The pet must not morph, duplicate, change size, or change appearance.

PHYSICAL REALISM:

Show realistic:

**paw placement,
joint movement,
body weight,
balance,
head movement,
fur response,
breathing,
sniffing,
and floor contact.**

The pet must not pass through the crate, floor, door, or walls.

The crate must remain rigid and structurally stable according to its real material.

CAMERA ACTION:

Begin with the exact framing of the uploaded first frame.

Perform one slow and restrained smartphone movement:

**a gentle push-in toward the crate,
combined with a very small lateral drift of only a few centimeters.**

The movement may reveal slightly more of the crate's depth, door construction, ventilation system, handle, base, or material texture without exposing hidden sides.

Maintain the same visible product side and camera axis.

Do not orbit around the crate.

Do not zoom aggressively.

Do not change lenses.

Do not move close enough to force reconstruction of unseen product details.

BRAZILIAN OUTDOOR ENVIRONMENT:

Preserve or create a real Brazilian middle-class comfortable residential area consistent with the first frame.

Use a:

**covered patio,
clean backyard,
residential garage,
veranda,
quintal,
or practical travel-preparation area.**

Include:

**finished painted walls,
clean ceramic, porcelain, stone, or concrete flooring,
subtle plants,
practical residential objects,
natural daylight,
and realistic household proportions.**

The environment must feel clean, organized, functional, lived-in, Brazilian, and naturally attractive without appearing luxurious or staged.

CAMERA QUALITY:

Shot as if recorded with an iPhone 15 Pro or a similar modern smartphone.

24mm to 28mm equivalent main camera.

Standard smartphone video mode.

Natural standing-height or slightly lowered framing.

Broad natural focus.

True-to-life colors.

Realistic daylight exposure.

Natural highlight rolloff.

Subtle sensor texture.

Restrained smartphone processing.

No portrait mode.

No cinematic artificial depth simulation.

No strong bokeh.

No artificial subject isolation.

No excessive motion blur.

No fake HDR.

TEMPORAL CONSISTENCY:

Every frame must preserve the same:

**crate identity,
product geometry,
door structure,
ventilation pattern,
locks,
handle,
wheels,
branding,
printed text,
pet identity when present,
environment layout,
floor texture,
lighting direction,
white balance,**

**focus behavior,
and exposure.**

The crate must not morph.

The pet must not morph.

The environment must not change, multiply, disappear, or transform.

CLEAN FRAME:

Legitimate branding and text may remain only when physically printed on the exact product.

Outside the product itself, generate no:

**floating text,
captions,
symbols,
icons,
stickers,
social-media interface,
camera controls,
price graphics,
promotional banners,
or watermarks.**

AUDIO:

Natural synchronized Brazilian outdoor residential ambience only.

Include:

**soft breeze,
faint birds,
subtle distant neighborhood sound,
gentle paw contact,
quiet pet breathing,
and minimal sniffing sounds.**

No dialogue.

No voice-over.

No music.

No artificial transition sounds.

NEGATIVE CONSTRAINTS:

**no altered crate,
no duplicated crate,
no product morphing,
no changed door,
no opening door,
no altered locks,
no extra handles,
no invented wheels,
no distorted ventilation holes,
no product movement,
no floating crate,
no deformed pet,
no extra paws,
no missing limbs,
no pet morphing,
no aggressive interaction,
no pet entering the crate,
no scene change,
no CGI,
no 3D render,
no collage effect,
no subtitles,
no captions,
no text overlays,
no watermark,
no borders,
no glitch effects.**

FINAL OUTPUT:

One continuous 8-second ultra-realistic vertical iPhone-style video of the exact attached pet transport crate remaining stable in a real Brazilian outdoor residential area while one compatible domestic pet calmly approaches, sniffs, and pauses beside it, with complete product fidelity, accurate animal anatomy, realistic ground contact, and no visual drift.

Copiar prompt de vídeo sem fala — **POV VIDEO PROMPT — BED SHEET SET
UNBOXING / PACKAGE ALWAYS VISIBLE / MAX FIDELITY / ULTRAREALISM**

Use the attached reference image as the absolute visual reference for the bed sheet set and the package. Reproduce the scene with maximum realism and consistency.

Subject:

A folded bed sheet set is being removed from an opened black shipping package by two realistic human hands in a first-person POV. The sheet set is the hero of the scene, but the black package must remain visible in the frame the entire time, staying in the background or second plane after the product is lifted.

Background:

A real indoor home environment, clean and functional, with a wooden table near a bright window. Soft natural daylight. Cozy, believable, middle-class home aesthetic. Background softly blurred and secondary.

Action:

First-person POV video. Two realistic hands open the black package naturally and gently pull the folded bed sheet set out of it. The movement must be human, soft, careful, and believable. As the person lifts the folded sheet set with both hands, the black package must NEVER disappear from the scene. It must remain visible on the table in the background or lower part of the frame during the whole action, acting as a secondary visual element. The hands present the folded bed sheet set to the camera, showing the fabric, folds, print, and finish in a natural way.

Important scene rule:

The package stays in frame at all times. It may move slightly or shift into the background, but it cannot vanish, be cut out, or leave the scene completely.

Style:

Ultra-photorealistic vertical video, authentic smartphone POV, natural handheld realism, realistic human movement, soft fabric physics, clean daylight, subtle

depth of field, cozy home aesthetic, organic social media realism, product-focused but not artificial, natural Brazilian household feel.

Fidelity rules:

- **Preserve the exact visual identity of the attached bed sheet set**
- **Preserve the folded presentation style**
- **Preserve the black package as the packaging reference**
- **Maintain believable scale between hands, package, and sheet set**
- **Keep the package visible throughout the whole clip**
- **Keep the product consistent in every frame**

Composition:

- **vertical 9:16**
- **POV / first-person perspective**
- **two hands visible**
- **no face**
- **no full body**
- **product centered as it is lifted**
- **package visible behind or below the product in second plane**
- **clear view of the folded bed sheet set**
- **soft natural framing like a real TikTok unboxing clip**

Dialogue:

No dialogue. No voiceover. No talking.

Background sounds:

Soft plastic package handling sounds, light fabric movement, subtle room ambience.

Music:

Optional soft minimal ambient music, very low volume, cozy and elegant.

Technical parameters:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

Anti-bug / negative prompt:

package disappearing, package out of frame, package vanishing, one hand only, extra hands, extra fingers, deformed fingers, broken wrists, unrealistic grip, floating sheet set, altered bedding print, changed fabric color, distorted folds, inconsistent product, messy background, blurry product, shaky camera, robotic movement, face visible, body visible, full person visible, CGI, cartoon, 3D render,

link imagem -

Copiar prompt de imagem — UNIVERSAL IMAGE PROMPT — KITCHEN APPLIANCE / MAX FIDELITY / BRAZILIAN PHOTOREALISM / REAL SCALE

ABSOLUTE PRIORITY:

Do not redesign, reinterpret, beautify, simplify, replace, modernize, recolor, or alter the product in any way.

- exact appliance type
- exact structure and geometry
- exact dimensions and proportions
- exact color
- exact material finish
- exact front panel, buttons, knobs, handles, doors, display, vents, glass, metal, plastic or painted surfaces
- exact edges, thickness, seams, joints and construction details
- exact visible design details
- exact brand area or label placement if visible in the reference
- exact product identity from the attached image

The AI must understand the product as a real functional appliance with physical weight, volume and believable dimensions.

Examples:

- refrigerator must have correct height relative to cabinets, walls and ceiling
- stove or cooktop must align naturally with countertop height
- microwave or oven must appear at practical kitchen height
- air fryer, blender, coffee maker or small appliance must sit naturally on the countertop
- dishwasher or washing appliance must fit logically under or near a counter if appropriate
- appliance must have realistic clearance, support and spacing

SCENE:

Place the appliance in a real medium-standard Brazilian kitchen.

The kitchen must feel authentic, functional, organized, clean and believable.

BRAZILIAN KITCHEN STYLE:

- real Brazilian middle-class apartment or house kitchen
- ceramic, porcelain or simple tiled floor
- neutral wall tiles or painted wall
- practical cabinets, countertop, sink, stove area or fridge space if appropriate
- subtle everyday kitchen objects
- clean but lived-in
- no luxury showroom
- no empty studio
- no foreign catalog look
- no unrealistic mansion kitchen

AUTO-CONTEXT PLACEMENT:

Place the appliance naturally according to its function:

- refrigerator against a wall or near cabinets
- microwave on a counter, shelf or niche
- oven or stove aligned with countertop or wall
- cooktop installed into countertop
- air fryer, blender, mixer, coffee maker or small appliance on a realistic kitchen counter
- dishwasher or washing appliance positioned logically near plumbing area
- product must look usable, plugged in or ready to use when appropriate

COMPOSITION:

The appliance is the hero of the image.

Show the product clearly and fully when possible.

Use enough kitchen context to confirm real scale.

Natural iPhone framing, realistic perspective, no forced dramatic angle, no extreme close-up, no fake catalog render.

The product must remain the strongest visual focus.

CAMERA STYLE:

iPhone 15 Pro Max rear camera look, 24mm to 26mm realistic wide-angle feel, natural smartphone perspective, sharp realistic detail, no excessive blur, no artificial softness, no CGI look, no AI look.

LIGHTING:

Real natural daylight from a window or soft practical kitchen lighting, balanced exposure, realistic shadows, realistic reflections on metal, glass, plastic, enamel, stainless steel, tiles and countertop.

No harsh flash, no overexposed window, no artificial studio lighting, no HDR exaggeration.

TEXTURE AND MATERIAL REALISM:

Show tactile real material:

brushed metal, stainless steel, glossy plastic, matte plastic, glass, rubber, enamel, buttons, knobs, digital display, vents, seams, handles, cable if visible, realistic reflections and realistic surface microtexture.

QUALITY:

Ultra photorealistic, Brazilian home realism, sharp microtexture, natural details, functional real kitchen, no blur on the product, no overprocessing, no waxy materials.

STRICT RULES:

Keep the exact appliance identity from the reference.

Do not change design, color, proportions, buttons, display, handle, door, shape, material or scale.

Do not invent missing parts.

Do not crop important parts.

Keep the appliance physically believable inside the kitchen.

NEGATIVE PROMPT:

wrong appliance design, altered product, changed proportions, wrong scale, miniature appliance, oversized appliance, distorted geometry, fake metal texture, fake plastic texture, CGI, 3D render, cartoon, illustration, AI artifacts, unrealistic kitchen, luxury showroom, mansion kitchen, empty studio, overexposed window, harsh flash, blurry appliance, soft image, smoothed details, warped buttons, warped display, bent doors, fake reflections, inconsistent shadows, floating appliance, impossible perspective, cluttered kitchen, dirty kitchen, low quality, oversaturated colors, missing parts, extra parts, unreadable product structure

Copiar prompt de vídeo sem fala — **# AIR FRYER — B-ROLL PRO + FIDELIDADE MÁXIMA**

****USE THE UPLOADED AIR FRYER IMAGE AS THE ABSOLUTE, UNCHANGEABLE VISUAL REFERENCE.****

Create an ultra-photorealistic vertical 9:16 product video showing the **EXACT SAME AIR FRYER from the uploaded reference image inside a realistic Brazilian kitchen.**

The air fryer must look like the **same physical product throughout the entire video. Every shot, camera angle, close-up and functional action must preserve the exact product identity.**

 ABSOLUTE PRODUCT LOCK — HIGHEST PRIORITY

The uploaded image defines the exact appearance of the air fryer.

Preserve **100% exactly:**

*** body shape and geometry;**

- * height, width and depth proportions;
- * exact colors and color distribution;
- * exact front panel;
- * exact buttons and controls;
- * exact digital display, if present;
- * exact display position and shape;
- * exact basket;
- * exact basket handle;
- * exact drawer mechanism;
- * exact cooking chamber;
- * exact vents;
- * exact feet;
- * exact seams and edges;
- * exact logo;
- * exact labels, icons and visible text;
- * exact materials;
- * exact plastic, metal or glass appearance;
- * exact surface texture;
- * exact finish;
- * exact reflections;
- * every other visible physical detail.

****DO NOT redesign, reinterpret, improve, simplify, replace, recolor, reshape or regenerate any part of the air fryer.****

The reference image always has priority over the generated environment.

If a detail is unclear or not visible in the reference, ****DO NOT invent it.**** Do not add buttons, displays, compartments, accessories or functions that are not clearly supported by the reference.

🍟 AIR FRYER FUNCTIONALITY LOCK

This is specifically an ****AIR FRYER****.

All functionality shown must correspond to a real air fryer and to the exact model shown in the reference.

Allowed realistic actions include:

- * pulling the exact basket outward;
- * pushing the exact basket inward;
- * holding the exact basket handle;
- * placing food inside the existing basket;
- * removing food from the existing basket;
- * pressing an existing button or control;

- * activating the existing display, if present;
- * showing the air fryer operating;
- * opening and closing the drawer naturally.

The functional action must match the ****actual visible construction of the reference product****.

NEVER CREATE:

- * microwave doors;
- * oven doors;
- * blender jars;
- * stove burners;
- * refrigerator doors;
- * coffee-machine components;
- * invented cooking compartments;
- * invented buttons;
- * invented screens;
- * invented temperature controls;
- * invented accessories;
- * functions that the reference product does not have.

****Never add a feature just because it is common on another air fryer.****

🎬 MANDATORY VIDEO STRUCTURE — B-ROLL REQUIRED

The video **MUST** contain multiple clearly different shots.

****DO NOT generate one continuous shot.****

0s–1.5s — HERO SHOT

Show the exact air fryer naturally positioned on a realistic Brazilian kitchen countertop.

The entire product should be clearly visible.

Correctly establish its real-world size relative to:

- * countertop;
- * cabinets;
- * surrounding appliances;
- * kitchen utensils.

The air fryer is the hero of the shot.

Use subtle natural camera movement while keeping the product stable and recognizable.

1.5s–3s — B-ROLL DETAIL SHOT 1

Cut to a close-up macro shot of the exact same air fryer.

Focus on real details visible in the reference, such as:

- * control panel;
- * buttons;
- * digital display;
- * basket handle;
- * front surface;
- * vents;
- * logo;
- * material texture;
- * seams;
- * edges;
- * finish.

The close-up must be a closer view of the ****same physical product****, not a regenerated variation.

3s–4.5s — FUNCTIONALITY SHOT

Cut to a realistic interaction with the exact air fryer.

A realistic feminine hand may naturally:

****pull the exact basket outward, briefly reveal the existing interior, and push the same basket back into the exact air fryer.****

The hand must interact with the real physical structure correctly.

The basket must:

- * have the exact shape from the reference;
- * move from the correct location;
- * remain attached to the correct mechanism;
- * maintain the same dimensions;
- * never transform.

If the reference does not clearly show a removable basket or a particular mechanism, ****do not invent one.****

4.5s–6s — B-ROLL DETAIL SHOT 2

Cut to another close-up angle showing a different real feature of the same air fryer.

Possible details:

- * basket handle texture;
- * control buttons;
- * display;
- * front panel;
- * basket edge;
- * cooking chamber;
- * ventilation openings;
- * material finish;
- * reflections;
- * surface texture.

Only show details actually supported by the reference.

6s–8s — FINAL HERO SHOT

Return to a clean final hero shot.

Show the complete air fryer naturally positioned in the kitchen.

It must remain:

- * identical to the reference;
- * correctly scaled;
- * sharp;
- * physically believable;
- * visually consistent with every previous shot.

End with a stable and desirable product presentation.

🏠 ENVIRONMENT

Realistic Brazilian middle-class kitchen.

Clean, functional, organized and naturally lived-in.

Include realistic elements such as:

- * neutral ceramic or porcelain tiles;
- * standard kitchen cabinets;

- * countertop;
- * sink;
- * stove;
- * refrigerator;
- * microwave;
- * utensils;
- * everyday kitchen objects.

The environment must look authentic and secondary to the product.

****The kitchen adapts to the air fryer — never the opposite.****

No luxury showroom.

No mansion.

No futuristic kitchen.

No fake commercial studio.

📏 REAL-WORLD SCALE

Maintain believable physical proportions throughout the entire video.

The air fryer must never become:

- * miniature;
- * oversized;
- * unusually tall;
- * unusually wide;
- * floating;
- * embedded into the countertop;
- * stretched;
- * compressed.

Its physical dimensions must remain consistent across every shot.

📷 CAMERA

Vertical 9:16.

iPhone 15 Pro Max realism.

Natural 24–26mm perspective.

Smooth handheld or stabilized movement.

Realistic smartphone optics.

Natural depth of field.

Sharp product focus.

No excessive cinematic blur.

No extreme wide-angle distortion.

No robotic camera movement.

Camera angle and distance may change, but **the physical product cannot change.******

💡 LIGHTING

Natural Brazilian daylight entering through a kitchen window, optionally combined with subtle practical kitchen lighting.

Balanced exposure.

Natural shadows.

Realistic reflections on:

- * plastic;**
- * metal;**
- * glass;**
- * countertop;**
- * tiles.**

No harsh flash.

No artificial studio glow.

No exaggerated highlights.

No overexposed windows.

🤝 HAND INTERACTION

If hands appear:

- * realistic feminine hand;**

- * natural anatomy;
- * realistic finger proportions;
- * natural movement;
- * correct grip;
- * physically accurate contact with the basket handle;
- * fingers remain outside the product structure;
- * no clipping through the air fryer;
- * no extra fingers;
- * no fused fingers;
- * no deformed hands.

The hand must never obscure the important product details unnecessarily.

🗣️ AUDIO

No dialogue.

No voiceover.

No spoken words.

Natural kitchen ambience only.

Realistic subtle sounds such as:

- * basket sliding;
- * basket contact;
- * button click;
- * countertop contact;
- * subtle appliance operating sound.

Do not exaggerate sound effects.

⚙️ TECHNICAL PARAMETERS

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

format: ultra-photorealistic live-action video

🚫 ABSOLUTE CONTINUITY RULE

Treat the uploaded air fryer image as a ****locked physical product reference****.

The air fryer is the ****SAME SINGLE PHYSICAL OBJECT**** in every shot.

Camera position can change.

Camera distance can change.

Lighting can change naturally.

The environment can be different from shot to shot.

****THE AIR FRYER ITSELF CANNOT CHANGE.****

Do not regenerate the product between cuts.

Do not reinterpret the product from a different angle.

Do not replace details that are hidden by perspective.

When a feature is temporarily out of view, it must remain unchanged when it becomes visible again.

❌ NEGATIVE PROMPT

single continuous shot, no B-roll, altered air fryer, different air fryer, generic air fryer, similar air fryer, replacement product, product redesign, product reinterpretation, product regeneration, product morphing, changed body, changed proportions, changed dimensions, changed color, changed material, changed texture, changed finish, changed basket, changed basket handle, changed buttons, changed controls, changed display, changed logo, changed text, invented buttons, invented display, invented controls, invented accessories, invented compartments, fake functionality, wrong appliance, microwave, oven, blender, coffee maker, refrigerator, stove, wrong basket mechanism, distorted basket, floating basket, missing basket, extra basket, miniature air fryer, oversized air fryer, stretched product, compressed product, warped geometry, melted plastic, deformed product, disappearing product, duplicated product, inconsistent product between shots, product deformation, product changing during operation, CGI, 3D render, cartoon, illustration, synthetic product, AI artifacts, deformed hands, extra fingers, fused fingers, hands clipping through product, robotic hands, excessive motion blur, excessive depth of field, extreme lens distortion, fake showroom, luxury kitchen, mansion kitchen, futuristic kitchen, studio background, harsh flash, overexposure, oversaturation, blurry product, unreadable product, unstable geometry, impossible shadows, cluttered kitchen, dirty kitchen, missing parts, extra parts, fake details.

Copiar prompt de vídeo - **Ultra-realistic vertical smartphone video, 9:16 aspect ratio, authentic smartphone men's fashion UGC, natural handheld camera. A male influencer stands naturally facing the camera with relaxed shoulders, confident posture, and direct eye contact. He wears a friendly, approachable closed-mouth smile that feels genuine and effortless.**

He naturally interacts with his outfit by lightly smoothing the front of his shirt with one hand, then briefly adjusting the collar and gently brushing the fabric across the chest and shoulders to highlight the fit, texture, and premium quality. He subtly grips the lower hem of the shirt and gives it a light outward pull before releasing it naturally, allowing the fabric to fall back into place. He then casually slides one hand into his pocket while using the other to lightly touch the side of the shirt near the waist, showing the garment from different angles with small, smooth body turns.

Throughout the movement, he shifts his weight naturally from one leg to the other, slightly rotating his torso left and right to display the overall look without posing excessively. His body language is relaxed, masculine, charismatic, and authentic, conveying confidence and comfort rather than performance. Every gesture is fluid and physically believable, with realistic hand articulation, natural breathing, subtle shoulder movement, authentic fabric physics, gentle clothing folds, cinematic daylight, premium men's fashion aesthetic, ultra-realistic human biomechanics, seamless natural motion, authentic smartphone UGC style.

No talking, no lip movement, no mouthing words, no singing, no whispering, no laughing, no exaggerated facial expressions, no teeth showing, no overacting, no runway posing, no robotic movement, no stiff posture.

relógio bonito na mesa

Copiar prompt de vídeo sem fala — **Create an ultra-photorealistic vertical image (9:16) showing the EXACT product from the attached reference image being presented to the camera in a natural first-person POV. The scene must feel human, real, spontaneous, and believable, as if someone is simply showing the product to the camera with one hand.**

ABSOLUTE PRIORITY:

The attached product must be reproduced with maximum fidelity and zero redesign. Preserve exactly all visible characteristics from the reference image:

- packaging shape
- bottle / jar / box / container structure
- label design
- typography
- colors
- logo placement
- cap / lid / nozzle / pump details
- material finish
- reflections
- transparency
- proportions
- print alignment
- all visual details

Do not simplify, reinterpret, beautify, replace, invent, or alter any part of the product. The final product must look exactly like the attached reference.

MAIN COMPOSITION:

- true POV / first-person feeling
- only ONE hand visible
- no second hand
- no full person
- no face
- no body
- no selfie framing
- no person "showing" the product in the scene
- only the hand and, if necessary, a small part of the forearm may appear
- the product is held naturally and shown directly to the camera
- product close to the camera, clearly visible, hero of the frame
- label/front side turned toward the camera whenever physically possible
- framing should look organic and human, not staged like a studio ad

HAND / PRODUCT REALISM:

- grip must be anatomically correct
- hand posture must match the real size and shape of the product
- scale must be accurate: the product cannot look too big or too small in the hand

- fingers must wrap around the product naturally
- skin texture must be realistic
- nails natural
- no tattoos unless present in the reference or explicitly requested
- no rings, watches, bracelets, or accessories unless necessary and subtle
- never generate extra fingers
- never generate multiple hands
- never deform the hand or forearm

ENVIRONMENT:

Place the scene in a realistic, functional, believable environment that matches the product category naturally, but keep the environment secondary. The AI should infer the ideal setting based on the product itself.

Examples:

- perfume / skincare / cosmetics → vanity, bathroom, bedroom dresser
- food / drink / supplement → kitchen, dining table, pantry, desk
- tech / electronics → desk, office, bedroom setup
- fashion accessory → wardrobe area, mirror area, neutral indoor setting
- home / cleaning product → kitchen, laundry area, utility space

The environment must be:

- photorealistic
- natural
- functional
- clean but lived-in
- believable
- softly secondary
- never luxurious showroom
- never empty studio
- never fake CGI background

VISUAL STYLE:

- ultra photorealistic
- natural smartphone realism
- authentic iPhone-style look
- slight shallow depth of field
- sharp focus on the product and main label
- natural lighting or realistic indoor light
- realistic reflections and shadows
- subtle natural grain allowed
- organic social-media realism
- not overly polished
- not artificial advertising style

CAMERA:

- iPhone 15 Pro Max rear camera look

- 24mm wide-angle feel
- handheld POV realism
- natural perspective
- slight edge distortion acceptable
- vertical 9:16 composition

FOCUS HIERARCHY:

1. exact product fidelity
2. label consistency and readability
3. correct hand anatomy
4. correct product-to-hand proportion
5. realistic environment coherence
6. natural human POV feeling

STRICT RULES:

- use the attached product as the exact visual reference
- do not change any product features
- do not create a generic version
- do not replace the packaging
- do not hide the main label
- do not distort text
- do not create fake branding
- do not show multiple hands
- do not show the person
- do not create a mirror selfie
- do not crop the product awkwardly
- do not oversaturate colors
- do not stylize
- do not turn the image into CGI or illustration

ANTI-BUG / NEGATIVE PROMPT:

multiple hands, two hands, extra fingers, extra limbs, duplicated hand, deformed hand, broken anatomy, warped fingers, melted skin, visible face, visible person, visible body, selfie pose, mirror selfie, altered packaging, changed label, wrong logo, fake text, unreadable text, distorted typography, changed colors, changed cap, wrong material, oversized product, undersized product, floating product, unrealistic grip, blurry product, low quality, CGI, 3D render, illustration, cartoon, studio background, luxury showroom, fake reflections, overprocessed image, harsh flash, overexposed highlights, cluttered background, inconsistent scale, warped container, bent bottle, stretched packaging

OUTPUT GOAL:

Generate a flawless universal POV image where a single realistic hand naturally shows the exact attached product to the camera, preserving maximum fidelity, consistency, correct scale, and ultra-realistic detail, with zero margin for error.

Movimento | Cta

Copiar prompt de vídeo – **Ultra-realistic vertical smartphone video, 9:16 aspect ratio, authentic smartphone men's fashion UGC, natural handheld camera. A male influencer stands naturally facing the camera with relaxed shoulders, confident posture, and direct eye contact. He wears a warm, approachable closed-mouth smile that feels genuine, charismatic, and effortless. He never speaks or moves his lips.**

He first raises both hands to chest level and gives a natural thumbs-up with both hands, holding the gesture briefly with relaxed wrists and authentic masculine body language. After lowering his thumbs, he smoothly extends only the index fingers of both hands and naturally points downward below the frame, repeating the downward gesture two or three times with a calm, confident rhythm as if directing attention to the caption or link. Throughout the movement, he maintains friendly eye contact and a relaxed, confident expression without exaggeration.

Natural masculine posture, realistic breathing, subtle weight shifts, relaxed shoulders, accurate hand and finger articulation, authentic human biomechanics, realistic fabric physics, gentle clothing movement, cinematic daylight, premium men's fashion aesthetic, ultra-realistic human motion, seamless natural movement, authentic smartphone UGC style.

No talking, no lip movement, no mouthing words, no singing, no whispering, no laughing, no exaggerated smile, no teeth showing, no overacting, no robotic movement, no stiff posture, no exaggerated influencer posing.

Look de Toalha link imagem -

Copiar prompt de imagem– **Create an ultra-realistic UGC fashion image using two reference images.**

Reference image 1 = avatar identity.

Reference image 2 = clothing item reference.

Keep my avatar 100% identical to reference image 1:

- * same face
- * same facial features
- * same hair

- * same hairstyle
- * same skin tone
- * same body proportions
- * same identity
- * same realistic skin texture
- * same natural appearance

Do not change my avatar in any way.

Create a realistic smartphone photo of my avatar standing in a bedroom/dressing room environment, wearing a soft white bath towel wrapped naturally around her body, like a creator preparing to show a new clothing piece.

She is holding the exact clothing item from reference image 2 with both hands, one piece in each hand, presenting the outfit toward the camera.

The clothing must match reference image 2 exactly:

- * same color
- * same fabric
- * same texture
- * same shape
- * same stitching
- * same buttons/details
- * same proportions
- * no redesign
- * no changes

The garments should hang naturally in her hands with realistic fabric weight, natural folds, and gravity.

Pose:

- * relaxed influencer pose
- * natural smile
- * looking directly at the camera
- * relaxed shoulders
- * realistic hand positioning
- * natural fingers and nails
- * casual UGC content style

Environment:

- * modern bedroom or dressing room
- * mirror visible in the background
- * realistic home environment
- * natural lighting
- * smartphone camera perspective

Camera:

- * iPhone 15 Pro Max quality
- * vertical 9:16

- * realistic smartphone photo
- * natural depth of field
- * sharp details
- * authentic UGC style

Style:

Ultra photorealistic.

Real human photography.

Natural skin texture.

Realistic hair.

Realistic fabric simulation.

Premium TikTok Shop creator style.

Negative prompt:

Do not change the avatar.

Do not change face.

Do not change hair.

Do not create a different person.

No extra fingers.

No distorted hands.

No fake skin.

No CGI.

No artificial beauty filter.

No unrealistic body.

No clothing alteration.

No wrong color.

No wrong texture.

No background change.

No text.

No watermark.

Copiar prompt de vídeo sem fala — **Create a hyper-realistic UGC fashion video filmed on a real smartphone in vertical 9:16.**

IMPORTANT:

The avatar must remain completely SILENT throughout the entire video.

NO speech.

NO dialogue.

NO lip-sync.

NO talking.

NO mouth movements suggesting speech.

She only uses natural facial expressions and subtle eye contact.

PRODUCT FIDELITY — ABSOLUTE PRIORITY:

Use the EXACT clothing pieces from the reference image.

Do not modify, redesign, replace, recolor, reshape, stretch, shrink, regenerate, or reinterpret the garments.

Preserve exactly the original:

- color
- fabric
- texture
- ribbing
- stitching
- seams
- proportions
- cut
- silhouette
- length
- shape
- details

The clothing must remain the SAME physical products from the reference image throughout the entire video.

NO hanger.

NO hook.

NO clips.

The garments must be held directly by the avatar's hands.

HAND + CLOTHING MOVEMENT:

The avatar holds one clothing piece in each hand, gripping the upper corners naturally and securely.

She MUST NOT let go of either garment at any moment.

Both hands maintain continuous contact with the clothing from the beginning to the end of the video.

Her grip can make tiny natural adjustments while remaining securely attached to the fabric.

Her fingers must remain anatomically correct and naturally wrapped around the fabric.

NO fingers passing through the clothing.

NO hands merging with the garments.

NO extra fingers.

NO distorted hands.

The garments must hang naturally from her hands according to real gravity.

The fabric should have realistic weight, softness, folds and subtle movement.

Do not stretch or pull the garments aggressively.

Do not deform the clothing.

NATURAL MOVEMENT:

The avatar stands naturally approximately two meters from the camera.

Relaxed shoulders.

Natural breathing.

Soft friendly smile.

Natural blinking.

Subtle head movement.

She gently lifts both clothing pieces slightly, approximately 5–10 cm, as if naturally showing the products to the viewer.

She briefly looks at the clothing and then naturally looks back at the camera.

She keeps holding both pieces securely.

After presenting them, she slowly walks toward the camera with three short, relaxed steps.

She NEVER releases either garment.

She maintains the same natural grip while walking.

The clothing moves subtly and naturally with her walking motion and gravity.

No exaggerated arm movements.

No exaggerated hip movement.

No runway walk.

No dramatic posing.

No sudden movements.

No robotic motion.

CAMERA:

Real smartphone UGC aesthetic.

Vertical 9:16.

Stable handheld smartphone framing.

No zoom.

No camera rotation.

No cinematic camera movement.

Natural indoor lighting.

Realistic skin texture.

Photorealistic human movement.

The video should feel like a real person casually presenting clothing to the camera.

STRICT NEGATIVE CONSTRAINTS:

NO speech.

NO talking.

NO dialogue.

NO lip-sync.

NO releasing the garments.

NO dropping the garments.

NO changing hands.

NO swapping the garments between hands.

NO hanger.

NO clothing deformation.

NO clothing redesign.

NO clothing replacement.
NO color changes.
NO fabric changes.
NO altered proportions.
NO warped garments.
NO distorted hands.
NO extra fingers.
NO fingers passing through fabric.
NO duplicated clothing.
NO disappearing clothing.

The avatar continuously holds BOTH original clothing pieces in her hands throughout the entire video.

Keep the movement subtle, natural, realistic and physically believable.

Movimento Selfie | Cta

movimento prompt - Ultra-realistic vertical smartphone video, 9:16, authentic UGC fashion influencer style, natural handheld camera. A female influencer holds a smartphone naturally in one hand at waist level while maintaining direct eye contact with the camera. She has a sweet, angelic, approachable expression with a soft closed-lip smile. She does not speak or move her lips.

With her free hand, she extends ONLY the index finger and smoothly points downward below the camera frame, directing attention to the caption, comments, or link. Repeat the gesture 2–3 times with a light, friendly rhythm, using subtle wrist and elbow movements. Add a slight head tilt and warm, inviting expression.

Natural posture, realistic breathing, soft shoulder movement, gentle body sway, authentic finger articulation, anatomically correct hands, realistic phone grip, subtle hair movement, natural fabric physics, cinematic daylight, premium fashion UGC aesthetic, lifelike facial micro-expressions and human biomechanics.

No talking, lip movement, teeth, exaggerated smile, waving, thumbs up, pointing at camera, robotic motion, stiffness, overacting, or exaggerated gestures. ONLY repeated downward pointing with the free hand.

Beleza / Rímel

Copiar prompt de imagem

UNIVERSAL CINEMATIC MAKEUP IMAGE PROMPT — INFLUENCER FACE REFERENCE +

EXACT MAKEUP PRODUCT / FACE AND PRODUCT CLOSE TO CAMERA / AUTOMATIC
PRODUCT ANALYSIS / IMMUTABLE FIRST FRAME FOR VIDEO

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the attached makeup product.

Create one ultra-photorealistic cinematic vertical 9:16 beauty UGC image designed to serve as the immutable first-frame anchor for a later makeup demonstration or application video.

Show the EXACT influencer very close to the camera, naturally holding the EXACT attached makeup product close to her face and close to the camera.

Both the influencer's face and the exact product must be:

- clearly visible
- sharply focused
- correctly proportioned
- physically realistic
- visually dominant
- fully recognizable
- and suitable for visual continuity in a subsequent video

The influencer is only presenting the product in this image.

She is not applying it yet.

AUTOMATIC MAKEUP PRODUCT IDENTIFICATION

Analyze the attached product and automatically identify its exact category and real presentation method.

Possible categories include:

- lipstick
- lip gloss
- lip tint
- lip oil
- lip balm
- lip liner
- foundation
- skin tint
- concealer
- primer
- setting spray
- setting powder
- compact powder
- loose powder
- blush
- bronzer
- contour product
- highlighter

- illuminator
- eyeshadow palette
- single eyeshadow
- mascara
- eyeliner
- eye pencil
- eyebrow pencil
- eyebrow gel
- brow pomade
- makeup stick
- cream makeup
- liquid makeup
- pressed makeup
- makeup palette
- or another cosmetic makeup product

Do not convert the attached product into another category.

Do not invent a different use, mechanism, applicator, container, or cosmetic format.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly from image 1:

- same facial identity
- same face shape
- same skin tone
- same apparent age
- same eye shape
- same eye color
- same eyebrows
- same nose
- same lips
- same natural lip volume
- same jawline
- same cheek structure
- same forehead proportions
- same hairstyle
- same hair color
- same hair texture
- same hairline
- same recognizable appearance

Do not replace the influencer with a similar person.

Do not beautify, rejuvenate, age, slim, reshape, stylize, or reinterpret her face.

Do not enlarge the eyes.

Do not enlarge or reshape the lips.

Do not alter the nose, jawline, cheeks, or eyebrows.

Do not change the hairstyle.

No facial identity drift.

No beauty-filter transformation.

ABSOLUTE MAKEUP PRODUCT LOCK

Preserve the attached product exactly:

- same brand
- same product category
- same product model
- same packaging
- same tube, bottle, compact, palette, stick, pencil, jar, or container
- same cap
- same lid
- same pump
- same nozzle
- same applicator mechanism
- same wand
- same brush
- same pencil tip
- same lipstick bullet
- same powder pan
- same palette layout
- same number of visible shades
- same shade arrangement
- same proportions
- same dimensions
- same shape
- same color
- same shade
- same undertone
- same finish
- same transparency or opacity
- same label
- same logo
- same lettering
- same spelling
- same typography
- same printed graphics
- same material
- same gloss level
- and every visible packaging detail

Do not redesign the product.

Do not replace it with a similar cosmetic item.

Do not recolor it.

Do not simplify the packaging.

Do not mirror the logo.

Do not rewrite, correct, or distort printed text.

Do not change the container shape.

Do not add or remove shades from a palette.

Do not invent a different cap, lid, pump, wand, brush, applicator, mirror, or accessory.

Do not open the product in this image unless it is already open in the attached reference.

Do not reveal hidden interior details that are not visible in the reference.

PRODUCT COLOR AND SHADE LOCK

Preserve the exact visible cosmetic shade from the reference.

Maintain the same:

- hue
- undertone
- saturation
- brightness
- depth
- opacity
- shimmer level
- shine level
- metallic effect
- matte effect
- satin effect
- and visual color identity

Do not warm, cool, darken, lighten, intensify, soften, or reinterpret the product shade.

This exact product color must remain available for consistent application in the subsequent video.

COMPOSITION — CRITICAL

Use a close cinematic beauty framing from approximately the upper chest or shoulders upward.

The influencer's face must be very close to the camera and occupy most of the vertical frame.

She holds the exact makeup product close to her face and near the camera.

Keep enough physical separation between the product and the face so both remain sharply readable.

The product must not appear disproportionately large or unnaturally small.

The product must not cover:

- the eyes
- the eyebrows
- the nose
- the lips
- or the main facial identity

Use a natural beauty-advertising pose.

The influencer looks directly into the camera with a calm, confident, elegant expression.

Her face remains relaxed.

She is not applying the product yet.

AUTOMATIC PRODUCT POSITIONING

Position the product close to the facial area associated with its real use while keeping the face fully visible.

Use the following positioning logic:

Lip products

Position the product beside the lips, lower cheek, or jawline.

Do not cover the mouth.

Eye products

Position the product beside the temple, outer eye area, or upper cheek.

Do not cover the eyes, lashes, or eyebrows.

Eyebrow products

Position the product beside the temple or upper cheek.

Do not cover the eyebrow shape.

Foundation, concealer, primer, or skin products

Position the product beside the cheek, jawline, or lower face.

Do not cover the central facial features.

Blush, bronzer, contour, or highlighter

Position the product beside the cheekbone or lower cheek.

Keep the cheek structure readable.

Powder or compact products

Position the compact beside the cheek or jawline at its natural presentation angle.

Palettes

Hold the closed palette, or preserve its exact reference state, beside the lower cheek or shoulder.

Do not enlarge the palette unrealistically.

Setting spray

Hold the bottle beside the cheek or jawline with the label facing the camera.

Do not spray it in this image.

For any other makeup category, choose the most natural presentation position according to its real use, packaging, dimensions, and commercial presentation logic.

PRODUCT ORIENTATION

Hold the product vertically, horizontally, or at its natural presentation angle according to its real packaging.

Whenever physically possible, point the front label or main visual face toward the camera.

Keep the complete product inside the frame.

Do not crop:

- the cap
- the base
- the lid
- the pump
- the logo
- the label
- palette corners
- pencil tips
- applicator ends
- or packaging edges

Do not place the product so close to the lens that perspective distortion changes its shape.

HAND AND GRIP REALISM

Show exactly one anatomically correct hand naturally holding the product.

The hand must have:

- exactly five fingers
- correct thumb placement

- natural finger lengths
- real joints
- realistic knuckles
- natural nails
- visible skin pores
- subtle skin lines
- correct wrist alignment
- believable grip pressure
- realistic contact shadows

Automatically adapt the grip to the real product:

- fingertip grip for small tubes, pencils, mascara, eyeliner, and lipstick
- stable finger-and-thumb grip for bottles and sprays
- natural palm support for compacts and palettes
- physically plausible support for larger products

Do not cover the main logo, product name, shade name, label, or important packaging details.

No extra fingers.

No fused fingers.

No missing fingers.

No floating hand.

No product clipping through the fingers.

No impossible grip.

HUMAN PHYSICAL REALISM

Show extreme natural human detail:

- visible skin pores
- fine facial lines
- subtle tonal variation
- natural under-eye texture
- realistic lips
- individual eyebrow hairs
- individual eyelashes
- individual hair strands
- natural eye moisture
- fine facial hair when naturally visible
- authentic skin highlights
- subtle natural facial asymmetry
- realistic hand skin
- real nail texture

No waxy skin.

No plastic face.

No airbrushed beauty filter.

No artificial glass-skin effect.

No excessive smoothing.

No synthetic makeup texture.

No flawless digital skin replacement.

AUTOMATIC BEAUTY PREPARATION

Use refined and minimal beauty preparation appropriate to the attached product.

Keep the intended application area neutral, clean, or only lightly prepared so the later application remains visually meaningful.

For lip products

Keep the lips neutral or lightly moisturized.

Do not apply a competing lip color.

For eye products

Keep the eyes and lashes lightly prepared.

Do not apply strong competing eyeshadow, eyeliner, or mascara.

For eyebrow products

Keep the eyebrows natural and lightly groomed.

Do not create a heavily filled brow.

For foundation, concealer, primer, or powder

Keep the skin naturally prepared with visible texture.

Do not create a fully perfected heavy base before application.

For blush, bronzer, contour, or highlighter

Keep the relevant cheek area neutral.

Do not apply a competing color or finish.

For any other category, automatically keep the intended application area visually ready for the subsequent demonstration.

Do not change the influencer's identity with heavy makeup.

ENVIRONMENT

Automatically create a real, clean, premium-accessible Brazilian beauty environment, such as:

- an organized residential vanity
- a refined bedroom dressing area
- a clean bathroom mirror corner
- or a realistic home beauty setup

Use:

- neutral beige
- cream
- warm brown
- soft blush
- muted terracotta
- or other restrained natural tones

Include:

- refined but believable decor
- clean practical surfaces
- subtle mirror elements
- restrained cosmetic objects
- real residential materials
- natural organization
- and a physically inhabited atmosphere

The setting must feel elegant, human, functional, and credible.

No fake luxury spa.

No futuristic showroom.

No empty photographic studio.

No excessive background cosmetics.

No competing product packaging.

No duplicate hero product in the background.

CAMERA

- cinematic vertical 9:16
- professional full-frame beauty-camera realism
- 4K commercial quality
- 70mm to 85mm equivalent lens
- natural eye-level position
- close beauty framing

- minimal perspective distortion
- realistic facial proportions
- stable composition
- no fisheye
- no extreme wide angle

FOCUS — FACE AND PRODUCT MUST BOTH BE SHARP

Keep both the influencer's face and the exact makeup product sharply readable.

Use sufficient depth of field to preserve:

- eyes
- eyebrows
- lips
- facial texture
- hand
- product packaging
- logo
- label
- applicator structure
- palette layout when visible
- and product edges

Do not use extreme shallow depth of field.

No blurred product.

No blurred face.

No portrait-mode cutout.

No artificial separation around the hair, fingers, or packaging.

The environment may be slightly softer but must remain recognizable.

LIGHTING

Use soft cinematic beauty lighting with:

- natural skin tones
- accurate product colors
- accurate cosmetic shade
- gentle frontal illumination
- soft lateral shaping
- restrained catchlights in the eyes
- realistic facial shadows
- correct packaging reflections
- balanced exposure
- natural white balance

No harsh flash.

No fake HDR.

No neon lighting.

No colored light altering the product shade.

No artificial glow.

No excessive skin shine.

CLEAN FRAME

Outside legitimate branding and printed information physically present on the exact product, generate no:

- captions
- subtitles
- promotional text
- prices
- floating labels
- social-media interface
- reaction icons
- banners
- unrelated logos
- watermarks

NEGATIVE PROMPT

different influencer, similar face, facial identity drift, changed face shape, changed eyes, changed nose, enlarged lips, reshaped lips, changed eyebrows, changed hairstyle, changed skin tone, beauty-filter face, waxy skin, plastic skin, excessive smoothing, wrong makeup product, replacement cosmetic, generic cosmetic product, changed product category, changed packaging, changed cap, changed lid, changed pump, changed applicator, changed palette layout, missing shades, extra shades, changed shade, altered undertone, changed finish, mirrored logo, misspelled branding, distorted typography, oversized product, miniature product, product covering face, product too far from camera, product outside frame, cropped packaging, blurred product, blurred face, extreme bokeh, portrait-mode cutout, deformed hand, extra fingers, missing fingers, fused fingers, product clipping through hand, impossible grip, artificial pose, duplicate product, competing cosmetic packaging, CGI, 3D render, illustration, collage, AI artifacts, subtitles, text overlays, watermark

FINAL OUTPUT

One ultra-photorealistic cinematic vertical 9:16 beauty UGC image showing the EXACT attached influencer very close to the camera, calmly holding the EXACT attached makeup product beside her face and near the camera.

The system must automatically identify the makeup category and position the product naturally near its intended facial application area while keeping both the influencer's complete identity and the exact product sharply readable.

Preserve absolute facial identity, absolute packaging fidelity, exact cosmetic shade, realistic hand anatomy, natural skin microtexture, cinematic beauty lighting, and absolutely no visible AI traits.

This image must remain visually stable and suitable as the immutable first-frame anchor for a subsequent product-specific makeup application video.

Copiar prompt de vídeo sem fala — **# UNIVERSAL CINEMATIC MASCARA VIDEO — SAME INITIAL-FRAME ENVIRONMENT / EXACTLY TWO B-ROLL SCENES / MASCARA OPENING + ROOT-TO-TIP APPLICATION / SILENT BEAUTY ROUTINE / ABSOLUTE PRODUCT AND FACE LOCK**

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the mascara product.

Use the approved generated image as the immutable first-frame anchor.

Create one ultra-photorealistic cinematic vertical 9:16 beauty video showing the EXACT influencer silently opening and applying the EXACT attached mascara.

The influencer never speaks.

She does not narrate.

She does not lip-sync.

She simply performs her makeup routine naturally, opening the mascara and applying it precisely to her eyelashes.

The video must contain exactly TWO dedicated B-roll scenes:

1. one product-focused B-roll showing the exact mascara being opened naturally;
2. one application-focused B-roll showing the mascara wand applying the product from the lash roots to the tips with a controlled micro zig-zag movement.

FORMAT

- cinematic vertical 9:16
- 8 seconds
- 24 fps
- exactly four connected shots
- exactly two dedicated B-roll shots
- three clean editorial cuts
- professional 4K beauty-commercial realism
- no dialogue

- no narration
- no voice-over
- no lip-sync
- no singing
- no subtitles
- no text overlays
- no music

INITIAL-FRAME ENVIRONMENT LOCK — HIGHEST PRIORITY

Preserve the approved first-frame environment exactly throughout the entire video.

Maintain the same:

- room
- vanity or beauty area
- wall colors
- furniture
- mirror placement
- decorative objects
- background cosmetics
- lighting fixtures
- surfaces
- architecture
- camera-facing background
- color palette
- atmosphere
- outfit
- hairstyle
- accessories
- and overall visual composition

Do not redesign the environment.

Do not move furniture.

Do not replace decor.

Do not add new beauty products.

Do not remove existing visible objects.

Do not change the room between shots.

Do not create a studio, bathroom, bedroom, or vanity different from the approved first frame.

All B-roll shots must feel physically captured inside the same exact location, during the same makeup session, under the same lighting conditions.

SILENT PERFORMANCE — CRITICAL

The influencer remains completely silent throughout the entire video.

Her lips do not form words.

She does not address the camera.

She does not explain the product.

She does not perform promotional gestures.

Her expression is calm, focused, precise, and naturally concentrated on applying mascara.

Use only subtle facial movements related to opening the product, positioning the head, and applying mascara.

PRODUCT IDENTIFICATION — FIXED

Treat the attached product specifically as mascara.

Do not reinterpret it as:

- eyeliner**
- eyebrow gel**
- lash serum**
- liquid lipstick**
- eye pencil**
- or another cosmetic product**

The video must show real mascara behavior only.

REFERENCE PRIORITY

Priority 1: preserve the exact mascara from image 2.

Priority 2: preserve the exact influencer identity from image 1.

Priority 3: preserve the exact approved first-frame environment.

Priority 4: show the mascara opening naturally.

Priority 5: show realistic root-to-tip mascara application.

Priority 6: maintain natural eye anatomy, eyelash behavior, hand realism, and cosmetic physics.

If any conflict occurs, simplify the camera movement rather than changing the product, influencer, or environment.

ABSOLUTE MASCARA PRODUCT LOCK

Preserve the attached mascara exactly throughout every frame:

- same brand
- same product model
- same tube
- same packaging shape
- same dimensions
- same proportions
- same cap
- same wand
- same wand stem
- same brush head
- same bristle arrangement
- same brush length
- same brush thickness
- same applicator shape
- same logo
- same label
- same lettering
- same spelling
- same typography
- same printed graphics
- same product colors
- same material
- same finish
- same gloss level
- same black or colored mascara pigment
- and every visible construction detail

Do not redesign, replace, simplify, recolor, mirror, duplicate, enlarge, shrink, or morph the product.

Do not substitute a generic mascara tube.

Do not create a different brush head.

Do not change a straight wand into a curved wand.

Do not change bristle density.

Do not invent another applicator.

Do not change the product between shots.

ORIGINAL PRODUCT RESET RULE

At the beginning of every new shot, reconstruct the mascara directly from image 2.

Do not use the generated mascara from the previous shot as the reference for the next shot.

Every shot must independently match the original attached mascara.

No packaging drift.

No logo drift.

No wand drift.

No brush-head drift.

No color drift.

EXACT MASCARA COLOR AND FINISH LOCK

The pigment visible:

- on the wand**
- on the brush bristles**
- during application**
- on the eyelash roots**
- along the eyelash lengths**
- and on the finished lashes**

must match the exact mascara color shown or clearly supported by image 2.

Preserve the same:

- hue
- depth
- darkness
- opacity
- finish
- shine level
- and overall pigment identity

For black mascara, create a deep, rich, natural black.

Do not create gray, blue-black, brown, purple, or another color unless the attached mascara clearly shows that color.

The final lashes must display the exact product tone.

No color fading.

No pigment disappearance.

No shade drift between shots.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly throughout every shot:

- same facial identity
- same face shape
- same skin tone
- same apparent age
- same eyes
- same eye shape
- same eye color
- same eyebrows
- same nose
- same lips
- same jawline
- same cheek structure
- same hairstyle
- same hair color
- same hair texture
- same hairline
- same hand appearance
- and same recognizable identity

Do not replace the influencer with another woman during the B-roll.

Do not alter the eye shape.

Do not enlarge the eyes.

Do not change the eyelashes before application.

Do not change the eyebrows.

No face drift.

No eye drift.

No hand identity drift.

No beauty-filter transformation.

PRE-APPLICATION EYELASH STATE

Before the mascara application begins, keep the eyelashes natural and lightly defined.

Do not begin with fully coated lashes.

Do not create false eyelashes.

Do not create oversized lash volume before physical application.

The viewer must clearly perceive the gradual difference between:

- untreated eyelashes**
- and mascara-coated eyelashes**

Preserve the influencer's real eyelash direction, density, length, and natural anatomy.

EXACTLY FOUR-SHOT STRUCTURE

SHOT 1 — 0.0s TO 1.4s — SILENT BEAUTY PREPARATION

Start from the approved first-frame composition.

Use the same cinematic close beauty framing from approximately the shoulders upward.

The influencer holds the exact mascara naturally near her face.

She remains silent and focused.

She briefly looks at the mascara and prepares to open it.

Both her face and the complete product remain sharply visible.

Preserve the exact original environment, lighting, hairstyle, outfit, and camera angle.

This is not a B-roll shot.

No talking.

No promotional gestures.

SHOT 2 — 1.4s TO 3.4s — B-ROLL 1: OPENING THE EXACT MASCARA

Cut to the first dedicated B-roll scene.

Focus closely on the influencer's real hands opening the EXACT attached mascara.

Show:

- one hand holding the tube securely
- the other hand gripping the cap naturally
- realistic finger pressure
- the cap unscrewing in the correct direction
- subtle thread resistance
- the wand being pulled slowly from the tube
- the brush passing naturally through the wiper opening
- a controlled amount of mascara remaining on the brush
- the exact brush shape
- the exact bristle arrangement
- and the exact product pigment

The opening must feel:

- slow
- human
- delicate
- controlled
- physically correct
- and visually satisfying

The product and wand are the complete visual focus.

Do not make the cap open by itself.

Do not make the wand appear from nowhere.

Do not make the cap disappear.

Do not generate excessive clumps on the brush.

Do not create dripping mascara.

Do not pump the wand repeatedly inside the tube.

Do not switch to another mascara.

SHOT 3 — 3.4s TO 6.8s — B-ROLL 2: PRECISE ROOT-TO-TIP MASCARA APPLICATION

Cut to the second dedicated B-roll scene.

Use an extreme cinematic close-up focused on one eye and its upper eyelashes.

The influencer slightly stabilizes her head backward and gently raises her chin.

This positioning exposes the eyelash roots and keeps the wand away from the eyelid skin.

Her eye remains naturally open or softly lowered according to the physically correct application angle.

The exact mascara wand enters the frame slowly.

The brush is placed precisely at the base of the upper eyelashes.

The bristles must visibly engage with the lash roots.

She performs one controlled micro zig-zag movement from left to right while simultaneously drawing the wand upward from the roots toward the tips.

The zig-zag must be:

- very small**
- restrained**
- controlled**
- stable**
- and physically realistic**

The purpose of the movement is to deposit product at the roots and separate the lashes while combing them upward.

The motion remains continuous.

As the wand approaches the lash tips, the movement slows slightly.

At the tips, she performs one soft upward pull, creating a subtle natural curl and lengthening effect.

The hand remains extremely stable.

No trembling.

No sudden wrist movement.

No exaggerated brushing.

No repeated aggressive passes.

The mascara must be applied only:

- from the lash roots**
- along the real lash strands**
- to the lash tips**

The viewer must clearly see the pigment transferring from the brush to the eyelashes.

The result must develop gradually exactly where the brush passes.

The finished lashes must appear:

- visibly longer**
- ultra-defined**
- individually separated**
- darker**
- clean**
- lifted**
- naturally curved**
- and coated from root to tip**

The black contrast must become noticeable immediately but remain realistic.

No clumps.

No spider lashes.

No stuck-together lash groups.

No mascara on the eyelid.

No mascara below the eye.

No mascara on the skin.

No brush touching the eyeball.

No product inside the eye.

No artificial false-lash effect.

SHOT 4 — 6.8s TO 8.0s — SILENT FINISHED EYE RESULT

Return to the exact original close beauty composition from Shot 1.

Preserve the same:

- camera angle
- camera height
- room
- background
- lighting
- outfit
- hairstyle
- and facial identity

The influencer remains completely silent.

She lowers the wand slightly and calmly looks toward the camera or nearby mirror.

The exact mascara remains visible in her hand.

The treated eye must show:

- deep pigment
- noticeably longer lashes
- clean separation
- subtle upward curvature
- strong definition

- no clumping
- no smudging
- and preserved natural eyelash anatomy

The untreated eye may remain slightly more natural when composition allows, creating a subtle visible contrast between mascara and no mascara.

Do not exaggerate the difference.

Do not create asymmetrical facial distortion.

This is not a B-roll shot.

No speech.

No lip movement forming words.

No promotional gesture.

MASCARA APPLICATION TECHNIQUE — CRITICAL

The application must follow physically correct professional mascara technique:

1. slightly raise the chin;
2. position the brush at the lash roots;
3. perform restrained micro zig-zag movements;
4. move continuously from roots to tips;
5. slow down near the tips;
6. finish with a soft upward pull;
7. separate the lashes while depositing pigment;
8. avoid direct contact with eyelid skin;
9. preserve natural lash direction;
10. stop before excessive product accumulation.

Do not brush only the tips.

Do not begin in the middle of the lashes.

Do not apply mascara backward.

Do not sweep horizontally across the eyelid.

Do not use broad dramatic movements.

HUMAN OPENING PHYSICS

Show:

- correct cap rotation
- realistic thread resistance
- subtle hand pressure
- natural wrist alignment
- controlled wand extraction
- realistic movement through the tube wiper
- believable product viscosity
- accurate contact shadows
- and physically coherent product weight

No floating cap.

No disappearing tube.

No self-opening mascara.

No wand clipping through the tube.

No cap clipping through fingers.

EYELASH AND MASCARA PHYSICS

Show:

- real bristle-to-lash contact
- subtle eyelash flexibility
- natural lash separation
- gradual pigment buildup
- realistic product viscosity
- authentic root coating
- controlled product transfer
- subtle lash lift
- real lash-tip movement
- and physically accurate brush resistance

Each lash must remain attached to the natural lash line.

No floating lashes.

No instantly generated long lashes.

No lash multiplication.

No lashes growing before brush contact.

No digital transformation.

EYE SAFETY AND ANATOMY

Maintain physically accurate eye anatomy.

Show:

- natural eyelid shape
- realistic eye moisture
- real eyelashes emerging from the lash line
- correct distance between brush and eyeball
- subtle natural blinking only when physically safe
- stable pupil and iris
- realistic eye reflections

The mascara wand must never:

- touch the eyeball
- enter the eye
- pass through the eyelid
- bend through the lashes unnaturally
- or cause visible irritation

No red eye.

No watery-eye exaggeration.

No eye deformation.

HAND REALISM

Maintain:

- exactly five fingers per visible hand
- correct thumb placement
- natural finger lengths
- real joints
- realistic knuckles
- natural nails
- visible skin pores
- fine skin lines
- correct wrist alignment
- physically believable grip
- stable precision

- accurate contact shadows

No extra fingers.

No fused fingers.

No missing fingers.

No hand morphing.

No impossible grip.

No trembling hand.

SKIN AND FACE REALISM

Show:

- visible skin pores
- natural facial microtexture
- fine lines
- realistic eyelid texture
- natural under-eye texture
- subtle tonal variation
- individual eyebrow hairs
- real eyelash strands
- individual hair strands
- natural eye moisture
- subtle natural facial asymmetry

No waxy skin.

No plastic face.

No artificial smoothing.

No glass-skin effect.

No beauty-filter transformation.

CAMERA

Shot 1

- cinematic close beauty framing
- 70mm to 85mm equivalent lens

- face and mascara equally sharp
- natural eye-level angle
- exact approved first-frame composition

B-roll Shot 2

- product-focused close-up
- 85mm to 100mm equivalent lens
- tube, cap, wand, fingers, and brush sharply visible
- product opening is the visual focus

B-roll Shot 3

- extreme eye and eyelash close-up
- 90mm to 105mm macro-lens aesthetic
- one eye and upper lashes occupying most of the frame
- wand, roots, lash lengths, tips, and pigment transfer completely sharp

Shot 4

- return to the exact original 70mm to 85mm beauty framing
- same camera position
- same angle
- same environment continuity

No aggressive zoom.

No orbit.

No fisheye.

No artificial camera shake.

FOCUS

Shot 2 must focus completely on the mascara packaging, cap, wand, and opening mechanism.

Shot 3 must focus completely on:

- the brush touching the lash roots
- the micro zig-zag movement
- the pigment transfer
- the separated lashes
- and the upward root-to-tip application

Do not shift focus to the background.

No blurred mascara tube.

No blurred brush head.

No blurred eyelashes.

No blurred contact point.

No focus pulsing.

No excessive bokeh hiding errors.

LIGHTING

Use the exact lighting established in the approved first frame.

Maintain:

- natural skin tones**
- exact mascara packaging color**
- exact mascara pigment**
- realistic eye reflections**
- balanced exposure**
- neutral white balance**
- soft frontal illumination**
- subtle lateral shaping**
- natural shadows**

Do not alter the room lighting between shots.

No colored lighting.

No fake HDR.

No artificial glow.

No dramatic color grading.

AUDIO

No speech.

No narration.

No voice-over.

No music.

Use only subtle synchronized ASMR sounds:

- cap unscrewing
- wand passing through the tube opening
- soft applicator handling
- very subtle brush movement
- quiet room tone
- faint clothing movement

No audible speaking.

No whispers.

No intelligible background voices.

CLEAN FRAME

Outside legitimate branding physically printed on the exact mascara, generate no:

- subtitles
- captions
- promotional text
- prices
- floating labels
- social-media interface
- icons
- banners
- unrelated logos
- watermarks

NEGATIVE PROMPT

speaking, dialogue, narration, voice-over, lip-sync, singing, whispering, more than two B-roll scenes, missing opening B-roll, missing application B-roll, altered initial environment, changed room, changed background, changed furniture, changed lighting, changed outfit, changed hairstyle, wrong cosmetic category, eyeliner application, eyebrow-gel application, changed mascara, similar replacement mascara, generic mascara packaging, altered tube, changed cap, changed wand, changed brush shape, changed bristles, changed logo, changed pigment, product drift, packaging morphing, mascara opening itself, floating cap, disappearing wand, invented applicator, dripping mascara, excessive product on wand, clumped brush, wrong application direction, brush touching eyeball, brush

touching eyelid skin, mascara on skin, mascara on eyelid, mascara under eye, mascara inside eye, shaky hand, robotic movement, wide zig-zag movement, aggressive brushing, spider lashes, clumped lashes, stuck-together lashes, false eyelashes appearing, excessive lash volume, eyelashes growing before contact, floating eyelashes, different model in B-roll, facial identity drift, changed eye shape, enlarged eyes, changed skin tone, hand morphing, extra fingers, missing fingers, fused fingers, wand clipping through hand, waxy skin, plastic face, artificial beauty filter, blurred opening, blurred wand, blurred eyelashes, focus pulsing, excessive bokeh, CGI, 3D render, illustration, collage, AI artifacts, subtitles, text overlays, watermark

FINAL OUTPUT

One ultra-photorealistic cinematic 8-second vertical mascara video showing the EXACT influencer silently using the EXACT attached mascara inside the exact same environment established in the approved first frame.

The video must contain exactly two dedicated B-roll scenes:

1. a product-focused B-roll showing the exact mascara being opened naturally, with the cap unscrewing and the exact wand being removed from the tube;
2. an application-focused B-roll showing the exact mascara brush placed at the upper-lash roots, moving with a restrained micro zig-zag motion from side to side while traveling continuously toward the tips, slowing near the ends, and finishing with a delicate upward pull.

The influencer never speaks, narrates, lip-syncs, or performs a verbal product presentation.

Preserve the exact initial environment, absolute mascara identity, exact wand geometry, deep pigment, absolute influencer identity, real eye anatomy, stable hand control, visible root-to-tip product transfer, individually separated elongated lashes, natural skin microtexture, cinematic human realism, and absolutely no visible AI traits.

[hjuuLrhoCyY&width=560&quality=70&resize=contain](#)

Copiar prompt de imagem – Use the attached garment image as the sole and authoritative product reference.

Before generating the scene, visually inspect the reference and identify:

- the exact number of physically distinct garments;
- whether the product is a single garment, coordinated set, kit, dress, jumpsuit, top, bottom or multiple similar items;
- the exact colors and their placement;
- the exact prints, illustrations, logos, embroidery and written elements;
- the garment silhouette, neckline, sleeves, straps, waistband, hem, pockets, buttons, bows, zippers, drawstrings, cuffs and seams;
- the apparent textile type, fabric weight, weave, knit, ribbing, softness, elasticity and drape.

Create an ultra-photorealistic vertical 9:16 overhead product photograph showing exactly the garment or garments from the attached reference laid naturally on a real bed.

PRODUCT FIDELITY LOCK:

The attached reference is the only source of truth for the product.

Reproduce every garment with exact fidelity.

Preserve:

- exact quantity of garments;
- exact colors;
- exact color placement;
- exact print position;
- exact print scale;
- exact logos and written elements;
- exact embroidery;
- exact buttons;
- exact pockets;
- exact bows;
- exact seams;
- exact trims;
- exact neckline;
- exact sleeves;
- exact waistband;
- exact hems;
- exact garment proportions;
- exact relationship between all parts of the outfit.

Do not redesign, reinterpret, beautify, simplify or modernize the clothing.

Do not add pieces that are not visible in the reference.

Do not remove pieces that are visible.

Do not duplicate one garment to create a kit.

Do not change one color into another.

Do not change the position, size or design of any print.

QUANTITY LOGIC:

If the reference contains one garment, show only one garment.

If the reference contains a coordinated set, show every real component of that set exactly once.

If the reference contains a kit of several garments, show every physically distinct garment exactly once.

If the reference contains three blouses, show exactly three blouses.

If the reference contains one blouse and one pair of shorts, show exactly one blouse and one pair of shorts.

Never create an additional matching garment that does not exist in the reference.

Never omit a real component.

SCENE ADAPTATION:

Infer the visual audience from the clothing design itself.

For a visually feminine product, use a warm neutral bedroom with one or two subtle feminine accents.

For a visually masculine product, use a warm neutral bedroom with restrained and subtle masculine accents.

For an unisex or ambiguous product, use a completely neutral bedroom.

For children's clothing, use an innocent, cheerful, authentic and age-appropriate atmosphere.

Avoid exaggerated gender stereotypes.

Never use an environment color that changes the perceived color of the clothing.

BEDROOM ENVIRONMENT:

A real residential bedroom, warm, clean and softly lived-in.

Use a real bed with a matte cotton or linen bedspread in a pale neutral color selected to create natural contrast with the garment.

Include:

- subtle wrinkles in the bedding;
- realistic fabric compression beneath the garments;

- believable bed seam lines;
- natural contact shadows;
- small environmental imperfections;
- one or two discreet decorative elements near the edge of the frame;
- realistic furniture scale;
- natural object placement.

Possible subtle background objects:

- a small bedside table;
- a neutral lamp;
- a discreet cushion;
- a small decorative item appropriate to the product category;
- a softly blurred curtain or wall section.

Do not create a sterile showroom.

Do not create excessive decoration.

Do not place objects over the garments.

GARMENT PLACEMENT:

Lay the clothing flat on the bed while preserving realistic fabric relaxation.

The garment must not look rigid, inflated or unnaturally symmetrical.

Use:

- subtle natural folds;
- realistic sleeve placement;
- believable waistband positioning;
- realistic edge curling only where physically plausible;
- correct spacing between kit components;
- enough separation to identify every item;
- complete visibility of all important prints and details.

For a coordinated set, arrange the pieces as one complete look.

For a kit, arrange the garments in a clean grid, gentle fan or balanced commercial composition.

Do not overlap garments in a way that hides important information.

FABRIC PHYSICS:

Render the fabric according to what is visible in the reference.

Show:

- visible textile fibers;
- realistic weave or knit structure;
- natural fabric grain;

- realistic stitching depth;
- believable thread thickness;
- seam tension;
- natural fold memory;
- garment weight;
- realistic drape;
- realistic contact between clothing and bedding;
- realistic material thickness;
- subtle shadows inside folds.

If the fabric appears cotton, preserve a matte natural cotton finish.

If the fabric appears ribbed, preserve the rib structure.

If the fabric appears knitted, preserve the knit loops.

If the fabric appears denim, preserve realistic denim grain.

If the fabric appears soft and elastic, show realistic softness and moderate elasticity without turning it into rubber.

CAMERA:

True top-down overhead camera.

The camera is positioned directly above the bed at approximately 90 degrees.

Vertical 9:16 social-commerce framing.

High-quality smartphone main camera realism.

Approximately 26mm equivalent focal behavior.

Minimal lens distortion.

Accurate garment geometry.

The complete product must remain inside the safe frame.

No visible photographer.

No visible body.

No reflections of people.

LIGHTING:

Soft natural daylight entering from one side through a lightly diffused window.

Subtle ambient room bounce.

Neutral white balance.

Accurate product colors.

Realistic directional shadows.

Soft highlight rolloff.

Natural dynamic range.

The lighting must reveal fabric texture without changing the actual color of the product.

Avoid:

- orange color cast;
- blue color cast;
- harsh direct sunlight;
- excessive glow;
- blown highlights;
- artificial studio appearance;
- dramatic shadows hiding product details.

PHOTOGRAPHIC REALISM:

The image must look indistinguishable from a real vertical smartphone photograph created for an authentic fashion product demonstration.

Include:

- subtle photographic grain;
- natural sensor response;
- realistic textile-to-bed contact;
- slight environmental imperfections;
- realistic shadow gradients;
- believable optical sharpness;
- natural depth behavior.

STRICT NEGATIVE CONSTRAINTS:

No person.

No model.

No mannequin.

No hands.

No hanger unless it is part of the actual reference.

No duplicated clothing.

No missing clothing.

No invented accessories.

No added shoes.

No added handbag.

No added matching garment.

No altered colors.

No altered prints.

No mirrored text.

No illegible logos.

No warped seams.

No melted fabric.

No floating clothing.

No fused garments.

No impossible folds.

No inflated garment.

No paper-flat clothing.

No CGI.

No 3D render.

No plastic fabric.

No artificial catalog cutout appearance.

No price.

No promotional text.

No watermark.

No application interface.

No social-media icons.

Copiar prompt de vídeo sem fala —

Vídeo editorial vertical de moda com cinco cenas B-roll sofisticadas em oito segundos.

A fotografia de referência será usada como frame inicial e como trava absoluta de continuidade durante todo o vídeo.

A roupa é o único protagonista.

Nenhuma peça pode mudar de posição, formato, quantidade, proporção, dobra, textura, costura, cor, estampa, orientação ou relação espacial.

Todos os elementos já presentes na composição devem permanecer exatamente iguais.

O dinamismo, o magnetismo e a percepção de valor devem ser criados exclusivamente pela câmera, pelo enquadramento, pelo ritmo dos cortes e pela maneira como os melhores detalhes do produto são revelados.

O resultado deve parecer uma campanha editorial premium de moda: elegante, refinada, tátil, sofisticada e visualmente desejável.

POV mostrando pulseira

Copiar prompt de imagem — ultra realistic POV close-up of a single feminine wrist wearing a bracelet, only one hand and wrist visible, natural relaxed pose

skin with visible pores, fine lines, natural tone variation, slight imperfections, no smoothing

bracelet fits naturally around the wrist, correct scale, realistic contact with skin, no floating

bracelet material is consistent, with stable metal texture, subtle micro scratches, non-uniform reflections

composition focused on wrist and bracelet, no second hand visible

environment: real home interior, adaptable (bedroom, closet or dressing area), neutral tones, slightly lived-in

background softly blurred with natural depth

lighting: natural window light, soft shadows, realistic highlights on bracelet and skin

camera: handheld feel, 50mm lens, shallow depth of field

style: realistic jewelry UGC, no CGI look, no studio perfection

negative: floating bracelet, plastic skin, fake reflections, distorted wrist, multiple arms, artificial glow

Copiar prompt de vídeo sem fala — **POV shot of a single feminine wrist wearing a bracelet, only one arm visible**

the bracelet must remain EXACTLY the same design, shape, material and structure in all frames, no variation allowed

the bracelet stays firmly positioned on the wrist with realistic physical behavior, no sliding or changing fit

the wrist remains at a consistent distance from the camera, maintaining stable scale and proportions

action: subtle natural wrist rotation only, minimal movement, no forward or backward motion

focus is locked on the bracelet, shallow depth of field

lighting: soft natural window light with stable reflections

camera: minimal handheld movement, no zoom, no perspective shift

environment: softly blurred home interior

background sounds: subtle indoor ambient

music: minimal soft ambient

Crianças | Influencer Segurando Roupas No Cabide

Copiar prompt de imagem – ## UNIVERSAL IMAGE PROMPT — KIDS STORE UGC / INFLUENCER HOLDING CHILD CLOTHING ON HANGER / ONE VISIBLE HAND / EXTREME HUMAN REALISM / NO CHILDREN

Create an ultra-photorealistic vertical UGC image (9:16) using two attached reference images.

Reference image 1 = the influencer identity source.

Reference image 2 = the exact child clothing item to be presented.

Preserve the influencer from reference image 1 with maximum fidelity: same face, same skin tone, same facial proportions, same body proportions, same natural asymmetry, same hair, same realistic adult anatomy, same pores, same skin microtexture, same realistic expression, and same authentic human appearance.

Preserve the clothing from reference image 2 with maximum fidelity: same garment type, same shape, same proportions, same size, same print, same pattern, same color, same stitching, same collar, same sleeves, same hem, same fabric texture, same drape, and same visible design identity. Do not alter the clothing in any way.

IMPORTANT NATURALITY RULE:

This must feel like real UGC content, not a rigid catalog shot and not an AI fashion render.

The clothing must be on a realistic hanger.

The influencer must hold the hanger with ONLY ONE visible adult hand by default.

The garment must hang naturally under real gravity.

Do not stretch the clothing sideways.

Do not hold it perfectly flat like a cardboard display.

Do not create a symmetrical pose.

Do not create a stiff mannequin-like frontal posture.

The influencer's body should have slight natural asymmetry, relaxed shoulders, natural elbow bend, subtle torso turn, and a believable human stance.

The free arm should remain relaxed, partially out of frame, or naturally resting without competing for attention.

CHILD / BABY VISIBILITY SAFETY RULE:

No real child, baby, toddler, infant, teenager, or underage person may appear anywhere in the image.

Do not generate children or babies in the store, background, mirror, poster, frame, sign, display, aisle, or any visible part of the environment.

If the clothing tag, packaging, poster, display card, or background object contains a baby or child image, preserve the structure but blur or softly obscure only the child/baby representation.

Scene: a real Brazilian children's clothing store, charming, organized, beautiful, welcoming, and commercially attractive. The store must feel like a comfortable Brazilian middle-class kids boutique or infant clothing shop.

KIDS STORE STYLE:

- real Brazilian infant / kids fashion store
- beautiful and organized racks
- shelves with folded clothing
- tasteful décor
- wood details
- soft neutral and playful tones
- warm retail lighting

- comfortable and real
- no visible minors
- no poor store
- no fake showroom
- no empty studio
- no foreign catalog look

HUMAN REALISM RULE:

The final image must look like a real high-definition photograph captured with iPhone 15 Pro Max clarity and fully human realism.

Skin must look organic, with pores, microtexture, natural tonal variation, realistic light response, and no smoothing.

Hair must have real strands, natural volume, coherent roots, and realistic shine.

Eyes must have moisture, life, coherent reflections, real iris texture, aligned pupils, and human expression.

Mouth, lips, and smile must feel natural and alive, not rigid or robotic.

Hands must be anatomically correct and natural.

The clothing must show real drape, softness, folds, fiber texture, weight, and contact with gravity. No stiff fabric. No fabric looking cut out or pasted.

Composition:

- influencer in the foreground
- clothing on hanger clearly visible
- one visible adult hand only holding the hanger
- slight natural body angle, not perfectly frontal
- product is the main commercial focus after the influencer's face
- enough store context to feel real
- no over-staged composition

Camera:

- iPhone 15 Pro Max realism
- vertical 9:16
- natural smartphone perspective
- sharp focus on face and clothing
- realistic depth
- no excessive blur
- no fake cinematic distortion

Lighting:

- realistic retail lighting
- soft and balanced
- natural highlights on skin, fabric, hanger, wood, and store elements
- realistic shadows
- no harsh flash
- no fake glow

Negative prompt:

rigid pose, symmetrical pose, mannequin posture, stretched garment, cardboard fabric, altered clothing, changed print, wrong scale, floating hanger, floating clothing, extra fingers, warped hands, deformed arms, child hands, baby hands, visible child, visible baby, visible minor, child poster without blur, baby poster without blur, child packaging without blur, baby packaging without blur, plastic skin,

blurry product, soft image, fake store, CGI, AI artifacts, poor commercial environment, oversaturated colors, text overlays, watermark

Copiar prompt de vídeo sem fala — ****UNIVERSAL VIDEO PROMPT — KIDS STORE UGC / CHILD CLOTHING ON HANGER / ABSOLUTE GARMENT FIDELITY / REAL SCALE / BRAZILIAN PHOTOREALISM****

Use two attached reference images.

****REFERENCE IMAGE 1 = INFLUENCER IDENTITY SOURCE****

****REFERENCE IMAGE 2 = EXACT CHILD CLOTHING PRODUCT SOURCE****

Create an ultra-photorealistic vertical UGC video (9:16) inside a real Brazilian children's clothing store. The influencer presents the ****EXACT** clothing item from reference image 2****** on a realistic hanger.

ABSOLUTE PRODUCT FIDELITY — HIGHEST PRIORITY

****Reference image 2 is the absolute and unchangeable product identity source.****

The clothing must remain ****exactly the same physical garment throughout the entire video.****

****DO NOT redesign, recreate, reinterpret, improve, simplify, stylize, replace or modify the clothing.****

Preserve EXACTLY:

- * garment type
- * construction
- * shape
- * silhouette
- * size
- * proportions
- * length
- * width
- * sleeves
- * sleeve length
- * collar
- * neckline
- * cuffs
- * hem
- * seams
- * stitching
- * embroidery

- * buttons
- * zippers
- * pockets
- * labels
- * tags
- * logos
- * graphics
- * prints
- * patterns
- * text
- * decorative elements
- * color
- * color distribution
- * fabric
- * fabric texture
- * material
- * thickness
- * finishing
- * folds
- * edges
- * drape
- * overall visual identity

****Every visible detail from reference image 2 must remain unchanged.****

Do not add details that do not exist.

Do not remove details that exist.

Do not invent buttons, pockets, seams, prints, embroidery, logos, labels or decorative elements.

Do not change the position, size, shape or proportions of any garment detail.

Do not regenerate the print.

Do not reconstruct the fabric differently.

Do not change the garment's color.

Do not make the clothing look like a similar product.

****It must look like the exact same physical piece from reference image 2.****

PRODUCT IDENTITY LOCK

Treat reference image 2 as a **PRODUCT IDENTITY LOCK****.**

The garment must be treated as one real physical object throughout the entire video.

Camera angles may change.

Camera distance may change.

Lighting may change naturally.

******The garment itself must NOT change.******

No product regeneration between shots.

No garment morphing between frames.

No texture replacement.

No print regeneration.

No pattern variation.

No color variation.

No shape variation.

No proportion variation.

No detail hallucination.

If a detail becomes partially hidden because of the camera angle or natural fabric folds, **do not invent a new version of that detail.******

INFLUENCER IDENTITY LOCK

Reference image 1 is the absolute identity source for the influencer.

The influencer must remain visually consistent throughout the entire video:

- * same face**
- * same facial proportions**
- * same skin tone**
- * same hair**
- * same hairstyle**
- * same body proportions**

- * same natural asymmetry**
- * same authentic human appearance**
- * same overall identity**

Do not alter her identity.

Do not change facial structure.

Do not generate a different person between shots.

CRITICAL GARMENT MOVEMENT RULE

The clothing must **NOT** be manipulated in a way that changes its appearance.****

The influencer should simply hold the hanger naturally.

****Do not lift, stretch, pull, shake, unfold, fold, twist, rotate, turn inside out or reposition the garment.****

The hanger can have extremely subtle natural movement caused by the influencer's hand.

The garment follows gravity naturally.

The fabric hangs naturally from the hanger.

The clothing must never appear stiff like cardboard.

The clothing must never be stretched sideways.

The clothing must never be artificially flattened.

The clothing must never be pulled tight.

The clothing must never change shape unnaturally.

****The garment's original shape and details must remain preserved even while hanging.****

HAND RULE

Prefer **one visible adult feminine hand holding the hanger****.**

The hand must hold only the hanger.

Do not touch, pull or manipulate the garment itself.

The other arm remains relaxed or partially outside the frame.

No second hand interacting with the clothing.

No fingers covering important garment details.

No hand pulling the fabric.

No hand stretching the sleeves.

No hand opening or unfolding the garment.

CHILD / BABY FULL PRIVACY BLUR RULE

No real child, baby, toddler, infant, teenager or underage person may appear clearly anywhere in the video.

Do not generate visible minors in the store, background, mirror, poster, frame, shelf, clothing display, packaging, decoration or any visible area.

If any child or baby appears on a tag, packaging, poster, display card, frame, decoration or printed material, completely blur or privacy-mask the entire child/baby representation in every frame.

Blur face, body, hands, skin, silhouette and any human-like minor representation.

****Never blur the garment, hanger or product details.****

VIDEO STRUCTURE

0s–1.5s — HERO UGC SHOT

The influencer stands naturally inside a real Brazilian children's clothing store.

She holds the hanger with the **exact garment from reference image 2.**

One adult feminine hand holds the hanger naturally.

The garment hangs freely under gravity.

****No manipulation of the garment.****

Keep the product sharp and clearly visible.

1.5s–3s — B-ROLL DETAIL SHOT 1

Cut to a close-up of the exact garment while hanging on the same type of hanger.

Show existing details such as:

- * fabric texture**
- * print**
- * collar**
- * sleeve**
- * stitching**
- * seam**
- * label**
- * hem**

****Do not generate, modify or reinterpret any detail.****

The close-up must show the actual same product.

3s–4.5s — NATURAL PRESENTATION SHOT

Return to the influencer holding the hanger naturally.

She makes only a **very subtle natural presentation movement with the hanger****, without manipulating the clothing.**

No turning the garment.

No lifting the garment.

No stretching.

No pulling.

No shaking.

No unfolding.

The garment remains hanging in the same natural position.

4.5s–6s — B-ROLL DETAIL SHOT 2

Cut to another close-up of the same garment.

Show natural fabric drape, sleeve detail, print alignment, stitching, hem, hanger support and texture.

****All details must remain identical to reference image 2.****

6s–8s — FINAL HERO SHOT

Return to a stable UGC shot of the influencer holding the exact garment on the hanger.

She may smile naturally or present calmly.

The garment remains the primary commercial focus.

No clothing manipulation.

No product transformation.

SCENE

Real Brazilian middle-class children's clothing store.

Clean, organized racks.

Shelves with folded clothing.

Soft neutral playful tones.

Tasteful decor.

Wood details.

Comfortable retail lighting.

Realistic commercial environment.

No visible children or babies.

No poor store.

No fake showroom.

No empty studio.

CAMERA

Vertical 9:16.

iPhone 15 Pro Max front-camera look.

Natural smartphone perspective.

Real UGC framing.

Sharp focus on influencer and garment.

Realistic depth.

No excessive background blur.

No fake studio appearance.

Camera movement should be subtle and natural.

****Camera movement must never cause the garment to change.****

LIGHTING

Realistic soft retail lighting.

Balanced exposure.

Natural shadows.

Realistic highlights on fabric, skin, hanger, shelves and store elements.

****Preserve the original garment colors from reference image 2.****

Do not recolor the clothing.

Do not increase saturation.

Do not alter print contrast.

AUDIO

Optional soft natural female voice in Brazilian Portuguese if requested.

Otherwise no dialogue.

Subtle store ambience.

Very soft natural fabric movement sounds.

TECHNICAL PARAMETERS

model: veo-3
length: 8 seconds
resolution: 1080x1920
framerate: 24fps
aspect_ratio: 9:16

STRICT PRIORITY RULES

****PRIORITY 1 — EXACT GARMENT****

****PRIORITY 2 — PRESERVE EVERY GARMENT DETAIL****

****PRIORITY 3 — EXACT INFLUENCER IDENTITY****

****PRIORITY 4 — REALISTIC PHYSICAL BEHAVIOR****

****PRIORITY 5 — CINEMATIC/UGC PRESENTATION****

If cinematic movement conflicts with product fidelity, ****ALWAYS** prioritize product fidelity.**

The garment must never be changed for cinematic purposes.

The clothing must look like the ****same exact physical product** from reference image 2 from the first frame to the last frame.**

ANTI-CRASH / NEGATIVE PROMPT

altered clothing, modified clothing, redesigned clothing, recreated clothing, different clothing, similar clothing, replacement product, product morphing, product transformation, changing garment, changing design, changing print, changing pattern, changing color, changing fabric, changing texture, changing proportions, changing silhouette, changing sleeves, changing collar, changing hem, changing stitching, changing seams, changing buttons, changing pockets, changing zipper, changing label, changing logo, invented details, missing details, extra details, hallucinated details, regenerated print, regenerated texture, distorted print, warped logo, fake stitching, fake fabric, incorrect garment construction, inconsistent garment between shots, garment variation between frames, garment regeneration, garment reconstruction, garment deformation, stretched garment, pulled garment, twisted garment, folded garment, unfolded garment, rotated garment, shaking garment, lifted garment, manipulated garment, garment moving by itself, floating hanger, floating clothing, suspended clothing, levitating clothing, stiff fabric, cardboard fabric, unnatural folds, unnatural drape, two hands, hand touching garment, hand pulling garment, hand stretching garment, hand covering product details, extra fingers, warped hands, deformed arms, child hands, baby

hands, visible child, visible baby, visible toddler, visible teenager, visible minor, child body, baby body, child face, baby face, child poster not fully blurred, baby poster not fully blurred, child packaging not fully blurred, baby packaging not fully blurred, plastic skin, blurry product, soft product details, fake store, poor commercial environment, empty studio, luxury showroom, CGI, 3D render, AI artifacts, text overlays, watermark

Movimento | Casal Beijando

Copiar prompt de vídeo – **AUDIO SETTINGS**

Generate VIDEO ONLY. No audio / voice / speech / lip sync / ambient sound. Output must be completely silent.

CHARACTER PRESERVATION — Keep both people exactly as shown in the source images. Do not modify identity, facial features, hairstyle, clothing, body proportions, environment, lighting, framing, camera angle.

SCENE — Both people stand naturally side by side. Relaxed posture. Visible breathing. Small independent posture adjustments. Natural blinking. Both gradually develop a genuine closed-mouth smile while looking at each other. After a brief pause, both slowly lean their upper bodies forward a few centimeters. Their heads tilt slightly in opposite directions. They briefly touch the front of their faces together for approximately half a second with a soft, natural motion. Immediately afterward they smoothly return to their original positions. Both continue smiling naturally. The interaction feels spontaneous and relaxed.

BODY MOVEMENT — Natural human biomechanics. Smooth acceleration. Natural deceleration. Small balance corrections. Visible breathing. Independent timing. No synchronized robotic movement. No repeated animation.

FACE — Relaxed facial muscles. Natural smile. Subtle cheek movement. Natural blinking. No speech behavior. No mouth articulation. No exaggerated expressions.

HANDS / HAIR / CLOTHING — Hands relaxed. Natural finger movement. No unnecessary gestures. No clipping. Correct anatomy. Natural hair secondary motion and delayed inertia; hair settles naturally. Realistic fabric simulation, natural folds, subtle movement caused by body motion.

CAMERA / ENVIRONMENT — Locked smartphone camera. No zoom, pan, shake, cinematic movement. Environment completely unchanged. Lighting identical.

ULTRA REALISM — Photorealistic. Visible skin texture. Natural shadows. Authentic reflections. Realistic body mechanics. Natural facial animation. No CGI.

FORBIDDEN — talking, speech, lip sync, dramatic acting, robotic movement, looping, camera movement, floating, body deformation, extra fingers, environment changes, background animation.

FINAL RESULT — A completely silent, photorealistic smartphone video where two people naturally smile, briefly lean toward each other, gently touch the front of their faces for a brief moment, then smoothly return to their original positions.

Movimentos | Detalhes do Conjunto

Copiar prompt de vídeo — **puxada para o lado, apenas para ajustar o caimento da cintura. Solta naturalmente.**

Em seguida, leva uma das mãos até a parte da frente da blusa, exatamente no centro, entre os seios, segura suavemente o tecido da própria blusa e dá uma pequena puxadinha para frente, como quem está simplesmente ajustando a blusa no corpo. O movimento deve ser curto, delicado e natural.

Ela não puxa a pele, não aperta o corpo e não levanta a blusa. A mão deve pegar somente o tecido da blusa, fazendo um pequeno ajuste na região central do decote/parte superior.

Depois, solta o tecido e passa a mão naturalmente pela lateral da blusa, finalizando com uma pose simples mostrando o conjunto.

Movimentos lentos, naturais e femininos, estilo UGC/TikTok Shop, sem cortes e sem movimentos exagerados. Manter exatamente o rosto, corpo, roupa, textura, cor, cenário e enquadramento da imagem referência

Movimento | Detalhes Calça

Copiar prompt de vídeo - **The character glides both hands from the waistband down to just above the knees, elegantly showcasing the fabric texture and tailored fit. Soft, diffused lighting enhances the garment's craftsmanship as the fluid movement emphasizes its natural drape and silhouette.**

Beleza / Blush em pó

Copiar prompt de imagem – **# UNIVERSAL CINEMATIC MAKEUP IMAGE PROMPT — INFLUENCER FACE REFERENCE + EXACT MAKEUP PRODUCT / FACE AND PRODUCT CLOSE TO CAMERA / AUTOMATIC PRODUCT ANALYSIS / IMMUTABLE FIRST FRAME FOR VIDEO**

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the attached makeup product.

Create one ultra-photorealistic cinematic vertical 9:16 beauty UGC image designed to serve as the immutable first-frame anchor for a later makeup demonstration or application video.

Show the EXACT influencer very close to the camera, naturally holding the EXACT attached makeup product close to her face and close to the camera.

Both the influencer's face and the exact product must be:

- clearly visible
- sharply focused
- correctly proportioned
- physically realistic
- visually dominant
- fully recognizable
- and suitable for visual continuity in a subsequent video

The influencer is only presenting the product in this image.

She is not applying it yet.

AUTOMATIC MAKEUP PRODUCT IDENTIFICATION

Analyze the attached product and automatically identify its exact category and real presentation method.

Possible categories include:

- lipstick
- lip gloss
- lip tint
- lip oil
- lip balm
- lip liner
- foundation
- skin tint
- concealer
- primer
- setting spray
- setting powder
- compact powder
- loose powder
- blush
- bronzer
- contour product
- highlighter
- illuminator
- eyeshadow palette

- single eyeshadow
- mascara
- eyeliner
- eye pencil
- eyebrow pencil
- eyebrow gel
- brow pomade
- makeup stick
- cream makeup
- liquid makeup
- pressed makeup
- makeup palette
- or another cosmetic makeup product

Do not convert the attached product into another category.

Do not invent a different use, mechanism, applicator, container, or cosmetic format.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly from image 1:

- same facial identity
- same face shape
- same skin tone
- same apparent age
- same eye shape
- same eye color
- same eyebrows
- same nose
- same lips
- same natural lip volume
- same jawline
- same cheek structure
- same forehead proportions
- same hairstyle
- same hair color
- same hair texture
- same hairline
- same recognizable appearance

Do not replace the influencer with a similar person.

Do not beautify, rejuvenate, age, slim, reshape, stylize, or reinterpret her face.

Do not enlarge the eyes.

Do not enlarge or reshape the lips.

Do not alter the nose, jawline, cheeks, or eyebrows.

Do not change the hairstyle.

No facial identity drift.

No beauty-filter transformation.

ABSOLUTE MAKEUP PRODUCT LOCK

Preserve the attached product exactly:

- same brand
- same product category
- same product model
- same packaging
- same tube, bottle, compact, palette, stick, pencil, jar, or container
- same cap
- same lid
- same pump
- same nozzle
- same applicator mechanism
- same wand
- same brush
- same pencil tip
- same lipstick bullet
- same powder pan
- same palette layout
- same number of visible shades
- same shade arrangement
- same proportions
- same dimensions
- same shape
- same color
- same shade
- same undertone
- same finish
- same transparency or opacity
- same label
- same logo
- same lettering
- same spelling
- same typography
- same printed graphics
- same material
- same gloss level
- and every visible packaging detail

Do not redesign the product.

Do not replace it with a similar cosmetic item.

Do not recolor it.

Do not simplify the packaging.

Do not mirror the logo.

Do not rewrite, correct, or distort printed text.

Do not change the container shape.

Do not add or remove shades from a palette.

Do not invent a different cap, lid, pump, wand, brush, applicator, mirror, or accessory.

Do not open the product in this image unless it is already open in the attached reference.

Do not reveal hidden interior details that are not visible in the reference.

PRODUCT COLOR AND SHADE LOCK

Preserve the exact visible cosmetic shade from the reference.

Maintain the same:

- hue
- undertone
- saturation
- brightness
- depth
- opacity
- shimmer level
- shine level
- metallic effect
- matte effect
- satin effect
- and visual color identity

Do not warm, cool, darken, lighten, intensify, soften, or reinterpret the product shade.

This exact product color must remain available for consistent application in the subsequent video.

COMPOSITION — CRITICAL

Use a close cinematic beauty framing from approximately the upper chest or shoulders upward.

The influencer's face must be very close to the camera and occupy most of the vertical frame.

She holds the exact makeup product close to her face and near the camera.

Keep enough physical separation between the product and the face so both remain sharply readable.

The product must not appear disproportionately large or unnaturally small.

The product must not cover:

- the eyes
- the eyebrows
- the nose
- the lips
- or the main facial identity

Use a natural beauty-advertising pose.

The influencer looks directly into the camera with a calm, confident, elegant expression.

Her face remains relaxed.

She is not applying the product yet.

AUTOMATIC PRODUCT POSITIONING

Position the product close to the facial area associated with its real use while keeping the face fully visible.

Use the following positioning logic:

Lip products

Position the product beside the lips, lower cheek, or jawline.

Do not cover the mouth.

Eye products

Position the product beside the temple, outer eye area, or upper cheek.

Do not cover the eyes, lashes, or eyebrows.

Eyebrow products

Position the product beside the temple or upper cheek.

Do not cover the eyebrow shape.

Foundation, concealer, primer, or skin products

Position the product beside the cheek, jawline, or lower face.

Do not cover the central facial features.

Blush, bronzer, contour, or highlighter

Position the product beside the cheekbone or lower cheek.

Keep the cheek structure readable.

Powder or compact products

Position the compact beside the cheek or jawline at its natural presentation angle.

Palettes

Hold the closed palette, or preserve its exact reference state, beside the lower cheek or shoulder.

Do not enlarge the palette unrealistically.

Setting spray

Hold the bottle beside the cheek or jawline with the label facing the camera.

Do not spray it in this image.

For any other makeup category, choose the most natural presentation position according to its real use, packaging, dimensions, and commercial presentation logic.

PRODUCT ORIENTATION

Hold the product vertically, horizontally, or at its natural presentation angle according to its real packaging.

Whenever physically possible, point the front label or main visual face toward the camera.

Keep the complete product inside the frame.

Do not crop:

- the cap
- the base
- the lid
- the pump
- the logo
- the label
- palette corners
- pencil tips
- applicator ends
- or packaging edges

Do not place the product so close to the lens that perspective distortion changes its shape.

HAND AND GRIP REALISM

Show exactly one anatomically correct hand naturally holding the product.

The hand must have:

- exactly five fingers
- correct thumb placement
- natural finger lengths
- real joints

- realistic knuckles
- natural nails
- visible skin pores
- subtle skin lines
- correct wrist alignment
- believable grip pressure
- realistic contact shadows

Automatically adapt the grip to the real product:

- fingertip grip for small tubes, pencils, mascara, eyeliner, and lipstick
- stable finger-and-thumb grip for bottles and sprays
- natural palm support for compacts and palettes
- physically plausible support for larger products

Do not cover the main logo, product name, shade name, label, or important packaging details.

No extra fingers.

No fused fingers.

No missing fingers.

No floating hand.

No product clipping through the fingers.

No impossible grip.

HUMAN PHYSICAL REALISM

Show extreme natural human detail:

- visible skin pores
- fine facial lines
- subtle tonal variation
- natural under-eye texture
- realistic lips
- individual eyebrow hairs
- individual eyelashes
- individual hair strands
- natural eye moisture
- fine facial hair when naturally visible
- authentic skin highlights
- subtle natural facial asymmetry
- realistic hand skin
- real nail texture

No waxy skin.

No plastic face.

No airbrushed beauty filter.

No artificial glass-skin effect.

No excessive smoothing.

No synthetic makeup texture.

No flawless digital skin replacement.

AUTOMATIC BEAUTY PREPARATION

Use refined and minimal beauty preparation appropriate to the attached product.

Keep the intended application area neutral, clean, or only lightly prepared so the later application remains visually meaningful.

For lip products

Keep the lips neutral or lightly moisturized.

Do not apply a competing lip color.

For eye products

Keep the eyes and lashes lightly prepared.

Do not apply strong competing eyeshadow, eyeliner, or mascara.

For eyebrow products

Keep the eyebrows natural and lightly groomed.

Do not create a heavily filled brow.

For foundation, concealer, primer, or powder

Keep the skin naturally prepared with visible texture.

Do not create a fully perfected heavy base before application.

For blush, bronzer, contour, or highlighter

Keep the relevant cheek area neutral.

Do not apply a competing color or finish.

For any other category, automatically keep the intended application area visually ready for the subsequent demonstration.

Do not change the influencer's identity with heavy makeup.

ENVIRONMENT

Automatically create a real, clean, premium-accessible Brazilian beauty environment, such as:

- an organized residential vanity
- a refined bedroom dressing area
- a clean bathroom mirror corner
- or a realistic home beauty setup

Use:

- neutral beige
- cream
- warm brown
- soft blush
- muted terracotta
- or other restrained natural tones

Include:

- refined but believable decor
- clean practical surfaces
- subtle mirror elements
- restrained cosmetic objects
- real residential materials
- natural organization
- and a physically inhabited atmosphere

The setting must feel elegant, human, functional, and credible.

No fake luxury spa.

No futuristic showroom.

No empty photographic studio.

No excessive background cosmetics.

No competing product packaging.

No duplicate hero product in the background.

CAMERA

- cinematic vertical 9:16
- professional full-frame beauty-camera realism
- 4K commercial quality
- 70mm to 85mm equivalent lens
- natural eye-level position
- close beauty framing
- minimal perspective distortion
- realistic facial proportions

- stable composition
- no fisheye
- no extreme wide angle

FOCUS — FACE AND PRODUCT MUST BOTH BE SHARP

Keep both the influencer's face and the exact makeup product sharply readable.

Use sufficient depth of field to preserve:

- eyes
- eyebrows
- lips
- facial texture
- hand
- product packaging
- logo
- label
- applicator structure
- palette layout when visible
- and product edges

Do not use extreme shallow depth of field.

No blurred product.

No blurred face.

No portrait-mode cutout.

No artificial separation around the hair, fingers, or packaging.

The environment may be slightly softer but must remain recognizable.

LIGHTING

Use soft cinematic beauty lighting with:

- natural skin tones
- accurate product colors
- accurate cosmetic shade
- gentle frontal illumination
- soft lateral shaping
- restrained catchlights in the eyes
- realistic facial shadows
- correct packaging reflections
- balanced exposure
- natural white balance

No harsh flash.

No fake HDR.

No neon lighting.

No colored light altering the product shade.

No artificial glow.

No excessive skin shine.

CLEAN FRAME

Outside legitimate branding and printed information physically present on the exact product, generate no:

- captions
- subtitles
- promotional text
- prices
- floating labels
- social-media interface
- reaction icons
- banners
- unrelated logos
- watermarks

NEGATIVE PROMPT

different influencer, similar face, facial identity drift, changed face shape, changed eyes, changed nose, enlarged lips, reshaped lips, changed eyebrows, changed hairstyle, changed skin tone, beauty-filter face, waxy skin, plastic skin, excessive smoothing, wrong makeup product, replacement cosmetic, generic cosmetic product, changed product category, changed packaging, changed cap, changed lid, changed pump, changed applicator, changed palette layout, missing shades, extra shades, changed shade, altered undertone, changed finish, mirrored logo, misspelled branding, distorted typography, oversized product, miniature product, product covering face, product too far from camera, product outside frame, cropped packaging, blurred product, blurred face, extreme bokeh, portrait-mode cutout, deformed hand, extra fingers, missing fingers, fused fingers, product clipping through hand, impossible grip, artificial pose, duplicate product, competing cosmetic packaging, CGI, 3D render, illustration, collage, AI artifacts, subtitles, text overlays, watermark

FINAL OUTPUT

One ultra-photorealistic cinematic vertical 9:16 beauty UGC image showing the EXACT attached influencer very close to the camera, calmly holding the EXACT attached makeup product beside her face and near the camera.

The system must automatically identify the makeup category and position the product naturally near its intended facial application area while keeping both the influencer's complete identity and the exact product sharply readable.

Preserve absolute facial identity, absolute packaging fidelity, exact cosmetic shade, realistic hand anatomy, natural skin microtexture, cinematic beauty lighting, and absolutely no visible AI traits.

This image must remain visually stable and suitable as the immutable first-frame anchor for a subsequent product-specific makeup application video.

Copiar prompt de vídeo sem fala — # UNIVERSAL CINEMATIC BLUSH VIDEO — SAME INITIAL-FRAME ENVIRONMENT / EXACTLY TWO B-ROLL SCENES / PRODUCT OPENING + PRECISE CHEEK APPLICATION / SILENT BEAUTY ROUTINE / EXACT SHADE TRANSFER / ABSOLUTE PRODUCT AND FACE LOCK

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the attached blush product.

Use the approved generated image as the immutable first-frame anchor.

Create one ultra-photorealistic cinematic vertical 9:16 beauty video showing the EXACT influencer silently opening and applying the EXACT attached blush.

The influencer never speaks.

She does not narrate.

She does not lip-sync.

She simply performs her makeup routine naturally, opening the blush, loading a real blush brush with the product, removing the excess, and applying it delicately to her cheeks.

The video must contain exactly TWO dedicated B-roll scenes:

1. one product-focused B-roll showing the exact blush packaging being presented and opened naturally;
2. one application-focused B-roll showing the exact blush color being transferred gradually from the brush onto the cheek with delicate upward movements.

FORMAT

- cinematic vertical 9:16
- 8 seconds
- 24 fps
- exactly four connected shots
- exactly two dedicated B-roll shots
- three clean editorial cuts
- professional 4K beauty-commercial realism
- no dialogue
- no narration
- no voice-over
- no lip-sync
- no singing
- no subtitles
- no text overlays
- no music

INITIAL-FRAME ENVIRONMENT LOCK — HIGHEST PRIORITY

Preserve the approved first-frame environment exactly throughout the entire video.

Maintain the same:

- room
- vanity or beauty area
- walls
- furniture
- mirror placement
- decorative objects
- visible background items
- surfaces
- architecture
- color palette
- lighting direction
- lighting intensity
- atmosphere
- outfit
- hairstyle
- accessories
- and overall visual composition

Do not redesign the room.

Do not move furniture.

Do not replace decor.

Do not add new products.

Do not remove existing objects.

Do not change the environment between shots.

All B-roll shots must feel physically captured in the same exact location, during the same makeup session, under the same lighting conditions.

SILENT PERFORMANCE — CRITICAL

The influencer remains completely silent throughout the entire video.

Her lips do not form words.

She does not address the camera.

She does not explain or promote the product.

She does not perform exaggerated sales gestures.

Her expression remains calm, focused, elegant, and naturally concentrated on doing her makeup.

Use only subtle facial movements related to inspecting, opening, loading, and applying the blush.

PRODUCT IDENTIFICATION — FIXED

Treat the attached product specifically as blush.

Do not reinterpret it as:

- bronzer
- contour
- highlighter
- compact powder
- foundation
- eyeshadow
- or another cosmetic category

Use real blush behavior only.

The blush must be applied specifically to the cheek area with a suitable soft blush brush.

REFERENCE PRIORITY

Priority 1: preserve the exact attached blush product.

Priority 2: preserve the exact influencer identity.

Priority 3: preserve the exact initial-frame environment.

Priority 4: reproduce the correct opening mechanism and packaging.

Priority 5: reproduce the exact visible blush shade on the cheek.

Priority 6: preserve realistic brush contact, skin texture, pigmentation, and gradual blending.

If any conflict occurs, simplify camera movement or background detail rather than changing the product, color, face, or environment.

ABSOLUTE BLUSH PRODUCT LOCK

Preserve the attached blush exactly throughout every frame:

- same brand
- same product model
- same compact or container
- same packaging geometry
- same dimensions
- same proportions
- same lid
- same hinge
- same closure
- same base
- same transparent or opaque areas

- same powder pan
- same pan shape
- same visible pressed-product surface
- same logo
- same label
- same lettering
- same spelling
- same typography
- same printed graphics
- same packaging colors
- same blush color
- same undertone
- same finish
- same material
- same gloss level
- and every visible construction detail

Do not redesign, replace, simplify, recolor, mirror, duplicate, enlarge, shrink, or morph the product.

Do not replace it with a similar blush.

Do not create another compact from the same brand.

Do not change the powder pan.

Do not invent extra compartments, mirrors, brushes, puffs, applicators, or accessories unless clearly visible in the original reference.

ORIGINAL PRODUCT RESET RULE

At the beginning of every new shot, reconstruct the blush directly from image 2.

Do not use the generated product from the previous shot as the reference for the next shot.

Every shot must independently match the original attached blush.

No packaging drift.

No logo drift.

No pan-shape drift.

No product-color drift.

No finish drift.

EXACT BLUSH SHADE TRANSFER LOCK — HIGHEST PRIORITY

The exact blush color visible inside the attached packaging must be physically transferred onto the influencer's cheek.

The visible shade on the cheek must clearly correspond to the color inside the blush compact.

Preserve the same:

- hue
- undertone
- saturation
- brightness
- depth
- warmth
- coolness
- opacity
- transparency
- matte finish
- satin finish
- shimmer level
- luminosity
- and overall color identity

Do not reinterpret the blush color.

Do not make it generically pink.

Do not make it peach, coral, rose, mauve, berry, red, brown, terracotta, orange, nude, or another shade unless that exact color is visible in the attached product.

Do not adapt the blush color to the influencer's outfit, skin tone, or environment.

Do not warm, cool, darken, lighten, desaturate, oversaturate, or beautify the shade.

The product color in the compact and the final cheek color must remain visibly related under the same neutral lighting.

REALISTIC SHADE-BUILDING RULE

The blush color must appear gradually through real brush contact.

Do not make the cheek instantly change color.

Do not create a digital color transition.

Do not create the complete result before the brush touches the skin.

The color buildup must happen in physically coherent layers:

1. the brush touches and picks up the exact blush pigment;
2. excess product is lightly removed;
3. the brush touches the cheek;
4. a soft first layer appears exactly where the bristles pass;
5. a second restrained pass gradually strengthens the color;
6. the final shade blends naturally with the influencer's real skin tone and texture.

The blush must be clearly visible but still physically and humanly realistic.

The skin must remain visible beneath the product.

No opaque paint effect.

No artificial colored patch.

No airbrushed digital gradient.

PRE-APPLICATION CHEEK STATE

Before application, keep both cheeks naturally prepared and free from competing blush.

Do not begin with the target blush color already fully visible.

Preserve:

- natural skin tone
- pores
- fine texture
- subtle natural warmth
- and real facial asymmetry

The viewer must clearly perceive the difference between the untreated cheek area and the gradually powdered cheek area.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly throughout every shot:

- same facial identity
- same face shape
- same skin tone
- same apparent age
- same eyes
- same eyebrows
- same nose
- same lips
- same jawline
- same cheek structure
- same cheekbone placement
- same hairstyle
- same hair color
- same hair texture
- same hairline
- same hand appearance
- and same recognizable identity

Do not replace the influencer with another woman during B-roll.

Do not reshape her cheeks.

Do not sharpen or enlarge the cheekbones.

Do not alter her face to exaggerate the blush effect.

No facial drift.

No hairstyle change.

No skin-tone change.

No beauty-filter transformation.

EXACTLY FOUR-SHOT STRUCTURE

SHOT 1 — 0.0s TO 1.4s — SILENT BEAUTY PREPARATION

Start from the approved first-frame composition.

Use the same cinematic close beauty framing from approximately the shoulders upward.

The influencer holds the exact attached blush near her face.

Both the face and product remain sharply visible.

She remains silent and focused.

She briefly looks toward the product and prepares to open it.

Preserve the exact environment, lighting, outfit, hairstyle, and camera angle from the first frame.

This is not a B-roll shot.

No speaking.

No promotional gesture.

SHOT 2 — 1.4s TO 3.4s — B-ROLL 1: SHOWING AND OPENING THE EXACT BLUSH

Cut to the first dedicated B-roll scene.

Focus closely on the influencer's real hands holding and opening the EXACT attached blush packaging.

Show:

- the complete compact or container
- the front packaging
- the visible logo and product details
- real finger placement
- natural pressure on the closure
- the lid opening through the correct mechanism
- realistic hinge resistance

- the exact powder pan being revealed
- and the exact blush color inside the packaging

After opening, she briefly holds the compact at a clear natural presentation angle so the powder surface and packaging remain visible.

The product remains the complete visual focus.

Do not make the compact open by itself.

Do not make the lid disappear.

Do not change the pan shape.

Do not change the blush color.

Do not switch to another product.

Do not reveal unsupported hidden compartments.

SHOT 3 — 3.4s TO 6.8s — B-ROLL 2: DELICATE BLUSH APPLICATION WITH VISIBLE COLOR TRANSFER

Cut to the second dedicated B-roll scene.

Use a close cinematic beauty shot focused on one cheek, the cheekbone, the brush, and the exact point of product transfer.

The influencer herself must remain identifiable as the same person.

Use one real, clean, soft, unbranded blush brush with:

- natural proportional size
- soft rounded or slightly angled bristles
- realistic bristle density
- physically believable handle
- and correct flexibility

The action begins with the brush lightly touching the exact blush pan and picking up a controlled amount of product.

She then gives one or two delicate taps:

- against the edge of the compact
- or lightly against the back of her hand

to remove excess powder.

The tapping must be subtle and physically realistic.

No large powder cloud.

No product explosion.

She slightly turns her face and keeps her head stable.

She positions the brush diagonally at the apple of the cheek.

The brush travels softly upward and outward toward the upper cheekbone and temple.

Use a controlled combination of:

- very light tapping
- short sweeping motions
- soft circular blending
- and restrained upward strokes

The brush must not be dragged forcefully across the face.

The bristles lightly compress against the skin.

The movement is firm enough to control the application but extremely gentle.

The hand remains stable.

No trembling.

No abrupt wrist movement.

The first pass deposits a subtle layer.

The second restrained pass builds the exact shade gradually.

The color must become visible exactly where the brush passes.

The final result must clearly show:

- the exact blush color from the compact
- natural blending with the influencer's skin
- a visible but delicate flush
- soft upward direction
- slightly lifted visual effect
- preserved pores
- preserved skin microtexture
- no harsh border
- and no smudging

Keep enough untreated skin visible around the application area so the viewer can notice the subtle difference between:

- skin without blush
- and skin with the exact blush applied

When composition allows, keep the opposite cheek more neutral during this B-roll to create a realistic visual comparison.

Do not create an artificial split-screen.

Do not exaggerate the difference.

SHOT 4 — 6.8s TO 8.0s — SILENT FINISHED BLUSH RESULT

Return to the exact original close beauty composition from Shot 1.

Preserve the same:

- camera position
- camera angle
- room
- background
- lighting
- outfit
- hairstyle
- facial identity
- and product packaging

The influencer remains completely silent.

She lowers the brush slightly and holds the exact open blush near her face.

She calmly looks toward the camera or a nearby mirror.

The applied cheek must display:

- the exact visible blush shade
- realistic gradual pigmentation
- delicate upward blending
- soft natural edges
- visible skin texture
- subtle healthy color
- and no smudging

The visible blush in the compact and the applied result on the face must be visually consistent.

This is not a B-roll shot.

No speech.

No lip movement forming words.

No promotional gesture.

BLUSH APPLICATION TECHNIQUE — CRITICAL

The application must follow realistic professional blush technique:

1. load the soft brush lightly with the product;
2. remove excess with one or two delicate taps;
3. place the brush around the apple of the cheek;
4. angle the movement upward toward the temple;
5. deposit the first layer with soft tapping;
6. blend using short upward and outward sweeps;
7. build intensity gradually with a second restrained layer;
8. preserve natural skin texture;
9. keep the edges soft and diffused;
10. stop before excessive color accumulation.

Do not apply the full intensity in one pass.

Do not drag the brush downward.

Do not create circular clown-like cheek patches.

Do not apply blush under the jawline.

Do not cover the entire face.

Do not create harsh contour lines.

HUMAN OPENING PHYSICS

Show:

- correct lid movement
- realistic hinge resistance
- natural finger pressure
- controlled wrist movement
- accurate compact weight
- real contact shadows
- and physically coherent product handling

No floating lid.

No disappearing packaging parts.

No product clipping through fingers.

No self-opening compact.

BRUSH AND POWDER PHYSICS

Show:

- realistic brush contact with the powder pan
- subtle bristle movement
- controlled pigment pickup
- minimal excess powder

- believable tap-off behavior
- real bristle compression against the cheek
- gradual pigment transfer
- authentic blending
- physically realistic powder adhesion
- and soft natural diffusion

No excessive airborne powder.

No powder cloud covering the face.

No floating pigment.

No instant color transformation.

No brush passing through the cheek.

No rigid plastic bristles.

HAND REALISM

Maintain:

- exactly five fingers per visible hand
- correct thumb placement
- natural finger lengths
- real joints
- realistic knuckles
- natural nails
- visible skin pores
- fine skin lines
- correct wrist alignment
- physically believable grip
- accurate contact shadows

No extra fingers.

No fused fingers.

No missing fingers.

No hand morphing.

No impossible grip.

No trembling hand.

SKIN AND FACE REALISM

Show:

- visible skin pores

- fine facial lines
- natural cheek texture
- realistic under-eye texture
- subtle tonal variation
- individual eyebrow hairs
- individual eyelashes
- individual hair strands
- natural eye moisture
- subtle natural facial asymmetry
- realistic skin compression from the brush
- authentic pigment interaction with skin

No waxy skin.

No plastic face.

No artificial glass-skin effect.

No excessive smoothing.

No beauty-filter transformation.

The blush enhances the real skin instead of replacing it.

CAMERA

Shot 1

- cinematic close beauty framing
- 70mm to 85mm equivalent lens
- face and product equally sharp
- natural eye-level angle
- exact approved first-frame composition

B-roll Shot 2

- product-focused close-up
- 85mm to 100mm equivalent lens
- packaging, fingers, hinge, pan, and blush color sharply visible
- product opening is the visual focus

B-roll Shot 3

- application-focused cheek close-up
- 85mm to 105mm equivalent lens
- cheek, cheekbone, brush, bristles, and pigment transfer sharply visible
- close enough to perceive the subtle difference between applied and unapplied skin

Shot 4

- return to the exact original 70mm to 85mm beauty framing
- same camera position

- same angle
- same scene continuity

No aggressive zoom.

No orbit.

No fisheye.

No artificial camera shake.

FOCUS

Shot 2 must focus completely on:

- the exact packaging
- opening mechanism
- powder pan
- and blush color

Shot 3 must focus completely on:

- brush-to-skin contact
- gradual pigment transfer
- cheek texture
- upward application movement
- and the subtle difference between skin with and without blush

Do not shift focus to background decor.

No blurred compact.

No blurred blush pan.

No blurred brush.

No blurred cheek.

No blurred contact point.

No focus pulsing.

No excessive bokeh hiding errors.

COLOR-MANAGED LIGHTING — CRITICAL

Use the exact lighting established in the approved first frame.

Maintain:

- natural skin tones
- exact packaging colors

- exact blush shade
- exact blush undertone
- realistic skin finish
- balanced exposure
- neutral white balance
- high color accuracy
- soft frontal illumination
- subtle lateral shaping
- natural shadows

The blush compact and applied cheek must be illuminated under the same neutral lighting.

Do not allow warm or colored light to change the blush shade.

No pink lighting.

No orange cast.

No red cast.

No blue, green, or purple contamination.

No fake HDR.

No artificial glow.

No dramatic color grading.

AUDIO

No speech.

No narration.

No voice-over.

No music.

Use only subtle synchronized ASMR sounds:

- compact opening
- lid movement
- brush touching the powder
- delicate tap against the compact or hand
- soft bristle movement against the cheek
- light product handling
- quiet room tone

No audible speaking.

No whispers.

No intelligible background voices.

CLEAN FRAME

Outside legitimate branding physically printed on the exact blush, generate no:

- subtitles
- captions
- promotional text
- prices
- floating labels
- social-media interface
- icons
- banners
- unrelated logos
- watermarks

NEGATIVE PROMPT

speaking, dialogue, narration, voice-over, lip-sync, singing, whispering, promotional gestures, more than two B-roll scenes, missing opening B-roll, missing application B-roll, changed initial environment, different room, changed furniture, changed background, changed lighting, changed outfit, changed hairstyle, wrong product category, bronzer effect, contour effect, highlighter effect, compact powder effect, foundation effect, generic blush, changed product, replacement blush, altered compact, changed lid, changed hinge, changed powder pan, changed packaging, altered logo, mirrored label, misspelled branding, changed blush shade, generic pink cheeks, color mismatch between compact and face, incorrect undertone, warmer result, cooler result, darker result, lighter result, oversaturated cheeks, desaturated blush, instant color change, digital pigment transition, color appearing before brush contact, brush not touching skin, wrong brush type, excessive powder cloud, powder explosion, floating pigment, harsh circular cheek patch, clown blush, sharp edge, unblended color, blush outside cheek area, blush under jawline, downward brush movement, aggressive dragging, exaggerated transformation, erased pores, plastic skin, waxy face, artificial beauty filter, different model during B-roll, facial identity drift, changed skin tone, changed face shape, hand morphing, extra fingers, fused fingers, missing fingers, impossible grip, blurred opening, blurred application, focus pulsing, excessive bokeh, CGI, 3D render, illustration, collage, AI artifacts, subtitles, text overlays, watermark

FINAL OUTPUT

One ultra-photorealistic cinematic 8-second vertical blush video showing the EXACT influencer silently using the EXACT attached blush inside the exact same environment established in the approved first frame.

The video must contain exactly two dedicated B-roll scenes:

1. a product-focused B-roll showing the exact blush packa

-=====

Influenciador Ugc Desfilando Na Esteira

Copiar prompt de imagem – # UNIVERSAL IMAGE PROMPT — INFLUENCER VESTINDO O LOOK ENVIADO / DESFILANDO NA ESTEIRA NO CHÃO / SALA PREMIUM REAL BRASILEIRA / EXTREMO FOTORREALISMO

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute clothing reference for the outfit or hero garment.

Create one ultra-photorealistic vertical 9:16 image showing the EXACT influencer wearing the EXACT attached clothing item as part of a stylish complete look, while naturally modeling on a floor-level treadmill inside a premium real Brazilian living room.

This prompt is UNIVERSAL:

- if image 1 is a woman, generate a woman;
- if image 1 is a man, generate a man;
- preserve the exact identity from the uploaded face reference;
- preserve the exact attached clothing as the hero piece of the look.

The treadmill must be the low floor-deck type only, with no arms, no side supports, no handlebars, and no upper console emphasis — visually like a treadmill base on the floor.

The final result must look like a real premium commercial fashion image captured in a beautiful Brazilian home, with convincing human realism, body realism, fabric realism, and absolutely no AI look.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly from image 1:

- same facial identity
- same face shape
- same eyes
- same eyebrows
- same nose
- same lips
- same jawline
- same cheek structure
- same skin tone
- same apparent age
- same hairstyle
- same hair color
- same hair texture
- same recognizable appearance

Do not replace the influencer with a similar person.

Do not beautify excessively.

Do not change gender.

Do not change ethnicity.

Do not change the facial identity.

No beauty-filter effect.

No face drift.

ABSOLUTE OUTFIT / GARMENT LOCK

Use image 2 as the only product and clothing reference.

Preserve exactly:

- same clothing type
- same model
- same design
- same silhouette
- same color
- same print
- same pattern placement
- same structure
- same fabric
- same texture
- same stitching
- same neckline
- same collar
- same hood if present
- same sleeves
- same cuffs
- same waistband
- same hem
- same zipper
- same buttons
- same pockets
- same trims
- same visible branding if any
- same visible construction details

Do not redesign, recolor, replace, simplify, restyle, or alter the garment.

If the uploaded piece is only one item, build a complete neutral look around it without competing with it.

COMPLETE LOOK RULE

The attached clothing item must remain the main visual focus.

Create a full stylish look around it using neutral complementary pieces only.

For women:

- neutral elegant complementary pieces if needed
- refined feminine styling
- discreet neutral footwear

For men:

- neutral stylish complementary pieces if needed
- clean masculine styling
- discreet neutral footwear

The complementary pieces must:

- not compete with the hero garment
- remain neutral in color
- feel commercially attractive
- feel coherent with the attached piece

Do not create loud accessories.

Do not overpower the main garment.

Do not add a bag unless explicitly requested.

ACTION / POSE

Show the influencer naturally walking or mid-step on the treadmill, as if subtly modeling the look.

The pose must feel:

- human
- elegant
- confident
- soft
- natural
- commercially attractive
- physically believable

The influencer may interact subtly with the worn outfit, such as:

- lightly touching the collar
- lightly touching the zipper area
- gently smoothing the front
- lightly touching the hem
- softly touching the sleeve or cuff
- lightly touching the waist area

In some generations, optionally include:

- a soft stylish downward index-finger gesture
- subtle and elegant
- never aggressive
- while maintaining a natural walking pose

No exaggerated posing.

No stiff catwalk exaggeration.

No awkward hands.

No mannequin stiffness.

WALKING AND BODY REALISM

The pose must suggest real human biomechanics:

- believable mid-step posture
- natural leg alternation
- balanced torso
- realistic foot placement
- subtle shoulder movement
- balanced posture
- natural arm positioning
- physically correct weight distribution

The influencer must feel like a real person truly walking and modeling on the treadmill.

No robotic pose.

No floating feet.

No rigid limbs.

TREADMILL — CRITICAL

The treadmill must be only the floor-level walking base.

Show:

- only the low deck / walking platform
- realistic treadmill belt
- subtle side rails near the base only if physically required by design
- no large structure
- no arm supports
- no side arms
- no high handles
- no console dominating the frame

It must visually feel:

- low
- elegant
- discreet
- integrated into the room

The treadmill must not dominate the scene.

SCENE — PREMIUM REAL BRAZILIAN LIVING ROOM

Place the scene in a real premium Brazilian living room, with a beautiful but believable residential aesthetic.

Use:

- off-white or warm white walls
- neutral white and cream tones
- soft beige architectural surfaces
- terracotta decorative accents
- natural warm wood details
- tasteful green plants
- elegant clean furniture
- refined but real Brazilian-home atmosphere

The room must feel:

- Brazilian
- premium
- residential
- lived-in
- warm
- clean
- organized
- attractive
- believable
- human

Possible elements:

- neutral rug
- refined console or low cabinet
- subtle decorative ceramics
- terracotta vase
- medium green indoor plant
- elegant wood slat or textured wall detail
- soft natural light
- beautiful but non-luxury-palace atmosphere

Avoid:

- gym environment
- sterile studio
- luxury hotel suite
- fake mansion
- empty CGI showroom
- exaggerated minimalist emptiness
- commercial store environment

COMPOSITION

- vertical 9:16
- straight frontal or very slight three-quarter front angle
- full body visible
- influencer near the camera, but not cropped awkwardly
- treadmill visible mainly at the bottom
- room visible enough to establish the environment
- outfit clearly readable
- the influencer occupies most of the frame height
- no excessively wide shot
- no distant framing
- no too much ceiling
- no too much empty floor

The scene must feel intimate, elegant, and commercially strong.

CAMERA

- vertical 9:16
- premium commercial photo realism

- 4K quality
- eye-level or slightly below eye-level angle
- 35mm to 50mm lens feel
- natural perspective
- no distortion
- no fisheye
- no extreme wide angle

LIGHTING

Use soft premium residential lighting:

- natural daylight mixed with soft ambient interior lighting
- realistic shadows
- gentle highlight rolloff
- accurate skin tone
- accurate clothing color
- realistic fabric rendering
- believable room illumination

No harsh flash.

No fake HDR.

No glow effects.

No overprocessed contrast.

FOCUS

Keep clearly readable:

- face
- hairstyle
- body
- complete outfit
- main clothing details
- treadmill base
- immediate room context

Use natural depth only.

No portrait cutout.

No fake blur halo.

No excessive bokeh.

No blur on the outfit.

HUMAN REALISM

The influencer must look fully real and human:

- visible skin texture
- facial microtexture
- real pores
- natural hair strands
- natural body proportions
- realistic neck

- realistic shoulders
- real hands
- exactly five fingers on each visible hand
- correct nails
- realistic wrists
- natural posture

No waxy skin.

No plastic face.

No deformed hands.

No extra fingers.

No mannequin feeling.

FABRIC REALISM

The clothing must behave like real worn clothing:

- natural drape
- realistic folds
- natural tension in key areas
- correct sleeve behavior
- correct hem behavior
- realistic garment fit
- real fabric weight
- visible texture

The clothing must not:

- melt
- float
- inflate unnaturally
- change color
- change design
- shift into another garment

CLEAN FRAME RULE

Do not generate:

- subtitles
- text overlays
- captions
- banners
- social-media interface
- watermark

NEGATIVE PROMPT

wrong person, similar person, face drift, changed gender, changed face shape, changed hair, altered skin tone, changed garment, altered clothing design, recolored outfit, wrong print, wrong pattern placement, wrong fabric, exaggerated accessories, ugly styling, gym room, fake mansion, studio look, CGI, 3D render, AI look, robotic pose, floating feet, treadmill with arms, treadmill handlebars, treadmill console emphasis, deformed anatomy, extra fingers, missing fingers, waxy skin, plastic face, fake hair, distorted room, excessive blur, fake bokeh, over-HDR, text overlays, subtitles, watermark

FINAL OUTPUT

One ultra-realistic vertical 9:16 image showing the EXACT influencer from image 1 wearing the EXACT attached clothing from image 2 as the hero piece of a stylish complete look, naturally modeling on a low floor-level treadmill inside a premium real Brazilian living room with neutral whites, cream tones, terracotta accents, warm wood, and green plants, with extreme human realism, accurate fabric behavior, elegant commercial presence, and absolutely no visible AI traits.

Copiar prompt de vídeo sem fala — # UNIVERSAL VIDEO PROMPT — REAL INFLUENCER
WEARING THE ATTACHED LOOK / WALKING AND MODELING ON A FLOOR-LEVEL TREADMILL
/ BRAZILIAN PREMIUM LIVING ROOM / EXTREME HUMAN PHOTOREALISM

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute clothing reference for the outfit or hero garment.

Create one ultra-photorealistic vertical 9:16 video showing the EXACT influencer wearing the EXACT attached clothing item as part of a stylish complete look, while naturally walking and subtly modeling on a floor-level treadmill inside a real premium Brazilian living room.

This prompt is UNIVERSAL:

- if image 1 is a woman, generate a woman;
- if image 1 is a man, generate a man;
- preserve the exact identity from the uploaded face reference;
- preserve the exact attached clothing as the hero piece of the look.

The treadmill must be the low floor-deck type only, with no arms, no side supports, no handlebars, and no upper console emphasis — visually similar to a walking base on the floor.

The final result must look like a real commercial lifestyle video recorded in a beautiful Brazilian home, with convincing human realism, body realism, fabric realism, and absolutely no AI look.

FORMAT

- vertical 9:16
- 8 seconds
- 24 fps
- one continuous shot
- no scene cuts
- no transitions
- cinematic but realistic
- premium commercial quality
- no narration unless explicitly requested
- no subtitles
- no text overlays
- no watermark

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly from image 1:

- same facial identity
- same face shape
- same eyes
- same eyebrows
- same nose
- same lips
- same jawline
- same cheek structure
- same skin tone
- same apparent age
- same hairstyle
- same hair color
- same hair texture
- same recognizable appearance

Do not replace the influencer with a similar person.

Do not beautify excessively.

Do not slim the face unnaturally.

Do not change gender.

Do not change ethnicity.

Do not change the facial identity.

No beauty-filter effect.

No face drift.

ABSOLUTE OUTFIT / GARMENT LOCK

Use image 2 as the only product and clothing reference.

Preserve exactly:

- same clothing type
- same model
- same design
- same silhouette
- same color
- same print
- same pattern placement
- same structure
- same fabric
- same texture
- same stitching
- same neckline
- same collar
- same hood if present

- same sleeves
- same cuffs
- same waistband
- same hem
- same zipper
- same buttons
- same pockets
- same trims
- same visible branding if any
- same visible construction details

Do not redesign, recolor, replace, simplify, restyle, or alter the garment.

If the uploaded piece is only one item, build a complete neutral look around it without competing with it.

COMPLETE LOOK RULE

The attached clothing item must remain the main visual focus.

Create a full stylish look around it using neutral complementary pieces only.

For women:

- neutral elegant bottoms or top if needed
- refined feminine styling
- discreet neutral footwear

For men:

- neutral stylish bottoms or top if needed
- clean masculine styling
- discreet neutral footwear

The complementary pieces must:

- not compete with the hero garment
- remain neutral in color
- feel commercially attractive
- feel coherent with the attached piece

Do not create loud accessories.

Do not overpower the main garment.

Do not add a bag unless explicitly requested.

ACTION

The influencer walks naturally on the treadmill for the entire video while subtly modeling the look.

The influencer never stops walking.

The walk must feel:

- human
- elegant
- confident

- smooth
- natural
- commercially attractive
- physically believable

The influencer may interact subtly with the worn outfit while walking, such as:

- lightly touching the collar
- lightly touching the zipper area
- gently smoothing the front
- lightly touching the hem
- softly touching the sleeve or cuff
- briefly adjusting the side seam
- lightly touching the waist area

In some generations, optionally include:

- a soft stylish downward index-finger gesture
- subtle and elegant
- never aggressive
- while continuing to walk naturally

All gestures must remain restrained and elegant.

No exaggerated posing.

No stiff catwalk exaggeration.

No dancing.

No spinning.

WALKING AND BODY REALISM

The walk must show real human biomechanics:

- correct step rhythm
- natural alternating legs
- stable torso
- correct foot placement
- believable treadmill contact
- subtle shoulder movement
- balanced posture
- natural arm movement
- physically correct weight transfer

The influencer must feel like a real person truly walking on a treadmill.

No robotic motion.

No floating feet.

No skating motion.

No rigid limbs.

No unnatural looped animation.

TREADMILL — CRITICAL

The treadmill must be only the floor-level walking base.

Show:

- only the low deck / walking platform
- realistic treadmill belt
- subtle side rails near the base only if physically required by design
- no large structure
- no arm supports
- no side arms
- no high handles
- no console dominating the frame

It must visually feel like the example:

- low treadmill base on the floor
- minimalist
- elegant
- discreet
- integrated into the room

The treadmill must not dominate the scene.

SCENE — PREMIUM REAL BRAZILIAN LIVING ROOM

Place the scene in a real premium Brazilian living room, with a beautiful but believable residential aesthetic.

Use:

- off-white or warm white walls
- neutral white and cream tones
- soft beige architectural surfaces
- terracotta decorative accents
- natural warm wood details
- tasteful green plants
- elegant clean furniture
- refined but real Brazilian-home atmosphere

The room must feel:

- Brazilian
- premium
- residential
- lived-in
- warm
- clean
- organized
- attractive
- believable
- human

Possible elements:

- neutral rug
- refined console or low cabinet
- subtle decorative ceramics
- terracotta vase

- medium green indoor plant
- elegant wood slat or textured wall detail
- soft natural light
- beautiful but non-luxury-palace atmosphere

Avoid:

- gym environment
- sterile studio
- luxury hotel suite
- fake mansion
- empty CGI showroom
- exaggerated minimalist emptiness
- commercial store environment

COMPOSITION

- straight frontal or very slight three-quarter front angle
- full body visible
- influencer near the camera, but not cropped awkwardly
- treadmill visible mainly at the bottom
- room visible enough to establish the environment
- outfit clearly readable
- the influencer occupies most of the frame height
- no excessively wide shot
- no distant framing
- no excessive ceiling
- no too much empty floor

The scene must feel intimate, elegant, and commercially strong.

CAMERA

- vertical 9:16
- one continuous shot
- eye-level or slightly below eye-level angle
- realistic premium commercial framing
- 35mm to 50mm lens feel
- natural perspective
- no distortion
- no fisheye
- no extreme wide angle
- subtle handheld realism or very restrained stabilized motion

No orbit.

No aggressive push-in.

No dramatic zoom.

No gimmicky camera move.

LIGHTING

Use soft premium residential lighting:

- natural daylight mixed with soft ambient interior lighting

- realistic shadows
- gentle highlight rolloff
- accurate skin tone
- accurate clothing color
- realistic fabric rendering
- believable room illumination

No harsh flash.

No fake HDR.

No glow effects.

No overprocessed contrast.

No extreme cinematic grading.

FOCUS

Keep clearly readable:

- face
- hairstyle
- body
- complete outfit
- main clothing details
- treadmill base
- immediate room context

Use natural depth only.

No portrait cutout.

No fake blur halo.

No excessive bokeh.

No blur on the outfit.

HUMAN REALISM

The influencer must look fully real and human:

- visible skin texture
- facial microtexture
- real pores
- natural hair strands
- natural body proportions
- realistic neck
- realistic shoulders
- real hands
- exactly five fingers on each visible hand
- correct nails
- realistic wrists
- natural posture

No waxy skin.

No plastic face.

No deformed hands.

No extra fingers.

No mannequin feeling.

FABRIC REALISM

The clothing must behave like real worn clothing:

- natural drape
- realistic folds
- realistic movement while walking
- natural tension in key areas
- correct sleeve behavior
- correct hem behavior
- realistic garment fit
- real fabric weight
- visible texture

The clothing must not:

- melt
- float
- inflate unnaturally
- change color
- change design
- shift into another garment

AUDIO

Use only natural synchronized audio:

- soft treadmill ambience
- subtle room tone
- very soft fabric movement
- no dialogue unless requested
- no narration unless requested
- no music unless requested

NEGATIVE PROMPT

wrong person, similar person, face drift, changed gender, changed face shape, changed hair, altered skin tone, changed garment, altered clothing design, recolored outfit, wrong print, wrong pattern placement, wrong fabric, wrong fit, exaggerated accessories, ugly styling, gym room, fake mansion, studio look, CGI, 3D render, AI look, robotic motion, floating feet, treadmill with arms, treadmill handlebars, treadmill console emphasis, deformed anatomy, extra fingers, missing fingers, waxy skin, plastic face, fake hair, distorted room, excessive blur, fake bokeh, over-HDR, text overlays, subtitles, watermark

FINAL OUTPUT

One ultra-realistic 8-second vertical video showing the EXACT influencer from image 1 wearing the EXACT attached clothing from image 2 as the hero piece of a stylish complete look, naturally walking and subtly modeling on a low floor-level treadmill inside a premium real Brazilian living room with neutral whites, cream tones, terracotta accents, warm wood, and green plants, with extreme human realism, accurate fabric behavior, elegant commercial presence, and absolutely no visible AI traits.

Beleza / Blush Bastão

Copiar prompt de imagem - # UNIVERSAL CINEMATIC MAKEUP IMAGE PROMPT —
INFLUENCER FACE REFERENCE + EXACT MAKEUP PRODUCT / FACE AND PRODUCT CLOSE
TO CAMERA / AUTOMATIC PRODUCT ANALYSIS / IMMUTABLE FIRST FRAME FOR VIDEO

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the attached makeup product.

Create one ultra-photorealistic cinematic vertical 9:16 beauty UGC image designed to serve as the immutable first-frame anchor for a later makeup demonstration or application video.

Show the EXACT influencer very close to the camera, naturally holding the EXACT attached makeup product close to her face and close to the camera.

Both the influencer's face and the exact product must be:

- clearly visible
- sharply focused
- correctly proportioned
- physically realistic
- visually dominant
- fully recognizable
- and suitable for visual continuity in a subsequent video

The influencer is only presenting the product in this image.

She is not applying it yet.

AUTOMATIC MAKEUP PRODUCT IDENTIFICATION

Analyze the attached product and automatically identify its exact category and real presentation method.

Possible categories include:

- lipstick
- lip gloss
- lip tint
- lip oil
- lip balm
- lip liner
- foundation
- skin tint
- concealer
- primer
- setting spray
- setting powder

- compact powder
- loose powder
- blush
- bronzer
- contour product
- highlighter
- illuminator
- eyeshadow palette
- single eyeshadow
- mascara
- eyeliner
- eye pencil
- eyebrow pencil
- eyebrow gel
- brow pomade
- makeup stick
- cream makeup
- liquid makeup
- pressed makeup
- makeup palette
- or another cosmetic makeup product

Do not convert the attached product into another category.

Do not invent a different use, mechanism, applicator, container, or cosmetic format.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly from image 1:

- same facial identity
- same face shape
- same skin tone
- same apparent age
- same eye shape
- same eye color
- same eyebrows
- same nose
- same lips
- same natural lip volume
- same jawline
- same cheek structure
- same forehead proportions
- same hairstyle
- same hair color
- same hair texture
- same hairline
- same recognizable appearance

Do not replace the influencer with a similar person.

Do not beautify, rejuvenate, age, slim, reshape, stylize, or reinterpret her face.

Do not enlarge the eyes.

Do not enlarge or reshape the lips.

Do not alter the nose, jawline, cheeks, or eyebrows.

Do not change the hairstyle.

No facial identity drift.

No beauty-filter transformation.

ABSOLUTE MAKEUP PRODUCT LOCK

Preserve the attached product exactly:

- same brand
- same product category
- same product model
- same packaging
- same tube, bottle, compact, palette, stick, pencil, jar, or container
- same cap
- same lid
- same pump
- same nozzle
- same applicator mechanism
- same wand
- same brush
- same pencil tip
- same lipstick bullet
- same powder pan
- same palette layout
- same number of visible shades
- same shade arrangement
- same proportions
- same dimensions
- same shape
- same color
- same shade
- same undertone
- same finish
- same transparency or opacity
- same label
- same logo
- same lettering
- same spelling
- same typography
- same printed graphics
- same material
- same gloss level
- and every visible packaging detail

Do not redesign the product.

Do not replace it with a similar cosmetic item.

Do not recolor it.

Do not simplify the packaging.

Do not mirror the logo.

Do not rewrite, correct, or distort printed text.

Do not change the container shape.

Do not add or remove shades from a palette.

Do not invent a different cap, lid, pump, wand, brush, applicator, mirror, or accessory.

Do not open the product in this image unless it is already open in the attached reference.

Do not reveal hidden interior details that are not visible in the reference.

PRODUCT COLOR AND SHADE LOCK

Preserve the exact visible cosmetic shade from the reference.

Maintain the same:

- hue
- undertone
- saturation
- brightness
- depth
- opacity
- shimmer level
- shine level
- metallic effect
- matte effect
- satin effect
- and visual color identity

Do not warm, cool, darken, lighten, intensify, soften, or reinterpret the product shade.

This exact product color must remain available for consistent application in the subsequent video.

COMPOSITION — CRITICAL

Use a close cinematic beauty framing from approximately the upper chest or shoulders upward.

The influencer's face must be very close to the camera and occupy most of the vertical frame.

She holds the exact makeup product close to her face and near the camera.

Keep enough physical separation between the product and the face so both remain sharply readable.

The product must not appear disproportionately large or unnaturally small.

The product must not cover:

- the eyes
- the eyebrows
- the nose
- the lips
- or the main facial identity

Use a natural beauty-advertising pose.

The influencer looks directly into the camera with a calm, confident, elegant expression.

Her face remains relaxed.

She is not applying the product yet.

AUTOMATIC PRODUCT POSITIONING

Position the product close to the facial area associated with its real use while keeping the face fully visible.

Use the following positioning logic:

Lip products

Position the product beside the lips, lower cheek, or jawline.

Do not cover the mouth.

Eye products

Position the product beside the temple, outer eye area, or upper cheek.

Do not cover the eyes, lashes, or eyebrows.

Eyebrow products

Position the product beside the temple or upper cheek.

Do not cover the eyebrow shape.

Foundation, concealer, primer, or skin products

Position the product beside the cheek, jawline, or lower face.

Do not cover the central facial features.

Blush, bronzer, contour, or highlighter

Position the product beside the cheekbone or lower cheek.

Keep the cheek structure readable.

Powder or compact products

Position the compact beside the cheek or jawline at its natural presentation angle.

Palettes

Hold the closed palette, or preserve its exact reference state, beside the lower cheek or shoulder.

Do not enlarge the palette unrealistically.

Setting spray

Hold the bottle beside the cheek or jawline with the label facing the camera.

Do not spray it in this image.

For any other makeup category, choose the most natural presentation position according to its real use, packaging, dimensions, and commercial presentation logic.

PRODUCT ORIENTATION

Hold the product vertically, horizontally, or at its natural presentation angle according to its real packaging.

Whenever physically possible, point the front label or main visual face toward the camera.

Keep the complete product inside the frame.

Do not crop:

- the cap
- the base
- the lid
- the pump
- the logo
- the label
- palette corners
- pencil tips
- applicator ends
- or packaging edges

Do not place the product so close to the lens that perspective distortion changes its shape.

HAND AND GRIP REALISM

Show exactly one anatomically correct hand naturally holding the product.

The hand must have:

- exactly five fingers
- correct thumb placement
- natural finger lengths
- real joints
- realistic knuckles
- natural nails
- visible skin pores
- subtle skin lines
- correct wrist alignment
- believable grip pressure
- realistic contact shadows

Automatically adapt the grip to the real product:

- fingertip grip for small tubes, pencils, mascara, eyeliner, and lipstick
- stable finger-and-thumb grip for bottles and sprays
- natural palm support for compacts and palettes
- physically plausible support for larger products

Do not cover the main logo, product name, shade name, label, or important packaging details.

No extra fingers.

No fused fingers.

No missing fingers.

No floating hand.

No product clipping through the fingers.

No impossible grip.

HUMAN PHYSICAL REALISM

Show extreme natural human detail:

- visible skin pores
- fine facial lines
- subtle tonal variation
- natural under-eye texture
- realistic lips
- individual eyebrow hairs
- individual eyelashes
- individual hair strands
- natural eye moisture
- fine facial hair when naturally visible
- authentic skin highlights

- subtle natural facial asymmetry
- realistic hand skin
- real nail texture

No waxy skin.

No plastic face.

No airbrushed beauty filter.

No artificial glass-skin effect.

No excessive smoothing.

No synthetic makeup texture.

No flawless digital skin replacement.

AUTOMATIC BEAUTY PREPARATION

Use refined and minimal beauty preparation appropriate to the attached product.

Keep the intended application area neutral, clean, or only lightly prepared so the later application remains visually meaningful.

For lip products

Keep the lips neutral or lightly moisturized.

Do not apply a competing lip color.

For eye products

Keep the eyes and lashes lightly prepared.

Do not apply strong competing eyeshadow, eyeliner, or mascara.

For eyebrow products

Keep the eyebrows natural and lightly groomed.

Do not create a heavily filled brow.

For foundation, concealer, primer, or powder

Keep the skin naturally prepared with visible texture.

Do not create a fully perfected heavy base before application.

For blush, bronzer, contour, or highlighter

Keep the relevant cheek area neutral.

Do not apply a competing color or finish.

For any other category, automatically keep the intended application area visually ready for the subsequent demonstration.

Do not change the influencer's identity with heavy makeup.

ENVIRONMENT

Automatically create a real, clean, premium-accessible Brazilian beauty environment, such as:

- an organized residential vanity
- a refined bedroom dressing area
- a clean bathroom mirror corner
- or a realistic home beauty setup

Use:

- neutral beige
- cream
- warm brown
- soft blush
- muted terracotta
- or other restrained natural tones

Include:

- refined but believable decor
- clean practical surfaces
- subtle mirror elements
- restrained cosmetic objects
- real residential materials
- natural organization
- and a physically inhabited atmosphere

The setting must feel elegant, human, functional, and credible.

No fake luxury spa.

No futuristic showroom.

No empty photographic studio.

No excessive background cosmetics.

No competing product packaging.

No duplicate hero product in the background.

CAMERA

- cinematic vertical 9:16
- professional full-frame beauty-camera realism
- 4K commercial quality
- 70mm to 85mm equivalent lens
- natural eye-level position
- close beauty framing
- minimal perspective distortion
- realistic facial proportions
- stable composition
- no fisheye
- no extreme wide angle

FOCUS — FACE AND PRODUCT MUST BOTH BE SHARP

Keep both the influencer's face and the exact makeup product sharply readable.

Use sufficient depth of field to preserve:

- eyes
- eyebrows
- lips
- facial texture
- hand
- product packaging
- logo
- label
- applicator structure
- palette layout when visible
- and product edges

Do not use extreme shallow depth of field.

No blurred product.

No blurred face.

No portrait-mode cutout.

No artificial separation around the hair, fingers, or packaging.

The environment may be slightly softer but must remain recognizable.

LIGHTING

Use soft cinematic beauty lighting with:

- natural skin tones
- accurate product colors
- accurate cosmetic shade
- gentle frontal illumination
- soft lateral shaping
- restrained catchlights in the eyes

- realistic facial shadows
- correct packaging reflections
- balanced exposure
- natural white balance

No harsh flash.

No fake HDR.

No neon lighting.

No colored light altering the product shade.

No artificial glow.

No excessive skin shine.

CLEAN FRAME

Outside legitimate branding and printed information physically present on the exact product, generate no:

- captions
- subtitles
- promotional text
- prices
- floating labels
- social-media interface
- reaction icons
- banners
- unrelated logos
- watermarks

NEGATIVE PROMPT

different influencer, similar face, facial identity drift, changed face shape, changed eyes, changed nose, enlarged lips, reshaped lips, changed eyebrows, changed hairstyle, changed skin tone, beauty-filter face, waxy skin, plastic skin, excessive smoothing, wrong makeup product, replacement cosmetic, generic cosmetic product, changed product category, changed packaging, changed cap, changed lid, changed pump, changed applicator, changed palette layout, missing shades, extra shades, changed shade, altered undertone, changed finish, mirrored logo, misspelled branding, distorted typography, oversized product, miniature product, product covering face, product too far from camera, product outside frame, cropped packaging, blurred product, blurred face, extreme bokeh, portrait-mode cutout, deformed hand, extra fingers, missing fingers, fused fingers, product clipping through hand, impossible grip, artificial pose, duplicate product, competing cosmetic packaging, CGI, 3D render, illustration, collage, AI artifacts, subtitles, text overlays, watermark

FINAL OUTPUT

One ultra-photorealistic cinematic vertical 9:16 beauty UGC image showing the EXACT attached influencer very close to the camera, calmly holding the EXACT attached makeup product beside her face and near the camera.

The system must automatically identify the makeup category and position the product naturally near its intended facial application area while keeping both the influencer's complete identity and the exact product sharply readable.

Preserve absolute facial identity, absolute packaging fidelity, exact cosmetic shade, realistic hand anatomy, natural skin microtexture, cinematic beauty lighting, and absolutely no visible AI traits.

This image must remain visually stable and suitable as the immutable first-frame anchor for a subsequent product-specific makeup application video.

Copiar prompt de vídeo sem fala – # UNIVERSAL CINEMATIC BLUSH VIDEO — SAME INITIAL-FRAME ENVIRONMENT / EXACTLY TWO B-ROLL SCENES / PRODUCT OPENING + PRECISE CHEEK APPLICATION / SILENT BEAUTY ROUTINE / EXACT SHADE TRANSFER / ABSOLUTE PRODUCT AND FACE LOCK

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the attached blush product.

Use the approved generated image as the immutable first-frame anchor.

Create one ultra-photorealistic cinematic vertical 9:16 beauty video showing the EXACT influencer silently opening and applying the EXACT attached blush.

The influencer never speaks.

She does not narrate.

She does not lip-sync.

She simply performs her makeup routine naturally, opening the blush, loading a real blush brush with the product, removing the excess, and applying it delicately to her cheeks.

The video must contain exactly TWO dedicated B-roll scenes:

1. one product-focused B-roll showing the exact blush packaging being presented and opened naturally;
2. one application-focused B-roll showing the exact blush color being transferred gradually from the brush onto the cheek with delicate upward movements.

FORMAT

- cinematic vertical 9:16
- 8 seconds
- 24 fps
- exactly four connected shots
- exactly two dedicated B-roll shots
- three clean editorial cuts
- professional 4K beauty-commercial realism
- no dialogue

- no narration
- no voice-over
- no lip-sync
- no singing
- no subtitles
- no text overlays
- no music

INITIAL-FRAME ENVIRONMENT LOCK — HIGHEST PRIORITY

Preserve the approved first-frame environment exactly throughout the entire video.

Maintain the same:

- room
- vanity or beauty area
- walls
- furniture
- mirror placement
- decorative objects
- visible background items
- surfaces
- architecture
- color palette
- lighting direction
- lighting intensity
- atmosphere
- outfit
- hairstyle
- accessories
- and overall visual composition

Do not redesign the room.

Do not move furniture.

Do not replace decor.

Do not add new products.

Do not remove existing objects.

Do not change the environment between shots.

All B-roll shots must feel physically captured in the same exact location, during the same makeup session, under the same lighting conditions.

SILENT PERFORMANCE — CRITICAL

The influencer remains completely silent throughout the entire video.

Her lips do not form words.

She does not address the camera.

She does not explain or promote the product.

She does not perform exaggerated sales gestures.

Her expression remains calm, focused, elegant, and naturally concentrated on doing her makeup.

Use only subtle facial movements related to inspecting, opening, loading, and applying the blush.

PRODUCT IDENTIFICATION — FIXED

Treat the attached product specifically as blush.

Do not reinterpret it as:

- bronzer
- contour
- highlighter
- compact powder
- foundation
- eyeshadow
- or another cosmetic category

Use real blush behavior only.

The blush must be applied specifically to the cheek area with a suitable soft blush brush.

REFERENCE PRIORITY

Priority 1: preserve the exact attached blush product.

Priority 2: preserve the exact influencer identity.

Priority 3: preserve the exact initial-frame environment.

Priority 4: reproduce the correct opening mechanism and packaging.

Priority 5: reproduce the exact visible blush shade on the cheek.

Priority 6: preserve realistic brush contact, skin texture, pigmentation, and gradual blending.

If any conflict occurs, simplify camera movement or background detail rather than changing the product, color, face, or environment.

ABSOLUTE BLUSH PRODUCT LOCK

Preserve the attached blush exactly throughout every frame:

- same brand
- same product model

- same compact or container
- same packaging geometry
- same dimensions
- same proportions
- same lid
- same hinge
- same closure
- same base
- same transparent or opaque areas
- same powder pan
- same pan shape
- same visible pressed-product surface
- same logo
- same label
- same lettering
- same spelling
- same typography
- same printed graphics
- same packaging colors
- same blush color
- same undertone
- same finish
- same material
- same gloss level
- and every visible construction detail

Do not redesign, replace, simplify, recolor, mirror, duplicate, enlarge, shrink, or morph the product.

Do not replace it with a similar blush.

Do not create another compact from the same brand.

Do not change the powder pan.

Do not invent extra compartments, mirrors, brushes, puffs, applicators, or accessories unless clearly visible in the original reference.

ORIGINAL PRODUCT RESET RULE

At the beginning of every new shot, reconstruct the blush directly from image 2.

Do not use the generated product from the previous shot as the reference for the next shot.

Every shot must independently match the original attached blush.

No packaging drift.

No logo drift.

No pan-shape drift.

No product-color drift.

No finish drift.

EXACT BLUSH SHADE TRANSFER LOCK — HIGHEST PRIORITY

The exact blush color visible inside the attached packaging must be physically transferred onto the influencer's cheek.

The visible shade on the cheek must clearly correspond to the color inside the blush compact.

Preserve the same:

- hue
- undertone
- saturation
- brightness
- depth
- warmth
- coolness
- opacity
- transparency
- matte finish
- satin finish
- shimmer level
- luminosity
- and overall color identity

Do not reinterpret the blush color.

Do not make it generically pink.

Do not make it peach, coral, rose, mauve, berry, red, brown, terracotta, orange, nude, or another shade unless that exact color is visible in the attached product.

Do not adapt the blush color to the influencer's outfit, skin tone, or environment.

Do not warm, cool, darken, lighten, desaturate, oversaturate, or beautify the shade.

The product color in the compact and the final cheek color must remain visibly related under the same neutral lighting.

REALISTIC SHADE-BUILDING RULE

The blush color must appear gradually through real brush contact.

Do not make the cheek instantly change color.

Do not create a digital color transition.

Do not create the complete result before the brush touches the skin.

The color buildup must happen in physically coherent layers:

1. the brush touches and picks up the exact blush pigment;
2. excess product is lightly removed;
3. the brush touches the cheek;
4. a soft first layer appears exactly where the bristles pass;
5. a second restrained pass gradually strengthens the color;
6. the final shade blends naturally with the influencer's real skin tone and texture.

The blush must be clearly visible but still physically and humanly realistic.

The skin must remain visible beneath the product.

No opaque paint effect.

No artificial colored patch.

No airbrushed digital gradient.

PRE-APPLICATION CHEEK STATE

Before application, keep both cheeks naturally prepared and free from competing blush.

Do not begin with the target blush color already fully visible.

Preserve:

- natural skin tone
- pores
- fine texture
- subtle natural warmth
- and real facial asymmetry

The viewer must clearly perceive the difference between the untreated cheek area and the gradually powdered cheek area.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly throughout every shot:

- same facial identity
- same face shape
- same skin tone
- same apparent age
- same eyes
- same eyebrows
- same nose
- same lips
- same jawline
- same cheek structure
- same cheekbone placement
- same hairstyle
- same hair color

- same hair texture
- same hairline
- same hand appearance
- and same recognizable identity

Do not replace the influencer with another woman during B-roll.

Do not reshape her cheeks.

Do not sharpen or enlarge the cheekbones.

Do not alter her face to exaggerate the blush effect.

No facial drift.

No hairstyle change.

No skin-tone change.

No beauty-filter transformation.

EXACTLY FOUR-SHOT STRUCTURE

SHOT 1 — 0.0s TO 1.4s — SILENT BEAUTY PREPARATION

Start from the approved first-frame composition.

Use the same cinematic close beauty framing from approximately the shoulders upward.

The influencer holds the exact attached blush near her face.

Both the face and product remain sharply visible.

She remains silent and focused.

She briefly looks toward the product and prepares to open it.

Preserve the exact environment, lighting, outfit, hairstyle, and camera angle from the first frame.

This is not a B-roll shot.

No speaking.

No promotional gesture.

SHOT 2 — 1.4s TO 3.4s — B-ROLL 1: SHOWING AND OPENING THE EXACT BLUSH

Cut to the first dedicated B-roll scene.

Focus closely on the influencer's real hands holding and opening the EXACT attached blush packaging.

Show:

- the complete compact or container
- the front packaging
- the visible logo and product details
- real finger placement
- natural pressure on the closure
- the lid opening through the correct mechanism
- realistic hinge resistance
- the exact powder pan being revealed
- and the exact blush color inside the packaging

After opening, she briefly holds the compact at a clear natural presentation angle so the powder surface and packaging remain visible.

The product remains the complete visual focus.

Do not make the compact open by itself.

Do not make the lid disappear.

Do not change the pan shape.

Do not change the blush color.

Do not switch to another product.

Do not reveal unsupported hidden compartments.

SHOT 3 — 3.4s TO 6.8s — B-ROLL 2: DELICATE BLUSH APPLICATION WITH VISIBLE COLOR TRANSFER

Cut to the second dedicated B-roll scene.

Use a close cinematic beauty shot focused on one cheek, the cheekbone, the brush, and the exact point of product transfer.

The influencer herself must remain identifiable as the same person.

Use one real, clean, soft, unbranded blush brush with:

- natural proportional size
- soft rounded or slightly angled bristles
- realistic bristle density
- physically believable handle
- and correct flexibility

The action begins with the brush lightly touching the exact blush pan and picking up a controlled amount of product.

She then gives one or two delicate taps:

- against the edge of the compact
- or lightly against the back of her hand

to remove excess powder.

The tapping must be subtle and physically realistic.

No large powder cloud.

No product explosion.

She slightly turns her face and keeps her head stable.

She positions the brush diagonally at the apple of the cheek.

The brush travels softly upward and outward toward the upper cheekbone and temple.

Use a controlled combination of:

- very light tapping
- short sweeping motions
- soft circular blending
- and restrained upward strokes

The brush must not be dragged forcefully across the face.

The bristles lightly compress against the skin.

The movement is firm enough to control the application but extremely gentle.

The hand remains stable.

No trembling.

No abrupt wrist movement.

The first pass deposits a subtle layer.

The second restrained pass builds the exact shade gradually.

The color must become visible exactly where the brush passes.

The final result must clearly show:

- the exact blush color from the compact
- natural blending with the influencer's skin
- a visible but delicate flush
- soft upward direction
- slightly lifted visual effect
- preserved pores
- preserved skin microtexture
- no harsh border

- and no smudging

Keep enough untreated skin visible around the application area so the viewer can notice the subtle difference between:

- skin without blush
- and skin with the exact blush applied

When composition allows, keep the opposite cheek more neutral during this B-roll to create a realistic visual comparison.

Do not create an artificial split-screen.

Do not exaggerate the difference.

SHOT 4 — 6.8s TO 8.0s — SILENT FINISHED BLUSH RESULT

Return to the exact original close beauty composition from Shot 1.

Preserve the same:

- camera position
- camera angle
- room
- background
- lighting
- outfit
- hairstyle
- facial identity
- and product packaging

The influencer remains completely silent.

She lowers the brush slightly and holds the exact open blush near her face.

She calmly looks toward the camera or a nearby mirror.

The applied cheek must display:

- the exact visible blush shade
- realistic gradual pigmentation
- delicate upward blending
- soft natural edges
- visible skin texture
- subtle healthy color
- and no smudging

The visible blush in the compact and the applied result on the face must be visually consistent.

This is not a B-roll shot.

No speech.

No lip movement forming words.

No promotional gesture.

BLUSH APPLICATION TECHNIQUE — CRITICAL

The application must follow realistic professional blush technique:

1. load the soft brush lightly with the product;
2. remove excess with one or two delicate taps;
3. place the brush around the apple of the cheek;
4. angle the movement upward toward the temple;
5. deposit the first layer with soft tapping;
6. blend using short upward and outward sweeps;
7. build intensity gradually with a second restrained layer;
8. preserve natural skin texture;
9. keep the edges soft and diffused;
10. stop before excessive color accumulation.

Do not apply the full intensity in one pass.

Do not drag the brush downward.

Do not create circular clown-like cheek patches.

Do not apply blush under the jawline.

Do not cover the entire face.

Do not create harsh contour lines.

HUMAN OPENING PHYSICS

Show:

- correct lid movement
- realistic hinge resistance
- natural finger pressure
- controlled wrist movement
- accurate compact weight
- real contact shadows
- and physically coherent product handling

No floating lid.

No disappearing packaging parts.

No product clipping through fingers.

No self-opening compact.

BRUSH AND POWDER PHYSICS

Show:

- realistic brush contact with the powder pan
- subtle bristle movement
- controlled pigment pickup
- minimal excess powder
- believable tap-off behavior
- real bristle compression against the cheek
- gradual pigment transfer
- authentic blending
- physically realistic powder adhesion
- and soft natural diffusion

No excessive airborne powder.

No powder cloud covering the face.

No floating pigment.

No instant color transformation.

No brush passing through the cheek.

No rigid plastic bristles.

HAND REALISM

Maintain:

- exactly five fingers per visible hand
- correct thumb placement
- natural finger lengths
- real joints
- realistic knuckles
- natural nails
- visible skin pores
- fine skin lines
- correct wrist alignment
- physically believable grip
- accurate contact shadows

No extra fingers.

No fused fingers.

No missing fingers.

No hand morphing.

No impossible grip.

No trembling hand.

SKIN AND FACE REALISM

Show:

- visible skin pores
- fine facial lines
- natural cheek texture
- realistic under-eye texture
- subtle tonal variation
- individual eyebrow hairs
- individual eyelashes
- individual hair strands
- natural eye moisture
- subtle natural facial asymmetry
- realistic skin compression from the brush
- authentic pigment interaction with skin

No waxy skin.

No plastic face.

No artificial glass-skin effect.

No excessive smoothing.

No beauty-filter transformation.

The blush enhances the real skin instead of replacing it.

CAMERA

Shot 1

- cinematic close beauty framing
- 70mm to 85mm equivalent lens
- face and product equally sharp
- natural eye-level angle
- exact approved first-frame composition

B-roll Shot 2

- product-focused close-up
- 85mm to 100mm equivalent lens
- packaging, fingers, hinge, pan, and blush color sharply visible
- product opening is the visual focus

B-roll Shot 3

- application-focused cheek close-up

- 85mm to 105mm equivalent lens
- cheek, cheekbone, brush, bristles, and pigment transfer sharply visible
- close enough to perceive the subtle difference between applied and unapplied skin

Shot 4

- return to the exact original 70mm to 85mm beauty framing
- same camera position
- same angle
- same scene continuity

No aggressive zoom.

No orbit.

No fisheye.

No artificial camera shake.

FOCUS

Shot 2 must focus completely on:

- the exact packaging
- opening mechanism
- powder pan
- and blush color

Shot 3 must focus completely on:

- brush-to-skin contact
- gradual pigment transfer
- cheek texture
- upward application movement
- and the subtle difference between skin with and without blush

Do not shift focus to background decor.

No blurred compact.

No blurred blush pan.

No blurred brush.

No blurred cheek.

No blurred contact point.

No focus pulsing.

No excessive bokeh hiding errors.

COLOR-MANAGED LIGHTING — CRITICAL

Use the exact lighting established in the approved first frame.

Maintain:

- natural skin tones
- exact packaging colors
- exact blush shade
- exact blush undertone
- realistic skin finish
- balanced exposure
- neutral white balance
- high color accuracy
- soft frontal illumination
- subtle lateral shaping
- natural shadows

The blush compact and applied cheek must be illuminated under the same neutral lighting.

Do not allow warm or colored light to change the blush shade.

No pink lighting.

No orange cast.

No red cast.

No blue, green, or purple contamination.

No fake HDR.

No artificial glow.

No dramatic color grading.

AUDIO

No speech.

No narration.

No voice-over.

No music.

Use only subtle synchronized ASMR sounds:

- compact opening
- lid movement
- brush touching the powder
- delicate tap against the compact or hand

- soft bristle movement against the cheek
- light product handling
- quiet room tone

No audible speaking.

No whispers.

No intelligible background voices.

CLEAN FRAME

Outside legitimate branding physically printed on the exact blush, generate no:

- subtitles
- captions
- promotional text
- prices
- floating labels
- social-media interface
- icons
- banners
- unrelated logos
- watermarks

NEGATIVE PROMPT

speaking, dialogue, narration, voice-over, lip-sync, singing, whispering, promotional gestures, more than two B-roll scenes, missing opening B-roll, missing application B-roll, changed initial environment, different room, changed furniture, changed background, changed lighting, changed outfit, changed hairstyle, wrong product category, bronzer effect, contour effect, highlighter effect, compact powder effect, foundation effect, generic blush, changed product, replacement blush, altered compact, changed lid, changed hinge, changed powder pan, changed packaging, altered logo, mirrored label, misspelled branding, changed blush shade, generic pink cheeks, color mismatch between compact and face, incorrect undertone, warmer result, cooler result, darker result, lighter result, oversaturated cheeks, desaturated blush, instant color change, digital pigment transition, color appearing before brush contact, brush not touching skin, wrong brush type, excessive powder cloud, powder explosion, floating pigment, harsh circular cheek patch, clown blush, sharp edge, unblended color, blush outside cheek area, blush under jawline, downward brush movement, aggressive dragging, exaggerated transformation, erased pores, plastic skin, waxy face, artificial beauty filter, different model during B-roll, facial identity drift, changed skin tone, changed face shape, hand morphing, extra fingers, fused fingers, missing fingers, impossible grip, blurred opening, blurred application, focus pulsing, excessive bokeh, CGI, 3D render, illustration, collage, AI artifacts, subtitles, text overlays, watermark

FINAL OUTPUT

One ultra-photorealistic cinematic 8-second vertical blush video showing the EXACT influencer silently using the EXACT attached blush inside the exact same environment established in the approved first frame.

The video must contain exactly two dedicated B-roll scenes:

1. a product-focused B-roll showing the exact blush packa

Beleza / Batom e Gloss

Copiar prompt de imagem - # UNIVERSAL CINEMATIC MAKEUP IMAGE PROMPT —
INFLUENCER FACE REFERENCE + EXACT MAKEUP PRODUCT / FACE AND PRODUCT CLOSE
TO CAMERA / AUTOMATIC PRODUCT ANALYSIS / IMMUTABLE FIRST FRAME FOR VIDEO

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the attached makeup product.

Create one ultra-photorealistic cinematic vertical 9:16 beauty UGC image designed to serve as the immutable first-frame anchor for a later makeup demonstration or application video.

Show the EXACT influencer very close to the camera, naturally holding the EXACT attached makeup product close to her face and close to the camera.

Both the influencer's face and the exact product must be:

- clearly visible
- sharply focused
- correctly proportioned
- physically realistic
- visually dominant
- fully recognizable
- and suitable for visual continuity in a subsequent video

The influencer is only presenting the product in this image.

She is not applying it yet.

AUTOMATIC MAKEUP PRODUCT IDENTIFICATION

Analyze the attached product and automatically identify its exact category and real presentation method.

Possible categories include:

- lipstick
- lip gloss
- lip tint
- lip oil
- lip balm
- lip liner
- foundation
- skin tint
- concealer
- primer
- setting spray

- setting powder
- compact powder
- loose powder
- blush
- bronzer
- contour product
- highlighter
- illuminator
- eyeshadow palette
- single eyeshadow
- mascara
- eyeliner
- eye pencil
- eyebrow pencil
- eyebrow gel
- brow pomade
- makeup stick
- cream makeup
- liquid makeup
- pressed makeup
- makeup palette
- or another cosmetic makeup product

Do not convert the attached product into another category.

Do not invent a different use, mechanism, applicator, container, or cosmetic format.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly from image 1:

- same facial identity
- same face shape
- same skin tone
- same apparent age
- same eye shape
- same eye color
- same eyebrows
- same nose
- same lips
- same natural lip volume
- same jawline
- same cheek structure
- same forehead proportions
- same hairstyle
- same hair color
- same hair texture
- same hairline
- same recognizable appearance

Do not replace the influencer with a similar person.

Do not beautify, rejuvenate, age, slim, reshape, stylize, or reinterpret her face.

Do not enlarge the eyes.

Do not enlarge or reshape the lips.

Do not alter the nose, jawline, cheeks, or eyebrows.

Do not change the hairstyle.

No facial identity drift.

No beauty-filter transformation.

ABSOLUTE MAKEUP PRODUCT LOCK

Preserve the attached product exactly:

- same brand
- same product category
- same product model
- same packaging
- same tube, bottle, compact, palette, stick, pencil, jar, or container
- same cap
- same lid
- same pump
- same nozzle
- same applicator mechanism
- same wand
- same brush
- same pencil tip
- same lipstick bullet
- same powder pan
- same palette layout
- same number of visible shades
- same shade arrangement
- same proportions
- same dimensions
- same shape
- same color
- same shade
- same undertone
- same finish
- same transparency or opacity
- same label
- same logo
- same lettering
- same spelling
- same typography
- same printed graphics
- same material
- same gloss level

- and every visible packaging detail

Do not redesign the product.

Do not replace it with a similar cosmetic item.

Do not recolor it.

Do not simplify the packaging.

Do not mirror the logo.

Do not rewrite, correct, or distort printed text.

Do not change the container shape.

Do not add or remove shades from a palette.

Do not invent a different cap, lid, pump, wand, brush, applicator, mirror, or accessory.

Do not open the product in this image unless it is already open in the attached reference.

Do not reveal hidden interior details that are not visible in the reference.

PRODUCT COLOR AND SHADE LOCK

Preserve the exact visible cosmetic shade from the reference.

Maintain the same:

- hue
- undertone
- saturation
- brightness
- depth
- opacity
- shimmer level
- shine level
- metallic effect
- matte effect
- satin effect
- and visual color identity

Do not warm, cool, darken, lighten, intensify, soften, or reinterpret the product shade.

This exact product color must remain available for consistent application in the subsequent video.

COMPOSITION — CRITICAL

Use a close cinematic beauty framing from approximately the upper chest or shoulders upward.

The influencer's face must be very close to the camera and occupy most of the vertical frame.

She holds the exact makeup product close to her face and near the camera.

Keep enough physical separation between the product and the face so both remain sharply readable.

The product must not appear disproportionately large or unnaturally small.

The product must not cover:

- the eyes
- the eyebrows
- the nose
- the lips
- or the main facial identity

Use a natural beauty-advertising pose.

The influencer looks directly into the camera with a calm, confident, elegant expression.

Her face remains relaxed.

She is not applying the product yet.

AUTOMATIC PRODUCT POSITIONING

Position the product close to the facial area associated with its real use while keeping the face fully visible.

Use the following positioning logic:

Lip products

Position the product beside the lips, lower cheek, or jawline.

Do not cover the mouth.

Eye products

Position the product beside the temple, outer eye area, or upper cheek.

Do not cover the eyes, lashes, or eyebrows.

Eyebrow products

Position the product beside the temple or upper cheek.

Do not cover the eyebrow shape.

Foundation, concealer, primer, or skin products

Position the product beside the cheek, jawline, or lower face.

Do not cover the central facial features.

Blush, bronzer, contour, or highlighter

Position the product beside the cheekbone or lower cheek.

Keep the cheek structure readable.

Powder or compact products

Position the compact beside the cheek or jawline at its natural presentation angle.

Palettes

Hold the closed palette, or preserve its exact reference state, beside the lower cheek or shoulder.

Do not enlarge the palette unrealistically.

Setting spray

Hold the bottle beside the cheek or jawline with the label facing the camera.

Do not spray it in this image.

For any other makeup category, choose the most natural presentation position according to its real use, packaging, dimensions, and commercial presentation logic.

PRODUCT ORIENTATION

Hold the product vertically, horizontally, or at its natural presentation angle according to its real packaging.

Whenever physically possible, point the front label or main visual face toward the camera.

Keep the complete product inside the frame.

Do not crop:

- the cap
- the base
- the lid
- the pump
- the logo
- the label
- palette corners
- pencil tips
- applicator ends
- or packaging edges

Do not place the product so close to the lens that perspective distortion changes its shape.

HAND AND GRIP REALISM

Show exactly one anatomically correct hand naturally holding the product.

The hand must have:

- exactly five fingers
- correct thumb placement
- natural finger lengths
- real joints
- realistic knuckles
- natural nails
- visible skin pores
- subtle skin lines
- correct wrist alignment
- believable grip pressure
- realistic contact shadows

Automatically adapt the grip to the real product:

- fingertip grip for small tubes, pencils, mascara, eyeliner, and lipstick
- stable finger-and-thumb grip for bottles and sprays
- natural palm support for compacts and palettes
- physically plausible support for larger products

Do not cover the main logo, product name, shade name, label, or important packaging details.

No extra fingers.

No fused fingers.

No missing fingers.

No floating hand.

No product clipping through the fingers.

No impossible grip.

HUMAN PHYSICAL REALISM

Show extreme natural human detail:

- visible skin pores
- fine facial lines
- subtle tonal variation
- natural under-eye texture
- realistic lips
- individual eyebrow hairs
- individual eyelashes
- individual hair strands
- natural eye moisture
- fine facial hair when naturally visible

- authentic skin highlights
- subtle natural facial asymmetry
- realistic hand skin
- real nail texture

No waxy skin.

No plastic face.

No airbrushed beauty filter.

No artificial glass-skin effect.

No excessive smoothing.

No synthetic makeup texture.

No flawless digital skin replacement.

AUTOMATIC BEAUTY PREPARATION

Use refined and minimal beauty preparation appropriate to the attached product.

Keep the intended application area neutral, clean, or only lightly prepared so the later application remains visually meaningful.

For lip products

Keep the lips neutral or lightly moisturized.

Do not apply a competing lip color.

For eye products

Keep the eyes and lashes lightly prepared.

Do not apply strong competing eyeshadow, eyeliner, or mascara.

For eyebrow products

Keep the eyebrows natural and lightly groomed.

Do not create a heavily filled brow.

For foundation, concealer, primer, or powder

Keep the skin naturally prepared with visible texture.

Do not create a fully perfected heavy base before application.

For blush, bronzer, contour, or highlighter

Keep the relevant cheek area neutral.

Do not apply a competing color or finish.

For any other category, automatically keep the intended application area visually ready for the subsequent demonstration.

Do not change the influencer's identity with heavy makeup.

ENVIRONMENT

Automatically create a real, clean, premium-accessible Brazilian beauty environment, such as:

- an organized residential vanity
- a refined bedroom dressing area
- a clean bathroom mirror corner
- or a realistic home beauty setup

Use:

- neutral beige
- cream
- warm brown
- soft blush
- muted terracotta
- or other restrained natural tones

Include:

- refined but believable decor
- clean practical surfaces
- subtle mirror elements
- restrained cosmetic objects
- real residential materials
- natural organization
- and a physically inhabited atmosphere

The setting must feel elegant, human, functional, and credible.

No fake luxury spa.

No futuristic showroom.

No empty photographic studio.

No excessive background cosmetics.

No competing product packaging.

No duplicate hero product in the background.

CAMERA

- cinematic vertical 9:16
- professional full-frame beauty-camera realism
- 4K commercial quality
- 70mm to 85mm equivalent lens
- natural eye-level position
- close beauty framing
- minimal perspective distortion
- realistic facial proportions
- stable composition
- no fisheye
- no extreme wide angle

FOCUS — FACE AND PRODUCT MUST BOTH BE SHARP

Keep both the influencer's face and the exact makeup product sharply readable.

Use sufficient depth of field to preserve:

- eyes
- eyebrows
- lips
- facial texture
- hand
- product packaging
- logo
- label
- applicator structure
- palette layout when visible
- and product edges

Do not use extreme shallow depth of field.

No blurred product.

No blurred face.

No portrait-mode cutout.

No artificial separation around the hair, fingers, or packaging.

The environment may be slightly softer but must remain recognizable.

LIGHTING

Use soft cinematic beauty lighting with:

- natural skin tones
- accurate product colors
- accurate cosmetic shade
- gentle frontal illumination
- soft lateral shaping

- restrained catchlights in the eyes
- realistic facial shadows
- correct packaging reflections
- balanced exposure
- natural white balance

No harsh flash.

No fake HDR.

No neon lighting.

No colored light altering the product shade.

No artificial glow.

No excessive skin shine.

CLEAN FRAME

Outside legitimate branding and printed information physically present on the exact product, generate no:

- captions
- subtitles
- promotional text
- prices
- floating labels
- social-media interface
- reaction icons
- banners
- unrelated logos
- watermarks

NEGATIVE PROMPT

different influencer, similar face, facial identity drift, changed face shape, changed eyes, changed nose, enlarged lips, reshaped lips, changed eyebrows, changed hairstyle, changed skin tone, beauty-filter face, waxy skin, plastic skin, excessive smoothing, wrong makeup product, replacement cosmetic, generic cosmetic product, changed product category, changed packaging, changed cap, changed lid, changed pump, changed applicator, changed palette layout, missing shades, extra shades, changed shade, altered undertone, changed finish, mirrored logo, misspelled branding, distorted typography, oversized product, miniature product, product covering face, product too far from camera, product outside frame, cropped packaging, blurred product, blurred face, extreme bokeh, portrait-mode cutout, deformed hand, extra fingers, missing fingers, fused fingers, product clipping through hand, impossible grip, artificial pose, duplicate product, competing cosmetic packaging, CGI, 3D render, illustration, collage, AI artifacts, subtitles, text overlays, watermark

FINAL OUTPUT

One ultra-photorealistic cinematic vertical 9:16 beauty UGC image showing the EXACT attached influencer very close to the camera, calmly holding the EXACT attached makeup product beside her face and near the camera.

The system must automatically identify the makeup category and position the product naturally near its intended facial application area while keeping both the influencer's complete identity and the exact product sharply readable.

Preserve absolute facial identity, absolute packaging fidelity, exact cosmetic shade, realistic hand anatomy, natural skin microtexture, cinematic beauty lighting, and absolutely no visible AI traits.

This image must remain visually stable and suitable as the immutable first-frame anchor for a subsequent product-specific makeup application video.

Copiar prompt de vídeo sem fala – # UNIVERSAL CINEMATIC MAKEUP APPLICATION VIDEO — AUTOMATIC PRODUCT IDENTIFICATION / HUMAN PRODUCT OPENING / PRODUCT-SPECIFIC B-ROLL APPLICATION / EXACT INFLUENCER AND PRODUCT LOCK

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the attached makeup product.

Use the approved generated image as the immutable first-frame anchor.

Create one ultra-photorealistic cinematic vertical 9:16 beauty UGC video showing the EXACT influencer presenting, opening, using, and applying the EXACT attached makeup product according to its real cosmetic category, packaging mechanism, applicator, texture, shade, finish, and intended facial application area.

The system must automatically identify what the attached product is before generating any action.

The video must include:

- one initial beauty hero scene;
- one dedicated B-roll scene showing the product being opened naturally;
- one dedicated application B-roll scene focused on the exact facial area where the product is used;
- and one final beauty scene showing the completed result.

The influencer remains silent throughout the entire video.

FORMAT

- cinematic vertical 9:16
- 8 seconds
- 24 fps
- exactly four connected scenes
- three clean editorial cuts
- professional 4K beauty-commercial realism
- no dialogue
- no narration
- no voice-over

- no subtitles
- no text overlays

REFERENCE PRIORITY

Priority 1: preserve the exact makeup product from image 2.

Priority 2: preserve the exact influencer identity from image 1.

Priority 3: reproduce the product's real opening and application method.

Priority 4: preserve realistic human anatomy, cosmetic physics, and skin response.

Priority 5: environment and visual styling.

If any conflict occurs, simplify the scene rather than changing the product or influencer.

AUTOMATIC PRODUCT ANALYSIS — CRITICAL

Before generating the video, visually analyze image 2 and determine:

- the exact makeup category;
- the exact packaging type;
- whether the product is open or closed;
- the real cap, lid, pump, compact, twist, click, snap, zipper, or wand mechanism;
- whether the product includes a visible applicator;
- the intended facial application area;
- the correct cosmetic application technique;
- the visible cosmetic shade;
- the texture;
- the opacity;
- the finish;
- and the physically plausible final result.

Possible product categories include:

- lipstick
- liquid lipstick
- lip gloss
- lip oil
- lip tint
- lip balm
- lip liner
- mascara
- eyeliner
- eye pencil
- eyeshadow
- eyeshadow palette
- eyebrow pencil
- eyebrow gel
- brow pomade
- foundation

- skin tint
- concealer
- primer
- setting spray
- compact powder
- loose powder
- blush
- bronzer
- contour
- highlighter
- illuminator
- makeup stick
- cream makeup
- pressed makeup
- or another real cosmetic makeup product

Do not transform the attached product into another category.

Do not use a generic makeup action.

The opening method and application technique must correspond specifically to the product visible in image 2.

AUTOMATIC APPLICATION LOGIC

Apply the following category-specific behavior only after identifying the exact product.

LIPSTICK, LIP GLOSS, LIP OIL, LIP TINT, LIP BALM OR LIP LINER

Apply only to the lips.

Use the exact lipstick bullet, wand, applicator, pencil tip, or balm mechanism visible or physically supported by the reference.

Follow the natural lip contour.

Apply from the center outward with precise controlled movement.

Do not cross the natural lip line.

The final lip shade and finish must exactly match the visible product.

MASCARA

Apply only to the eyelashes.

Open the tube by naturally unscrewing and removing the exact wand.

Move the applicator from the lash roots toward the tips using restrained upward strokes.

Do not touch the eyeball or eyelid skin.

Do not create false eyelashes.

Preserve the exact black, brown, colored, volumizing, lengthening, or natural finish visually supported by the product.

EYELINER OR EYE PENCIL

Apply only along the upper or lower lash line according to the real product type.

Use a controlled, anatomically correct movement.

Keep the eye naturally open, softly lowered, or gently closed according to the application angle.

Do not draw exaggerated wings unless visually appropriate to the product.

EYESHADOW OR EYESHADOW PALETTE

Apply only to the eyelid or eye crease.

Use the visible included applicator when clearly shown.

When no included applicator is visible, use one separate clean, neutral, unbranded professional eyeshadow brush.

Do not imply that the separate brush is included with the product.

Preserve the exact selected shade, undertone, shimmer, opacity, and finish.

EYEBROW PENCIL, GEL OR POMADE

Apply only to the eyebrows.

Follow the influencer's natural eyebrow direction and shape.

Use light controlled strokes or natural brushing motion according to the real product mechanism.

Do not redesign, enlarge, or overdefine the eyebrows.

FOUNDATION OR SKIN TINT

Apply to appropriate facial areas using small controlled amounts.

Use the visible pump, dropper, stick, tube, bottle, or applicator mechanism.

Blend naturally across the skin without creating an artificial mask.

Preserve real skin texture.

The final coverage must match the apparent product type.

CONCEALER

Apply only to targeted areas such as:

- under the eyes;
- around the nose;
- or small visible facial areas.

Use the exact wand, stick, tube, or applicator mechanism.

Do not cover the entire face as foundation.

PRIMER

Apply a thin realistic layer to appropriate facial areas.

Use fingertips or the visible product mechanism.

Do not create a visible colored layer unless the product reference supports it.

COMPACT POWDER OR LOOSE POWDER

Open the compact or container naturally.

Apply with the visible included puff or applicator when clearly provided.

When no included applicator is visible, use one separate neutral unbranded powder brush or puff.

Apply gently to the forehead, nose, cheeks, or chin according to real cosmetic technique.

Do not create excessive airborne powder.

BLUSH

Apply mainly to the cheeks or upper cheek area.

Use a real brush, stick, cream applicator, sponge, or fingertips according to the identified product type.

Blend with soft upward and outward movement.

Preserve the exact visible blush hue and intensity.

BRONZER

Apply naturally to the perimeter of the face, cheek area, temples, or jawline according to the product format.

Use restrained blending.

Do not make the skin unnaturally orange.

CONTOUR

Apply only to anatomically appropriate contour areas such as:

- beneath the cheekbones;
- sides of the forehead;
- jawline;
- or sides of the nose when physically appropriate.

Keep the result subtle and realistic.

Do not alter the influencer's facial identity.

HIGHLIGHTER OR ILLUMINATOR

Apply to elevated facial areas such as:

- upper cheekbones;
- brow bone;
- bridge or tip of the nose;
- or cupid's bow.

Preserve the exact shine, shimmer, undertone, and reflective quality.

Do not generate metallic plastic skin.

SETTING SPRAY

Hold the exact bottle at a realistic distance from the face.

Close the eyes naturally.

Press the actual nozzle.

Generate a subtle physically realistic mist.

Do not create excessive water, smoke, fog, or a soaking-wet face.

OTHER MAKEUP PRODUCTS

Identify the real purpose, opening mechanism, applicator, intended facial area, and correct professional application method from image 2.

Do not invent an unsupported use.

ABSOLUTE PRODUCT LOCK — HIGHEST PRIORITY

Preserve the exact attached product throughout every frame:

- same brand
- same category
- same model
- same packaging
- same dimensions
- same proportions

- same container geometry
- same tube, bottle, compact, palette, stick, pencil, jar, or container
- same cap
- same lid
- same closure
- same pump
- same nozzle
- same wand
- same applicator
- same brush when included
- same lipstick bullet
- same pencil tip
- same powder pan
- same palette layout
- same number of shades
- same shade positions
- same transparent and opaque areas
- same colors
- same color distribution
- same label
- same logo
- same lettering
- same spelling
- same typography
- same printed graphics
- same materials
- same finish
- same gloss level
- and every visible construction detail

Do not redesign the product.

Do not replace it with a similar cosmetic.

Do not use another product from the same brand.

Do not simplify the packaging.

Do not recolor it.

Do not mirror it.

Do not reverse the label.

Do not rewrite or correct printed text.

Do not invent hidden packaging details.

Do not create a different cap, wand, applicator, brush, mirror, pump, nozzle, palette, or product mechanism.

Do not add or remove shades.

Do not duplicate the product.

ORIGINAL-REFERENCE RESET RULE

At the beginning of every new shot, reconstruct the product directly from image 2.

Do not use the product generated in the previous shot as the source for the next shot.

Every shot must independently match the original attached product reference.

This rule applies to:

- packaging geometry;
- label;
- logo;
- dimensions;
- cap;
- applicator;
- cosmetic color;
- finish;
- and all visible details.

No product drift between scenes.

EXACT SHADE AND FINISH LOCK — CRITICAL

The cosmetic color visible:

- inside the product;
- on the applicator;
- on the brush;
- on the lipstick bullet;
- on the fingertips;
- during application;
- and on the influencer's face after application

must remain visually consistent with the exact shade shown in image 2.

Preserve the same:

- hue
- undertone
- saturation
- brightness
- depth
- transparency
- opacity
- shimmer level
- shine level
- metallic effect
- matte effect

- satin effect
- creamy effect
- and visual color identity

Do not warm, cool, darken, lighten, desaturate, oversaturate, or reinterpret the cosmetic color.

Do not modify the shade to flatter the influencer.

Do not harmonize the shade with the background or clothing.

For transparent or translucent products, preserve the real transparency and finish instead of generating an opaque color.

For mascara and eyeliner, preserve the exact black, brown, colored, glossy, matte, or subtle finish shown or strongly supported by the product.

For foundation, concealer, or complexion products, preserve the exact product tone while blending it realistically into the influencer's natural skin.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly throughout every scene:

- same facial identity
- same face shape
- same skin tone
- same apparent age
- same eye shape
- same eye color
- same eyebrows
- same nose
- same lips
- same natural lip volume
- same jawline
- same cheek structure
- same hairstyle
- same hair color
- same hair texture
- same hairline
- same recognizable appearance

Do not replace the influencer with a similar woman.

Do not beautify, rejuvenate, age, slim, reshape, stylize, or reinterpret her face.

Do not enlarge her lips or eyes.

Do not alter her nose, jawline, cheeks, eyebrows, or forehead.

No identity drift.

No face morphing.

No hairstyle change.

No artificial beauty filter.

MANDATORY FOUR-SCENE STRUCTURE

SHOT 1 — 0.0s TO 1.5s — BEAUTY HERO WITH EXACT PRODUCT

Start from the approved first-frame image.

Use a cinematic close beauty shot from approximately the shoulders upward.

The influencer holds the exact attached makeup product beside her face and close to the camera.

Both the face and product remain sharply readable.

She looks toward the camera with a calm, confident, elegant expression.

She is not applying the product yet.

SHOT 2 — 1.5s TO 3.2s — HUMAN PRODUCT OPENING B-ROLL

Cut to a precise product-focused beauty B-roll close-up.

Show the influencer opening the exact product according to its real mechanism.

Possible actions include only when physically supported:

- removing a cap;
- unscrewing a cap;
- twisting up a lipstick;
- pulling out a wand;
- opening a compact;
- lifting a palette lid;
- uncapping a pencil;
- pressing a pump;
- removing a protective cover;
- or activating another real visible mechanism.

The opening must feel:

- natural;
- deliberate;
- gentle;
- physically correct;
- and human.

Keep the product, fingers, logo, label, opening mechanism, and visible cosmetic material sharply readable.

Do not invent an unsupported mechanism.

Do not force the package open incorrectly.

Do not make the product open by itself.

SHOT 3 — 3.2s TO 6.4s — PRODUCT-SPECIFIC APPLICATION B-ROLL

Cut to a cinematic close-up or macro B-roll shot focused on the exact facial area where the identified product must be applied.

Examples:

- lips for lip products;
- eyelashes for mascara;
- lash line for eyeliner;
- eyelids for eyeshadow;
- eyebrows for brow products;
- cheeks for blush;
- cheekbones for highlighter;
- facial perimeter for bronzer;
- targeted facial zones for contour;
- skin for foundation, concealer, powder, or primer;
- full face at a safe distance for setting spray.

The product must be visibly and physically connected to the application.

Show the exact:

- applicator;
- brush;
- wand;
- pencil;
- stick;
- puff;
- sponge;
- fingertips;
- or spray mechanism

required by the identified product.

Use slow, controlled, precise, professional cosmetic movement.

The application must feel elegant, satisfying, and visually clear.

The camera must visibly show the influencer herself using the exact product.

Do not replace her hand with another person's hand.

Do not show an unidentified model.

Do not switch facial identity during the application close-up.

SHOT 4 — 6.4s TO 8.0s — FINAL BEAUTY RESULT

Return to the original close beauty composition.

Restore the same:

- camera angle;
- influencer identity;
- hairstyle;
- lighting;
- environment;
- outfit;
- and product packaging.

The influencer holds the exact product close to her face while calmly presenting the finished result.

The applied cosmetic must remain visible and consistent with the exact shade, texture, coverage, and finish of image 2.

Do not create an exaggerated transformation.

Do not alter her facial structure.

HUMAN PRODUCT OPENING PHYSICS

The product must obey real physical mechanics.

Show:

- realistic cap resistance;
- correct twisting direction;
- natural lid movement;
- realistic hinge movement;
- correct wand extraction;
- subtle product viscosity;
- believable pump pressure;
- real finger pressure;
- accurate contact shadows;
- and physically coherent hand movement.

No self-opening product.

No floating cap.

No disappearing lid.

No applicator appearing from nowhere.

No lid clipping through fingers.

No product changing shape while opening.

APPLICATION PHYSICS

The cosmetic must show physically accurate behavior according to its category.

Show:

- realistic viscosity;
- real pigmentation;
- gradual product transfer;
- natural blending;
- correct powder dispersion;
- subtle skin compression;
- believable brush contact;
- realistic applicator pressure;
- controlled product buildup;
- and authentic final texture.

Do not make the final result appear instantly without visible application.

Do not generate excessive product.

Do not cover the whole face unless the product's real use requires it.

Do not create floating powder, dripping cream, excessive mist, sticky strings, or impossible product movement.

HAND REALISM

Maintain anatomically correct hands throughout every scene.

Each visible hand must have:

- exactly five fingers
- correct thumb placement
- natural finger lengths
- real joints
- realistic knuckles
- natural nails
- visible pores
- fine skin lines
- correct wrist alignment
- realistic grip pressure
- accurate contact shadows

Preserve the same hand identity between scenes.

No extra fingers.

No fused fingers.

No missing fingers.

No hand morphing.

No applicator clipping through fingers.

No impossible grip.

SKIN AND FACE REALISM

Show extreme natural human detail:

- visible skin pores
- fine facial lines
- natural under-eye texture
- subtle tonal variation
- natural lip texture
- individual eyebrow hairs
- individual eyelashes
- individual hair strands
- natural eye moisture
- fine facial hair when visible
- subtle natural facial asymmetry
- realistic skin compression during application
- authentic cosmetic contact with skin

No waxy skin.

No plastic face.

No artificial glass-skin effect.

No excessive smoothing.

No digital beauty-filter transformation.

No synthetic facial texture.

ENVIRONMENT

Use the same real, clean, premium-accessible Brazilian beauty environment established in the first frame.

Possible environment:

- organized residential vanity;
- clean bedroom dressing area;
- realistic bathroom beauty corner;
- or refined home makeup space.

Use restrained neutral colors and real residential materials.

The environment remains secondary and stable.

Do not add competing makeup products.

Do not add duplicate hero products.

Do not change the room between shots.

CAMERA

Shot 1

- cinematic close beauty shot
- 70mm to 85mm equivalent lens
- face and product equally sharp
- natural eye-level angle

Shot 2

- product-focused B-roll close-up
- 85mm to 100mm equivalent lens
- sharp hands, packaging, opening mechanism, and cosmetic material

Shot 3

- product-specific close-up or macro framing
- 85mm to 105mm macro-lens aesthetic
- exact application area occupying most of the frame
- product and facial contact point sharply visible

Shot 4

- return to the original 70mm to 85mm close beauty composition
- same camera height and angle as Shot 1

Use stable cinematic camera movement.

Only subtle human micro-movement.

No aggressive zoom.

No orbit.

No fisheye.

No extreme wide angle.

No artificial handheld shake.

FOCUS

Keep the intended hero elements sharply readable in every shot.

Shot 1:

- influencer's face;
- hand;
- complete product;
- label;
- and packaging edges.

Shot 2:

- opening mechanism;
- fingers;
- visible cosmetic material;
- applicator;
- logo;
- and packaging.

Shot 3:

- application area;
- applicator;
- cosmetic transfer;
- skin texture;
- and exact final shade.

Shot 4:

- influencer's face;
- applied result;
- and exact product.

No focus pulsing.

No blurred product.

No blurred application.

No excessive bokeh hiding errors.

No artificial portrait-mode cutout.

COLOR-MANAGED LIGHTING

Use soft neutral cinematic beauty lighting calibrated for accurate color reproduction.

Use:

- neutral white balance;
- high color-rendering illumination;
- soft frontal light;
- subtle lateral shaping;
- realistic skin tones;
- accurate packaging colors;

- accurate cosmetic shade;
- gentle natural reflections;
- balanced exposure.

No colored lighting.

No warm orange cast changing the product.

No pink, red, blue, green, or purple light contaminating the cosmetic shade.

No fake HDR.

No artificial glow.

No dramatic color grade.

AUDIO

No speech.

No narration.

No voice-over.

No music.

Use only subtle synchronized ASMR sounds:

- cap removal;
- compact opening;
- wand extraction;
- pump pressure;
- brush movement;
- applicator contact;
- soft product handling;
- quiet room tone;
- and subtle clothing movement.

The sounds must match the visible action exactly.

No audible action without visible physical cause.

CLEAN FRAME

Outside legitimate branding physically present on the exact product, generate no:

- subtitles
- captions
- promotional text
- prices
- floating labels
- social-media interface

Automatically place the product in the most believable real-life environment for its category and function, while keeping the product as the hero of the image. The environment must look like a real

Brazilian middle-class setting, functional, organized, authentic, and naturally lived-in — never luxurious, never poor, never theatrical, never studio-like. The AI must infer the ideal context from the product type.

Examples of ideal environment logic:

- Perfume / cosmetics / skincare: real Brazilian vanity, bathroom counter, bedroom dresser, beauty shelf
- Beverage / supplement / cup / mug: kitchen, dining area, office desk, breakfast table
- Snack / food package: kitchen counter, dining table, pantry area
- Tech accessory / electronics: work desk, bedroom desk, office table, living room setup
- Fashion accessory: bedroom mirror area, wardrobe space, store-like but real home setting
- Cleaning / home product: laundry area, service area, kitchen sink zone
- Personal care product: bathroom sink, shower shelf, vanity, toiletry area
- Baby / family product: nursery corner, family room, practical home setup
- Sports item: gym corner, training bag area, sports store section, bedroom shelf with sports context
- Any other product: choose the most natural use-case environment in a real Brazilian home, store, or routine setting

BRAZILIAN SCENARIO STYLE:

The background must feel like a real Brazilian environment, medium standard, functional, clean, believable, and practical. Use subtle local realism:

- common Brazilian apartment or house interiors
- MDF or wood furniture, neutral walls, practical organization
- authentic household objects placed naturally
- soft signs of everyday use without clutter
- accessible, lived-in, realistic middle-class aesthetic
- no exaggerated luxury, no extreme minimalism, no foreign showroom look

VISUAL COMPOSITION:

- Vertical 9:16 framing
- POV smartphone feel
- Product centered or slightly off-center for natural realism
- Hand in foreground, product closest to camera
- Background visible but secondary
- Slight shallow depth of field, with the product label and packaging sharply in focus
- The product must remain fully readable and visually clean
- The framing should feel spontaneous but well-composed, like premium organic social content

HAND AND SKIN REALISM:

- One realistic human hand holding the product naturally
- Correct anatomy, natural finger bending, realistic skin texture, believable nails
- No extra fingers, no warped joints, no melted skin
- Skin tone natural and cohesive
- No exaggerated beauty retouching
- No tattoos unless requested
- No rings, watches, bracelets, or accessories unless they make sense and do not steal attention
- Grip must respect the product's real geometry and center of mass

LIGHTING:

Use realistic natural or practical ambient light that suits the product and setting:

- soft daylight from a window, or natural indoor lighting
- realistic reflections on plastic, glass, metal, matte, paper, or fabric surfaces

- balanced exposure
- soft shadows
- no harsh flash
- no blown highlights
- no fake studio setup
- no glossy artificial ad lighting unless the product naturally belongs in that aesthetic

TEXTURE AND MATERIAL ACCURACY:

Every material must look real:

- plastic should look like real plastic
- glass should show accurate transparency and reflections
- cardboard should show realistic print and texture
- metal should reflect naturally
- labels should wrap correctly around the container
- fabric or flexible packaging should show realistic folds and tension
- printed elements must remain consistent, legible, and undistorted

REALISM QUALITY STANDARD:

The final image must look like a real smartphone photo captured in Brazil, not a rendered mockup. It should have:

- ultra photorealistic detail
- natural micro-imperfections
- realistic perspective
- correct optical depth
- iPhone-like authenticity
- believable ambient context
- commercially strong but organic social-media realism

CAMERA STYLE:

- iPhone 15 Pro Max rear camera look
- 24mm wide-angle equivalent
- authentic handheld POV perspective
- slight natural lens distortion at the edges
- clean but not overprocessed
- realistic smartphone dynamic range
- sharp focus on product and label
- subtle natural grain allowed

FOCUS HIERARCHY:

1. Product packaging / label / branding
2. Hand and grip realism
3. Correct scale and proportion
4. Environment coherence
5. Background mood and functional realism

STRICT INSTRUCTIONS:

- Use the attached product as the exact visual reference
- Do not change the brand identity
- Do not invent a new label
- Do not alter packaging shape
- Do not crop the product awkwardly
- Do not hide the main label

- Do not create a generic substitute
- Do not generate an unrealistic hand-product scale
- Do not place the product in an unrelated environment
- Do not use luxury showroom aesthetics unless the product absolutely requires it
- Do not create a fake studio background
- Do not overdecorate the scene

NEGATIVE PROMPT:

low quality, blurry product, unreadable label, altered packaging, changed brand, fake logo, distorted typography, wrong proportions, oversized product, undersized product, deformed hand, extra fingers, extra hand, broken anatomy, warped forearm, floating product, unrealistic grip, messy background, luxury showroom, sterile studio, CGI, 3D render, illustration, cartoon, oversaturated colors, fake reflections, duplicated objects, incorrect material texture, stretched packaging, bent bottle, melted plastic, illegible text, wrong environment, cluttered scene, harsh flash, overexposed highlights, underexposed image, artificial ad look

OUTPUT GOAL:

Generate a flawless POV product-in-hand image that looks like a real Brazilian middle-class lifestyle photo, with the exact attached product reproduced faithfully, correctly scaled in the hand, and placed in the most appropriate real-world environment for its category.

Copiar prompt de vídeo sem fala — UNIVERSAL POV PRODUCT VIDEO PROMPT — ONE HAND ONLY / MAX FIDELITY / ULTRAREALISM / ANTI-BUGS

Use the attached reference image as the absolute product reference. Create an ultra-photorealistic POV video where ONLY ONE human hand presents the exact product to the camera in a natural, realistic, and believable way.

ABSOLUTE PRIORITY:

The product must remain максимально faithful to the attached reference image. Preserve with maximum consistency and zero redesign:

- exact packaging shape
- bottle / box / tube / jar / container format
- exact label
- typography
- logo placement
- colors
- cap / lid / pump / dispenser details
- proportions
- print alignment
- transparency
- reflections
- finish and materials
- all visible design elements

Do not alter, simplify, replace, reinterpret, beautify, invent, or distort any product detail.

SCENE CONCEPT:

A true first-person POV video, as if the viewer is holding the product and showing it naturally to the camera with one hand only. The movement should feel organic, human, spontaneous, and real — never robotic, never overly cinematic, never artificial.

MAIN ACTION:

One realistic human hand holds the product and presents it directly to the camera. The hand may make subtle natural movements: slightly bringing the product closer to the camera, slightly tilting it to show the front, gently adjusting the angle, softly stabilizing the grip, subtly revealing the label and packaging details. The product must remain the hero of the video at all times.

VERY IMPORTANT RULES:

- ONLY ONE HAND visible during the entire video
- NEVER show two hands
- NEVER show extra fingers
- NEVER show a person, face, body, reflection, or mirror selfie
- NEVER let the product leave the frame abruptly
- NEVER deform the product
- NEVER distort the label
- NEVER switch product identity between frames
- NEVER generate generic packaging
- NEVER generate a fake version of the brand/product
- NEVER make the grip anatomically impossible

HAND RULES:

- one single realistic human hand only
- natural anatomy
- correct finger count
- realistic joints
- realistic skin texture
- natural nails
- no deformities
- no duplicated fingers
- no extra thumb
- no merged fingers
- no floating fingers
- no unnatural bending
- no warped wrist
- no broken forearm
- no accessories unless subtle and natural
- no tattoos unless explicitly requested
- grip must match the actual size and geometry of the product

SCALE AND PROPORTION RULE:

The AI must analyze the real-world size of the attached product and hold it with correct proportion relative to the hand. Small products must look small in hand, medium products must fit naturally in the palm, large products must be held in a believable way. Never oversized, undersized, stretched, flattened, or warped.

ENVIRONMENT RULE:

Place the product in the most appropriate real-life environment for its category, but keep the environment secondary. The setting must be realistic, functional, clean, believable, Brazilian middle-class everyday context, natural and lived-in, softly blurred, not luxurious showroom, not sterile studio, not fake CGI.

Examples:

- perfume / skincare / beauty → vanity, bathroom, dresser

- food / beverage / snack → kitchen, dining table, pantry
- tech / gadget → desk, office, bedroom setup
- fashion accessory → wardrobe area, neutral room
- personal care → bathroom counter, sink area
- home product → laundry, kitchen, utility area

CAMERA STYLE:

- true first-person POV
- vertical 9:16
- iPhone 15 Pro Max rear camera look
- 24mm wide-angle feel
- handheld but stable
- natural micro movements
- realistic smartphone dynamic range
- slight natural lens distortion at the edges
- social-media native realism

VIDEO STYLE:

- ultra photorealistic
- natural product presentation
- organic UGC feeling
- authentic TikTok / Reels style
- subtle realism
- not overproduced
- not ad-like in an artificial way
- not stiff
- not robotic

LIGHTING:

- realistic natural or indoor practical lighting
- soft shadows
- balanced exposure
- no harsh flash
- no overexposed highlights
- no crushed blacks
- realistic reflections on packaging
- readable front label
- clean lighting that respects the material of the product

FOCUS:

- primary focus on the product front
- label must remain readable whenever visible in the reference
- hand slightly secondary but still realistic
- background softly blurred
- no excessive blur on the product
- no focus hunting
- no frame-to-frame inconsistency

DIALOGUE:

No dialogue. No voiceover. No spoken words.

BACKGROUND SOUNDS:

Soft ambient sound only, matching the environment. Subtle natural handling sound. No distracting noise.

MUSIC:

Optional minimal soft background music, low volume, elegant and unobtrusive.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

ANTI-BUG / NEGATIVE PROMPT:

two hands, multiple hands, extra fingers, extra thumb, missing fingers, fused fingers, deformed hand, broken wrist, warped arm, duplicated hand, visible person, visible face, visible body, reflection of person, mirror selfie, altered product, changed packaging, wrong label, fake logo, distorted typography, unreadable text, inconsistent branding, product morphing, changing bottle shape, stretched packaging, flattened product, floating product, unrealistic grip, wrong scale, oversized product, undersized product, blurred product, focus hunting, frame inconsistency, shaky motion, robotic movement, stiff animation, CGI, 3D render, cartoon, illustration, fake reflections, oversaturated colors, harsh flash, luxury showroom, studio background, sterile background, cluttered scene, irrelevant environment, product leaving frame, cropped label, bent bottle, melted plastic, warped container

OUTPUT GOAL:

Generate a flawless ultra-realistic POV product video where one single human hand naturally presents the exact attached product to the camera, preserving maximum fidelity, correct proportions, packaging consistency, and believable real-world realism with zero margin for error.

Gancho premium

Copiar prompt de vídeo - Use the original reference image as the exact identity reference. Preserve the exact same face, hairstyle, skin tone, body proportions, clothing, lighting and background. The video must look like a real TikTok UGC recorded naturally with a smartphone. Vertical 9:16. No cinematic effects. No slow motion. Real human speed. Natural body movement only.

SCENE

0.0–1.5s

She immediately looks down at the shirt she is wearing with a subtle disappointed expression, as if she genuinely doesn't like it. She points directly at the shirt with her index finger. Immediately afterward, she lifts the same index finger in front of her chest and clearly performs a natural "no" gesture by moving only the raised index finger smoothly from left to right several times while simultaneously giving a gentle head shake from side to side. The finger gesture must be obvious and synchronized with the head movement, clearly communicating "No, I don't like this shirt." She alternates her gaze naturally between the shirt and the camera, maintaining a believable UGC style.

1.5–2.5s

Without any cut, she immediately takes one natural step toward the camera. While approaching, she confidently extends her open hand toward the lens. The movement should be fluid and performed at normal human speed, exactly like a real TikTok creator making a transition.

2.5–3.0s

Her open palm completely covers the camera lens, naturally filling the entire frame. The hand realistically touches the lens as if intentionally creating a transition.

3.0–4.0s

She smoothly pulls her hand away from the lens while taking a small natural step back. She returns to her original position, looking directly into the camera with a soft closed-mouth smile and relaxed posture, naturally preparing for the next scene or outfit transition.

Requirements:

- The "no" gesture must be performed with the raised index finger, clearly moving left and right.
- Synchronize the finger gesture with a gentle head shake.
- Point at the shirt before making the finger "no" gesture.
- Normal human speed.
- No slow motion.
- No robotic movements.
- Natural facial expressions.
- Natural blinking.
- Realistic breathing.
- Subtle body weight shifts.
- One continuous shot.
- No cuts.
- No morphing.
- No camera shake beyond subtle natural handheld micro-movements.
- The hand must completely cover the camera lens before moving away.

She's not to say exactly anything!

Crianças | Influencer Segurando Roupas No Cabide

Copiar prompt de imagem - ## UNIVERSAL IMAGE PROMPT — KIDS STORE UGC / INFLUENCER HOLDING CHILD CLOTHING ON HANGER / ONE VISIBLE HAND / EXTREME HUMAN REALISM / NO CHILDREN

Create an ultra-photorealistic vertical UGC image (9:16) using two attached reference images.

Reference image 1 = the influencer identity source.

Reference image 2 = the exact child clothing item to be presented.

Preserve the influencer from reference image 1 with maximum fidelity: same face, same skin tone, same facial proportions, same body proportions, same natural asymmetry, same hair, same realistic adult anatomy, same pores, same skin microtexture, same realistic expression, and same authentic human appearance.

Preserve the clothing from reference image 2 with maximum fidelity: same garment type, same shape, same proportions, same size, same print, same pattern, same color, same stitching, same collar, same sleeves, same hem, same fabric texture, same drape, and same visible design identity. Do not alter the clothing in any way.

IMPORTANT NATURALITY RULE:

This must feel like real UGC content, not a rigid catalog shot and not an AI fashion render.

The clothing must be on a realistic hanger.

The influencer must hold the hanger with ONLY ONE visible adult hand by default.

The garment must hang naturally under real gravity.

Do not stretch the clothing sideways.

Do not hold it perfectly flat like a cardboard display.

Do not create a symmetrical pose.

Do not create a stiff mannequin-like frontal posture.

The influencer's body should have slight natural asymmetry, relaxed shoulders, natural elbow bend, subtle torso turn, and a believable human stance.

The free arm should remain relaxed, partially out of frame, or naturally resting without competing for attention.

CHILD / BABY VISIBILITY SAFETY RULE:

No real child, baby, toddler, infant, teenager, or underage person may appear anywhere in the image.

Do not generate children or babies in the store, background, mirror, poster, frame, sign, display, aisle, or any visible part of the environment.

If the clothing tag, packaging, poster, display card, or background object contains a baby or child image, preserve the structure but blur or softly obscure only the child/baby representation.

Scene: a real Brazilian children's clothing store, charming, organized, beautiful, welcoming, and commercially attractive. The store must feel like a comfortable Brazilian middle-class kids boutique or infant clothing shop.

KIDS STORE STYLE:

- real Brazilian infant / kids fashion store
- beautiful and organized racks
- shelves with folded clothing
- tasteful décor
- wood details
- soft neutral and playful tones
- warm retail lighting
- comfortable and real
- no visible minors
- no poor store
- no fake showroom
- no empty studio
- no foreign catalog look

HUMAN REALISM RULE:

The final image must look like a real high-definition photograph captured with iPhone 15 Pro Max clarity and fully human realism.

Skin must look organic, with pores, microtexture, natural tonal variation, realistic light response, and no smoothing.

Hair must have real strands, natural volume, coherent roots, and realistic shine.

Eyes must have moisture, life, coherent reflections, real iris texture, aligned pupils, and human expression.

Mouth, lips, and smile must feel natural and alive, not rigid or robotic.

Hands must be anatomically correct and natural.

The clothing must show real drape, softness, folds, fiber texture, weight, and contact with gravity.

No stiff fabric. No fabric looking cut out or pasted.

Composition:

- influencer in the foreground
- clothing on hanger clearly visible
- one visible adult hand only holding the hanger
- slight natural body angle, not perfectly frontal
- product is the main commercial focus after the influencer's face
- enough store context to feel real
- no over-staged composition

Camera:

- iPhone 15 Pro Max realism
- vertical 9:16
- natural smartphone perspective
- sharp focus on face and clothing
- realistic depth
- no excessive blur
- no fake cinematic distortion

Lighting:

- realistic retail lighting
- soft and balanced
- natural highlights on skin, fabric, hanger, wood, and store elements
- realistic shadows
- no harsh flash
- no fake glow

Negative prompt:

rigid pose, symmetrical pose, mannequin posture, stretched garment, cardboard fabric, altered clothing, changed print, wrong scale, floating hanger, floating clothing, extra fingers, warped hands, deformed arms, child hands, baby hands, visible child, visible baby, visible minor, child poster without blur, baby poster without blur, child packaging without blur, baby packaging without blur, plastic skin, blurry product, soft image, fake store, CGI, AI artifacts, poor commercial environment, oversaturated colors, text overlays, watermark

Copiar prompt de vídeo sem fala – ****UNIVERSAL VIDEO PROMPT — KIDS STORE UGC / CHILD CLOTHING ON HANGER / ABSOLUTE GARMENT FIDELITY / REAL SCALE / BRAZILIAN PHOTOREALISM****

Use two attached reference images.

****REFERENCE IMAGE 1 = INFLUENCER IDENTITY SOURCE****

****REFERENCE IMAGE 2 = EXACT CHILD CLOTHING PRODUCT SOURCE****

Create an ultra-photorealistic vertical UGC video (9:16) inside a real Brazilian children's clothing store. The influencer presents the ****EXACT** clothing item from reference image 2****** on a realistic hanger.

ABSOLUTE PRODUCT FIDELITY — HIGHEST PRIORITY

****Reference image 2 is the absolute and unchangeable product identity source.****

The clothing must remain ****exactly the same physical garment throughout the entire video.****

****DO NOT redesign, recreate, reinterpret, improve, simplify, stylize, replace or modify the clothing.****

Preserve EXACTLY:

- * garment type**
- * construction**
- * shape**
- * silhouette**
- * size**
- * proportions**
- * length**
- * width**
- * sleeves**
- * sleeve length**
- * collar**
- * neckline**
- * cuffs**
- * hem**
- * seams**
- * stitching**
- * embroidery**
- * buttons**
- * zippers**
- * pockets**
- * labels**
- * tags**
- * logos**
- * graphics**
- * prints**
- * patterns**
- * text**
- * decorative elements**
- * color**
- * color distribution**

- * fabric
- * fabric texture
- * material
- * thickness
- * finishing
- * folds
- * edges
- * drape
- * overall visual identity

****Every visible detail from reference image 2 must remain unchanged.****

Do not add details that do not exist.

Do not remove details that exist.

Do not invent buttons, pockets, seams, prints, embroidery, logos, labels or decorative elements.

Do not change the position, size, shape or proportions of any garment detail.

Do not regenerate the print.

Do not reconstruct the fabric differently.

Do not change the garment's color.

Do not make the clothing look like a similar product.

****It must look like the exact same physical piece from reference image 2.****

PRODUCT IDENTITY LOCK

Treat reference image 2 as a **PRODUCT IDENTITY LOCK.**

The garment must be treated as one real physical object throughout the entire video.

Camera angles may change.

Camera distance may change.

Lighting may change naturally.

****The garment itself must NOT change.****

No product regeneration between shots.

No garment morphing between frames.

No texture replacement.

No print regeneration.

No pattern variation.

No color variation.

No shape variation.

No proportion variation.

No detail hallucination.

If a detail becomes partially hidden because of the camera angle or natural fabric folds, **do not invent a new version of that detail.**

INFLUENCER IDENTITY LOCK

Reference image 1 is the absolute identity source for the influencer.

The influencer must remain visually consistent throughout the entire video:

- * same face**
- * same facial proportions**
- * same skin tone**
- * same hair**
- * same hairstyle**
- * same body proportions**
- * same natural asymmetry**
- * same authentic human appearance**
- * same overall identity**

Do not alter her identity.

Do not change facial structure.

Do not generate a different person between shots.

CRITICAL GARMENT MOVEMENT RULE

The clothing must **NOT be manipulated in a way that changes its appearance.**

The influencer should simply hold the hanger naturally.

****Do not lift, stretch, pull, shake, unfold, fold, twist, rotate, turn inside out or reposition the garment.****

The hanger can have extremely subtle natural movement caused by the influencer's hand.

The garment follows gravity naturally.

The fabric hangs naturally from the hanger.

The clothing must never appear stiff like cardboard.

The clothing must never be stretched sideways.

The clothing must never be artificially flattened.

The clothing must never be pulled tight.

The clothing must never change shape unnaturally.

****The garment's original shape and details must remain preserved even while hanging.****

HAND RULE

Prefer **one visible adult feminine hand holding the hanger.**

The hand must hold only the hanger.

Do not touch, pull or manipulate the garment itself.

The other arm remains relaxed or partially outside the frame.

No second hand interacting with the clothing.

No fingers covering important garment details.

No hand pulling the fabric.

No hand stretching the sleeves.

No hand opening or unfolding the garment.

CHILD / BABY FULL PRIVACY BLUR RULE

No real child, baby, toddler, infant, teenager or underage person may appear clearly anywhere in the video.

Do not generate visible minors in the store, background, mirror, poster, frame, shelf, clothing display, packaging, decoration or any visible area.

If any child or baby appears on a tag, packaging, poster, display card, frame, decoration or printed material, completely blur or privacy-mask the entire child/baby representation in every frame.

Blur face, body, hands, skin, silhouette and any human-like minor representation.

****Never blur the garment, hanger or product details.****

VIDEO STRUCTURE

0s–1.5s — HERO UGC SHOT

The influencer stands naturally inside a real Brazilian children's clothing store.

She holds the hanger with the ****exact garment from reference image 2****.

One adult feminine hand holds the hanger naturally.

The garment hangs freely under gravity.

****No manipulation of the garment.****

Keep the product sharp and clearly visible.

1.5s–3s — B-ROLL DETAIL SHOT 1

Cut to a close-up of the exact garment while hanging on the same type of hanger.

Show existing details such as:

- * fabric texture
- * print
- * collar
- * sleeve
- * stitching
- * seam
- * label
- * hem

****Do not generate, modify or reinterpret any detail.****

The close-up must show the actual same product.

3s–4.5s — NATURAL PRESENTATION SHOT

Return to the influencer holding the hanger naturally.

She makes only a ****very subtle natural presentation movement with the hanger****, without manipulating the clothing.

No turning the garment.

No lifting the garment.

No stretching.

No pulling.

No shaking.

No unfolding.

The garment remains hanging in the same natural position.

4.5s–6s — B-ROLL DETAIL SHOT 2

Cut to another close-up of the same garment.

Show natural fabric drape, sleeve detail, print alignment, stitching, hem, hanger support and texture.

****All details must remain identical to reference image 2.****

6s–8s — FINAL HERO SHOT

Return to a stable UGC shot of the influencer holding the exact garment on the hanger.

She may smile naturally or present calmly.

The garment remains the primary commercial focus.

No clothing manipulation.

No product transformation.

SCENE

Real Brazilian middle-class children's clothing store.

Clean, organized racks.

Shelves with folded clothing.

Soft neutral playful tones.

Tasteful decor.

Wood details.

Comfortable retail lighting.

Realistic commercial environment.

No visible children or babies.

No poor store.

No fake showroom.

No empty studio.

CAMERA

Vertical 9:16.

iPhone 15 Pro Max front-camera look.

Natural smartphone perspective.

Real UGC framing.

Sharp focus on influencer and garment.

Realistic depth.

No excessive background blur.

No fake studio appearance.

Camera movement should be subtle and natural.

****Camera movement must never cause the garment to change.****

LIGHTING

Realistic soft retail lighting.

Balanced exposure.

Natural shadows.

Realistic highlights on fabric, skin, hanger, shelves and store elements.

****Preserve the original garment colors from reference image 2.****

Do not recolor the clothing.

Do not increase saturation.

Do not alter print contrast.

AUDIO

Optional soft natural female voice in Brazilian Portuguese if requested.

Otherwise no dialogue.

Subtle store ambience.

Very soft natural fabric movement sounds.

TECHNICAL PARAMETERS

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

STRICT PRIORITY RULES

****PRIORITY 1 — EXACT GARMENT****

****PRIORITY 2 — PRESERVE EVERY GARMENT DETAIL****

****PRIORITY 3 — EXACT INFLUENCER IDENTITY****

****PRIORITY 4 — REALISTIC PHYSICAL BEHAVIOR****

****PRIORITY 5 — CINEMATIC/UGC PRESENTATION****

If cinematic movement conflicts with product fidelity, **ALWAYS prioritize product fidelity.**

The garment must never be changed for cinematic purposes.

The clothing must look like the **same exact physical product from reference image 2 from the first frame to the last frame.**

ANTI-CRASH / NEGATIVE PROMPT

altered clothing, modified clothing, redesigned clothing, recreated clothing, different clothing, similar clothing, replacement product, product morphing, product transformation, changing garment, changing design, changing print, changing pattern, changing color, changing fabric, changing texture, changing proportions, changing silhouette, changing sleeves, changing collar, changing hem, changing stitching, changing seams, changing buttons, changing pockets, changing zipper, changing label, changing logo, invented details, missing details, extra details, hallucinated details, regenerated print, regenerated texture, distorted print, warped logo, fake stitching, fake fabric, incorrect garment construction, inconsistent garment between shots, garment variation between frames, garment regeneration, garment reconstruction, garment deformation, stretched garment, pulled garment, twisted garment, folded garment, unfolded garment, rotated garment, shaking garment, lifted garment, manipulated garment, garment moving by itself, floating hanger, floating clothing, suspended clothing, levitating clothing, stiff fabric, cardboard fabric, unnatural folds, unnatural drape, two hands, hand touching garment, hand pulling garment, hand stretching garment, hand covering product details, extra fingers, warped hands, deformed arms, child hands, baby hands, visible child, visible baby, visible toddler, visible teenager, visible minor, child body, baby body, child face, baby face, child poster not fully blurred, baby poster not fully blurred, child packaging not fully blurred, baby packaging not fully blurred, plastic skin, blurry product, soft product details, fake store, poor commercial environment, empty studio, luxury showroom, CGI, 3D render, AI artifacts, text overlays, watermark

Pov | Meias Nos Pés

Copiar prompt de imagem

Use the attached sock image as the only and absolute product reference.

Create one ultra-realistic first-person smartphone photograph of the exact socks being naturally worn by the person taking the photo.

The camera must reproduce true human vision: positioned at the wearer's natural eye or chest level, looking downward at their own feet. The viewer must immediately feel, "I am looking at my own feet and taking this photo myself."

PRODUCT LOCK:

Preserve the exact socks from the attached image:

- same color,
- same print,
- same characters or graphics,
- same pattern placement,
- same sock type,
- same length,
- same cuff shape,
- same heel construction,
- same toe construction,
- same knit texture,
- same fabric thickness,
- and same proportions.

Do not redesign, recolor, simplify, replace, shorten, lengthen, duplicate, or invent any product detail.

Generate the exact same socks, not a similar variation.

If the reference shows a kit, select one complete matching pair from the kit and show only that pair being worn. Do not mix designs from different pairs.

WORN SOCK REALISM:

The socks must fit real human feet naturally.

Show:

- realistic heel placement,
- correct toe position,
- natural fabric tension over the foot,
- subtle wrinkles near the ankle,
- gentle cuff compression,
- authentic knit stretching,
- and small natural differences between both feet.

The print must remain identical to the reference and follow the curvature of the foot without changing its design.

The socks must not look painted onto the skin, vacuum-sealed, rigid, inflated, perfectly smooth, or digitally wrapped around the feet.

HUMAN POV AND ANATOMY:

Show only the wearer's lower legs, ankles, and feet from their own point of view.

Use natural human proportions, realistic foreshortening, relaxed feet, and slight asymmetry.

One foot may be slightly closer, rotated, or positioned differently from the other.

Do not create mirrored feet, identical poses, mannequin anatomy, or a third-person photographer angle.

SCENE:

Place the person inside a real, comfortable Brazilian middle-class bedroom.

Use a natural position such as sitting on the edge of the bed, reclining on the bed, or sitting on a chair with the feet resting naturally.

The environment must feel clean, organized, functional, cozy, lived-in, and realistic, with ordinary bedding, practical furniture, finished walls, natural window daylight, and ceramic, porcelain, laminate, or light wood flooring.

CAMERA:

Real iPhone-style snapshot.

Vertical 9:16.

24mm to 28mm equivalent main camera.

Standard photo mode.

Natural one-handed framing.

Broad natural focus.

True-to-life colors.

Realistic exposure and smartphone sharpness.

No portrait mode.

No strong bokeh.

No artificial blur.

No commercial studio appearance.

NEGATIVE CONSTRAINTS:

no changed sock design,

no changed print,

no changed colors,

no altered pattern placement,

no mixed pairs,

no extra socks,

no missing socks,

no incorrect heel,

no incorrect toe,

no rigid fabric,

no painted-on socks,

no deformed feet,

no mirrored legs,

no identical foot position,

no third-person angle,

no mannequin anatomy,

no CGI,
no 3D render,
no collage effect,
no text overlays,
no watermark.

OUTPUT:

One authentic first-person iPhone-style photo of the exact attached socks naturally worn on the photographer's own feet, with true human viewing perspective, realistic anatomy, natural fabric behavior, complete product preservation, and a comfortable Brazilian bedroom environment.

Copiar prompt de vídeo sem fala – Use the attached sock image as the mandatory and exclusive visual reference for the product.

Create a 6-second cinematic ultra-photorealistic vertical smartphone video showing the exact socks naturally worn on real human feet.

The video must show only the feet and lower ankles in a natural everyday situation, with the camera simply filming the sock-covered feet, slowly moving closer to the socks and then gently moving back.

The result must feel like a real casual smartphone video recorded in a comfortable Brazilian middle-class home, not CGI, not a fashion campaign, not a synthetic AI composition.

FORMAT:

Vertical 9:16.

6 seconds.

24 fps.

One continuous shot.

Natural smartphone footage.

Cinematic, realistic, intimate, human.

ABSOLUTE PRODUCT LOCK:

Preserve the exact socks from the attached reference:

same color,

same print,

same characters or graphics,

same pattern placement,

same sock type,

same length,

same cuff height,

same cuff shape,

same heel construction,

same toe construction,

same knit or plush texture,

same fabric thickness,

same proportions,
and the same visible construction details.

If the reference shows a kit, select one exact matching pair and show only that pair being worn.

Do not redesign, recolor, simplify, shorten, lengthen, duplicate, remove, replace, or invent any product detail.

Do not generate a similar sock.
Generate the exact same sock.

WORN SOCK REALISM:

The socks must be naturally worn on real human feet.

Show:

correct heel placement,
correct toe position,
realistic fabric tension,
subtle ankle wrinkles,
gentle cuff compression,
natural knit stretching,
small natural differences between both feet,
and realistic contact with the support surface.

The print must remain identical to the reference and follow the natural curvature of the feet without changing design, scale, color, or placement.

The socks must not look painted onto the skin, vacuum-sealed, rigid, inflated, perfectly smooth, or digitally wrapped around generic feet.

HUMAN ANATOMY:

Show only the lower legs, ankles, and feet.

Use realistic adult anatomy,
natural foot proportions,
believable ankle structure,
relaxed posture,
subtle asymmetry,
and true human physical presence.

The two feet must not look mirrored or identical.

One foot may be slightly ahead or slightly rotated compared to the other.

No face.

No hands.
No full body.
No mannequin anatomy.

PHYSICAL SUPPORT:

The feet must remain naturally supported at all times.

Use one believable situation:
feet resting naturally on a bed,
or feet resting naturally on a sofa,
or feet resting naturally on the floor while seated.

The feet must never float in the air.

The posture must feel casual, comfortable, and human.

CAMERA ACTION — CRITICAL:

One continuous shot only.

Start with a natural medium-close smartphone framing of the sock-covered feet.

The camera performs a slow gentle push-in toward the socks for the first half of the shot.

Then the camera performs a slow gentle pull-back for the second half of the shot.

The movement must be subtle, smooth, physically achievable, and human.

The feet remain mostly still.

Allow only very subtle natural micro-movements:
tiny breathing motion,
minimal posture adjustment,
very slight toe relaxation,
and small natural smartphone handheld drift.

Do not create dramatic movement.
Do not orbit around the feet.
Do not rotate around the subject.
Do not create fast motion.

CAMERA:

Shot as if recorded on an iPhone 15 Pro or similar modern smartphone.
24mm to 28mm equivalent main camera.
Standard video mode.
Natural handheld framing.

Broad natural focus.
True-to-life colors.
Realistic exposure.
Subtle smartphone processing.
Natural highlight rolloff.
Balanced contrast.
Soft realistic motion.

No portrait mode.
No cinematic artificial depth mode.
No aggressive stabilization.
No strong bokeh.
No artificial blur.
No commercial studio look.

ENVIRONMENT:

Use a real comfortable Brazilian middle-class bedroom or living room.

The setting must feel:

real,
Brazilian,
clean,
organized,
functional,
cozy,
lived-in,
and naturally attractive.

Use:

a real bed, sofa, or floor support,
well-finished walls,
ordinary practical furniture,
soft natural daylight or realistic ambient indoor light,
and restrained everyday decor.

No mansion.
No luxury showroom.
No fake hotel room.
No studio set.
No generic foreign interior.
No unfinished construction.
No clutter.

LIGHTING:

Use natural daylight from a window or soft realistic indoor ambient light.

Create:

coherent light direction,
natural shadows,
realistic contact shadows,
visible knit texture,
balanced exposure,
true skin tone,
and physically believable fabric depth.

No harsh studio lighting.

No fake HDR.

No glowing highlights.

No excessive contrast.

AUDIO:

Natural synchronized room ambience only.

Include:

soft room tone,
very subtle indoor ambience,
faint distant neighborhood sound if appropriate,
and minimal natural fabric or body movement sound.

No dialogue.

No voice-over.

No music.

No exaggerated sound effects.

NEGATIVE CONSTRAINTS:

no floating feet,
no unsupported feet,
no third-person fashion campaign look,
no changed sock design,
no changed print,
no changed colors,
no altered pattern placement,
no mixed pairs,
no additional socks,
no missing socks,
no rigid fabric,
no painted-on socks,
no vacuum-sealed texture,
no deformed feet,
no mirrored legs,
no identical foot position,
no extra toes,

no missing toes,
no mannequin anatomy,
no hands,
no people besides the visible feet and lower ankles,
no CGI,
no 3D render,
no collage effect,
no text overlays,
no subtitles,
no watermark,
no borders,
no glitch effects.

FINAL OUTPUT:

One continuous 6-second ultra-realistic vertical cinematic smartphone video of the exact attached socks naturally worn on real supported human feet, with subtle human stillness, a slow push-in and gentle pull-back camera move, true anatomy, realistic knit behavior, and a comfortable Brazilian middle-class home environment. Use the attached sock image as the mandatory and exclusive visual reference for the product.

Create a 6-second cinematic ultra-photorealistic vertical smartphone video showing the exact socks naturally worn on real human feet.

Copiar prompt de vídeo sem fala – **UNIVERSAL POV VIDEO PROMPT — CLOTHING ON HANGER / NEVER LET GO**

Subject:

A clothing item hanging on a hanger, being shown directly to the camera in a natural first-person POV. The clothing remains on the hanger during the entire video. If a reference garment is provided, the clothing must match it exactly, preserving color, shape, print, fabric, proportions, collar, sleeves, details, and overall appearance with maximum fidelity.

Background:

A realistic indoor environment appropriate for showing clothing, such as a bedroom, closet area, dressing space, clothing store, or simple functional fashion environment. The background should be real, softly blurred, clean, believable, and secondary to the clothing.

Action:

First-person POV video. One or two realistic hands hold the hanger naturally and keep holding it during the entire video. The hanger is NEVER released. The

clothing is simply presented to the camera with subtle, smooth, human movement. The person gently lifts, slightly adjusts, and softly repositions the hanger to show the front, texture, fit, and details of the clothing. The movement should feel organic, stable, and realistic, as if someone is calmly showing the piece to the viewer. The clothing must remain clearly visible throughout the clip. Do not fold it, do not remove it from the hanger, do not place it down, and do not put it back on a rack.

Style:

Ultra-photorealistic vertical video, authentic smartphone POV, human and natural movement, realistic fabric behavior, soft depth of field, organic TikTok-style product presentation, clean but lived-in environment, natural commercial realism, no exaggerated cinematic effects, no fake advertising look.

Dialogue:

No dialogue. No voiceover. No talking.

Background sounds:

Soft room ambience, subtle fabric movement, light hanger handling sounds, gentle clothing rustle.

Music:

Minimal, elegant, subtle background music, low volume, modern and clean.

Technical parameters:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

Strict rules:

- The clothing must stay on the hanger at all times
- Never release the hanger
- Never drop the hanger
- Never place the clothing on a surface
- Never put the hanger back on a rack during the clip
- Never remove the garment from the hanger
- Only present the clothing to the camera
- Keep the clothing centered and readable
- Maintain natural human hand motion
- If reference clothing is attached, preserve it exactly with maximum fidelity

Negative prompt:

letting go of hanger, hanger falling, removing clothing from hanger, folding clothing, placing clothing on table, hanging it back on rack, extra hands, extra

fingers, deformed hands, shaky movement, robotic movement, visible face, visible person, full body, distorted clothing, altered garment, fake fabric, blurry video, low quality, messy background, CGI, cartoon, 3D render, unrealistic motion, duplicated objects, clothing out of frame, cropped garment, harsh lighting, oversaturated colors

Copiar prompt de imagem - UNIVERSAL IMAGE PROMPT — CHILDREN'S FOOTWEAR WORN ON FEET / ABSOLUTE PRODUCT FIDELITY / BRAZILIAN PHOTOREALISM / NO AI LOOK / DEEP FOCUS

Use the attached footwear image as the one and only absolute source of truth.

Create one ultra-photorealistic vertical 9:16 premium commercial image of the EXACT children's footwear product being naturally worn on a real child's feet inside a real Brazilian environment appropriate to the shoe style and target gender.

The final result must look like a real professional photograph of the exact advertised children's shoe worn in real life, with correct child anatomy, real scale, natural posture, true material behavior, believable environment, and zero visible AI traits.

CORE GOAL:

The viewer must immediately feel:

- this is the exact footwear product being sold
- it looks beautiful, real, wearable, and desirable
- it fits naturally on a real child's feet
- it feels physically believable, comfortable, and premium
- the focus is fully on the footwear

GENDER AND CONTEXT INTERPRETATION — MANDATORY:

Automatically interpret the product style.

- If the product is clearly feminine, show it on real girl feet.
- If the product is clearly masculine, show it on real boy feet.
- If the product is clearly unisex, show it on real child feet in a neutral child context.

The surrounding environment and styling must harmonize naturally with the product's apparent gender and category, but the footwear must remain the visual hero.

ABSOLUTE PRODUCT LOCK — MANDATORY:

Preserve exactly:

- same footwear type
- same model
- same pair identity
- same category
- same shape
- same proportions
- same real scale
- same silhouette
- same toe shape
- same heel shape
- same collar shape
- same shaft height if applicable
- same sandal opening structure if applicable
- same sole thickness
- same outsole shape
- same midsole design
- same upper construction
- same stitching
- same panels
- same overlays
- same straps
- same laces
- same closure system
- same velcro placement
- same buckle if present
- same zipper if present
- same elastics if present
- same decorative elements
- same prints
- same characters or graphics
- same branding
- same logo placement
- same letters
- same visible labels
- same colors
- same color distribution
- same materials
- same finish
- same texture
- same visible construction details

If the attached reference shows only one shoe photographed alone, infer it as one exact matching pair of the same model and place that exact pair on the child's feet.

Do not redesign the shoe.

Do not beautify it by inventing details.
Do not replace it with a similar children's shoe.
Do not alter proportions.
Do not alter colors.
Do not simplify closures or decorative elements.
Do not add new accessories.
Do not remove existing details.

REAL SCALE — CRITICAL:

The footwear must appear at correct child scale.

The shoes must fit naturally on real child feet.

Do not create:

- miniature unrealistic feet
- oversized shoes
- adult feet wearing child shoes
- shoes too small for the feet
- shoes floating loosely
- distorted foot proportions

The size relationship between:

- shoe
- foot
- ankle
- lower leg
- floor
- furniture
- environment

must be physically correct and believable.

CHILD ANATOMY — CRITICAL:

Show only the necessary visible body area:

- feet
- ankles
- part of the lower legs

The child anatomy must be realistic and age-appropriate:

- real child foot shape
- correct ankle size
- natural leg proportions
- natural skin folds
- correct toes shape if visible
- believable resting posture
- natural asymmetry between both feet

No adult feet.

No mannequin feet.

No deformed toes.

No fused toes.
No extra toes.
No floating legs.
No rigid pose.

The child must be:

- standing naturally
- sitting naturally
- or resting feet naturally on a bed, sofa, rug, floor, or bench

The feet must always be physically supported.

FOOTWEAR FIT AND PHYSICAL REALISM:

The shoes must behave like real shoes worn by a child.

Show:

- correct opening and closure behavior
- natural contact between foot and shoe
- realistic pressure points
- believable fit around the ankle
- natural bending only if compatible with the shoe type
- proper sole contact with the surface
- realistic laces, straps, buckles, or velcro behavior
- correct heel placement
- correct toe box shape under wear
- real material tension and folds

The pair must not look pasted onto the feet.

The shoes must not look like a digital wrap around generic feet.

BRAZILIAN ENVIRONMENT AUTO-SELECTION:

Automatically choose a real Brazilian environment appropriate to the footwear type, while keeping the focus on the shoes.

Examples:

- sneakers: bedroom, playroom, hallway, living room, school-prep area, or outdoor home area
- sandals: varanda, living room, child bedroom, garden area, or casual home setting
- dress shoes: clean indoor home area, living room, celebration-prep area, or child party-ready context
- school shoes: entryway, study corner, child bedroom, or practical morning routine context
- baby/toddler shoes: soft rug area, nursery corner, play mat, bed, or sofa edge

The environment must feel:

- Brazilian
- real
- organized
- clean
- child-friendly
- comfortable
- lived-in

- premium but natural
- visually believable

Avoid:

- fake showroom
- empty studio
- foreign generic interior
- exaggerated luxury
- clutter chaos
- 3D-render look
- artificial catalog set

COMPOSITION — FOOTWEAR FIRST:

The footwear must be the absolute focus.

The shoes should occupy approximately 65% to 85% of the frame.

Show enough of:

- feet
- ankles
- lower legs
- supporting surface
- nearby environment

to confirm real use and scale.

Do not crop the shoes badly.

Do not place the shoes too far away.

Do not turn the image into a portrait of the child.

Do not show the face.

Use a natural angle such as:

- downward close perspective
- low child-foot-level angle
- seated perspective
- side three-quarter angle focused on the shoes
- slightly elevated view focused on the feet

CAMERA:

Professional full-frame camera realism.

Vertical 9:16.

4K commercial photo quality.

Lens feel:

- 50mm to 85mm equivalent for tighter product realism
- 35mm to 50mm equivalent when more context is needed
- no fisheye
- no extreme wide-angle distortion
- no exaggerated cinematic angle

DEEP FOCUS — NO BLUR:

The footwear must remain tack sharp.

The feet, ankles, and immediate surrounding context must also remain clearly readable.

Use realistic deep focus.

No portrait mode.

No extreme bokeh.

No artificial blur.

No soft haze.

No cutout look.

Keep clearly visible:

- upper material texture
- sole texture
- stitching
- closures
- laces
- branding
- prints
- decorative details
- foot-to-shoe fit
- floor contact
- shadows

LIGHTING:

Use realistic natural or ambient light appropriate to the environment.

Possible sources:

- soft daylight
- natural indoor ambient light
- subtle practical home lighting

Maintain:

- true product colors
- natural child skin tone
- realistic shadows
- balanced highlights
- believable reflections

Avoid:

- harsh flash
- fake HDR
- artificial glow
- overexposed highlights
- colored light distortion

MATERIAL REALISM:

All materials must behave correctly:

- leather like real leather
- synthetic leather like real synthetic material
- fabric like real woven fabric
- mesh like real mesh
- rubber like real rubber
- foam sole like real foam
- plastic details like real molded plastic
- metallic details like real metal if present

Show:

- stitching
- grain
- weave
- edge finishing
- sole thickness
- flex points
- light wear behavior only if natural
- contact shadows
- microtexture

No fake textures.

No melted geometry.

No synthetic reflections.

No plastic-looking skin.

No fake shoe wrapping.

CLEAN FRAME:

Outside legitimate branding or printed details physically present on the exact footwear, generate no:

- subtitles
- captions
- promotional text
- prices
- banners
- interface elements
- watermarks
- random text

STRICT RULES:

- exact footwear fidelity
- child feet only
- boy feet for boy shoes
- girl feet for girl shoes
- neutral child context for unisex shoes
- product must dominate the frame
- focus must remain fully on the footwear
- no face
- no blur
- no AI look
- no CGI look

- no product drift
- no similar shoe substitution

NEGATIVE PROMPT:

changed footwear, wrong shoe, similar children's shoe, altered colors, altered sole, altered closure, altered shape, altered branding, wrong scale, oversized shoes, miniature feet, adult feet, deformed feet, extra toes, missing toes, fused toes, floating feet, shoes pasted onto feet, wrong environment, fake showroom, empty studio, clutter chaos, distant framing, too much empty space, portrait-style framing, blurred shoes, portrait blur, strong bokeh, soft focus, CGI, 3D render, AI look, fake textures, melted geometry, distorted logos, random text, watermark, overlay.

FINAL OUTPUT:

One ultra-photorealistic vertical 9:16 premium sales photograph of the EXACT attached children's footwear product naturally worn on real child feet, at correct child scale, in a real Brazilian environment appropriate to the product style and gender, with total visual focus on the footwear, true material behavior, realistic anatomy, deep focus, strong purchase appeal, and absolutely no visible AI traits.

Copiar prompt de vídeo sem fala - **UNIVERSAL CHILDREN'S FOOTWEAR SALES VIDEO PROMPT — WORN ON FEET / 5 FUNCTIONAL B-ROLL SCENES / ABSOLUTE PRODUCT FIDELITY / BRAZILIAN PHOTOREALISM / NO AI LOOK**

Use the attached footwear image as the one and only absolute visual reference for the featured product.

Create one ultra-photorealistic vertical 9:16 premium sales video showing the EXACT children's footwear product naturally worn on real child feet inside a real Brazilian environment appropriate to the footwear style and target gender.

The final result must look like a real premium product video recorded in Brazil, with physically believable child anatomy, true product fidelity, natural material behavior, correct scale, and zero visible AI traits.

The footwear must remain the absolute hero in every scene.

VIDEO GOAL:

The viewer must immediately understand:

- this is the exact children's shoe being sold
- it fits naturally on real child feet
- it looks comfortable, beautiful, and wearable
- it is being shown in a believable real-life context
- the focus is completely on the footwear

GENDER AND CONTEXT INTERPRETATION — MANDATORY:

Automatically interpret the product style.

- If the product is clearly feminine, show it on real girl feet in a harmonized girl context.
- If the product is clearly masculine, show it on real boy feet in a harmonized boy context.
- If the product is clearly unisex, show it on real child feet in a neutral child context.

REFERENCE RESET RULE — CRITICAL:

At the start of each new scene, re-anchor the footwear directly to the original attached reference.

Do not allow scene-to-scene drift.

Do not let one generated shot reinterpret the next.

Each B-roll scene must independently preserve the original footwear identity.

ABSOLUTE PRODUCT LOCK:

Preserve exactly in all scenes:

- same footwear type
- same model
- same pair
- same category
- same shape
- same silhouette
- same proportions
- same toe shape
- same heel shape
- same upper construction
- same panels
- same stitching
- same closure system
- same velcro placement
- same laces
- same buckles
- same elastics
- same sole thickness
- same sole design
- same outsole shape
- same branding

- same logos
- same letters
- same decorative elements
- same prints
- same graphics
- same characters if present
- same colors
- same material
- same finish
- same texture
- same visible construction details

If the reference shows only one shoe photographed alone, infer an exact matching pair and keep that exact pair consistent in all scenes.

Do not redesign the footwear.

Do not replace it with a similar shoe.

Do not simplify it.

Do not alter colors.

Do not alter proportions.

Do not invent new decorative elements.

Do not remove details.

VIDEO FORMAT:

- vertical 9:16
- 8 seconds
- 24 fps
- exactly 5 separate B-roll scenes
- no narration
- no dialogue
- no subtitles
- no text overlays

CHILD ANATOMY AND SUPPORT — CRITICAL:

Show only:

- feet
- ankles
- lower legs
- optional small portion of knees when needed

Do not show the face.

The feet must be real child feet:

- age-appropriate proportions

- natural ankle structure
- believable lower legs
- real skin texture
- natural asymmetry
- physically correct support

The feet must always remain supported by:

- floor
- rug
- bed
- sofa
- bench
- play mat
- step
- or other believable surface

No floating feet.

No mannequin feet.

No adult feet.

No deformed toes.

No extra toes.

FOOTWEAR FIT AND MOTION REALISM:

The shoes must fit the child naturally and remain consistent in every scene.

Show:

- real contact with the feet
- proper heel fit
- proper toe fit
- believable closure tension
- natural material bending only where physically appropriate
- real floor contact
- believable walking or resting behavior
- subtle sole compression when stepping if appropriate
- natural child movement

Do not make the footwear look rigid when it should flex.

Do not make it collapse unnaturally.

Do not make it look pasted onto the feet.

BRAZILIAN ENVIRONMENT AUTO-SELECTION:

Choose one coherent real Brazilian child environment appropriate to the product type, such as:

- child bedroom

- playroom
- hallway
- living room
- home varanda
- nursery area
- school-prep corner
- child party-prep indoor space
- real outdoor home area

The environment must feel:

- Brazilian
- real
- organized
- child-friendly
- clean
- comfortable
- natural
- lived-in
- premium but believable

Do not use:

- fake showroom
- empty studio
- foreign generic environment
- excessive luxury
- clutter chaos
- synthetic set

MANDATORY 5-SCENE STRUCTURE:

SHOT 1 — 0.0s to 1.5s — HERO FOOTWEAR INTRO

Show both feet wearing the exact footwear clearly.

Use a close or medium-close angle with the shoes dominating the frame.

The child is standing or sitting naturally.

The supporting surface must be visible.

Use a subtle push-in or gentle lateral camera movement.

SHOT 2 — 1.5s to 3.0s — MATERIAL / CLOSURE DETAIL

Cut to a close-up of one important visible detail:

- upper texture

- sole
- stitching
- velcro
- laces
- buckle
- branding
- decorative element
- side structure

Keep the shoe exact and sharply readable.

SHOT 3 — 3.0s to 4.6s — NATURAL USE / STEP OR REST

Cut to a natural functional scene:

- a gentle step
- a subtle foot movement
- a child seated with feet resting naturally
- a soft weight shift
- a natural small walk motion if appropriate

The movement must be subtle, believable, and keep the footwear visible.

SHOT 4 — 4.6s to 6.2s — SECONDARY ANGLE / SIDE OR HIGH-ANGLE VIEW

Cut to another product-focused angle showing:

- side profile
- front profile
- top opening
- ankle fit
- how the pair looks together
- sole contact
- real scale

This shot must not repeat the previous framing.

SHOT 5 — 6.2s to 8.0s — FINAL SALES HERO

Return to a polished final hero view.

Show the exact pair clearly on the child's feet in a beautiful, believable child setting.

End with the product looking:

- wearable
- comfortable
- attractive

- premium
- physically real
- fully recognizable

CAMERA:

Professional full-frame commercial realism.

Vertical 9:16.

4K-grade appearance.

Lens feel:

- 50mm to 85mm for tight product emphasis
- 35mm to 50mm when more context is needed
- no fisheye
- no extreme distortion
- no exaggerated cinematic movement

FOCUS — NO BLUR:

The footwear must remain sharply readable in every scene.

The feet, ankles, and immediate context must also remain clear.

Use realistic deep focus.

No portrait mode.

No artificial background blur.

No strong bokeh.

No soft haze.

No focus pulsing.

Keep clearly visible:

- shoe structure
- sole
- closures
- branding
- textures
- foot fit
- supporting surface
- shadows

LIGHTING:

Use realistic natural or ambient light.

Possible sources:

- soft daylight
- natural home ambient light
- subtle practical indoor lighting

Maintain:

- real product colors
- natural skin tone
- realistic shadows
- balanced highlights
- believable reflections

Avoid:

- harsh flash
- fake HDR
- artificial glow
- overexposed highlights
- colored lighting distortion

MATERIAL REALISM:

- leather must look like real leather
- synthetic materials must look authentic
- fabric must show real fibers
- mesh must show real weave
- rubber must show realistic sole behavior
- closures must behave naturally
- child skin must show real texture
- socks if present must behave like real socks

No fake reflections.

No melted geometry.

No pasted-on shoe look.

No synthetic skin.

AUDIO:

No narration.

No dialogue.

Use only subtle natural ambience and light product-use sounds, such as:

- soft room tone
- subtle footsteps
- gentle shoe contact with floor
- soft fabric movement
- natural indoor ambience

Optional very soft premium background music may be used, but it must remain discreet and secondary.

No subtitles.

No captions.

No text overlays.

CLEAN FRAME:

Outside legitimate branding or printed details physically present on the exact footwear, generate no:

- subtitles
- captions
- promotional text
- prices
- watermarks
- interface elements
- random text

STRICT RULES:

- exact product fidelity
- child feet only
- girl feet for girl shoes
- boy feet for boy shoes
- neutral child context for unisex shoes
- total focus on the footwear
- no face
- no narration
- no blur
- no product drift
- no similar shoe substitution
- no AI look
- no CGI look

NEGATIVE PROMPT:

single continuous take, no B-roll, changed footwear, wrong children's shoe, altered colors, altered branding, altered closures, altered sole, wrong scale, adult feet, deformed feet, extra toes, missing toes, floating feet, pasted-on shoes, fake environment, empty studio, fake showroom, clutter chaos, shoes too far from camera, portrait framing, blurred shoes, artificial blur, soft focus, strong bokeh, CGI, 3D render, AI look, fake textures, melted geometry, random text, watermark, overlay, subtitles.

FINAL OUTPUT:

One ultra-photorealistic 8-second vertical premium sales video with exactly five separate B-roll scenes showing the EXACT attached children's footwear product naturally worn on real child feet, with correct child anatomy, correct real-world scale, a harmonized Brazilian child environment, total visual focus on the footwear, deep focus, true material behavior, and absolutely no visible AI traits.

PET dentro de casa

<https://wpevghcfmjwmidcjdtn.supabase.co/storage/v1/render/image/sign/prompt-media/image/1786154384083-gd4vf2.jpg?token=eyJraWQiOiJzdG9yYWdlLXVyYyB1ZaWduaW5nLWtleV8zNDM0YzgxZi0wMzRmLTRINTEtYWYzYy01MzkxYWNjYjgxODIiLCJhbGciOiJIUzI1NiJ9.eyJ1cmwiOiJwcm9tcHQtbWVkaWEvaW1hZ2UvMTc4NjE1NDM4NDA4My1nZDR2ZjluYW50b3R5IiwiaWF0IjoiMTk1fQ.noAaFepUfn5Pglsw0leswHSCChGX7C3k78SBBDyFK94&width=560&quality=70&resize=contain>

Copiar prompt de imagem - Use the attached image as the only and absolute reference for the pet bed.

Create one ultra-realistic vertical 9:16 smartphone photograph of the exact pet bed naturally placed inside a comfortable Brazilian middle-class home.

The final image must look like a genuine iPhone photograph captured inside a real home, not CGI, not a 3D render, and not an artificial catalog composition.

PRODUCT LOCK:

Preserve the exact pet bed shown in the attached reference:

same quantity,
same shape,
same dimensions,
same height,
same proportions,
same colors,
same fabric,
same texture,
same padding,
same seams,
same borders,
same cushion,
same print,
same branding,
same legitimate printed details,
same removable parts,

and the same visible construction.

Do not redesign, recolor, simplify, inflate, flatten, duplicate, remove, replace, improve, or invent any part of the bed.

Generate the exact attached product, not a similar variation.

PLACEMENT:

Place the pet bed naturally on the floor in a real Brazilian living room, bedroom, hallway pet area, or dedicated indoor pet corner.

The bed must be fully supported by the floor and correctly scaled relative to the room and pet.

Show realistic:

floor contact,
natural fabric folds,
soft irregular padding,
believable cushion volume,
subtle seam tension,
physically accurate shadows,
and realistic material texture.

The bed must not appear rigid, perfectly inflated, floating, miniature, oversized, or pasted into the scene.

PET INTERACTION:

Include one real domestic pet physically compatible with the size and shape of the bed.

The pet may be:

resting naturally inside the bed,
sitting beside it,
looking toward it,
or calmly approaching it.

When the pet is inside the bed, show realistic cushion compression and believable weight distribution.

Keep the bed clearly visible and recognizable.

The pet must not completely hide the product.

PET REALISM:

The pet must have:

correct anatomy,
natural fur,
realistic paws,
proper joints,

correct muzzle,
natural ears,
realistic eyes,
believable body weight,
and a relaxed domestic posture.

The animal must not float, deform, duplicate, or look like a plush toy.

BRAZILIAN HOME:

Use a clean, comfortable, organized, functional, and naturally lived-in Brazilian middle-class home.

Include believable details such as:

finished neutral walls,
practical proportional furniture,
clean ceramic, porcelain, laminate, or light wood flooring,
natural window daylight,
subtle plants or ordinary household objects,
and restrained decoration.

The environment must feel warm and attractive without appearing luxurious, staged, empty, unfinished, or foreign.

CAMERA:

Shot as if captured with an iPhone 15 Pro or a similar modern smartphone.

Vertical 9:16.

24mm to 28mm equivalent main camera.

Standard photo mode.

Low three-quarter or natural standing-height framing.

Broad natural focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle smartphone processing.

No portrait mode.

No excessive background blur.

No artificial bokeh.

No fake HDR.

PHOTOGRAPHIC COHERENCE:

The pet bed, pet, floor, furniture, and room must share the same:

lighting direction,
white balance,
perspective,
focus behavior,
exposure,
shadow softness,
and photographic texture.

The result must look like one real photograph captured in a single moment.

CLEAN FRAME:

Outside legitimate branding or printing physically present on the exact product, generate no added text, symbols, icons, labels, captions, stickers, interface elements, promotional graphics, or watermarks.

NEGATIVE CONSTRAINTS:

no altered pet bed,
no similar replacement product,
no duplicated bed,
no changed fabric,
no changed color,
no invented cushion,
no rigid padding,
no floating bed,
no oversized pet,
no miniature pet,
no deformed animal,
no extra paws,
no missing limbs,
no plush-toy appearance,
no CGI,
no 3D render,
no collage effect,
no artificial showroom,
no text overlays,
no watermark,
no borders.

FINAL OUTPUT:

One clean ultra-realistic vertical iPhone-style photograph of the exact attached pet bed naturally placed inside a comfortable Brazilian middle-class home, with one realistic domestic pet calmly resting in, approaching, or standing beside it, complete product fidelity, correct physical scale, and believable fabric behavior.

Copiar prompt de vídeo sem fala - **Use the uploaded first frame as an immutable visual anchor and the exclusive source of truth for the pet bed, pet, environment, lighting, camera angle, and composition.**

Create an 8-second ultra-photorealistic vertical smartphone video of a real domestic pet naturally interacting with the exact pet bed shown in the first frame inside a comfortable Brazilian middle-class home.

FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

One continuous uninterrupted take.

No cuts.

No transitions.

No scene changes.

PET BED LOCK:

Preserve the exact pet bed throughout every frame:

**same quantity,
same shape,
same dimensions,
same height,
same proportions,
same colors,
same fabric,
same texture,
same padding,
same seams,
same borders,
same cushion,
same print,
same branding,
same legitimate printed details,
same removable parts,**

and the same visible construction.

Treat the bed as a real physical object already represented correctly in the uploaded first frame.

Do not redesign, recolor, simplify, inflate, flatten, duplicate, remove, replace, improve, reconstruct, or invent any part of it.

The bed must not morph, change size, change fabric, lose details, gain components, or move independently.

PET LOCK:

Preserve the same pet throughout the entire video:

**same species,
same breed or physical type,
same size,
same fur color,
same markings,
same eyes,
same ears,
same muzzle,
same paws,
and same body proportions.**

The pet must not morph, duplicate, change size, or change appearance.

ACTION:

Use one calm and physically believable interaction sequence.

The pet slowly approaches the bed, sniffs it briefly, steps into it, turns once naturally, lowers its body, and settles into a comfortable resting position.

Keep the movement restrained and realistic.

The pet may blink, move its ears slightly, adjust one paw, or relax its head after lying down.

Do not create fast, exaggerated, or trained performance behavior.

BED PHYSICS:

The bed must react naturally to the pet's weight.

Show:

subtle cushion compression,
realistic movement of the padded sides,
organic fabric folds,
minor seam tension,
believable weight distribution,
natural friction against the floor,
and coherent contact shadows.

The bed must remain stable and grounded.

It must not slide significantly, inflate, deflate, pulse, melt, stretch, collapse, or change construction.

Keep enough of the bed visible throughout the video so the product remains clearly recognizable.

PET MOVEMENT:

Show realistic:

paw placement,
joint movement,
body weight,
balance,
head movement,
fur response,
breathing,
and settling behavior.

The pet must enter and rest inside the bed without passing through the cushion or side walls.

CAMERA ACTION:

Begin with the exact framing of the uploaded first frame.

Use a low three-quarter smartphone angle that clearly shows the bed and pet.

Perform a very slow handheld push-in of only a few centimeters while gently following the pet's movement.

Maintain the same camera axis.

Do not orbit around the product.

Do not zoom aggressively.

Do not change lenses.

Do not move close enough to force reconstruction of hidden product details.

BRAZILIAN HOME:

Preserve or create a real Brazilian middle-class comfortable home consistent with the first frame.

Use a clean living room, bedroom, hallway pet area, or indoor pet corner with:

**finished neutral walls,
practical proportional furniture,
clean ceramic, porcelain, laminate, or light wood flooring,
natural daylight,
subtle household objects,
and restrained decoration.**

The environment must feel warm, organized, functional, lived-in, and naturally attractive without appearing luxurious or staged.

CAMERA QUALITY:

Shot as if recorded with an iPhone 15 Pro or a similar modern smartphone.

24mm to 28mm equivalent main camera.

Standard smartphone video mode.

Broad natural focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle sensor texture.

Restrained smartphone processing.

No portrait mode.

No cinematic depth simulation.

No strong bokeh.

No artificial subject isolation.

No excessive motion blur.

No fake HDR.

TEMPORAL CONSISTENCY:

Every frame must preserve the same:

**pet bed identity,
shape,
fabric,
colors,
padding,
seams,
pet identity,
pet anatomy,
room layout,
floor texture,
lighting direction,
white balance,
focus behavior,
and exposure.**

The bed must not morph.

The pet must not morph.

The environment must not change, multiply, disappear, or transform.

AUDIO:

Natural synchronized home ambience only.

Include:

**soft paw sounds,
subtle fabric movement,
gentle cushion compression,
quiet pet breathing,
and faint household room tone.**

No dialogue.

No voice-over.

No music.

No artificial transition sounds.

CLEAN FRAME:

Outside legitimate branding or printing physically present on the product, generate no added text, symbols, icons, captions, stickers, social-media interface, camera controls, promotional graphics, or watermarks.

NEGATIVE CONSTRAINTS:

**no altered pet bed,
no duplicated bed,
no product morphing,
no changed fabric,
no rigid cushion,
no floating bed,
no sliding bed,
no oversized pet,
no miniature pet,
no deformed animal,
no extra paws,
no missing limbs,
no pet morphing,
no pet passing through the bed,
no abrupt movement,
no scene change,
no CGI,
no 3D render,
no collage effect,
no subtitles,
no captions,
no text overlays,
no watermark,
no borders,
no glitch effects.**

FINAL OUTPUT:

One continuous 8-second ultra-realistic vertical iPhone-style video of the same real domestic pet calmly approaching, entering, turning, and settling into the exact attached pet bed inside a comfortable Brazilian middle-class home, with realistic cushion compression, stable product identity, accurate animal anatomy, and no visual drift.

POV | Cena B-roll

Copiar prompt de vídeo - Use the provided reference image as the exact first frame and as an absolute visual continuity lock for the entire video.

Create an ultra-photorealistic vertical 9:16 fashion product B-roll video with exactly six dynamic scenes completed within 8 seconds.

The result must feel energetic, modern, visually attractive and professionally edited for social commerce, while preserving the product with absolute fidelity.

ABSOLUTE PRODUCT AND ENVIRONMENT LOCK:

The reference image is the only source of truth.

Every garment, object and environmental element visible in the reference must remain completely unchanged during all six scenes.

Preserve exactly:

- the number of garments;
- the identity of every garment;
- the position of every piece;
- the orientation of each piece;
- the distance between the garments;
- the overlap between pieces;
- the complete silhouette of every item;
- the exact sleeves, straps, collars, necklines, waistbands, cuffs and hems;
- the exact folds and wrinkles;
- the exact fabric texture;
- the exact colors and color placement;
- the exact print position and print scale;
- the exact logos, words, embroidery and illustrations;
- the exact pockets, buttons, bows, seams and decorative elements;
- the exact contact shadows;
- the exact bedding compression;
- the exact bedspread;
- the exact bedroom;
- the exact lighting direction;
- the exact white balance;

- the exact background objects.

All garments remain perfectly stationary.

No garment may slide, rotate, stretch, shrink, unfold, refold, lift, flutter, breathe or change shape.

No object may appear, disappear, duplicate or transform.

Only the virtual camera framing, camera distance and focus may change.

DYNAMIC EDITING STYLE:

Use exactly six distinct scenes.

Use fast, precise and visually clean hard cuts.

Use subtle speed ramps only on camera movement.

Do not use morphing.

Do not use dissolve transitions.

Do not use liquid transitions.

Do not use whip-pan transitions that distort or reconstruct the garments.

Each scene must begin from a geometrically faithful view of the same unchanged product arrangement.

The rhythm must feel dynamic without becoming chaotic.

SCENE 1 — FAST HERO INTRO — 0.0 TO 1.1 SECONDS:

Begin from the exact attached reference frame.

Show the complete outfit, set or kit on the bed.

Perform a quick but smooth overhead push-in toward the center of the product.

Use a subtle speed ramp: slightly faster at the beginning and gently slowing near the end.

Keep the complete garment arrangement identifiable.

This scene acts as the visual hook.

SCENE 2 — UPPER DETAIL SLIDE — 1.1 TO 2.2 SECONDS:

Hard cut to a close overhead framing of the upper part of the main garment.

Focus on a real existing detail such as:

- neckline;**
- collar;**
- shoulder seam;**
- straps;**
- upper print;**
- sleeve finish;**
- upper buttons;**
- embroidery.**

Perform a short controlled lateral camera slide from left to right.

Keep the camera movement smooth, precise and slightly energetic.

Do not invent or alter any garment detail.

SCENE 3 — PRINT OR FEATURE PUNCH-IN — 2.2 TO 3.3 SECONDS:

Hard cut to the most visually important authentic detail in the reference.

Possible real features include:

- central print;**
- logo;**
- illustration;**
- embroidery;**
- bow;**
- pocket;**
- applique;**
- button arrangement.**

Perform a quick controlled punch-in followed by a very subtle stabilization hold.

Preserve the exact print geometry, color, scale, orientation and position.

All text must remain unchanged and correctly oriented.

SCENE 4 — TEXTURE MACRO GLIDE — 3.3 TO 4.5 SECONDS:

Hard cut to a macro-style overhead view of the actual fabric texture.

Show real textile characteristics such as:

- cotton fibers;
- ribbed knit;
- denim grain;
- stitching;
- seam tension;
- elastic gathering;
- fabric weave;
- hem construction.

Perform a short diagonal camera glide.

Use shallow depth of field only around the edges while keeping the main fabric detail sharply visible.

Do not blur, reconstruct or alter the garment.

SCENE 5 — SECOND PIECE OR LOWER DETAIL — 4.5 TO 5.9 SECONDS:

Hard cut to the lower garment or another important piece of the set or kit.

If the reference contains only one garment, show a different real detail from the lower part of that same garment.

Focus on an authentic feature such as:

- waistband;
- lower print;
- hem;
- pocket;
- leg opening;
- skirt finish;
- drawstring;
- bottom seam.

Perform a short curved micro-orbit while maintaining an almost top-down perspective.

The orbit must be extremely subtle and must not introduce visible perspective distortion.

Preserve the exact garment geometry and product arrangement.

SCENE 6 — DYNAMIC FINAL REVEAL — 5.9 TO 8.0 SECONDS:

Hard cut back to a medium overhead view of the full unchanged product arrangement.

Begin slightly closer than the original reference.

Perform a smooth, elegant pull-back combined with a very subtle vertical camera rise.

Use a gentle speed ramp that slows naturally at the end.

Finish with the entire garment, coordinated set or kit fully visible, centered and surrounded by balanced negative space.

The final frame must match the exact product arrangement, colors, folds and spatial relationships established in the original reference.

End with a clean hero composition suitable for promotional text to be added later during editing.

Do not generate text inside the video.

CAMERA LANGUAGE:

True overhead and near-overhead commercial product cinematography.

Use controlled framing variation:

- push-in;**
- lateral slide;**
- punch-in;**
- diagonal macro glide;**
- subtle micro-orbit;**
- pull-back reveal.**

Maintain realistic lens behavior.

Minimal distortion.

No fisheye.

No extreme perspective.

No camera shake.

No abrupt reframing that cuts important garment areas.

LIGHTING LOCK:

Maintain the exact lighting established in the reference image.

No flicker.

No moving shadows.

No changing daylight direction.

No exposure pumping.

No changing color temperature.

No artificial glow.

No additional reflections.

No dramatic lighting effects.

The product color must remain accurate and stable in every scene.

REALISM:

The video must look like six real B-roll shots filmed consecutively in the same bedroom while the garments remain untouched on the bed.

Include:

- realistic photographic texture;**
- subtle sensor grain;**
- natural highlight rolloff;**
- realistic textile fibers;**
- correct fabric-to-bed contact;**
- stable shadows;**
- believable depth of field;**
- high-quality commercial smartphone footage.**

STRICT NEGATIVE CONSTRAINTS:

No garment movement.

No fabric animation.

No breathing clothing.

No fluttering sleeves.

No changing folds.

No changing product position.

No duplicated pieces.

No missing pieces.

No additional garments.

No altered colors.

No altered print.

No changing logo.

No mirrored words.

No warped seams.

No redesigned product.

No floating objects.

No morphing transitions.

No dissolves.

No liquid transitions.

No teleportation.

No moving shadows.

No changing background.

No changing bedding.

No hands.

No arms.

No people.

No mannequins.

No reflections of people.

No text overlays.

No captions.

No watermark.

No application interface.

Background sounds: soft natural room ambience with subtle cinematic transition accents.

Music: modern light fashion instrumental, energetic but elegant, without vocals.

Diálogo: nenhum.

Influenciador UGC + calçado

Copiar prompt de imagem — {"scene":"influencer holding the shoe near chest level","focus":"shoe close to camera","background":"clean neutral or soft lifestyle","lighting":"soft frontal light","product_detail":"stitching, texture and material fully visible"}{"global_rules":["preserve exact product design from reference","do not redesign or reinterpret footwear","maintain exact proportions, stitching, texture and structure","no deformation of straps, sole or heel","product must look like a real photographed item, not generated","no symmetry correction","no plastic textures","no CGI look","natural lighting only","visible skin texture and pores","natural camera imperfections","no looped motion patterns in video"]}

Copiar prompt de vídeo sem fala - **AUDIO / SPEECH: The influencer speaks naturally in Brazilian Portuguese while holding the product close to the camera:**

"Tênis lindo, de qualidade, solado super macio é esse aqui. Ele é um dos mais vendidos da Shopee e o precinho nem se fala."

MOTION: very subtle hand stabilization, small rotation of the shoe, no aggressive movement. Maintain exact grip and scale, no product bending or reshaping.

ANTI-BUG: no product redesign, no geometry change, no texture smoothing, no lighting flicker, no frame inconsistency, no repeated animation loops, product must remain identical across all frames.

Copiar prompt de imagem- ## UNIVERSAL IMAGE PROMPT — POV ON BED / KIDS BEDROOM / CHILD CLOTHING / ONE VISIBLE ADULT FEMININE HAND / EXTREME REALISM / NO CHILDREN

Create an ultra-photorealistic vertical POV image (9:16) using the attached reference image as the exact child clothing source.

Preserve the clothing item with maximum fidelity: same garment type, same shape, same proportions, same size, same color, same print, same stitching, same sleeves, same collar, same hem, same fabric texture, same folds, and same design identity.

IMPORTANT NATURALITY RULE:

This must feel like a real top-view or near top-view photo taken naturally in a bedroom.

The garment must lie naturally on the bed with realistic gravity, folds, and softness.

Show only ONE visible adult feminine hand.

The hand may gently smooth, hold, or touch one area of the garment naturally.

Do not create two hands.

Do not flatten the garment into a rigid shape.

Do not create artificial symmetry.

Allow realistic textile drape and natural imperfection.

CHILD / BABY VISIBILITY SAFETY RULE:

No real child, baby, toddler, infant, teenager, or underage person may appear anywhere in the image.

Do not generate children or babies on the bed, in the room, background, mirror, photo frame, poster, decoration, packaging, or any visible part of the environment.

If any packaging or object contains a baby or child image, blur or softly obscure only that child/baby representation.

Scene: a real comfortable Brazilian middle-class kids bedroom or nursery-style room, cozy, beautiful, organized, warm, and child-friendly, but with no child or baby present. The garment is laid naturally on a bed.

KIDS ROOM STYLE:

- real Brazilian comfortable middle-class home
- neutral and warm child-friendly room
- bedding, pillows, rug, plush items, books, light wood furniture, curtains, and subtle décor
- cozy and caprichoso
- no visible minors
- no poverty look
- no unfinished construction

- no dirty cement floor
- no broken walls
- no improvised bedroom
- no abandoned room

HUMAN REALISM RULE:

The final image must look like a real high-definition photograph.

The visible hand must look adult, real, and human, with pores, skin texture, natural nails, realistic joints, and believable contact with the fabric.

The garment must show realistic fibers, folds, weight, softness, and surface detail.

The bed linens must look real, with tactile texture and natural pressure folds.

Composition:

- top-down or slightly angled POV shot
- product is the hero
- one visible adult feminine hand only
- realistic bed context
- natural asymmetry
- no rigid styling

Camera:

- iPhone 15 Pro Max realism
- natural smartphone perspective
- vertical 9:16
- sharp focus on garment
- realistic bedding depth
- no blur
- no beauty softness

Lighting:

- soft natural daylight or warm room light
- balanced exposure
- realistic shadows
- believable highlights on fabric and bedding
- no harsh flash

Negative prompt:

rigid garment, flattened garment, symmetrical layout, altered color, altered print, stiff fabric, deformed hands, extra fingers, child hands, baby hands, visible child, visible baby, visible minor, child photo without blur, baby photo without blur, child packaging without blur, baby packaging without blur, fake bedding, blurry product, soft image, CGI, AI artifacts, poor room, messy low-quality room, oversaturated colors, watermark

Copiar prompt de vídeo sem fala — **UNIVERSAL VIDEO PROMPT — CHILD CLOTHING ON BED / KIDS BEDROOM POV / MAX FIDELITY / REAL SCALE / BRAZILIAN PHOTOREALISM**

Use the attached child clothing image as the absolute visual reference. Create an ultra-photorealistic vertical POV video (9:16) showing the EXACT child clothing item naturally placed on a bed inside a real Brazilian nursery or kids bedroom.

The garment must remain visually identical to the reference during the entire video: same type, shape, size, proportions, color, print, stitching, collar, sleeves, hem, fabric texture, folds and visual identity.

CHILD / BABY FULL PRIVACY BLUR RULE:

No real child, baby, toddler, infant, teenager or underage person may appear clearly anywhere in the video.

Do not generate visible minors on the bed, in the room, background, mirror, poster, frame, shelf, packaging, decoration or any visible area.

If any child or baby appears on packaging, tags, posters, frames, books, decorations or printed material, completely blur or privacy-mask the entire child/baby representation in every frame.

Do not blur the garment or the rest of the scene.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO BED SHOT:

Show the exact garment naturally resting on the bed. The clothing is the hero, clearly visible, correctly scaled and physically believable.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of fabric texture, stitching, print, sleeve, collar, hem, seam or material detail.

3s–4.5s — NATURAL HAND SHOT:

Cut to one adult feminine hand gently smoothing or touching one area of the garment. Do not use two hands. Do not stretch or flatten the garment unnaturally. The fabric must move softly and realistically.

4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing folds, fabric thickness, print clarity, seam quality, softness, textile fibers and bedding contact.

6s–8s — FINAL HERO SHOT:

Return to a final clean POV shot of the garment on the bed, with the kids bedroom context visible and the product sharp.

SCENE:

Real comfortable Brazilian middle-class nursery or kids bedroom. Cozy, organized, beautiful, neutral tones, soft wood furniture, bed, crib, shelves,

baskets, rug, curtains, books, plush toys and subtle decor may appear naturally.
No visible children or babies.

CAMERA:

Vertical 9:16, iPhone 15 Pro Max rear camera look, natural smartphone top-view or slightly angled POV, sharp garment focus, realistic bedding depth, no excessive blur, no artificial softness.

LIGHTING:

Real natural daylight from a bedroom window or soft practical room light, balanced exposure, realistic shadows and natural highlights on fabric, bedding, wood and room decor.

AUDIO:

No dialogue. No voiceover. Natural quiet room ambience, subtle fabric movement and soft hand contact sounds.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

STRICT RULES:

Mandatory B-roll cuts.

Keep the exact garment consistent in every shot.

Maintain real-world scale.

Do not alter color, print, fabric, proportions or details.

Do not generate visible children or babies.

Blur the entire child/baby representation if it appears on any printed material.

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered garment, changed print, changed color, wrong scale, stiff fabric, fake folds, floating garment, two hands, extra fingers, deformed hand, visible child, visible baby, visible toddler, visible teenager, visible minor, child photo not fully blurred, baby photo not fully blurred, child packaging not fully blurred, baby packaging not fully blurred, CGI, 3D render, AI artifacts, poor bedroom, unfinished construction, dirty cement floor, broken wall, improvised room, poverty look, blurry garment, soft image, oversaturated colors, watermark

Copiar prompt de imagem – Hyper-realistic POV style jewelry photography, first-person point of view.

Looking down at a soft, fluffy plush fabric surface in a beautiful and elegant setting. The exact jewelry kit from the reference image is carefully placed on the fluffy cloth, centered in the frame.

Soft, luxurious lighting with gentle highlights reflecting on the stones and metal. The background is dreamy and refined, with subtle elegant elements that enhance the scene without distracting from the jewelry. Shallow depth of field, premium and romantic atmosphere.

PRODUCT LOCK (absolute rules):

- Use the exact jewelry kit from the reference image with 100% fidelity.
- Do not change shape, size, proportions, colors, materials, stones, metal finish, arrangement, earrings or any visible detail.
- Do not redesign, stylize, improve or reinterpret the jewelry in any way.
- The product must remain perfectly identical and clearly identifiable.

Style: ultra-photorealistic, luxurious, soft and elegant, high-end jewelry campaign, delicate natural lighting, creamy tones, 8k quality, intimate POV shot on fluffy fabric.

Copiar prompt de vídeo sem fala — **macro cinematic shots of a diamond necklace with true material realism**

cuts:

- **extreme close-up of stones with irregular sparkle**
- **chain sliding naturally over fabric**
- **single hand touching chain lightly**

focus on:

light refraction variation

metal micro scratches

non-uniform reflections

lighting: directional natural light, dynamic highlights

style: high-end jewelry commercial, real optics behavior

background sounds: subtle metal friction

music: minimal piano

Movimento Natural

Copiar prompt de vídeo - **Movimentos exatos em sequência de 10 segundos, filmagem estilo TikTok segurando celular:**

0-1s: close rosto, sorriso leve, inclina cabeça direita, piscada lenta, gesto rápido com mão direita.

1-2s: zoom out, sorriso largo, joga cabelo para trás com mão direita.

2-3s: mão na cintura, balanço leve de quadril, sorriso confiante.

3-4s: olha para baixo, ajusta peça com duas mãos na barra.

4-5s: volta olhar para câmera, passa mão no cabelo, mão na cintura.

5-6s: duas mãos ajustando laterais da peça na cintura, balanço corpo.

6-7s: olha para baixo, ajusta barra novamente.

7-8s: vira completamente de costas, fica 1s.

8-9s: vira de frente, ajusta peça.

9-10s: meche no cabelo e manda beijo

Copiar prompt de imagem – Hyper-realistic premium beauty product photography in pure POV style, first-person point of view.

Exact same composition, framing, camera angle and perspective as the reference image:

POV shot looking down at a realistic female hand with long elegant nude manicured nails and a delicate thin gold bracelet, holding the product naturally as if it is the viewer's own hand. The hand enters from the bottom left of the frame. The product is held in the lower-center, slightly tilted, with natural grip, correct anatomy, realistic scale and proportions.

Background: clean white marble surface with subtle light gray veining. Soft natural sunlight coming from the upper right, creating sharp yet soft shadows and bright highlights on the hand and product. Minimalist, sophisticated, modern aesthetic.

PRODUCT LOCK (absolute rules):

- Use the exact product provided in the reference image with 100% fidelity.
- Do not change shape, size, proportions, materials, finish, colors, lid, packaging, labels, logos, text, typography or any visible detail.
- Do not invent, remove, add or reinterpret any element of the product.
- Do not replace the product with a similar one.
- The product must remain clearly identifiable and photorealistic.

The product is the sole hero of the image. Perfect product-hand interaction, realistic lighting, accurate shadows, natural skin texture and cinematic shallow depth of field.

Style: ultra-photorealistic, clean, premium beauty advertising, high-end campaign look, professional natural lighting, soft contrast, high detail, 8k quality, authentic POV hand-held product shot.

Copiar prompt de vídeo sem fala — **Hyper-realistic premium beauty product video in pure POV style, first-person point of view.**

Start with the exact same composition as the reference: looking down at a realistic female hand with long elegant nude manicured nails and a delicate thin gold bracelet, holding the product against a clean white marble surface with subtle gray veining. Soft natural sunlight from the upper right creating soft shadows and highlights.

Camera slowly moves closer, showing detailed close-ups of the product packaging, texture, label and finish while the hand gently rotates it.

The same hand carefully twists and opens the white cap with natural, elegant finger movements. Then the hand tilts the product and dispenses a small amount of the product onto the palm or fingertips of the other hand (also with matching nude manicure).

Slow, smooth, cinematic motion. Soft focus transitions, shallow depth of field, luxurious and intimate feel.

PRODUCT LOCK (absolute rules):

- Use the exact product from the reference image with 100% fidelity.
- Do not change shape, size, proportions, materials, colors, lid, packaging, labels, logos, text or any detail.
- Do not invent or alter the product in any way.

Style: ultra-photorealistic, clean high-end beauty campaign, professional natural lighting, soft contrast, 4K quality, elegant slow-motion product demonstration in authentic POV.

Movimento | Virando de lado

Copiar prompt de vídeo – **Ultra-realistic vertical smartphone video, 9:16 aspect ratio, authentic smartphone men's fashion UGC. The male influencer looks directly into the camera with a confident and approachable expression, then naturally rotates his body about 45 degrees to one side in a smooth, relaxed motion, subtly showcasing the side fit and silhouette of the outfit. He briefly glances toward the side before returning his gaze to the camera while maintaining a soft closed-mouth smile. Relaxed masculine posture, natural weight shift, realistic fabric movement, cinematic daylight, premium men's fashion aesthetic, ultra-realistic human motion, no talking, no lip movement, no exaggerated acting.**

– UNIVERSAL VIDEO PROMPT — CHILDREN PRODUCT ON STORE SHELF / MAX FIDELITY / REAL SCALE / BRAZILIAN PHOTOREALISM

Use the attached children's product image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT product naturally placed on a shelf or display area inside a real Brazilian children's store.

The product must remain visually identical to the reference during the entire video: same type, shape, size, proportions, color, packaging structure, material finish, label placement, edges, seams, thickness and visible details.

CHILD / BABY FULL PRIVACY BLUR RULE:

No real child, baby, toddler, infant, teenager or underage person may appear clearly anywhere in the video.

Do not generate visible minors in the store, aisle, background, posters, frames, mirrors, shelves, displays, packaging or any visible area.

If any child or baby appears on the product packaging or background store materials, completely blur or privacy-mask the entire child/baby representation in every frame.

Blur face, body, hands, skin, silhouette and human-like minor representation.

Do not blur the whole product. Keep product structure, colors, packaging and non-child design elements sharp and faithful.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO SHELF SHOT:

Show the exact product placed naturally on a shelf or display. The product is the hero, clearly visible, correctly scaled and physically supported.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of packaging texture, label placement, edge, seam, material finish, cap, lid, box corner, plastic surface or printed detail.

3s–4.5s — RETAIL CONTEXT SHOT:

Cut to a slow natural camera movement across the shelf or display area, keeping the exact product in focus. The environment confirms a real Brazilian children's store without competing with the product.

4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another detail angle showing surface texture, packaging volume, shelf contact, side profile, product thickness or tactile material quality.

6s–8s — FINAL HERO SHOT:

Return to a clean final product shot on the shelf, stable, sharp, realistic and commercially clear.

SCENE:

Real Brazilian middle-class children's product store or infant retail environment. Organized shelves, soft playful neutral decor, clean retail lighting, wood, white, beige, pastel or warm store details. No visible children or babies.

CAMERA:

Vertical 9:16, iPhone 15 Pro Max rear camera look, natural smartphone perspective, smooth handheld or stabilized movement, sharp product focus, realistic store depth.

LIGHTING:

Soft retail lighting, balanced exposure, realistic shadows and natural highlights on packaging, plastic, paper, fabric, shelves and display surfaces.

AUDIO:

No dialogue. No voiceover. Subtle store ambience and soft shelf/product handling sounds if applicable.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not alter product design, packaging, label placement, color or material.
Do not generate visible children or babies.
Blur the entire child/baby representation if it appears on packaging or printed material.

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, wrong product design, altered product, changed proportions, wrong scale, floating product, fake shelf, cluttered shelf, product morphing, blurry product, CGI, 3D render, AI artifacts, poor store, empty studio, fake showroom, visible child, visible baby, visible toddler, visible teenager, visible minor, readable child face, readable baby face, visible child body, visible baby body, child on packaging not fully blurred, baby on packaging not fully blurred, child poster not fully blurred, baby poster not fully blurred, text overlays, watermark

Copiar prompt de vídeo sem fala

Subject:

A bed sheet set being carefully placed on a bed and presented in a first-person POV. The bed sheet set is the main focus, showing the fabric, folds, texture, and finishing details in a clear and attractive way.

Background:

A real, clean, cozy bedroom with a neatly arranged bed, soft neutral tones, functional decor, and a warm, inviting atmosphere. The environment should feel natural, lived-in, and elegant, with the background slightly blurred to keep focus on the bed sheet set.

Action:

First-person POV video. Two realistic hands gently place the bed sheet set on top of the bed in a natural and human way. After placing it, the camera performs a slow smooth zoom toward the fabric, capturing close-up details of the material, stitching, edges, folds, and finishing. The movement should feel soft, calm, realistic, and visually satisfying, as if someone is carefully presenting the quality of the bedding.

Style:

Ultra-photorealistic vertical video, authentic POV, realistic human movement, soft handheld stability, cozy home aesthetic, natural fabric behavior, shallow depth of field, premium but real product presentation, organic TikTok style, clean and elegant bedroom realism.

Dialogue:

No dialogue. No voiceover. No talking.

Background sounds:

Soft fabric sounds, subtle bedding movement, light room ambience, delicate ASMR-like textile handling.

Music:

Soft minimal ambient music, cozy and elegant, low volume, relaxing and clean.

Technical parameters:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

Negative prompt:

blurry fabric, distorted bedding, messy bed, extra hands, deformed fingers, unrealistic movement, harsh lighting, CGI, cartoon, 3D render, low quality, oversaturated colors, shaky camera, fake fabric texture, warped stitching, cluttered room, robotic motion, bad anatomy, floating sheets

Copiar prompt de vídeo sem fala - **POV VIDEO PROMPT — BED SHEET SET UNBOXING / PACKAGE ALWAYS VISIBLE / MAX FIDELITY / ULTRAREALISM**

Use the attached reference image as the absolute visual reference for the bed sheet set and the package. Reproduce the scene with maximum realism and consistency.

Subject:

A folded bed sheet set is being removed from an opened black shipping package by two realistic human hands in a first-person POV. The sheet set is the hero of the scene, but the black package must remain visible in the frame the entire time, staying in the background or second plane after the product is lifted.

Background:

A real indoor home environment, clean and functional, with a wooden table near a bright window. Soft natural daylight. Cozy, believable, middle-class home aesthetic. Background softly blurred and secondary.

Action:

First-person POV video. Two realistic hands open the black package naturally and gently pull the folded bed sheet set out of it. The movement must be human, soft, careful, and believable. As the person lifts the folded sheet set with both hands, the black package must NEVER disappear from the scene. It must remain visible on the table in the background or lower part of the frame during the whole action, acting as a secondary visual element. The hands present the folded bed sheet set to the camera, showing the fabric, folds, print, and finish in a natural way.

Important scene rule:

The package stays in frame at all times. It may move slightly or shift into the background, but it cannot vanish, be cut out, or leave the scene completely.

Style:

Ultra-photorealistic vertical video, authentic smartphone POV, natural handheld realism, realistic human movement, soft fabric physics, clean daylight, subtle depth of field, cozy home aesthetic, organic social media realism, product-focused but not artificial, natural Brazilian household feel.

Fidelity rules:

- Preserve the exact visual identity of the attached bed sheet set
- Preserve the folded presentation style
- Preserve the black package as the packaging reference
- Maintain believable scale between hands, package, and sheet set
- Keep the package visible throughout the whole clip
- Keep the product consistent in every frame

Composition:

- vertical 9:16
- POV / first-person perspective
- two hands visible
- no face
- no full body
- product centered as it is lifted
- package visible behind or below the product in second plane
- clear view of the folded bed sheet set
- soft natural framing like a real TikTok unboxing clip

Dialogue:

No dialogue. No voiceover. No talking.

Background sounds:

Soft plastic package handling sounds, light fabric movement, subtle room ambience.

Music:

Optional soft minimal ambient music, very low volume, cozy and elegant.

Technical parameters:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

Anti-bug / negative prompt:

package disappearing, package out of frame, package vanishing, one hand only, extra hands, extra fingers, deformed fingers, broken wrists, unrealistic grip, floating sheet set, altered bedding print, changed fabric color, distorted folds, inconsistent product, messy background, blurry product, shaky camera, robotic

link imagem -

Copiar prompt de imagem

Create an ultra-photorealistic vertical POV image (9:16) using the attached reference image as the exact child clothing source.

IMPORTANT NATURALITY RULE:

The garment must lie naturally on the counter or be naturally arranged on the counter surface.

The hand must only lightly touch, adjust, or support the garment in a subtle natural way.

Do not create symmetrical presentation.

Allow realistic folds, gravity, and textile behavior.

No real child, baby, toddler, infant, teenager, or underage person may appear anywhere in the image.

If any tag, packaging, poster, or background object contains a baby or child image, blur or softly obscure only that child/baby representation.

Scene: a real Brazilian children's clothing store counter area. The clothing item is placed naturally on top of the store counter, presented neatly and clearly as the hero product. The counter area must feel authentic, clean, charming, and commercially appealing.

STORE ENVIRONMENT STYLE:

- real Brazilian infant / kids clothing shop
- tasteful counter area
- soft playful neutral decor
- subtle shelves, folded clothing, hangers, packaging, or store elements in the background
- comfortable middle-class retail atmosphere
- clean and visually pleasant
- no visible minors
- no poor shop
- no fake studio
- no foreign catalog look

HUMAN REALISM RULE:

The final image must look like a real high-definition photograph with natural tactile realism.

If a hand appears, it must be an adult feminine hand with realistic skin texture, pores, nails, joints, and believable positioning.

The fabric must look real, with visible fibers, realistic folds, thickness, and softness.

No stiff fabric. No melted cloth. No pasted clothing look.

Composition:

- POV shot facing the counter
- product is the hero
- one visible adult feminine hand only if needed
- enough store context to confirm environment
- no rigid display symmetry
- no clutter competing with the garment

Camera:

- iPhone 15 Pro Max realism
- natural smartphone perspective
- vertical 9:16
- sharp product focus
- realistic depth
- no excessive blur
- no fake softness

Lighting:

- realistic retail lighting
- soft and balanced
- natural highlights on fabric and counter
- realistic shadows
- no harsh flash

Negative prompt:

rigid arrangement, flattened unnatural garment, symmetrical styling, altered clothing, stiff fabric, floating garment, extra fingers, child hands, baby hands, visible child, visible baby, visible minor, child poster without blur, baby poster without blur, child packaging without blur, baby packaging without blur, blurry product, soft image, CGI, AI artifacts, poor store, empty studio, cluttered environment, watermark

Copiar prompt de vídeo sem fala

— ****UNIVERSAL VIDEO PROMPT — POV KIDS STORE COUNTER / CHILD CLOTHING ON COUNTER / ABSOLUTE PRODUCT FIDELITY / BRAZILIAN PHOTOREALISM****

Use the attached child clothing image as the ****ABSOLUTE AND UNCHANGEABLE VISUAL REFERENCE****.

Create an ultra-photorealistic vertical POV video (9:16) showing the ****EXACT SAME CLOTHING ITEM** from the reference image**, physically placed on a counter inside a real Brazilian children's clothing store.

ABSOLUTE GARMENT FIDELITY — HIGHEST PRIORITY

****DO NOT** redesign, reinterpret, recreate, improve, simplify, stylize or modify the garment in any way.******

The attached reference image defines the exact product identity.

The garment must remain ****100% visually consistent with the reference image in every frame and every camera angle.****

Preserve EXACTLY:

- * garment type
- * garment construction
- * shape
- * silhouette
- * proportions
- * dimensions
- * length
- * width
- * sleeves
- * sleeve length
- * collar
- * neckline
- * cuffs
- * hem
- * seams
- * stitching
- * embroidery
- * buttons
- * zippers
- * pockets
- * labels
- * tags

- * decorative elements
- * prints
- * graphics
- * patterns
- * text printed on the garment
- * logos
- * color
- * color distribution
- * fabric
- * fabric texture
- * weave
- * material thickness
- * finishing
- * folds
- * edges
- * visual identity

****Every small detail visible in the reference must remain unchanged.****

Do not invent details that are not present in the reference.

Do not remove details that are present in the reference.

Do not add buttons, pockets, seams, prints, logos, labels, embroidery or decorative elements.

Do not change the position, size or shape of any existing detail.

Do not change the print layout.

Do not change the color temperature of the garment.

Do not make the garment look like a similar product.

****It must look like the exact same physical piece photographed from different camera angles.****

PRODUCT IMAGE LOCK

Treat the attached image as a **product identity lock.**

The camera may change position, distance and angle, but the product itself must NOT be regenerated differently between shots.

The garment must remain consistent across all cuts.

No product morphing.

No texture replacement.

No pattern regeneration.

No detail hallucination.

No design variation.

No color variation.

No shape variation.

No proportion variation.

If a detail is partially hidden by a fold or camera angle, **do not invent or reconstruct a different version of that detail.**

PHYSICAL PLACEMENT

The garment must remain **physically placed directly on the store counter throughout the video.**

It must obey real-world gravity.

The counter supports the garment.

The garment must have realistic contact with the counter surface and natural contact shadows.

No floating.

No hovering.

No levitation.

No suspended clothing.

The garment must not move by itself.

HAND INTERACTION

If a hand appears, use **only one adult feminine hand.**

The hand may gently touch or make a very subtle adjustment to the fabric.

The hand must NOT:

- * lift the garment**
- * fold the garment**
- * turn the garment over**
- * stretch the garment**
- * pull the garment**
- * cover important details**
- * change the garment's shape**
- * hide the print**
- * distort the fabric**
- * move the garment to another position**

The hand should only make a **minimal natural contact with the fabric****, preserving the original appearance of the product.**

CHILD / BABY FULL PRIVACY BLUR RULE

No real child, baby, toddler, infant, teenager or underage person may appear clearly anywhere in the video.

Do not generate visible minors in the store, background, mirror, display, poster, frame, packaging, decoration or any visible area.

If any child or baby appears on tags, packaging, posters, frames, display cards or printed material, completely blur or privacy-mask the entire child/baby representation in every frame.

****Never blur, distort or alter the clothing itself.****

The garment must remain sharp, clear and fully faithful to the reference.

VIDEO STRUCTURE

0s–1.5s — HERO COUNTER SHOT

Show the **exact garment from the reference image**** physically resting on the store counter.**

Keep the entire garment visible whenever possible.

Stable camera.

Sharp product focus.

Realistic scale.

No modification to the garment.

1.5s–3s — B-ROLL DETAIL SHOT 1

Cut to a close-up of an existing garment detail.

Show the actual fabric texture, print, collar, sleeve, stitching, seam, label area, hem or other visible detail *exactly as it appears in the reference***.**

*****Do not generate new details.*****

3s–4.5s — MINIMAL HAND CONTACT

One adult feminine hand gently touches a small area of the garment.

The garment remains on the counter.

The hand does not lift, stretch, fold, rotate or reposition the garment.

The original shape and details remain intact.

4.5s–6s — B-ROLL DETAIL SHOT 2

Cut to another close-up angle.

Show existing details only.

Maintain exact:

- * print**
- * texture**
- * stitching**
- * colors**
- * seams**
- * proportions**
- * material**
- * construction**

No detail may change between shots.

6s–8s — FINAL HERO SHOT

Return to a clean final POV shot of the *same exact garment*** on the counter.**

Stable.

Sharp.

Correctly scaled.

Commercially clear.

No product transformation.

SCENE

Real Brazilian middle-class children's clothing store.

Clean, charming, organized and tasteful.

Soft playful neutral decor.

Subtle shelves, folded clothes and hangers in the background.

Realistic retail environment.

No visible children or babies.

The background must remain secondary to the product.

CAMERA

Vertical 9:16.

iPhone 15 Pro Max rear camera look.

Natural smartphone POV.

Realistic handheld micro-movement.

Sharp garment focus.

Realistic store depth.

No excessive blur.

No artificial product-render appearance.

Camera movement only.

****Never use camera movement as an excuse to change or regenerate the garment.****

LIGHTING

Realistic retail lighting.

Soft and balanced.

Natural highlights on fabric and counter.

Preserve the **true original garment colors from the reference image.**

Do not recolor the garment.

Do not increase saturation.

Do not change the print contrast.

No harsh flash.

AUDIO

No dialogue.

No voiceover.

Subtle store ambience.

Very soft fabric movement.

Light natural hand-contact sounds.

TECHNICAL PARAMETERS

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

STRICT PRIORITY ORDER

- 1. **Exact garment fidelity****
- 2. **Preservation of every original garment detail****
- 3. **Correct physical placement on the counter****

4. ****Realistic camera movement****
5. ****Photorealistic store environment****

If there is any conflict between cinematic creativity and garment fidelity,
****ALWAYS prioritize garment fidelity.****

****The product must never be changed for cinematic purposes.****

ANTI-CRASH / NEGATIVE PROMPT

altered garment, redesigned garment, recreated garment, modified garment, different garment, similar garment, replacement clothing, product morphing, product transformation, changing garment, changing design, changing print, changing pattern, changing color, changing fabric, changing texture, changing proportions, changing silhouette, changing sleeves, changing collar, changing hem, changing seams, changing stitching, changing buttons, changing pockets, changing zipper, changing label, changing logo, invented details, missing details, extra details, hallucinated details, regenerated print, regenerated texture, distorted print, warped logo, fake stitching, fake fabric, incorrect garment construction, inconsistent garment between shots, garment variation between frames, floating garment, hovering garment, levitating garment, suspended garment, garment moving by itself, garment flying, garment folding by itself, garment rotating by itself, garment lifted from counter, two hands, extra fingers, deformed hand, hand covering product details, hand changing garment shape, hand stretching garment, visible child, visible baby, visible toddler, visible teenager, visible minor, child face, baby face, child on packaging not fully blurred, baby on packaging not fully blurred, child poster not fully blurred, baby poster not fully blurred, CGI, 3D render, artificial product render, AI artifacts, fake showroom, unrealistic store, cluttered counter, harsh flash, blurry garment, soft product details, oversaturated colors, text overlays, watermark

Copiar prompt de imagem - ultra realistic image of a woman naturally showcasing rings on her fingers, relaxed pose, hands positioned near face or body

natural skin texture, visible pores, slight imperfections, no heavy makeup

rings clearly visible on fingers, realistic scale, natural reflections, subtle material variation

environment: home interior, adaptable (bedroom, closet or dressing space), neutral tones, slightly lived-in

lighting: natural window light, soft shadows, realistic highlights

camera: 85mm lens, shallow depth of field

style: natural lifestyle photography, not studio, not overproduced

negative: plastic skin, perfect face, CGI look, exaggerated glow, oversized rings

Copiar prompt de vídeo sem fala - front camera shot of a woman in a home environment, holding her hand with rings in the foreground

the rings must remain EXACTLY the same design, shape, texture and material in every frame, no variation allowed

the ring is a single consistent object with stable identity, no changes in stone size, metal color, structure or detailing

the hand remains at a stable distance from the camera, maintaining consistent proportions between fingers and rings

action: minimal natural finger movement only, no rotation that hides or distorts the ring design

focus is locked on the rings, shallow depth of field, face softly blurred in background

lighting: soft natural window light, consistent reflections across frames

camera: no zoom, no perspective shift, minimal handheld movement

environment: softly blurred home interior

background sounds: subtle indoor ambient

music: minimal soft instrumental

Copiar prompt de vídeo sem fala – UNIVERSAL UGC VIDEO PROMPT — PRODUCT IN HAND / NEVER RELEASE

Create an ultra-photorealistic vertical UGC video of a female influencer holding the exact product from the attached reference image in one hand while speaking in Brazilian Portuguese. Preserve the product with maximum fidelity: same packaging, label, colors, logo placement, shape, cap, material, proportions, and all visible details.

The influencer holds the product naturally close to the camera and NEVER releases it during the entire video. The product must stay visible, stable, correctly scaled to the hand, and consistently the same in every frame. Natural human movement, authentic UGC style, realistic skin texture, correct hand anatomy, casual home or lifestyle environment, soft natural lighting, vertical 9:16, smartphone realism.

Anti-crash / negative prompt: product disappearing, product leaving frame, product passing through hand, floating product, hand clipping through product, altered packaging, changed label, fake logo, distorted text, product morphing, wrong scale, extra fingers, deformed hand, multiple hands, robotic movement, blurry product, CGI, cartoon, low quality, harsh lighting.

Technical parameters: model: veo-3, length: 8 seconds, resolution: 1080x1920, framerate: 24fps, aspect_ratio: 9:16.

DIÁLOGO EM PORTUGUES DO BRASIL: [ESCREVA A FALA DA SUA INFLUENCER AQUI]

POV | Roupas na caixa

Copiar prompt de imagem - Photorealistic vertical image reproducing the same composition as the reference photo: a person unboxing a folded T-shirt from a cardboard shipping box on a wooden table. The scene shows both clean hands holding the shirt carefully above the open box, with white tissue paper inside the packaging.

Use the attached shirt as the exact garment reference. The shirt being held must faithfully preserve the uploaded design, including exact color, print, artwork placement, fabric texture, collar shape, proportions, folds, and overall appearance, without changing or redesigning it.

Composition: close-up top-down angle, natural hands holding the folded shirt by the sides, shirt centered as the main focus, open cardboard box beneath it, white wrapping paper around the garment, realistic e-commerce unboxing moment. The person's hands and forearms are visible but must be clean, natural, and completely without tattoos, markings, accessories, bracelets, watches, or rings.

Background: wooden table near a bright window, soft natural daylight, cozy realistic indoor environment, subtle depth of field, clean premium packaging aesthetic.

Style: ultra-realistic commercial product photography, high-detail fabric texture, natural folds, realistic shadows, soft daylight, professional fashion unboxing scene, vertical 9:16 composition, high resolution.

Negative prompt: tattoos, tattooed hands, tattooed arms, markings on skin, accessories, rings, bracelets, watch, altered shirt design, changed colors, distorted print, blurry image, low quality, cartoon, illustration, CGI, extra fingers, deformed hands, messy packaging, dirty box, unrealistic fabric, cropped shirt, duplicated limbs

Copiar prompt de vídeo sem fala - Subject:

A clothing item being taken out of an open box by two realistic hands and presented to the camera. The clothing piece is the hero of the scene and must be clearly visible once lifted from the box.

Background:

A real, functional indoor environment, such as a clean bedroom, dressing area, or table setup in a natural home setting. The box is placed on a table or flat surface. The background is softly blurred, realistic, and secondary, with a warm, natural everyday atmosphere.

Action:

First-person POV video. The camera looks down at an open box on a table. Two human hands naturally open the tissue paper, gently grab the clothing item from inside the box, lift it in a smooth realistic motion, and present it directly to the camera. The movement must feel human, organic, and believable, like a real unboxing moment recorded on a smartphone. The clothing should be raised and centered in front of the camera, with subtle pauses to show the fabric and shape.

Style:

Ultra-photorealistic, authentic handheld POV, realistic human movement, natural fabric physics, soft depth of field, iPhone-style realism, social media product content, functional Brazilian middle-class environment, organic unboxing aesthetic, clean but lived-in setting. No studio look, no fake commercial gloss, no exaggerated cinematic effects.

Dialogue:

No dialogue. No voiceover. No talking.

Background sounds:

Soft tissue paper sounds, subtle box handling sounds, gentle fabric movement, light room ambience.

Music:

Soft minimal aesthetic background music, subtle and modern, low volume, elegant and natural.

Technical parameters:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

Negative prompt:

blurry video, distorted hands, extra fingers, extra hands, deformed arms, unrealistic grip, floating clothing, stiff motion, robotic movement, fake fabric, altered clothing shape, messy scene, overacted movement, visible face, visible full body, studio background, CGI, cartoon, 3D render, harsh lighting, unreadable product, low quality, shaky camera, duplicated objects

POV | Sem Manicure

Copiar prompt de imagem

Shiny black glossy headless mannequin viewed from the back, standing in a modern clothing store, wearing a t-shirt with the exact design from the reference image. The t-shirt fits naturally on the mannequin. A realistic human hand is gently adjusting the t-shirt on the right shoulder. Warm ambient lighting, wooden panels and shelves in the background, soft reflections on the glossy mannequin body, high detail, photorealistic, product photography style, 8k --ar 9:16

Copiar prompt de vídeo sem fala

Cinematic product video of a shiny black glossy headless mannequin viewed strictly from the back, wearing a t-shirt with the exact design from the reference image. The camera remains completely still and fixed on the back angle, no movement and no angle change. Only one single realistic human hand slowly slides across the back of the t-shirt and gently pulls the fabric on the sides to show the fit and print details. Strictly only one hand in the entire scene, no second hand, no crossed hands, no extra hands. Soft natural fabric movement. Warm ambient lighting in a modern clothing store with wooden panels, elegant and premium atmosphere, photorealistic, high detail, 4k --ar 9:16

MOBILIÁRIO COZINHA IMAGEM — PROMPT UNIVERSAL / MAX FIDELITY / ESCALA REAL / FOTOREALISMO BRASILEIRO

Create an ultra-photorealistic vertical image (9:16) of the EXACT kitchen furniture product from the attached reference image, placed inside a real Brazilian kitchen environment. The furniture must preserve maximum fidelity to the reference and appear in correct real-world size, proportion, angle and tactile physical presence.

ABSOLUTE PRIORITY:

Use the attached furniture image as the single source of truth.

Do not redesign, reinterpret, beautify, simplify, replace or alter the product in any way.

PRESERVE EXACTLY:

- exact furniture type
- exact structure and geometry
- exact dimensions and proportions
- exact color
- exact MDF / wood / lacquer / glass / metal / stone finish
- exact handles
- exact doors, drawers, cabinets, shelves, niches, countertop, legs, panels or modules
- exact edges, thickness, seams, joints and construction details
- exact material texture
- exact visible design details

CRITICAL REAL SCALE RULE:

The product must appear in realistic full size inside the kitchen.

It must respect real-world kitchen proportions.

Do not make the furniture miniature.

Do not make the furniture oversized.

The AI must understand the object as real functional kitchen furniture with physical volume, believable dimensions and correct relation to stove, sink, fridge, countertop, wall, floor and appliances.

Examples:

- kitchen cabinet must align naturally to wall and countertop height
- pantry cabinet must have realistic height relative to ceiling
- countertop must have believable working height
- kitchen island must fit with real walking space around it
- wall cabinets must be installed at practical height
- table or bench must match chair and room scale

SCENE:

Place the furniture in a real medium-standard Brazilian kitchen.

The kitchen must feel authentic, functional, organized, clean and believable.

BRAZILIAN KITCHEN STYLE:

- real Brazilian middle-class apartment or house kitchen

- ceramic, porcelain or simple tiled floor
- neutral wall tiles or painted wall
- sink, stove, fridge, microwave, utensils or appliances may appear subtly if appropriate
- clean but lived-in
- practical organization
- no luxury showroom
- no empty studio
- no unrealistic mansion kitchen

AUTO-CONTEXT PLACEMENT:

Place the furniture naturally according to its function:

- cabinet installed above or below countertop
- pantry cabinet against a wall
- countertop aligned with sink or stove area
- kitchen island centered only if the room size allows
- table positioned naturally in dining/kitchen area
- shelves and niches placed logically on the wall

COMPOSITION:

The furniture is the hero of the image.

Show it clearly and fully when possible.

Use enough kitchen context to confirm real scale.

Natural iPhone framing, realistic perspective, no forced dramatic angle, no extreme close-up, no fake catalog render.

CAMERA STYLE:

iPhone 15 Pro Max rear camera look, 24mm to 26mm realistic wide-angle feel, natural smartphone perspective, sharp realistic detail, no excessive blur, no artificial softness, no CGI look, no AI look.

LIGHTING:

Real natural daylight from a window or soft practical kitchen lighting, balanced exposure, realistic shadows, realistic reflections on MDF, glass, metal, countertop, tile, sink or appliances.

No harsh flash, no overexposed window, no artificial studio lighting.

TEXTURE AND MATERIAL REALISM:

Show tactile real material:

wood grain, MDF finish, lacquer finish, stone countertop, metal handles, glass doors, ceramic tiles, drawer lines, cabinet joints, panel divisions and realistic edges.

QUALITY:

Ultra photorealistic, Brazilian home realism, sharp microtexture, natural details, functional real kitchen, no blur on the product, no overprocessing.

STRICT RULES:

Keep the exact furniture identity from the reference.

Do not change design, color, proportions, handles, cabinet modules, doors, drawers, shelves, countertop or materials.

Do not invent missing parts.

Do not crop important parts.

Keep the furniture physically believable inside the kitchen.

NEGATIVE PROMPT:

wrong furniture design, altered product, changed proportions, wrong scale, miniature furniture, giant cabinet, distorted geometry, fake wood texture, plastic texture, CGI, 3D render, cartoon, illustration, AI artifacts, unrealistic kitchen, luxury showroom, mansion kitchen, empty studio, overexposed window, harsh flash, blurry furniture, soft image, smoothed details, warped drawers, warped doors, bent panels, fake reflections, inconsistent shadows, floating furniture, impossible perspective, cluttered kitchen, dirty kitchen, low quality, oversaturated colors, missing parts, extra parts

Copiar prompt de vídeo sem fala - MOBILIÁRIO COZINHA VÍDEO — PROMPT UNIVERSAL / FUNCIONALIDADE + B-ROLL / MAX FIDELITY / REALISMO BRASILEIRO

Use the attached kitchen furniture image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT kitchen furniture inside a real Brazilian kitchen, highlighting its functionality, scale, material and tactile details through mandatory B-roll cuts.

The furniture must remain visually identical to the reference during the entire video: same shape, same color, same dimensions, same handles, same doors, same drawers, same cabinets, same countertop, same shelves, same panels, same material and same proportions. Do not redesign, replace, morph or alter the product.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO SHOT:

Show the exact kitchen furniture installed naturally in a real Brazilian kitchen. The product is sharp, correctly scaled and clearly visible.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of material and finish: handle, drawer line, cabinet door edge, MDF texture, countertop surface, shelf, hinge, glass door, metal detail or panel joint.

3s–4.5s — FUNCTIONALITY SHOT:

Cut to the furniture being used naturally according to its function: drawer opening, cabinet door opening, pantry storage shown, shelf being accessed, countertop being used, utensils organized, or kitchen module demonstrated. Human interaction may appear only as realistic hands if necessary.

4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing texture, storage space, edge finish, handle alignment, countertop thickness, cabinet interior, drawer slide or realistic material quality.

6s–8s — FINAL HERO SHOT:

Return to a clean final shot of the furniture in the kitchen, stable, realistic and desirable, showing correct scale and functional placement.

SCENE:

Real Brazilian middle-class kitchen, clean, functional, organized and lived-in. Neutral tiles, practical flooring, sink, stove, fridge, utensils or appliances may appear naturally if appropriate. No luxury showroom, no mansion kitchen, no fake studio.

CAMERA:

Vertical 9:16, iPhone 15 Pro Max realism, 24mm to 26mm natural wide-angle feel, smooth handheld or stabilized movement, realistic depth of field, sharp product focus, no excessive blur, no robotic motion.

LIGHTING:

Natural daylight from kitchen window or soft practical kitchen lighting, balanced exposure, realistic shadows, accurate reflections on MDF, glass, metal, stone, tile and appliances. No harsh flash, no overexposed window, no fake studio glare.

AUDIO:

No dialogue. No voiceover. Natural kitchen room ambience only, subtle drawer, cabinet, handle, countertop or utensil sounds. Optional soft minimal music at low volume.

TECHNICAL PARAMETERS:

model: veo-3
length: 8 seconds
resolution: 1080x1920
framerate: 24fps
aspect_ratio: 9:16

STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not change color, geometry, handles, doors, drawers, shelves, cabinets, countertop, material or proportions.

Functional action must be physically realistic.

No product morphing.

No fake showroom.

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered furniture, changed design, wrong scale, giant cabinet, miniature cabinet, distorted geometry, warped drawers, warped doors, changing handles, product morphing, floating furniture, hands clipping through furniture, robotic motion, deformed hands, extra fingers, CGI, 3D render, cartoon, AI artifacts, fake kitchen, luxury showroom, mansion kitchen, harsh flash, blurry product, oversaturated colors, inconsistent lighting, impossible shadows, cluttered kitchen, dirty kitchen

Copiar prompt de imagem - UNIVERSAL IMAGE PROMPT — POV CHILDREN PRODUCT / NURSERY OR KIDS ROOM / MAX FIDELITY / REAL SCALE / BRAZILIAN PHOTOREALISM

Create an ultra-photorealistic vertical image (9:16) of the EXACT children's product from the attached reference image, presented inside a real Brazilian nursery or kids bedroom environment. The product must preserve maximum fidelity to the reference and appear in correct real-world size, proportion, angle, tactile presence, and physical realism.

ABSOLUTE PRIORITY:

Use the attached product image as the single source of truth.

Do not redesign, reinterpret, beautify, simplify, replace, or alter the product in any way.

PRESERVE EXACTLY:

- exact product type
- exact structure and geometry
- exact dimensions and proportions
- exact color
- exact packaging shape
- exact material finish
- exact label placement
- exact edges, seams, folds, thickness, and construction details

- exact visible design details
- exact visual identity

CRITICAL REAL SCALE RULE:

The product must appear in realistic full size inside the room.

It must respect real-world human scale and real nursery / kids bedroom proportions.

Do not make the product miniature.

Do not make the product oversized.

The AI must understand the object as a real functional product with physical volume, believable dimensions, and correct support.

Examples:

- diaper pack must look like a real diaper pack with believable thickness and volume
- baby care product must have believable packaging size
- toy must appear in correct real scale relative to furniture and room
- clothing pack must feel tangible and physically present
- the product must never look pasted, floating, or artificially enlarged

SCENE:

Place the product in a real comfortable Brazilian middle-class nursery or kids bedroom.

The room must feel authentic, functional, organized, beautiful, cozy, and believable.

BRAZILIAN NURSERY / KIDS ROOM STYLE:

- real Brazilian middle-class apartment or house
- comfortable and well-kept room
- neutral and cozy tones
- soft wood furniture
- crib, bed, shelves, baskets, rug, curtains, books, plush toys, and subtle decor may appear naturally
- clean but lived-in
- no poverty look
- no unfinished construction
- no dirty cement floor
- no broken walls
- no improvised room
- no abandoned room
- no luxury mansion
- no foreign showroom
- no empty studio

CHILD SAFETY / VISIBILITY RULE:

Do not show any real baby, child, toddler, teenager, or underage person anywhere in the image.

No real minors in the room, background, mirror, poster, frame, decoration, or scene.

If the product packaging contains any baby or child image, preserve the exact product identity but softly blur or obscure only the baby/child image on the packaging.

Do not blur the rest of the product.

Keep the packaging structure, colors, and product details sharp and faithful.

AUTO-CONTEXT PLACEMENT:

The AI must choose the most natural product presentation according to the product type:

- if the product is realistically handheld, show only one adult feminine hand holding or supporting it naturally

- if the product is too large or bulky for a natural one-hand presentation, place it on a bed, dresser, shelf, changing table, or other logical surface, with one adult feminine hand only lightly touching or presenting it
- do not force two hands
- do not force a centered rigid pose
- do not stretch or flatten the product unnaturally
- do not create fake catalog symmetry
- the product must feel physically supported and naturally positioned

COMPOSITION:

The product is the hero of the image.

Show the product clearly and fully when possible.

Use enough room context to confirm real scale.

Natural iPhone framing, realistic perspective, no forced dramatic angle, no extreme close-up, no fake catalog render.

If a hand appears, only one adult feminine hand should be visible by default.

The framing must feel natural, human, and believable.

CAMERA STYLE:

iPhone 15 Pro Max rear camera look, 24mm to 26mm realistic wide-angle feel, natural smartphone perspective, sharp realistic detail, no excessive blur, no artificial softness, no CGI look, no AI look.

LIGHTING:

Real natural daylight from a window or soft practical room light, balanced exposure, soft believable shadows, realistic reflections on plastic, paper, fabric, wood, and packaging surfaces.

No harsh flash.

No overexposed window.

No artificial studio lighting.

TEXTURE AND MATERIAL REALISM:

Show tactile real material:

- realistic plastic packaging
- realistic paper label texture
- realistic folds and compression marks if applicable
- realistic fabric if the product includes textile elements
- realistic wood grain on furniture
- realistic rug and curtain texture
- realistic edges, contact shadows, and depth
- no fake plastic sheen
- no melted packaging
- no AI artifacts

QUALITY:

Ultra photorealistic, Brazilian home realism, sharp microtexture, natural details, functional real nursery / kids room, no blur on the product, no overprocessing, no beauty smoothing, no artificial softness.

STRICT RULES:

Keep the exact product identity from the reference.

Do not change design, color, proportions, packaging, label placement, materials, or details.

Do not invent missing parts.

Do not crop important parts.

Do not create rigid or unnatural hand presentation.

Do not show two hands unless explicitly necessary.
Do not show any real child or baby.
Keep the product physically believable inside the room.

NEGATIVE PROMPT:

wrong product design, altered product, changed proportions, wrong scale, miniature product, oversized product, distorted geometry, fake packaging texture, fake plastic texture, CGI, 3D render, cartoon, illustration, AI artifacts, unrealistic nursery, poor bedroom, unfinished construction, dirty cement floor, broken wall, improvised room, abandoned room, poverty look, luxury mansion, showroom, empty studio, overexposed window, harsh flash, blurry product, soft image, smoothed details, warped packaging, fake reflections, inconsistent shadows, floating product, impossible perspective, cluttered room, low quality, oversaturated colors, missing parts, extra parts, visible baby, visible child, visible minor, baby on packaging not blurred, child on packaging not blurred, two visible hands, rigid pose, symmetrical pose, unnatural product holding, product pasted into scene

Copiar prompt de vídeo sem fala – UNIVERSAL VIDEO PROMPT — POV CHILDREN PRODUCT / ONE HAND / NURSERY OR KIDS ROOM / MAX FIDELITY / REAL SCALE / BRAZILIAN PHOTOREALISM

Use the attached product image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT children's product inside a real Brazilian nursery or kids bedroom environment.

The product must remain visually identical to the reference during the entire video: same shape, same size, same color, same proportions, same packaging, same label placement, same material, same texture, same edges, same details and same visual identity. Do not redesign, replace, recolor, morph, simplify or alter the product.

CHILD / BABY FULL PRIVACY BLUR RULE:

No real child, baby, toddler, infant, teenager, or underage person may appear clearly anywhere in the video.

Do not generate visible minors in the room, background, mirror, poster, frame, shelf, packaging, book cover, screen, decoration or any visible area.

If any child or baby appears on the product packaging, label, poster, frame, book cover, display card, decoration or printed material, completely blur or privacy-mask the entire child/baby representation in every frame.

Blur the full figure, not only the face: face, body, hands, skin, silhouette and any human-like minor representation.

Do not blur the whole product. Keep the product shape, colors, packaging structure, label placement, materials, texture, proportions and non-child design elements sharp, realistic and faithful.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO POV SHOT:

Show the exact product naturally presented in a real Brazilian nursery or kids bedroom. If the product is realistically handheld, show only one adult feminine hand holding or supporting it naturally. If the

product is too large, place it on a bed, dresser, shelf or changing table with one adult feminine hand lightly touching it.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up showing product material, packaging texture, label placement, edge thickness, seams, folds, plastic, paper, fabric, surface detail or construction feature depending on the product type.

3s–4.5s — NATURAL HANDLING / PLACEMENT SHOT:

Cut to a realistic action: one adult feminine hand gently adjusts, places, supports, rotates or points to the product. Do not force two hands. Do not create rigid presentation. The product must remain physically supported and correctly scaled.

4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up angle showing a different product detail: texture, surface reflection, packaging corner, label area, material finish, fold, seam, cap, lid, edge, handle or tactile surface.

6s–8s — FINAL HERO SHOT:

Return to a clean final POV hero shot of the product in the kids bedroom. The product remains sharp, stable, proportional and physically believable.

SCENE:

Real comfortable Brazilian middle-class nursery or kids bedroom. Cozy, organized, beautiful, joyful and believable. Neutral tones, soft wood furniture, crib, bed, shelves, baskets, rug, curtains, books, plush toys and subtle decor may appear naturally, but no visible children or babies.

CAMERA:

Vertical 9:16, iPhone 15 Pro Max realism, natural smartphone POV, 24mm to 26mm wide-angle feel, realistic handheld micro-movement, sharp product focus, realistic room depth, no excessive blur, no CGI look.

LIGHTING:

Real natural daylight from a window or soft practical room light, balanced exposure, soft believable shadows, realistic highlights on plastic, paper, fabric, wood and packaging surfaces.

AUDIO:

No dialogue. No voiceover. Natural quiet room ambience only, subtle hand movement and product handling sounds. Optional soft minimal music at low volume.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not change product design, color, packaging, label placement, material, texture or proportions.

Do not show two hands unless explicitly necessary.

Do not generate visible children or babies.

Blur the entire child/baby representation if it appears on packaging or printed material.

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered product, changed product design, wrong scale, miniature product, oversized product, product morphing, warped packaging, fake texture, floating product, two visible hands, rigid pose, symmetrical pose, unnatural holding, deformed hands, extra fingers, child hands, baby hands, visible child, visible baby, visible toddler, visible teenager, visible minor, readable child face, readable baby face, visible child body, visible baby body, child on packaging not fully blurred, baby on packaging not fully blurred, child illustration not blurred, baby illustration not blurred, CGI, 3D render, AI artifacts, poor bedroom, unfinished construction, dirty cement floor, broken wall, improvised room, abandoned room, poverty look, blurry product, soft focus, oversaturated colors, watermark, text overlays

POV | Elasticidade Cropeed

Copiar prompt de vídeo- CENTER-FABRIC STRETCH — CRITICAL INSTRUCTION:

The stretch MUST happen through the CENTRAL BODY OF THE CROPPED, approximately around the middle section of the garment.

Do NOT stretch the bottom hem.

Do NOT stretch the top edge.

Do NOT pull the straps.

Do NOT pull the side seams.

Do NOT pull any decorative element.

Do NOT pull the starfish detail.

Do NOT pull buttons, zippers, trims or rigid areas.

The two feminine hands approach the LEFT and RIGHT sides of the CENTRAL FABRIC AREA of ONE cropped garment.

Each hand gently grips the fabric approximately at the middle of the garment, slightly inward from the side edges, using the thumb and fingertips.

The hands then slowly pull the CENTRAL BODY OF THE CROPPED outward in opposite directions, creating a clearly visible but moderate horizontal stretch across the middle of the garment.

The stretch must visibly travel through the central fabric area rather than only deforming the edges.

The center of the garment expands naturally under tension while the neckline, upper edge, bottom hem, seams and decorative details remain structurally stable.

The fabric must behave like real elastic textile:

- subtle horizontal expansion;
- natural tension lines radiating from the hands;
- realistic compression around the fingertips;
- slight opening of the textile fibers;
- natural resistance;
- no exaggerated deformation.

Hold the central fabric gently stretched for approximately 1 second.

Then release slowly.

The central fabric naturally contracts back to its original width and shape.

After release, the cropped must look EXACTLY as it did in the reference image.

IMPORTANT:

The hands must visibly grip the MIDDLE OF THE GARMENT BODY, not the hem, not the top edge and not the side seams.

The stretch should be clearly visible in the CENTER OF THE CROPPED.

Copiar prompt de vídeo sem fala - UNIVERSAL FOOTWEAR VIDEO PROMPT — FEET ONLY / HUMAN MOVEMENT / SOFT ZOOM / NO TALKING

Create an ultra-photorealistic vertical video focused only on a pair of feet wearing the EXACT footwear from the attached reference image, if provided. The footwear must preserve maximum fidelity, including exact shape, colors, materials, textures, sole design, laces, stitching, proportions, finish, branding placement, and all visible details.

Subject:

Only the feet wearing the footwear are visible. No face, no upper body, no full person, no hands. The video must focus entirely on the footwear on the feet.

Action:

The feet move in a natural, human, subtle, and realistic way. The person may gently shift weight, take a small step, lightly reposition the feet, turn them slightly inward or outward, or make soft controlled movements that help show the footwear from different angles. The motion must feel organic and believable, never robotic or exaggerated.

Camera movement:

The camera films only the footwear on the feet and performs a gentle smooth zoom toward the shoes during the clip. The zoom should feel subtle and premium, helping highlight the details, shape, materials, and overall look of the footwear. The framing may begin with both feet visible and slowly move closer to emphasize the design and finish.

Important framing rules:

- show only the feet and the footwear
- do not show face
- do not show torso
- do not show hands
- do not show full body
- keep the footwear as the absolute hero of the video
- keep the footwear clearly visible throughout the clip

Environment:

Use a realistic and appropriate environment that matches the style of the footwear:

- sneakers / streetwear shoes → clean urban floor, store floor, minimalist indoor setting, concrete or wood surface
- sandals / slippers → clean home floor, bedroom, natural indoor setting
- dress shoes / premium footwear → elegant indoor floor, clean showroom-style setting, refined but realistic environment
- sports shoes → gym floor, neutral training environment, clean and functional setting

The background must remain secondary, clean, believable, and softly blurred.

Style:

Ultra-photorealistic vertical video, premium product-focused footwear presentation, realistic human movement, subtle cinematic zoom, natural lighting or soft commercial lighting, realistic shadows, authentic material texture, fashion commercial realism, social-media-ready, elegant and clean.

Dialogue:

No dialogue.
No voiceover.
No talking.

Background sounds:
Soft ambient room tone or subtle environmental sound only.

Music:
Optional soft modern background music, subtle and elegant, low volume.

Technical parameters:
model: veo-3
length: 8 seconds
resolution: 1080x1920
framerate: 24fps
aspect_ratio: 9:16

Strict fidelity rules:

- preserve the exact footwear design from the reference
- keep the exact colors and materials
- preserve the exact sole shape and proportions
- preserve stitching, laces, straps, buckles, texture, and branding placement
- do not redesign the footwear
- do not generate a generic substitute
- keep the footwear visually consistent in every frame

Anti-bug / negative prompt:
face, hands, torso, full body, person fully visible, distorted shoes, altered footwear design, changed colors, wrong material, fake logo, extra feet, extra legs, deformed toes, deformed ankles, bad anatomy, robotic movement, blurry footwear, low quality, CGI, 3D render, cartoon, illustration, shaky camera, aggressive zoom, cluttered background, warped sole, inconsistent product, morphing shoe, oversaturated colors, poor lighting

Copiar prompt de imagem

- {
"prompt": "ultra realistic iPhone POV photo, identity locked to the exact same lingerie product provided as reference, same product, same design, same proportions, same materials, no structural changes, no reinterpretation, preserve exact garment geometry and construction, maintain original

color, fabric behavior, stitching, lace patterns, trims, straps, and all unique details exactly as seen in reference image

scene: premium clean feminine lingerie boutique, minimalistic elegant interior, neutral tones (beige, off-white, soft lighting), modern shelves and racks subtly visible in background, coherent retail environment, no background replacement

presentation: product hanging on a clean wooden hanger (no text, no branding), natural retail display, garment correctly aligned, straps positioned naturally, no distortion

interaction: one human hand holding the hanger naturally, fingers relaxed, candid grip, no face visible, no body beyond partial hand/arm

composition: iPhone POV perspective, chest-level framing, slight handheld tilt, TikTok-style casual capture, product centered, background softly blurred but still readable as store

lighting: real store lighting, soft warm overhead illumination, natural shadows, realistic highlights on fabric and lace, no studio lighting, no artificial glow, balanced exposure with subtle iPhone HDR behavior

texture fidelity: retain full microtexture, visible stitching, lace detail, embroidery, fabric grain, natural folds and drape, no smoothing, no plastic look

vibe: natural, candid, human retail moment, authentic smartphone capture, no staged feel

strict rules: same identity, identity locked, preserve exact design, no color change, no material change, no added or removed elements, match original product exactly, no face visible",

"negative_prompt": "face, model wearing product, mannequin, text on hanger, branding, logo, studio lighting, artificial glow, beauty filter, over-smoothing, CGI, 3D render, product redesign, color shift, fabric alteration, missing details, extra accessories, unrealistic shadows, overexposure, dramatic lighting, background mismatch, distorted proportions, plastic texture, blur on product"

- ```json
- {
- "prompt": "ULTRA-PHOTOREALISTIC iPhone POV VIDEO. Use the provided reference image as the ABSOLUTE SOURCE OF TRUTH for the lingerie product. The exact same product must remain visually consistent from the first frame to the last frame. Do not redesign, reinterpret, reconstruct, beautify or modify the garment in any way.\n\nPRODUCT IDENTITY LOCK — HIGHEST PRIORITY:\nPreserve the exact original lingerie design, silhouette, proportions, dimensions, color, material, lace pattern, embroidery, stitching, seams, trims, straps, bow, elastic bands, edges, transparency and fabric texture exactly as shown in the reference. Every product detail must remain consistent throughout the entire video. No new details may appear and no existing details may disappear.\n\nSCENE:\nA premium but believable feminine lingerie boutique. Elegant, clean and contemporary interior with warm neutral tones such as beige, off-white and light wood. Minimal clothing racks and shelves are subtly visible in the background. Authentic Brazilian retail environment, realistic and functional, not a studio, not a showroom and not a luxury hotel.\n\nPRODUCT PRESENTATION:\nThe exact reference lingerie is hanging naturally from a simple light wooden hanger with NO text, NO branding and NO logo. The garment hangs vertically in a natural retail-display position. Preserve the exact original orientation, proportions and

structure. Straps remain correctly positioned. The garment must never stretch, shrink, twist, fold unnaturally or change shape.

HAND INTERACTION — SIMPLIFIED FOR MAXIMUM REALISM:

- ONLY ONE ADULT FEMALE HAND** is visible.
- The hand enters naturally from the lower side of the frame and gently holds the wooden hanger near the hook or lower bar.
- The hand remains relaxed and anatomically correct.
- The hand performs **ONLY ONE** subtle gesture: the fingertips briefly and gently touch the outer edge of the garment for approximately one second, then return to a relaxed position on the hanger.
- Do NOT** pull the fabric.
- Do NOT** stretch the fabric.
- Do NOT** pinch the lace.
- Do NOT** squeeze the garment.
- Do NOT** lift the garment off the hanger.
- Do NOT** move the hand across the center of the lingerie.
- Do NOT** cover important details.
- The product remains the main focus at all times.

HAND ANATOMY:

- Realistic adult feminine hand, natural skin texture, anatomically correct wrist and fingers, five clearly separated fingers, realistic joints and natural proportions.
- Relaxed finger positioning. No extra fingers, no missing fingers, no fused fingers, no twisted fingers, no elongated fingers, no deformed wrist.

NAILS AND JEWELRY:

- Neatly manicured feminine nails with a subtle glossy painted finish. One or two delicate minimal rings may be visible.
- Jewelry must be subtle and realistic, never distracting from the lingerie.
- No bracelets and no watch.

CAMERA MOVEMENT:

- Realistic handheld iPhone POV recording.
- Start with a medium-wide framing where the entire lingerie and hanger are clearly visible.
- The camera makes **ONE** extremely slow and subtle forward movement toward the product during the video, similar to a real person naturally bringing their phone slightly closer to inspect the fabric.
- The camera movement must be smooth, continuous and physically realistic.
- Add only extremely subtle handheld micro-movements and tiny framing corrections.
- No dramatic camera movement.

IMPORTANT: THE CAMERA MOVES CLOSER — THE PRODUCT DOES NOT MOVE.

TIMELINE — 8 SECONDS:

- 0.0–2.0s:** Full lingerie hanging from the wooden hanger, completely visible. Camera stable with very subtle natural handheld movement. One female hand naturally holds the hanger.
- 2.0–4.0s:** Camera begins a very slow forward movement. The hand remains relaxed. The garment stays completely stable on the hanger.
- 4.0–5.5s:** The fingertips make one small, gentle touch along the outer edge of the garment, briefly highlighting the fabric texture. No pulling, stretching or repositioning.
- 5.5–7.0s:** Hand returns to a relaxed position. Camera continues its subtle approach, revealing slightly more detail in the lace, stitching and fabric texture without creating a separate artificial close-up.
- 7.0–8.0s:** Camera stops naturally. The lingerie remains centered and fully recognizable. Hold the final composition briefly and naturally.

FOCUS:

- The entire product remains the primary subject throughout the video.
- Gradually reveal additional textile detail through natural camera proximity.
- Do NOT** generate independent close-up shots.
- Do NOT** crop the garment aggressively.
- Do NOT** reconstruct any part of the product.

FABRIC PHYSICS:

- The lingerie must behave like real physical fabric.
- Maintain accurate weight, gravity, folds, lace structure and natural drape.
- Only minimal secondary movement is permitted from the tiny movement of the hand and camera.
- The garment must **NOT** wave, ripple, breathe, morph, stretch or deform.

LIGHTING:

- Real boutique lighting with soft warm overhead illumination.
- Physically accurate shadows beneath the garment and hand.
- Soft realistic highlights on lace and fabric.
- Balanced exposure and natural color reproduction.
- No artificial glow, no beauty lighting and no dramatic cinematic lighting.

TEXTURE FIDELITY:

- Preserve visible lace fibers, embroidery, stitching threads, fabric grain, elastic texture and natural material response.
- Realistic skin pores and nail texture.
- No smoothing, no plastic appearance and no synthetic CGI texture.

VISUAL STYLE:

- Natural premium UGC, feminine fashion content, authentic TikTok-style smartphone recording.
- The video should feel casually recorded by a real woman inside a beautiful lingerie boutique, while maintaining high-end photographic realism.

AUDIO:

- No voice. No speech.
- No dialogue. No lip movement.
- Only subtle natural boutique ambience and very soft background music.

CAMERA:

- Modern iPhone camera aesthetic, approximately 26–28mm equivalent lens, realistic smartphone depth of field, natural sharpness, subtle

sensor noise, realistic exposure, slight handheld imperfections and authentic smartphone image processing.\n\nABSOLUTE RULES:\nSame product from first frame to last frame.\nSame design from first frame to last frame.\nSame color from first frame to last frame.\nSame material from first frame to last frame.\nSame straps from first frame to last frame.\nSame lace and embroidery from first frame to last frame.\nSame proportions from first frame to last frame.\nNo product redesign.\nNo product deformation.\nNo fabric stretching.\nNo fabric morphing.\nNo added or removed garment elements.\nNo duplicated garment.\nNo disappearing details.\nNo face visible.\nNo body visible.\nNo person wearing the lingerie.\nNo mannequin.\nNo text or branding on the hanger.\n\nFINAL GENERATION PRIORITY:\n1. Product identity and visual consistency.\n2. Realistic hand anatomy.\n3. Natural physical fabric behavior.\n4. Smooth human camera movement.\n5. Authentic boutique environment.\n6. High-detail smartphone realism.",

-
- "negative_prompt": "face, head, body, model wearing lingerie, person wearing product, mannequin, multiple hands, two hands, extra hand, duplicated hand, extra fingers, missing fingers, six fingers, four fingers, fused fingers, merged fingers, twisted fingers, elongated fingers, broken fingers, malformed hand, deformed wrist, disconnected wrist, floating hand, artificial hand, masculine hand, hand covering product, hand pulling fabric, hand stretching fabric, hand pinching lace, hand squeezing garment, hand lifting garment, hand crossing center of product, excessive jewelry, bracelets, watch, oversized rings, distorted nails, malformed nails, product deformation, garment morphing, garment stretching, garment shrinking, warped fabric, changing silhouette, altered lace, altered embroidery, changed straps, missing straps, extra straps, changing bow, color shift, material change, redesign, reinterpretation, invented details, missing details, duplicated garment, disappearing garment, floating garment, independent close-up, aggressive crop, camera orbit, camera rotation, dramatic zoom, fast zoom, sudden camera movement, excessive camera shake, looping motion, robotic movement, unnatural hand movement, unrealistic fabric physics, CGI, 3D render, plastic texture, fake fabric, studio lighting, artificial glow, beauty filter, excessive smoothing, dramatic shadows, overexposure, underexposure, excessive blur, low resolution, AI artifacts, text overlay, subtitles, watermark"

Copiar prompt de imagem – # UNIVERSAL CINEMATIC FINISHED MANICURE IMAGE —
BOTH HANDS / EXACT NAIL POLISH SHADE / PREMIUM CLEAN WHITE TABLE /
PERFECT HUMAN NAIL REALISM

-
- Use the attached nail polish image as the only and absolute product reference.
-
- Preserve the same premium clean white living-room table, manicure setup, beautiful Brazilian home, hand identity, jewelry, and lighting established in the previous images.
-
- Create one ultra-photorealistic cinematic vertical 9:16 first-person POV beauty image showing both feminine hands after the manicure is fully completed.
-
- All visible fingernails must be professionally painted with the EXACT color and finish of the attached nail polish.
-
- **## ABSOLUTE PRODUCT LOCK**
-
- Preserve the exact nail polish bottle beside the hands:
-
- - same bottle
- - same cap
- - same proportions
- - same label
- - same logo
- - same typography
- - same visible liquid shade
- - same glass
- - same finish
- - same packaging details
-
- Do not redesign or replace the bottle.
-
- **## EXACT COLOR AND FINISH LOCK — HIGHEST PRIORITY**
-
- The completed nails must exactly match the attached polish in:
-
- - hue
- - undertone
- - saturation
- - brightness
- - depth
- - opacity
- - transparency
- - shimmer
- - glitter particle color
- - metallic effect
- - pearlescent effect
- - glossy finish
- - satin finish
- - or matte finish
-
- Do not generate a generic nail color.
-
- Do not modify the shade to flatter the skin, jewelry, table, or environment.
-

- The bottle and nails must display the same color identity under the same neutral lighting.

-

FINISHED MANICURE QUALITY

-

- Show a beautiful professional manicure with realistic human characteristics:

-

- - uniform color
- - smooth coverage
- - clean cuticle line
- - natural nail curvature
- - symmetrical but not digitally identical nail shapes
- - approximately 0.5-millimeter natural cuticle spacing when appropriate
- - no polish on skin
- - no bubbles
- - no streaks
- - no pooling
- - no chips
- - no uneven edges
- - no excessive thickness
- - no synthetic plastic coating

-

- For glossy polish, show controlled natural highlights.

-

- For matte polish, show an even velvety finish.

-

- For shimmer, glitter, metallic, or pearl polish, reproduce the exact particle scale, density, color, and reflective behavior.

-

HAND POSE

-

- Both hands rest elegantly on the premium white table.

-

- Use a natural attractive pose:

-

- - fingers gently extended
- - subtle overlap or soft fan arrangement
- - nails facing the camera
- - wrists relaxed
- - no rigid mannequin pose

-

- Place the exact bottle naturally beside or between the hands with its label visible.

-

- Do not let the bottle cover the nails.

-

HUMAN REALISM

-

- Show:

-

- - exactly five fingers on each hand
- - natural finger proportions
- - real skin pores
- - subtle veins

- - fine skin lines
- - realistic cuticles
- - natural nail thickness
- - authentic nail curvature
- - subtle human asymmetry
- - real contact shadows
-
- Use the same delicate rings and bracelet.
-
- No extra fingers.
-
- No deformed nails.
-
- ## ENVIRONMENT LOCK
-
- Maintain:
-
- - same premium white table
- - same manicure tools
- - same acetone
- - same cotton pads
- - same manicure case
- - same secondary nail polishes
- - same elegant home decor
- - same lighting
- - same color palette
- - same scene organization
-
- The environment remains organized and secondary.
-
- ## COMPOSITION
-
- - vertical 9:16
- - close top-down POV
- - hands and nails occupy most of the frame
- - all painted nails clearly visible
- - exact polish bottle visible nearby
- - white table texture readable
- - manicure accessories subtly present
- - elegant home context softly recognizable
-
- ## CAMERA
-
- - cinematic 4K macro beauty realism
- - 70mm to 100mm equivalent lens
- - natural top-down perspective
- - minimal distortion
- - no fisheye
-
- ## FOCUS
-
- Keep sharply detailed:

-
- - every nail
- - cuticle lines
- - exact polish finish
- - highlights or matte surface
- - fingers
- - rings
- - bottle label
- - immediate table texture
-
- No artificial blur across the hands.
-
- ## LIGHTING
-
- Use neutral, high-color-accuracy beauty lighting.
-
- The bottle and nails must be illuminated consistently.
-
- No color cast.
-
- No excessive reflection hiding the nail shade.
-
- ## NEGATIVE PROMPT
-
- wrong nail color, color mismatch between bottle and nails, generic manicure, different shade, changed finish, polish on skin, flooded cuticles, chips, bubbles, streaks, uneven coverage, acrylic plastic nails, deformed nails, extra fingers, missing fingers, fused fingers, different hand identity, excessive jewelry, bottle covering nails, changed table, changed environment, CGI, 3D render, AI artifacts, captions, subtitles, watermark
-
- ## FINAL OUTPUT
-
- One ultra-photorealistic cinematic vertical POV image showing both realistic feminine hands resting elegantly on the same premium clean white living-room manicure table, with every nail professionally painted in the EXACT shade and finish of the attached nail polish, accompanied by the exact bottle, refined jewelry, authentic skin and cuticle microtexture, perfect but physically human manicure quality, and absolutely no visible AI traits.
-

Copiar prompt de vídeo sem fala -0# UNIVERSAL CINEMATIC FINISHED MANICURE VIDEO — NAIL DETAIL B-ROLL / EXACT SHADE AND FINISH / BOTH HANDS / SAME PREMIUM WHITE TABLE

-
- Use the approved finished-manicure image as the immutable first-frame anchor.
-
- Use the original attached nail polish image as the only and absolute product reference.
-
- Create one ultra-photorealistic cinematic vertical 9:16 first-person POV beauty video showing the completed manicure in elegant close B-roll scenes.
-
- ## FORMAT

-
- - vertical 9:16
- - 8 seconds
- - 24 fps
- - exactly four B-roll scenes
- - clean premium editorial cuts
- - no dialogue
- - no narration
- - no voice-over
- - no music
- - no subtitles
- - no text overlays
-
- ## ENVIRONMENT LOCK
-
- Preserve exactly:
-
- - same premium clean white table
- - same living room
- - same manicure tools
- - same product bottle
- - same jewelry
- - same hands
- - same lighting
- - same decor
- - same scene organization
-
- Do not change the table or background between shots.
-
- ## PRODUCT AND MANICURE LOCK
-
- Preserve throughout all scenes:
-
- - exact nail polish bottle
- - exact packaging
- - exact label
- - exact cap
- - exact nail color
- - exact undertone
- - exact opacity
- - exact shimmer
- - exact glitter
- - exact metallic or pearl effect
- - exact glossy, satin, or matte finish
- - same nail shape
- - same nail length
- - same cuticle condition
- - same hand identity
-
- No shade drift.
-
- No manicure change.

-
- No nail-length change.
-
- **## B-ROLL STRUCTURE**
-
- **### SHOT 1 — 0.0s TO 2.0s — BOTH HANDS HERO**
-
- Show both finished hands resting elegantly on the premium white table.
-
- Use a restrained top-down slider movement.
-
- Keep all nails visible and the exact nail polish bottle nearby.
-
- The manicure is the absolute visual hero.
-
- **### SHOT 2 — 2.0s TO 4.0s — MACRO FINISH DETAIL**
-
- Cut to an extreme macro shot of three or four nails.
-
- Show:
 -
 - - exact color
 - - smooth surface
 - - clean cuticle line
 - - natural nail curvature
 - - uniform coverage
 - - realistic product thickness
 - - visible human skin microtexture
 -
- For glossy polish, allow one soft light reflection to travel naturally across the surface as the fingers rotate a few degrees.
-
- For matte polish, show an even velvety finish without false shine.
-
- For glitter, shimmer, metallic, or pearlescent polish, show the exact particle behavior.
-
- **### SHOT 3 — 4.0s TO 6.0s — SIDE ANGLE AND EDGE DETAIL**
-
- Use a close side-front angle.
-
- The woman gently adjusts one hand to reveal:
 -
 - - nail sidewalls
 - - clean free edges
 - - even shape
 - - subtle polish thickness
 - - real skin texture
 - - precise application boundaries
 -
-
- No fast movements.
-
- No unnatural finger bending.

-
- **### SHOT 4 — 6.0s TO 8.0s — PRODUCT AND MANICURE COLOR MATCH**
-
- Return to a refined top-down hero composition.
-
- One hand rests near the exact bottle while the other slowly fans the fingers.
-
- Keep the bottle's visible polish shade and the painted nails in the same frame.
-
- The viewer must clearly perceive that the nail color exactly matches the attached product.
-
- End with both hands still, elegant, sharp, and naturally posed.
-
- **## HUMAN MOVEMENT**
-
- Use only subtle realistic movements:
-
- - slight wrist rotation
- - gentle finger extension
- - soft hand repositioning
- - natural tendon movement
- - physically correct joint behavior
-
- No exaggerated choreography.
-
- No robotic hand movement.
-
- **## HAND REALISM**
-
- Maintain:
-
- - exactly five fingers on each hand
- - natural finger proportions
- - realistic joints
- - visible skin pores
- - fine lines
- - natural tendons
- - realistic cuticles
- - real nail curvature
- - same rings and bracelet
-
- No finger morphing.
-
- No extra or missing fingers.
-
- **## CAMERA**
-
- Use cinematic macro and close-product framing:
-
- - 70mm to 100mm equivalent lens for hero shots
- - 90mm to 105mm macro-lens aesthetic for nail details
- - stabilized top-down and side-front camera angles

- - subtle slider movement
- - no aggressive zoom
- - no orbit
- - no fisheye
-
- **## FOCUS**
-
- Keep sharply readable:
-
- - nails
- - cuticles
- - product finish
- - bottle
- - label
- - rings
- - fingers
- - white-table texture
-
- No focus pulsing.
-
- No artificial blur hiding imperfections.
-
- No excessive bokeh.
-
- **## LIGHTING**
-
- Use the same neutral high-color-accuracy lighting established in the approved image.
-
- Preserve:
-
- - exact nail color
- - exact product color
- - realistic glossy highlights
- - accurate matte finish
- - shimmer or glitter reflections
- - natural skin tone
- - gold jewelry reflections
- - white-table texture
-
- No colored lighting.
-
- No shade transformation.
-
- No artificial glow.
-
- **## AUDIO**
-
- Use only subtle synchronized sounds:
-
- - gentle finger contact with the table
- - delicate jewelry movement
- - subtle hand repositioning

- - quiet residential room tone
-
- No speech.
-
- No narration.
-
- **## NEGATIVE PROMPT**
-
- changed nail color, color mismatch between bottle and nails, changed nail shape, changed nail length, changed finish, manicure morphing, product bottle changing, altered label, mirrored logo, polish on skin, damaged cuticles, bubbles, streaks, chips, uneven coverage, artificial plastic nails, finger morphing, extra fingers, missing fingers, fused fingers, robotic movement, excessive camera motion, blurred nails, focus pulsing, changed white table, changed environment, CGI, 3D render, AI artifacts, dialogue, narration, subtitles, text overlays, watermark
-
- **## FINAL OUTPUT**
-
- One ultra-photorealistic cinematic 8-second vertical POV beauty video with four elegant B-roll scenes showing both finished hands, macro nail details, precise side edges, realistic shine or finish, and the clear visual match between the painted nails and the EXACT attached nail polish bottle, preserving the same premium clean white-table environment, exact product shade, natural anatomy, refined feminine accessories, and absolutely no visible AI traits.
UNIVERSAL CINEMATIC FINISHED MANICURE VIDEO — NAIL DETAIL B-ROLL / EXACT SHADE AND FINISH / BOTH HANDS / SAME PREMIUM WHITE TABLE

Use the approved finished-manicure image as the immutable first-frame anchor.

Use the original attached nail polish image as the only and absolute product reference.

Create one ultra-photorealistic cinematic vertical 9:16 first-person POV beauty video showing the completed manicure in elegant close B-roll scenes.

FORMAT

- vertical 9:16
- 8 seconds
- 24 fps
- exactly four B-roll scenes
- clean premium editorial cuts
- no dialogue
- no narration
- no voice-over
- no music
- no subtitles
- no text overlays

ENVIRONMENT LOCK

Preserve exactly:

- same premium clean white table

- same living room
- same manicure tools
- same product bottle
- same jewelry
- same hands
- same lighting
- same decor
- same scene organization

Do not change the table or background between shots.

PRODUCT AND MANICURE LOCK

Preserve throughout all scenes:

- exact nail polish bottle
- exact packaging
- exact label
- exact cap
- exact nail color
- exact undertone
- exact opacity
- exact shimmer
- exact glitter
- exact metallic or pearl effect
- exact glossy, satin, or matte finish
- same nail shape
- same nail length
- same cuticle condition
- same hand identity

No shade drift.

No manicure change.

No nail-length change.

B-ROLL STRUCTURE

SHOT 1 — 0.0s TO 2.0s — BOTH HANDS HERO

Show both finished hands resting elegantly on the premium white table.

Use a restrained top-down slider movement.

Keep all nails visible and the exact nail polish bottle nearby.

The manicure is the absolute visual hero.

SHOT 2 — 2.0s TO 4.0s — MACRO FINISH DETAIL

Cut to an extreme macro shot of three or four nails.

Show:

- exact color
- smooth surface
- clean cuticle line
- natural nail curvature
- uniform coverage
- realistic product thickness
- visible human skin microtexture

For glossy polish, allow one soft light reflection to travel naturally across the surface as the fingers rotate a few degrees.

For matte polish, show an even velvety finish without false shine.

For glitter, shimmer, metallic, or pearlescent polish, show the exact particle behavior.

SHOT 3 — 4.0s TO 6.0s — SIDE ANGLE AND EDGE DETAIL

Use a close side-front angle.

The woman gently adjusts one hand to reveal:

- nail sidewalls
- clean free edges
- even shape
- subtle polish thickness
- real skin texture
- precise application boundaries

No fast movements.

No unnatural finger bending.

SHOT 4 — 6.0s TO 8.0s — PRODUCT AND MANICURE COLOR MATCH

Return to a refined top-down hero composition.

One hand rests near the exact bottle while the other slowly fans the fingers.

Keep the bottle's visible polish shade and the painted nails in the same frame.

The viewer must clearly perceive that the nail color exactly matches the attached product.

End with both hands still, elegant, sharp, and naturally posed.

HUMAN MOVEMENT

Use only subtle realistic movements:

- slight wrist rotation

- gentle finger extension
- soft hand repositioning
- natural tendon movement
- physically correct joint behavior

No exaggerated choreography.

No robotic hand movement.

HAND REALISM

Maintain:

- exactly five fingers on each hand
- natural finger proportions
- realistic joints
- visible skin pores
- fine lines
- natural tendons
- realistic cuticles
- real nail curvature
- same rings and bracelet

No finger morphing.

No extra or missing fingers.

CAMERA

Use cinematic macro and close-product framing:

- 70mm to 100mm equivalent lens for hero shots
- 90mm to 105mm macro-lens aesthetic for nail details
- stabilized top-down and side-front camera angles
- subtle slider movement
- no aggressive zoom
- no orbit
- no fisheye

FOCUS

Keep sharply readable:

- nails
- cuticles
- product finish
- bottle
- label
- rings
- fingers
- white-table texture

No focus pulsing.

No artificial blur hiding imperfections.

No excessive bokeh.

LIGHTING

Use the same neutral high-color-accuracy lighting established in the approved image.

Preserve:

- exact nail color
- exact product color
- realistic glossy highlights
- accurate matte finish
- shimmer or glitter reflections
- natural skin tone
- gold jewelry reflections
- white-table texture

No colored lighting.

No shade transformation.

No artificial glow.

AUDIO

Use only subtle synchronized sounds:

- gentle finger contact with the table
- delicate jewelry movement
- subtle hand repositioning
- quiet residential room tone

No speech.

No narration.

NEGATIVE PROMPT

changed nail color, color mismatch between bottle and nails, changed nail shape, changed nail length, changed finish, manicure morphing, product bottle changing, altered label, mirrored logo, polish on skin, damaged cuticles, bubbles, streaks, chips, uneven coverage, artificial plastic nails, finger morphing, extra fingers, missing fingers, fused fingers, robotic movement, excessive camera motion, blurred nails, focus pulsing, changed white table, changed environment, CGI, 3D render, AI artifacts, dialogue, narration, subtitles, text overlays, watermark

FINAL OUTPUT

"prompt": "ULTRA-PHOTOREALISTIC iPhone POV VIDEO. Use the provided reference image as the ABSOLUTE SOURCE OF TRUTH for the lingerie product. The exact same product must remain

visually consistent from the first frame to the last frame. Do not redesign, reinterpret, reconstruct, beautify or modify the garment in any way.

PRODUCT IDENTITY LOCK — HIGHEST PRIORITY: Preserve the exact original lingerie design, silhouette, proportions, dimensions, color, material, lace pattern, embroidery, stitching, seams, trims, straps, bow, elastic bands, edges, transparency and fabric texture exactly as shown in the reference. Every product detail must remain consistent throughout the entire video. No new details may appear and no existing details may disappear.

SCENE — NEUTRAL ENVIRONMENT: A clean, simple and completely neutral real-world interior. Soft off-white, beige and light neutral tones. Plain walls and an uncluttered background with only subtle natural depth. No identifiable location, no boutique elements, no clothing racks, no shelves filled with products, no bedroom furniture, no showroom appearance and no decorative elements competing with the product. The environment must feel realistic, calm and naturally lived-in while remaining visually neutral. The product is always the dominant visual element.

PRODUCT PRESENTATION: The exact reference lingerie is hanging naturally from a simple light wooden hanger with NO text, NO branding and NO logo. The garment hangs vertically in a natural position. Preserve the exact original orientation, proportions and structure. Straps remain correctly positioned. The garment must never stretch, shrink, twist, fold unnaturally or change shape.

HAND INTERACTION: ONLY ONE ADULT FEMALE HAND is visible. The hand enters naturally from the lower side of the frame and gently holds the wooden hanger near the hook or lower bar. The hand remains relaxed and anatomically correct.

The hand performs ONLY ONE subtle gesture: the fingertips briefly and gently touch the outer edge of the garment for approximately one second, then return to a relaxed position on the hanger.

Do NOT pull, stretch, pinch, squeeze or lift the fabric. Do NOT move the hand across the center of the garment or cover important product details.

HAND ANATOMY: Realistic adult feminine hand, natural skin texture, anatomically correct wrist and fingers, five clearly separated fingers, realistic joints and natural proportions. Relaxed finger positioning. No extra, missing, fused, twisted or elongated fingers and no deformed wrist.

NAILS AND JEWELRY: Neatly manicured feminine nails with a subtle glossy finish. One or two delicate minimal rings may be visible. No bracelets and no watch.

CAMERA MOVEMENT: Realistic handheld iPhone POV recording. Start with medium-wide framing where the entire garment and hanger are clearly visible. The camera makes ONE extremely slow and subtle forward movement toward the product, similar to a real person naturally bringing the phone slightly closer to inspect the fabric.

The camera movement is smooth, continuous and physically realistic with extremely subtle handheld micro-movements. No dramatic movement.

THE CAMERA MOVES CLOSER — THE PRODUCT DOES NOT MOVE.

TIMELINE — 8 SECONDS:

- 0.0–2.0s: Entire garment and hanger visible against the neutral background. Camera stable with tiny natural handheld movement. One female hand holds the hanger.
- 2.0–4.0s: Camera begins one very slow forward movement. Hand remains relaxed and garment remains stable.
- 4.0–5.5s: Fingertips gently touch the outer edge of the garment once, briefly highlighting the fabric texture without pulling or repositioning it.
- 5.5–7.0s: Hand returns to its relaxed position. Camera continues its subtle approach, naturally revealing more lace, stitching and fabric detail.
- 7.0–8.0s: Camera stops naturally. Garment remains centered and recognizable. Hold the final composition briefly.

FOCUS: The entire product remains the primary subject. Gradually reveal textile detail through natural camera proximity. No independent close-up shots, aggressive cropping or reconstruction of the product.

FABRIC PHYSICS: Maintain realistic weight, gravity, folds, lace structure and natural drape. Only minimal secondary movement caused by the hand is permitted. The garment must NOT wave, ripple, breathe, morph, stretch or deform.

LIGHTING: Soft natural daylight entering from one side. Neutral white balance, stable exposure, physically realistic soft shadows and subtle highlights on the material. No dramatic cinematic lighting, colored lighting, artificial glow or beauty lighting.

TEXTURE FIDELITY: Preserve visible lace fibers, embroidery, stitching threads, fabric grain, elastic texture and natural material response. Realistic skin pores and nail texture. No smoothing, plastic appearance or synthetic CGI texture.

VISUAL STYLE: Natural premium UGC product content with authentic smartphone realism. Simple, clean, spontaneous and believable. The neutral environment must never compete visually with the product.

AUDIO: No voice, speech, dialogue or lip-sync. Only extremely

subtle natural room ambience. No music.\n\nCAMERA:\nModern iPhone camera aesthetic, approximately 26–28mm equivalent lens, realistic smartphone depth of field, natural sharpness, subtle sensor noise, realistic exposure, slight handheld imperfections and authentic smartphone image processing.\n\nABSOLUTE RULES:\nSame product, design, color, material, straps, lace, embroidery and proportions from first frame to last frame. No redesign. No deformation. No stretching. No morphing. No added or removed garment elements. No duplicated garment. No disappearing details. No face visible. No body visible. No person wearing the product. No mannequin. No text or branding on the hanger. Neutral background throughout the entire sequence.\n\nFINAL GENERATION PRIORITY:\n1. Product identity and visual consistency.\n2. Realistic hand anatomy.\n3. Natural physical fabric behavior.\n4. Smooth human camera movement.\n5. Clean neutral environment.\n6. High-detail smartphone realism.",

"negative_prompt": "face, head, body, model wearing lingerie, person wearing product, mannequin, multiple hands, two hands, extra hand, duplicated hand, extra fingers, missing fingers, fused fingers, twisted fingers, elongated fingers, malformed hand, deformed wrist, floating hand, hand covering product, hand pulling fabric, hand stretching fabric, hand pinching lace, excessive jewelry, bracelets, watch, product deformation, garment morphing, garment stretching, garment shrinking, warped fabric, changing silhouette, altered lace, altered embroidery, changed straps, missing straps, extra straps, color shift, material change, redesign, invented details, missing details, duplicated garment, floating garment, boutique, store, retail shop, clothing racks, product shelves, showroom, bedroom, bed, luxury hotel, busy background, colorful background, excessive decoration, independent close-up, aggressive crop, camera orbit, camera rotation, dramatic zoom, fast zoom, sudden camera movement, excessive camera shake, robotic movement, unrealistic fabric physics, CGI, 3D render, plastic texture, artificial glow, beauty filter, excessive smoothing, dramatic shadows, overexposure, underexposure, excessive blur, low resolution, AI artifacts, text overlay, subtitles, watermark"
}

Movimento Selfie | Gancho Puxando

Copiar prompt de vídeo - AUDIO SETTINGS — CRITICAL FLOW COMPATIBILITY:

- Generate VIDEO ONLY
- Output must be completely silent
- No dialogue
- No narration
- No speech
- Zero audio channels

CRITICAL OVERRIDE — CLOSED-MOUTH SMILE & ZERO SPEECH ARTICULATION

FACIAL LOCK RULES:

- The subject keeps her lips fully sealed throughout the entire video.
- Mouth remains completely closed and visually stable.
- Zero lip separation.
- Zero jaw articulation.

- Zero speech-like movement.
- Zero lip-sync behavior.
- Zero phoneme or syllable formation.
- All expressiveness comes from the eyes, cheeks, posture, and body language.

The avatar must NEVER appear to be talking, speaking, singing, whispering, or simulating conversation.

She should look like a real girl casually recording a silent mirror-selfie TikTok while smiling naturally.

FACIAL BEHAVIOR:

Closed-mouth smile ONLY.

The smile should be soft, feminine, charismatic, natural, and simpática.

Eyes remain warm, expressive, and naturally focused on the mirror/camera.

Natural blinking only.

Tiny cheek movement is allowed.

Subtle eye reactions are allowed.

Minimal facial variation.

Expression should come primarily from the eyes.

The mouth must remain completely closed and visually stable from beginning to end.

FORBIDDEN:

lip articulation,
lip-sync,
mouth opening,
jaw movement,
speech-like facial motion,
rhythmic mouth movement,
phoneme shapes,
syllable formation,
talking energy,
conversational expression.

CORE IDEA:

Create a hyper-realistic spontaneous smartphone mirror selfie with natural feminine “biscoito” energy and playful clothing interaction.

The avatar casually records herself in a mirror while holding an iPhone naturally in one hand.

With her free hand, she softly stretches and adjusts the bottom of her blouse in a playful, feminine, casual way.

She subtly poses, shifts her body weight, makes tiny natural posture adjustments, and maintains a warm closed-mouth smile.

The vibe should feel:

despojada,
attractive,
naturally feminine,
spontaneous,
socially authentic,
subtly energetic,
simpática,
charismatic,
young,
casual.

This is NOT influencer overacting.

This is NOT dancing.

This is NOT runway behavior.

This is NOT exaggerated posing.

It should feel like a real attractive girl casually recording herself for TikTok while naturally fixing her blouse.

ADVANCED HUMAN KINETIC SYSTEM:

Human movement must NEVER happen at constant speed.

Every movement should contain realistic:

- acceleration;
- deceleration;
- body inertia;
- kinetic chain delay;
- residual momentum;
- muscular responsiveness;
- imperfect balance recovery;
- stabilization corrections;
- subtle overshoot;
- natural settling.

Movement must feel physically alive and spontaneous.

Avoid robotic, perfectly timed, mechanically smooth, or scripted motion.

The avatar should feel energetic without becoming hyperactive or exaggerated.

HUMAN MICRO-ENERGY SYSTEM:

Include subtle unconscious human movements:

- quick posture corrections;
- tiny shoulder reactions;
- natural body looseness;
- subtle body sway;
- small weight transfers;
- slight head responsiveness;
- tiny breathing movements;
- small balance corrections;
- spontaneous feminine body reactions.

These movements must remain subtle and believable.

Do NOT make the avatar hyperactive, chaotic, robotic, or overacted.

PHONE & CAMERA — RAW HANDHELD:

The camera must feel like a real smartphone being held naturally by the avatar.

NO artificial stabilization.

NO gimbal feeling.

NO tripod behavior.

NO cinematic camera movement.

NO floating camera.

NO zoom.

The phone arm must NOT feel locked.

The arm should naturally react to body movement.

Include:

- subtle wrist instability;
- tiny grip corrections;
- natural phone inertia;

- slight framing imperfections;
- small camera drift;
- tiny reactive movements;
- subtle shake caused by body weight transfer;
- natural stabilization corrections.

The camera should feel imperfect in a believable social-media way.

Do NOT make the movement excessively shaky.

SEQUENCE & INTERACTION:

START:

She begins naturally facing the mirror.

Phone already held naturally in one hand.

Free hand relaxed.

Relaxed asymmetrical posture.

Warm closed-mouth smile already active.

Eyes naturally focused toward the mirror/camera.

Tiny breathing movement visible.

Slight shoulder imbalance.

Small unconscious body movement before the main action.

Natural phone instability already active.

Hold the initial position for approximately 0.5–0.8 seconds before movement begins.

SHIRT / BLOUSE INTERACTION:

With the free hand, she naturally grabs the lower side of the blouse/shirt.

Her fingers gently pull the fabric slightly outward.

The movement should feel playful, feminine, casual, and unconscious.

The fabric must respond naturally:

- realistic tension;
- realistic folds;

- natural wrinkles;
- subtle stretching;
- realistic fabric recovery after release.

The hand must interact physically with the actual fabric.

No clipping through clothing.

No disappearing fingers.

No distorted hands.

The movement contains natural acceleration followed by soft deceleration and settling.

At the same time:

- subtle body sway;
- slight hip shift;
- natural shoulder counterbalance;
- tiny phone-arm reaction;
- realistic weight transfer.

The blouse interaction must feel spontaneous and socially natural.

NOT exaggerated.

NOT sexualized.

NOT like a fashion runway pose.

NATURAL “BISCOITO” ENERGY:

While adjusting the blouse, she subtly shifts her posture.

Allow:

- tiny playful body movements;
- slight feminine sway;
- small shoulder reactions;
- subtle head responsiveness;
- natural breathing;
- slight body looseness;
- tiny posture corrections.

The movement should communicate confidence and charisma without looking rehearsed.

BODY SHIFT & REPOSITIONING:

While fixing the blouse, she naturally changes her body angle slightly.

One shoulder moves subtly backward.

Hips reposition naturally.

A small side angle develops.

A slight feminine pose emerges naturally from the movement.

Body weight transfers realistically from one leg to the other.

Clothing and hair react naturally to the movement.

NO:

- spinning;
 - full rotation;
 - robotic pivot;
 - runway walk;
 - exaggerated hip movement;
 - dancing.
-

FINAL RECONNECTION:

She gently releases the blouse.

The fabric naturally returns to its resting position.

Residual body movement continues briefly after the release.

Hair continues settling naturally.

Breathing rhythm remains visible.

Phone instability remains subtly active.

Her eyes reconnect naturally with the mirror/camera.

The closed-mouth smile remains warm, attractive, and relaxed.

The final frame must NEVER feel frozen or artificially paused.

HAIR & CLOTHING PHYSICS:

Hair must behave as weighted physical mass.

Loose strands move independently.

Hair should have subtle secondary motion after body movement stops.

Clothing must respond dynamically to:

- hand interaction;
- stretching;
- body movement;
- gravity;
- release of tension.

Fabric must never become rigid, liquid, plastic, or distorted.

REAL HUMAN ANATOMY:

Maintain consistent anatomy throughout the entire video.

Hands must have:

- five fingers;
- realistic finger proportions;
- natural joints;
- correct thumb placement;
- realistic wrist structure.

No:

- extra fingers;
- missing fingers;
- fused fingers;
- malformed hands;
- disappearing fingers;
- hand deformation;
- limb morphing.

The same avatar must remain visually consistent throughout the entire video.

ULTRA REALISM:

Preserve:

- visible natural skin pores;
- realistic skin texture;
- subtle skin imperfections;
- natural facial asymmetry;
- realistic eye reflections;
- realistic hair strands;
- realistic cloth physics;

- natural mirror reflections;
- realistic shadows;
- physically accurate body movement;
- natural smartphone image characteristics.

The result must look like authentic user-generated content recorded casually on a smartphone.

FORBIDDEN:

speaking,
talking,
lip-sync,
mouth opening,
lip articulation,
jaw articulation,
phoneme shapes,
syllable motion,
speech-like timing,
conversational facial behavior,
rhythmic mouth movement,
robotic timing,
constant-speed movement,
artificial stabilization,
locked phone arm,
tripod behavior,
gimbal movement,
cinematic camera movement,
zoom,
floating camera,
exaggerated dancing,
exaggerated posing,
fast spinning,
runway behavior,
hyperactive movement,
dead eyes,
stiff hair,
rigid clothing,
cloth deformation,
hand deformation,
extra fingers,
missing fingers,
fused fingers,
CGI appearance,
3D render,
plastic skin,
artificial face,
AI artifacts.

FINAL RESULT:

Generate a completely silent, hyper-realistic mirror-selfie video with authentic handheld smartphone movement and natural human body physics.

The avatar casually adjusts and gently stretches the bottom of her blouse with one hand while holding the phone with the other.

She subtly shifts her body weight, makes natural posture corrections, maintains a warm closed-mouth smile, and moves with spontaneous feminine “biscoito” energy.

Her lips remain FULLY SEALED throughout the entire video.

No speaking.

No lip movement.

No mouth opening.

No artificial stabilization.

No exaggerated acting.

The final result must feel like a real, spontaneous TikTok mirror selfie recorded by an attractive, confident, despojada, and simpática girl.

UNIVERSAL UGC VIDEO PROMPT — PRODUCT IN HAND / NEVER RELEASE

Create an ultra-photorealistic vertical UGC video of a female influencer holding the exact product from the attached reference image in one hand while speaking in Brazilian Portuguese. Preserve the product with maximum fidelity: same packaging, label, colors, logo placement, shape, cap, material, proportions, and all visible details.

The influencer holds the product naturally close to the camera and NEVER releases it during the entire video. The product must stay visible, stable, correctly scaled to the hand, and consistently the same in every frame. Natural human movement, authentic UGC style, realistic skin texture, correct hand anatomy, casual home or lifestyle environment, soft natural lighting, vertical 9:16, smartphone realism.

Anti-crash / negative prompt: product disappearing, product leaving frame, product passing through hand, floating product, hand clipping through product, altered packaging, changed label, fake logo, distorted text, product morphing, wrong scale, extra fingers, deformed hand, multiple hands, robotic movement, blurry product, CGI, cartoon, low quality, harsh lighting.

Technical parameters: model: veo-3, length: 8 seconds, resolution: 1080x1920, framerate: 24fps, aspect_ratio: 9:16.

DIÁLOGO EM PORTUGUES DO BRASIL: [ESCREVA A FALA DA SUA INFLUENCER AQUI]

Copiar prompt de imagem

Use the attached image as the only and absolute reference for the pet product.

Create one ultra-realistic vertical 9:16 iPhone-style lifestyle photograph of the exact attached pet bowl, feeder, water dispenser, fountain, or combined feeding system naturally installed in a real Brazilian middle-class home.

PRODUCT IDENTIFICATION:

Automatically identify whether the attached product is:

a food bowl,
a water bowl,
a double bowl set,
an automatic feeder,
a gravity feeder,
a gravity water dispenser,
a pet water fountain,
or another feeding or hydration product.

Use the product only according to its real function.

PRODUCT LOCK:

Preserve the exact product shown in the reference:

same category,
same quantity,
same dimensions,
same proportions,
same shape,
same capacity,

same colors,
same materials,
same surface finish,
same bowls,
same reservoirs,
same lids,
same bases,
same openings,
same dispensers,
same filters when visible,
same branding,
same legitimate printed text,
same graphics,
and the same visible construction details.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, or invent any part of the product.

Generate the exact attached product, not a similar variation.

PLACEMENT:

Place the product naturally in a real Brazilian pet feeding corner.

The product must remain fully supported by:

the floor,
a low feeding mat,
or another physically appropriate stable surface.

Use a clean kitchen corner, service area, pantry support area, dining corner, or dedicated indoor pet area.

The product must show:

correct scale,
stable floor contact,
believable weight,
realistic plastic, ceramic, metal, glass, or silicone texture,
accurate reflections,
coherent contact shadows,
and physically correct perspective.

FOOD OR WATER:

If the product is a feeder or food bowl, show a small realistic amount of dry pet food inside only when appropriate.

If it is a water bowl, dispenser, or fountain, show clean water with realistic transparency, reflections, surface tension, and subtle water level.

If it is an electric fountain, preserve the exact visible construction and show only a subtle physically believable water flow.

Do not invent food, water, reservoirs, filters, cables, motors, or functional components that are not compatible with the exact product.

PET INTERACTION:

Include one compatible real domestic pet naturally interacting with the product.

The pet may:

- drink calmly,
- eat a small amount of food,
- approach and sniff,
- or stand beside the product looking toward it.

Use only one clear and natural interaction.

The pet must not block the entire product.

Keep the main design, reservoir, bowls, base, and functional components clearly visible.

PET REALISM:

The pet must have:

- correct anatomy,
- natural fur,
- realistic paws,
- proper joints,
- correct muzzle,
- natural ears,
- realistic eyes,
- believable body weight,
- and accurate head or mouth contact with the product.

The animal must not float, deform, duplicate, or look like a plush toy.

Water or food contact must be physically believable.

BRAZILIAN HOME:

Use a real Brazilian middle-class comfortable home with:

- finished neutral walls,
- clean ceramic or porcelain flooring,
- practical cabinetry,
- proportional household furniture,
- natural window daylight,
- subtle everyday pet context,
- and restrained decoration.

The environment must feel:

clean,
organized,
functional,
comfortable,
lived-in,
Brazilian,
and naturally attractive without appearing luxurious.

CAMERA:

Shot as if captured with an iPhone 15 Pro or a similar modern smartphone.

Vertical 9:16.

24mm to 28mm equivalent main camera.

Standard photo mode.

Low three-quarter or natural pet-level framing.

Broad readable focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle smartphone processing.

No portrait mode.

No extreme background blur.

No artificial bokeh.

No excessive HDR.

PHOTOGRAPHIC COHERENCE:

The product, pet, food or water, floor, furniture, and room must share the same:

lighting direction,
white balance,
perspective,
focus behavior,
exposure,
shadow softness,
reflections,

and photographic texture.

The result must look like one genuine iPhone photograph captured in a single moment.

CLEAN FRAME:

Legitimate text, branding, and graphics may remain only when physically present on the exact product.

Outside the product itself, generate no added text, logos, symbols, captions, stickers, price graphics, interface elements, promotional banners, or watermarks.

NEGATIVE CONSTRAINTS:

no altered product,
no similar replacement product,
no duplicated bowls,
no invented reservoir,
no extra components,
no floating product,
no spilled water without cause,
no impossible water flow,
no fake food,
no overflowing bowl,
no deformed pet,
no extra paws,
no distorted muzzle,
no incorrect scale,
no CGI,
no 3D render,
no collage effect,
no artificial studio look,
no text overlays,
no watermark,
no borders.

FINAL OUTPUT:

One clean ultra-realistic vertical iPhone-style photograph of one real domestic pet naturally eating from, drinking from, approaching, or standing beside the exact attached feeder, bowl, fountain, or water dispenser inside a comfortable Brazilian middle-class home, with complete product fidelity and physically believable interaction.

Copiar prompt de vídeo sem fala —

Use the uploaded first frame as an immutable visual anchor and the exclusive source of truth for the pet product, pet, environment, lighting, camera angle, and composition.

Create an 8-second ultra-photorealistic vertical smartphone video of the same real domestic pet naturally interacting with the exact feeder, bowl, fountain, or water dispenser shown in the first frame inside a comfortable Brazilian middle-class home.

FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

One continuous uninterrupted take.

No cuts.

No transitions.

No scene changes.

PRODUCT IDENTIFICATION:

Automatically identify whether the exact product is:

- a food bowl,
- a water bowl,
- a double bowl set,
- an automatic feeder,
- a gravity feeder,
- a gravity water dispenser,
- a pet water fountain,
- or another feeding or hydration product.

Use one simple interaction compatible with its real function.

ABSOLUTE PRODUCT LOCK:

Preserve the exact product throughout every frame:

- same category,
- same quantity,
- same dimensions,
- same proportions,
- same shape,
- same capacity,
- same colors,
- same materials,
- same surface finish,
- same bowls,
- same reservoirs,
- same lids,
- same bases,
- same openings,
- same filters when visible,
- same cables when visible,

same branding,
same legitimate printed text,
same graphics,
and the same visible construction details.

Treat the product as a real physical object already represented correctly in the uploaded first frame.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, complete, or reconstruct it.

Do not reveal hidden sides or invent unseen components.

The product must not morph, change size, change shape, gain parts, lose parts, or move independently.

PET LOCK:

Preserve the same pet throughout the entire video:

same species,
same breed or physical type,
same size,
same fur color,
same markings,
same eyes,
same ears,
same muzzle,
same paws,
and same body proportions.

The pet must not morph, duplicate, change size, or change appearance.

ACTION:

Use one calm and physically believable interaction sequence appropriate to the product.

For a food bowl or feeder:

the pet approaches calmly,
lowers its head,
eats a small amount of food,
pauses briefly,
and remains naturally beside the product.

For a water bowl, dispenser, or fountain:

the pet approaches calmly,
lowers its head,
drinks naturally for a few seconds,
pauses,
and remains beside the product.

Keep the action slow, clean, restrained, and realistic.

Do not make the pet push, drag, overturn, bite, scratch, or damage the product.

PRODUCT PHYSICS:

The product must remain fully supported and stable.

Show realistic:

floor contact,
weight,
friction,
contact shadows,
material reflections,
food movement,
water surface tension,
and minor vibration only when physically appropriate.

Water may show subtle ripples caused by natural drinking.

A fountain may maintain a gentle stable flow only when this function is clearly part of the exact product.

Do not create:

uncontrolled splashing,
overflow,
leakage,
floating bowls,
moving reservoirs,
fake water,
or food that changes shape or quantity unnaturally.

PET MOVEMENT:

Show realistic:

paw placement,
joint movement,
body weight,
balance,
head motion,
tongue or mouth movement when naturally visible,
fur response,
breathing,
and posture.

The pet's muzzle must make correct physical contact with the food or water area.

The animal must not pass through the product.

CAMERA ACTION:

Begin with the exact framing of the uploaded first frame.

Use low pet-level or low three-quarter smartphone framing.

Perform a very slow handheld push-in of only a few centimeters while keeping the product clearly visible.

Add only subtle natural camera movement:

minor breathing drift,
small framing corrections,
and restrained tracking of the pet's head movement.

Maintain the same visible product side and camera axis.

Do not orbit around the product.

Do not zoom aggressively.

Do not change lenses.

Do not move close enough to force reconstruction of hidden components.

BRAZILIAN HOME:

Preserve or create a real Brazilian middle-class comfortable home consistent with the first frame.

Use a clean kitchen corner, service area, pantry support area, dining corner, or dedicated pet feeding area with:

finished neutral walls,
clean ceramic or porcelain flooring,
practical cabinetry,
proportional furniture,
natural daylight,
subtle household objects,
and restrained decoration.

The environment must feel warm, organized, functional, lived-in, and naturally attractive without appearing luxurious or staged.

CAMERA QUALITY:

Shot as if recorded with an iPhone 15 Pro or a similar modern smartphone.

24mm to 28mm equivalent main camera.

Standard smartphone video mode.

Broad natural focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle sensor texture.

Restrained smartphone processing.

No portrait mode.

No cinematic artificial depth simulation.

No strong bokeh.

No artificial subject isolation.

No excessive motion blur.

No fake HDR.

TEMPORAL CONSISTENCY:

Every frame must preserve the same:

product identity,
product geometry,
materials,
colors,
branding,
printed text,
pet identity,
pet anatomy,
food or water state,
room layout,
floor texture,
lighting direction,
white balance,
focus behavior,
and exposure.

The product must not morph.

The pet must not morph.

The environment must not change, multiply, disappear, or transform.

CLEAN FRAME:

Legitimate text and branding may remain only when physically printed on the exact product.

Outside the product itself, generate no:

floating text,
captions,
symbols,
icons,
stickers,
social-media interface,
camera controls,
price graphics,
promotional banners,
or watermarks.

AUDIO:

Natural synchronized home ambience only.

For food interaction, include:

soft eating sounds,
subtle bowl contact,
gentle pet breathing,
and quiet room tone.

For water interaction, include:

soft lapping sounds,
subtle water movement,
gentle pet breathing,
and quiet room tone.

For a fountain, include a faint continuous water sound only when physically appropriate.

No dialogue.

No voice-over.

No music.

No artificial sound effects.

NEGATIVE CONSTRAINTS:

no altered product,
no duplicated product,
no extra bowls,
no invented components,
no product morphing,
no floating product,
no moving reservoir,
no spilled water without cause,
no overflow,

no leakage,
no fake food,
no impossible water flow,
no deformed pet,
no extra paws,
no missing limbs,
no distorted muzzle,
no pet morphing,
no aggressive interaction,
no scene change,
no CGI,
no 3D render,
no collage effect,
no subtitles,
no captions,
no text overlays,
no watermark,
no borders,
no glitch effects.

FINAL OUTPUT:

One continuous 8-second ultra-realistic vertical iPhone-style video of the same real domestic pet naturally eating from or drinking from the exact attached feeder, bowl, fountain, or water dispenser inside a comfortable Brazilian middle-class home, with stable product identity, realistic food or water behavior, accurate animal anatomy, and no visual drift.

Copiar prompt de vídeo — Use the uploaded image as the exact first frame.

Realistic POV style product video, first-person point of view.

Looking from a natural height inside a bright modern kitchen. The exact two-tier black metal fruit basket with wooden handle from the reference image is placed on top of the kitchen counter and sink area, centered in the frame.

The camera slowly and gently shows different angles of the fruit basket with very subtle movement, highlighting the two tiers, the wooden handle and the arrangement of the fruits, without touching or removing anything.

PRODUCT LOCK (absolute rules):

- Use the exact fruit basket from the reference image with 100% fidelity.
- Do not change shape, size, proportions, colors, metal structure, wooden handle or any visible detail.
- Do not move, remove or alter any of the fruits.
- Do not redesign, stylize, improve or reinterpret the product in any way.
- The basket and all fruits must remain perfectly identical in every frame.

Style: ultra-photorealistic, clean commercial kitchen video, soft natural lighting, high detail, authentic customer POV looking at the product.

8-second vertical video (9:16). Camera stays mostly stable with only very subtle natural handheld movement. No text, no subtitles, no watermark. No hands in the frame.

Crianças | Roupas Infantil Na Cama

Copiar prompt de imagem — ## UNIVERSAL IMAGE PROMPT — POV ON BED / KIDS BEDROOM / CHILD CLOTHING / ONE VISIBLE ADULT FEMININE HAND / EXTREME REALISM / NO CHILDREN

Create an ultra-photorealistic vertical POV image (9:16) using the attached reference image as the exact child clothing source.

Preserve the clothing item with maximum fidelity: same garment type, same shape, same proportions, same size, same color, same print, same stitching, same sleeves, same collar, same hem, same fabric texture, same folds, and same design identity.

IMPORTANT NATURALITY RULE:

This must feel like a real top-view or near top-view photo taken naturally in a bedroom.

The garment must lie naturally on the bed with realistic gravity, folds, and softness.

Show only ONE visible adult feminine hand.

The hand may gently smooth, hold, or touch one area of the garment naturally.

Do not create two hands.

Do not flatten the garment into a rigid shape.

Do not create artificial symmetry.

Allow realistic textile drape and natural imperfection.

CHILD / BABY VISIBILITY SAFETY RULE:

No real child, baby, toddler, infant, teenager, or underage person may appear anywhere in the image.

Do not generate children or babies on the bed, in the room, background, mirror, photo frame, poster, decoration, packaging, or any visible part of the environment.

If any packaging or object contains a baby or child image, blur or softly obscure only that child/baby representation.

Scene: a real comfortable Brazilian middle-class kids bedroom or nursery-style room, cozy, beautiful, organized, warm, and child-friendly, but with no child or baby present. The garment is laid naturally on a bed.

KIDS ROOM STYLE:

- real Brazilian comfortable middle-class home
- neutral and warm child-friendly room
- bedding, pillows, rug, plush items, books, light wood furniture, curtains, and subtle décor
- cozy and caprichoso
- no visible minors
- no poverty look
- no unfinished construction
- no dirty cement floor
- no broken walls
- no improvised bedroom
- no abandoned room

HUMAN REALISM RULE:

The final image must look like a real high-definition photograph.

The visible hand must look adult, real, and human, with pores, skin texture, natural nails, realistic joints, and believable contact with the fabric.

The garment must show realistic fibers, folds, weight, softness, and surface detail.

The bed linens must look real, with tactile texture and natural pressure folds.

Composition:

- top-down or slightly angled POV shot
- product is the hero
- one visible adult feminine hand only
- realistic bed context
- natural asymmetry
- no rigid styling

Camera:

- iPhone 15 Pro Max realism
- natural smartphone perspective
- vertical 9:16
- sharp focus on garment
- realistic bedding depth
- no blur
- no beauty softness

Lighting:

- soft natural daylight or warm room light
- balanced exposure
- realistic shadows
- believable highlights on fabric and bedding
- no harsh flash

Negative prompt:

rigid garment, flattened garment, symmetrical layout, altered color, altered print, stiff fabric, deformed hands, extra fingers, child hands, baby hands, visible child, visible baby, visible minor, child photo

without blur, baby photo without blur, child packaging without blur, baby packaging without blur, fake bedding, blurry product, soft image, CGI, AI artifacts, poor room, messy low-quality room, oversaturated colors, watermark

Copiar prompt de vídeo sem fala — UNIVERSAL VIDEO PROMPT — CHILD CLOTHING ON BED / KIDS BEDROOM POV / MAX FIDELITY / REAL SCALE / BRAZILIAN PHOTOREALISM

Use the attached child clothing image as the absolute visual reference. Create an ultra-photorealistic vertical POV video (9:16) showing the EXACT child clothing item naturally placed on a bed inside a real Brazilian nursery or kids bedroom.

The garment must remain visually identical to the reference during the entire video: same type, shape, size, proportions, color, print, stitching, collar, sleeves, hem, fabric texture, folds and visual identity.

CHILD / BABY FULL PRIVACY BLUR RULE:

No real child, baby, toddler, infant, teenager or underage person may appear clearly anywhere in the video.

Do not generate visible minors on the bed, in the room, background, mirror, poster, frame, shelf, packaging, decoration or any visible area.

If any child or baby appears on packaging, tags, posters, frames, books, decorations or printed material, completely blur or privacy-mask the entire child/baby representation in every frame.

Do not blur the garment or the rest of the scene.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO BED SHOT:

Show the exact garment naturally resting on the bed. The clothing is the hero, clearly visible, correctly scaled and physically believable.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of fabric texture, stitching, print, sleeve, collar, hem, seam or material detail.

3s–4.5s — NATURAL HAND SHOT:

Cut to one adult feminine hand gently smoothing or touching one area of the garment. Do not use two hands. Do not stretch or flatten the garment unnaturally. The fabric must move softly and realistically.

4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing folds, fabric thickness, print clarity, seam quality, softness, textile fibers and bedding contact.

6s–8s — FINAL HERO SHOT:

Return to a final clean POV shot of the garment on the bed, with the kids bedroom context visible and the product sharp.

SCENE:

Real comfortable Brazilian middle-class nursery or kids bedroom. Cozy, organized, beautiful, neutral tones, soft wood furniture, bed, crib, shelves, baskets, rug, curtains, books, plush toys and subtle decor may appear naturally. No visible children or babies.

CAMERA:

Vertical 9:16, iPhone 15 Pro Max rear camera look, natural smartphone top-view or slightly angled POV, sharp garment focus, realistic bedding depth, no excessive blur, no artificial softness.

LIGHTING:

Real natural daylight from a bedroom window or soft practical room light, balanced exposure, realistic shadows and natural highlights on fabric, bedding, wood and room decor.

AUDIO:

No dialogue. No voiceover. Natural quiet room ambience, subtle fabric movement and soft hand contact sounds.

TECHNICAL PARAMETERS:

model: veo-3
length: 8 seconds
resolution: 1080x1920
framerate: 24fps
aspect_ratio: 9:16

STRICT RULES:

Mandatory B-roll cuts.
Keep the exact garment consistent in every shot.
Maintain real-world scale.
Do not alter color, print, fabric, proportions or details.
Do not generate visible children or babies.
Blur the entire child/baby representation if it appears on any printed material.

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered garment, changed print, changed color, wrong scale, stiff fabric, fake folds, floating garment, two hands, extra fingers, deformed hand, visible child, visible baby, visible toddler, visible teenager, visible minor, child photo not fully blurred, baby photo not fully blurred, child packaging not fully blurred, baby packaging not fully blurred, CGI, 3D render, AI artifacts, poor bedroom, unfinished construction, dirty cement floor, broken wall, improvised room, poverty look, blurry garment, soft image, oversaturated colors, watermark

[hjuuLrhoCyY&width=560&quality=70&resize=contain](#)

Copiar prompt de imagem – Use the attached garment image as the sole and authoritative product reference.

Before generating the scene, visually inspect the reference and identify:

- the exact number of physically distinct garments;
- whether the product is a single garment, coordinated set, kit, dress, jumpsuit, top, bottom or multiple similar items;
- the exact colors and their placement;
- the exact prints, illustrations, logos, embroidery and written elements;
- the garment silhouette, neckline, sleeves, straps, waistband, hem, pockets, buttons, bows, zippers, drawstrings, cuffs and seams;
- the apparent textile type, fabric weight, weave, knit, ribbing, softness, elasticity and drape.

Create an ultra-photorealistic vertical 9:16 overhead product photograph showing exactly the garment or garments from the attached reference laid naturally on a real bed.

PRODUCT FIDELITY LOCK:

The attached reference is the only source of truth for the product.

Reproduce every garment with exact fidelity.

Preserve:

- exact quantity of garments;
- exact colors;
- exact color placement;
- exact print position;
- exact print scale;
- exact logos and written elements;
- exact embroidery;
- exact buttons;
- exact pockets;
- exact bows;
- exact seams;
- exact trims;
- exact neckline;
- exact sleeves;
- exact waistband;
- exact hems;
- exact garment proportions;
- exact relationship between all parts of the outfit.

Do not redesign, reinterpret, beautify, simplify or modernize the clothing.

Do not add pieces that are not visible in the reference.

Do not remove pieces that are visible.

Do not duplicate one garment to create a kit.

Do not change one color into another.

Do not change the position, size or design of any print.

QUANTITY LOGIC:

If the reference contains one garment, show only one garment.

If the reference contains a coordinated set, show every real component of that set exactly once.

If the reference contains a kit of several garments, show every physically distinct garment exactly once.

If the reference contains three blouses, show exactly three blouses.

If the reference contains one blouse and one pair of shorts, show exactly one blouse and one pair of shorts.

Never create an additional matching garment that does not exist in the reference.

Never omit a real component.

SCENE ADAPTATION:

Infer the visual audience from the clothing design itself.

For a visually feminine product, use a warm neutral bedroom with one or two subtle feminine accents.

For a visually masculine product, use a warm neutral bedroom with restrained and subtle masculine accents.

For an unisex or ambiguous product, use a completely neutral bedroom.

For children's clothing, use an innocent, cheerful, authentic and age-appropriate atmosphere.

Avoid exaggerated gender stereotypes.

Never use an environment color that changes the perceived color of the clothing.

BEDROOM ENVIRONMENT:

A real residential bedroom, warm, clean and softly lived-in.

Use a real bed with a matte cotton or linen bedspread in a pale neutral color selected to create natural contrast with the garment.

Include:

- subtle wrinkles in the bedding;
- realistic fabric compression beneath the garments;

- believable bed seam lines;
- natural contact shadows;
- small environmental imperfections;
- one or two discreet decorative elements near the edge of the frame;
- realistic furniture scale;
- natural object placement.

Possible subtle background objects:

- a small bedside table;
- a neutral lamp;
- a discreet cushion;
- a small decorative item appropriate to the product category;
- a softly blurred curtain or wall section.

Do not create a sterile showroom.

Do not create excessive decoration.

Do not place objects over the garments.

GARMENT PLACEMENT:

Lay the clothing flat on the bed while preserving realistic fabric relaxation.

The garment must not look rigid, inflated or unnaturally symmetrical.

Use:

- subtle natural folds;
- realistic sleeve placement;
- believable waistband positioning;
- realistic edge curling only where physically plausible;
- correct spacing between kit components;
- enough separation to identify every item;
- complete visibility of all important prints and details.

For a coordinated set, arrange the pieces as one complete look.

For a kit, arrange the garments in a clean grid, gentle fan or balanced commercial composition.

Do not overlap garments in a way that hides important information.

FABRIC PHYSICS:

Render the fabric according to what is visible in the reference.

Show:

- visible textile fibers;
- realistic weave or knit structure;
- natural fabric grain;

- realistic stitching depth;
- believable thread thickness;
- seam tension;
- natural fold memory;
- garment weight;
- realistic drape;
- realistic contact between clothing and bedding;
- realistic material thickness;
- subtle shadows inside folds.

If the fabric appears cotton, preserve a matte natural cotton finish.

If the fabric appears ribbed, preserve the rib structure.

If the fabric appears knitted, preserve the knit loops.

If the fabric appears denim, preserve realistic denim grain.

If the fabric appears soft and elastic, show realistic softness and moderate elasticity without turning it into rubber.

CAMERA:

True top-down overhead camera.

The camera is positioned directly above the bed at approximately 90 degrees.

Vertical 9:16 social-commerce framing.

High-quality smartphone main camera realism.

Approximately 26mm equivalent focal behavior.

Minimal lens distortion.

Accurate garment geometry.

The complete product must remain inside the safe frame.

No visible photographer.

No visible body.

No reflections of people.

LIGHTING:

Soft natural daylight entering from one side through a lightly diffused window.

Subtle ambient room bounce.

Neutral white balance.

Accurate product colors.

Realistic directional shadows.

Soft highlight rolloff.

Natural dynamic range.

The lighting must reveal fabric texture without changing the actual color of the product.

Avoid:

- orange color cast;
- blue color cast;
- harsh direct sunlight;
- excessive glow;
- blown highlights;
- artificial studio appearance;
- dramatic shadows hiding product details.

PHOTOGRAPHIC REALISM:

The image must look indistinguishable from a real vertical smartphone photograph created for an authentic fashion product demonstration.

Include:

- subtle photographic grain;
- natural sensor response;
- realistic textile-to-bed contact;
- slight environmental imperfections;
- realistic shadow gradients;
- believable optical sharpness;
- natural depth behavior.

STRICT NEGATIVE CONSTRAINTS:

No person.

No model.

No mannequin.

No hands.

No hanger unless it is part of the actual reference.

No duplicated clothing.

No missing clothing.

No invented accessories.

No added shoes.

No added handbag.

No added matching garment.

No altered colors.

No altered prints.

No mirrored text.

No illegible logos.

No warped seams.

No melted fabric.

No floating clothing.

No fused garments.

No impossible folds.

No inflated garment.

No paper-flat clothing.

No CGI.

No 3D render.

No plastic fabric.

No artificial catalog cutout appearance.

No price.

No promotional text.

No watermark.

No application interface.

No social-media icons.

Copiar prompt de vídeo sem fala – Vídeo editorial vertical de moda com cinco cenas B-roll sofisticadas em oito segundos.

A fotografia de referência será usada como frame inicial e como trava absoluta de continuidade durante todo o vídeo.

A roupa é o único protagonista.

Nenhuma peça pode mudar de posição, formato, quantidade, proporção, dobra, textura, costura, cor, estampa, orientação ou relação espacial.

Todos os elementos já presentes na composição devem permanecer exatamente iguais.

O dinamismo, o magnetismo e a percepção de valor devem ser criados exclusivamente pela câmera, pelo enquadramento, pelo ritmo dos cortes e pela maneira como os melhores detalhes do produto são revelados.

O resultado deve parecer uma campanha editorial premium de moda: elegante, refinada, tátil, sofisticada e visualmente desejável.

Copiar prompt de vídeo sem fala — Create an ultra-photorealistic vertical image (9:16) showing the EXACT product from the attached reference image being presented to the camera in a natural first-person POV. The scene must feel human, real, spontaneous, and believable, as if someone is simply showing the product to the camera with one hand.

ABSOLUTE PRIORITY:

The attached product must be reproduced with maximum fidelity and zero redesign. Preserve exactly all visible characteristics from the reference image:

- packaging shape
- bottle / jar / box / container structure
- label design
- typography
- colors
- logo placement
- cap / lid / nozzle / pump details
- material finish
- reflections
- transparency
- proportions
- print alignment
- all visual details

Do not simplify, reinterpret, beautify, replace, invent, or alter any part of the product. The final product must look exactly like the attached reference.

MAIN COMPOSITION:

- true POV / first-person feeling
- only ONE hand visible
- no second hand
- no full person
- no face
- no body
- no selfie framing
- no person "showing" the product in the scene
- only the hand and, if necessary, a small part of the forearm may appear
- the product is held naturally and shown directly to the camera
- product close to the camera, clearly visible, hero of the frame
- label/front side turned toward the camera whenever physically possible
- framing should look organic and human, not staged like a studio ad

HAND / PRODUCT REALISM:

- grip must be anatomically correct
- hand posture must match the real size and shape of the product

- scale must be accurate: the product cannot look too big or too small in the hand
- fingers must wrap around the product naturally
- skin texture must be realistic
- nails natural
- no tattoos unless present in the reference or explicitly requested
- no rings, watches, bracelets, or accessories unless necessary and subtle
- never generate extra fingers
- never generate multiple hands
- never deform the hand or forearm

ENVIRONMENT:

Place the scene in a realistic, functional, believable environment that matches the product category naturally, but keep the environment secondary. The AI should infer the ideal setting based on the product itself.

Examples:

- perfume / skincare / cosmetics → vanity, bathroom, bedroom dresser
- food / drink / supplement → kitchen, dining table, pantry, desk
- tech / electronics → desk, office, bedroom setup
- fashion accessory → wardrobe area, mirror area, neutral indoor setting
- home / cleaning product → kitchen, laundry area, utility space

The environment must be:

- photorealistic
- natural
- functional
- clean but lived-in
- believable
- softly secondary
- never luxurious showroom
- never empty studio
- never fake CGI background

VISUAL STYLE:

- ultra photorealistic
- natural smartphone realism
- authentic iPhone-style look
- slight shallow depth of field
- sharp focus on the product and main label
- natural lighting or realistic indoor light
- realistic reflections and shadows
- subtle natural grain allowed
- organic social-media realism
- not overly polished
- not artificial advertising style

CAMERA:

- iPhone 15 Pro Max rear camera look
- 24mm wide-angle feel
- handheld POV realism
- natural perspective
- slight edge distortion acceptable
- vertical 9:16 composition

FOCUS HIERARCHY:

1. exact product fidelity
2. label consistency and readability
3. correct hand anatomy
4. correct product-to-hand proportion
5. realistic environment coherence
6. natural human POV feeling

STRICT RULES:

- use the attached product as the exact visual reference
- do not change any product features
- do not create a generic version
- do not replace the packaging
- do not hide the main label
- do not distort text
- do not create fake branding
- do not show multiple hands
- do not show the person
- do not create a mirror selfie
- do not crop the product awkwardly
- do not oversaturate colors
- do not stylize
- do not turn the image into CGI or illustration

ANTI-BUG / NEGATIVE PROMPT:

multiple hands, two hands, extra fingers, extra limbs, duplicated hand, deformed hand, broken anatomy, warped fingers, melted skin, visible face, visible person, visible body, selfie pose, mirror selfie, altered packaging, changed label, wrong logo, fake text, unreadable text, distorted typography, changed colors, changed cap, wrong material, oversized product, undersized product, floating product, unrealistic grip, blurry product, low quality, CGI, 3D render, illustration, cartoon, studio background, luxury showroom, fake reflections, overprocessed image, harsh flash, overexposed highlights, cluttered background, inconsistent scale, warped container, bent bottle, stretched packaging

OUTPUT GOAL:

Generate a flawless universal POV image where a single realistic hand naturally shows the exact attached product to the camera, preserving maximum fidelity, consistency, correct scale, and ultra-realistic detail, with zero margin for error.

Ponto de vista | jovem Cabide

Copiar prompt de vídeo sem fala - UNIVERSAL POV VIDEO PROMPT — CLOTHING ON HANGER / NEVER LET GO

Subject:

A clothing item hanging on a hanger, being shown directly to the camera in a natural first-person POV. The clothing remains on the hanger during the entire video. If a reference garment is provided, the clothing must match it exactly, preserving color, shape, print, fabric, proportions, collar, sleeves, details, and overall appearance with maximum fidelity.

Background:

A realistic indoor environment appropriate for showing clothing, such as a bedroom, closet area, dressing space, clothing store, or simple functional fashion environment. The background should be real, softly blurred, clean, believable, and secondary to the clothing.

Action:

First-person POV video. One or two realistic hands hold the hanger naturally and keep holding it during the entire video. The hanger is NEVER released. The clothing is simply presented to the camera with subtle, smooth, human movement. The person gently lifts, slightly adjusts, and softly repositions the hanger to show the front, texture, fit, and details of the clothing. The movement should feel organic, stable, and realistic, as if someone is calmly showing the piece to the viewer. The clothing must remain clearly visible throughout the clip. Do not fold it, do not remove it from the hanger, do not place it down, and do not put it back on a rack.

Style:

Ultra-photorealistic vertical video, authentic smartphone POV, human and natural movement, realistic fabric behavior, soft depth of field, organic TikTok-style product presentation, clean but lived-in environment, natural commercial realism, no exaggerated cinematic effects, no fake advertising look.

Dialogue:

No dialogue. No voiceover. No talking.

Background sounds:

Soft room ambience, subtle fabric movement, light hanger handling sounds, gentle clothing rustle.

Music:

Minimal, elegant, subtle background music, low volume, modern and clean.

Technical parameters:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

Strict rules:

- The clothing must stay on the hanger at all times
- Never release the hanger
- Never drop the hanger
- Never place the clothing on a surface
- Never put the hanger back on a rack during the clip
- Never remove the garment from the hanger
- Only present the clothing to the camera
- Keep the clothing centered and readable
- Maintain natural human hand motion
- If reference clothing is attached, preserve it exactly with maximum fidelity

Negative prompt:

letting go of hanger, hanger falling, removing clothing from hanger, folding clothing, placing clothing on table, hanging it back on rack, extra hands, extra fingers, deformed hands, shaky movement, robotic movement, visible face, visible person, full body, distorted clothing, altered garment, fake fabric, blurry video, low quality, messy background, CGI, cartoon, 3D render, unrealistic motion, duplicated objects, clothing out of frame, cropped garment, harsh lighting, oversaturated colors

Looking from a natural height inside a bright and colorful toy store. The exact toy from the reference image is placed on a clean store display or shelf, centered in the frame.

The store environment is cheerful, well-lit and inviting, with soft blurred shelves and colorful elements in the background. Natural retail lighting with gentle reflections on the product. Shallow depth of field.

PRODUCT LOCK (absolute rules):

- Use the exact toy from the reference image with 100% fidelity.
- Do not change shape, size, proportions, colors, materials, lights, details, logos, text or any visible element.
- Do not redesign, stylize, improve or reinterpret the toy in any way.
- The product must remain perfectly identical and clearly identifiable.

Style: ultra-photorealistic, clean commercial retail photography, bright and playful atmosphere, high detail, 8k quality, authentic customer POV looking at the toy inside the store.

Copiar prompt de vídeo sem fala – Use the uploaded image as the exact first frame.

Realistic POV style product video, first-person point of view.

Looking from a natural height inside a bright and colorful toy store. The exact scooter from the reference image is placed on a clean white display table, centered in the frame.

The store environment is cheerful, well-lit and inviting, with soft blurred shelves full of colorful toys in the background. Natural retail lighting with gentle reflections on the product. Shallow depth of field.

A seller's hand enters the frame and gently touches the scooter — lightly running fingers along the handlebar, touching the seat, and pointing to the glowing LED wheels, as if explaining and presenting the product to the customer.

PRODUCT LOCK (absolute rules):

- Use the exact scooter from the reference image with 100% fidelity.
- Do not change shape, size, proportions, colors, materials, lights, details, logos, text ("SCOOTER", "RDE") or any visible element.
- Do not redesign, stylize, improve or reinterpret the toy in any way.
- The product must remain perfectly identical and clearly identifiable in every frame.
- The glowing LED wheels must keep the exact same blue-purple light effect.

Style: ultra-photorealistic, clean commercial retail video, bright and playful atmosphere, high detail, authentic customer POV looking at the toy inside the store.

8-second vertical video (9:16). Camera stays stable with only very subtle natural handheld movement. No text, no subtitles, no watermark.

UNIVERSAL UGC VIDEO PROMPT — PRODUCT IN HAND / NEVER RELEASE

Create an ultra-photorealistic vertical UGC video of a female influencer holding the exact product from the attached reference image in one hand while speaking in Brazilian Portuguese. Preserve the product with maximum fidelity: same packaging, label, colors, logo placement, shape, cap, material, proportions, and all visible details.

The influencer holds the product naturally close to the camera and NEVER releases it during the entire video. The product must stay visible, stable, correctly scaled to the hand, and consistently the same in every frame. Natural human movement, authentic UGC style, realistic skin texture, correct hand anatomy, casual home or lifestyle environment, soft natural lighting, vertical 9:16, smartphone realism.

Anti-crash / negative prompt: product disappearing, product leaving frame, product passing through hand, floating product, hand clipping through product, altered packaging, changed label, fake logo, distorted text, product morphing, wrong scale, extra fingers, deformed hand, multiple hands, robotic movement, blurry product, CGI, cartoon, low quality, harsh lighting.

Technical parameters: model: veo-3, length: 8 seconds, resolution: 1080x1920, framerate: 24fps, aspect_ratio: 9:16.

DIÁLOGO EM PORTUGUES DO BRASIL: [ESCREVA A FALA DA SUA INFLUENCER AQUI]

Crianças Ugc | No quarto Infantil Produto Ou Roupas

Copiar prompt de imagem - **## UNIVERSAL IMAGE PROMPT — KIDS ROOM UGC / INFLUENCER + PRODUCT OR CLOTHING / ONE VISIBLE HAND BY DEFAULT / EXTREME REALISM / NO CHILDREN**

Create an ultra-photorealistic vertical UGC image (9:16) using two attached reference images.

Reference image 1 = the influencer identity source.

Reference image 2 = the exact product or child clothing item to be presented.

Preserve the influencer with maximum fidelity: same face, same skin tone, same hair, same body proportions, same natural asymmetry, same pores, same skin microtexture, same realistic adult hands, same nails, same eye realism, same mouth realism, and same authentic human appearance.

Preserve the product from reference image 2 with maximum fidelity: same shape, same size, same proportions, same color, same print, same material, same packaging, same texture, same stitching or structural details, and same visible design identity.

IMPORTANT NATURALITY RULE:

This must feel like real UGC content, not a rigid commercial composite and not an AI render.

The influencer must pose naturally with slight asymmetry, relaxed shoulders, natural elbow bend, and believable posture.

Do not create mannequin stiffness.

Do not create frozen expression.

Do not create exaggerated symmetry.

Use only ONE visible adult hand by default.

PRODUCT INTERPRETATION RULE:

- if reference image 2 is a clothing item, place it on a realistic hanger and have the influencer present it with one visible adult hand holding the hanger naturally, allowing the garment to hang with real gravity

- if reference image 2 is another kind of product and it can realistically be held with one hand, hold it naturally with one visible adult hand

- if the product is too large for one-handed presentation, it may rest naturally on a bed, shelf, dresser, or surface while one visible adult hand lightly supports or indicates it

- never force a rigid grip

- never force unnatural symmetry

- the product must remain clearly visible and proportional

CHILD / BABY VISIBILITY SAFETY RULE:

No real child, baby, toddler, infant, teenager, or underage person may appear anywhere in the image.

Do not generate children or babies in the room, background, bed, crib, mirror, photo frame, poster, packaging, decoration, shelf, screen, or any visible part of the environment.

If any packaging, tag, room object, poster, or background object contains a baby or child image, blur or softly obscure only that child/baby representation while preserving the rest of the product and scene.

Scene: a real comfortable Brazilian middle-class kids bedroom or nursery-style room, unisex, cozy, beautiful, organized, joyful, and human, but with no children or babies present. The room must feel warm and caprichoso, with soft neutral tones, wood details, light décor, and subtle childlike elements.

KIDS ROOM STYLE:

- real Brazilian comfortable middle-class home
- unisex infant or child bedroom aesthetic
- beige, off-white, sand, greige, light gray, soft warm wood tones
- subtle toys, books, plush items, baskets, rug, curtains, shelves, lamp, crib or bed, dresser or small furniture may appear naturally
- no visible minors
- clean and lived-in
- no poverty look
- no unfinished construction
- no dirty cement floor
- no broken walls
- no improvised room
- no abandoned room
- no fake showroom

HUMAN REALISM RULE:

The final image must look like a real high-definition photograph captured with iPhone 15 Pro Max clarity and fully human realism.

Skin must have visible pores, microtexture, natural tonal variation, realistic shine, coherent shadows, and delicate imperfections.

Hair must have individual strands, coherent roots, natural volume, real depth, and realistic shine.

Eyes must have life, moisture, coherent reflections, and true human expression.

Mouth and lips must feel natural and organic.

Hands and anatomy must be physically plausible.

Clothing or product materials must look tactile, sharp, and real.

Composition:

- influencer is the main human subject
- product or clothing is the main commercial focus after her face
- one visible adult hand by default
- natural asymmetry
- no rigid frontal mannequin pose
- real UGC framing

Camera:

- iPhone 15 Pro Max realism
- vertical 9:16
- natural smartphone perspective
- sharp focus on influencer and item
- realistic depth
- no fake studio look
- no blur
- no oversmoothing

Lighting:

- soft natural bedroom daylight or warm practical room light
- balanced exposure
- realistic shadows
- realistic highlights on skin, fabric, product surfaces, wood, and décor
- no harsh flash
- no fake glow

Negative prompt:

rigid pose, symmetrical pose, mannequin look, frozen expression, wrong product, wrong clothing, altered color, changed print, stiff fabric, warped packaging, floating object, extra fingers, broken hands, child hands, baby hands, visible child, visible baby, visible minor, child face, baby face, child packaging without blur, baby packaging without blur, plastic skin, blurry product, soft image, CGI, AI artifacts, poor bedroom, unfinished construction, dirty cement floor, broken wall, improvised room, abandoned room, poverty look, cluttered scene, watermark, text overlays

Copiar prompt de imagem – UNIVERSAL IMAGE PROMPT — BEDROOM FURNITURE / MAX FIDELITY / BRAZILIAN PHOTOREALISM / REAL SCALE

Create an ultra-photorealistic vertical image (9:16) of the EXACT furniture product from the attached reference image, placed inside a real Brazilian bedroom environment. The furniture must preserve maximum fidelity to the reference and appear in correct real-world scale, proportion, angle, and tactile presence.

ABSOLUTE PRIORITY:

Use the attached furniture image as the single source of truth.

Do not redesign, reinterpret, beautify, simplify, replace, or alter the product in any way.

PRESERVE EXACTLY:

- exact furniture type
- exact structure and geometry
- exact dimensions and proportions
- exact color
- exact wood tone / MDF tone / paint finish
- exact texture
- exact handles
- exact doors / drawers / panels / legs / headboard / mirror / top surface
- exact edges and thickness
- exact materials and finish
- exact visible details
- exact design language
- exact front and side proportions

CRITICAL REAL SCALE RULE:

The furniture must appear in realistic full size inside the room.

It must respect real-world human scale and real bedroom proportions.

Do not make the product miniature.

Do not make the product oversized beyond realistic room scale.

The AI must understand the object as a real functional piece of furniture with physical volume and believable dimensions.

Examples:

- wardrobe must look like a full real wardrobe with correct height relative to ceiling and walls
- bed must look like a real bed with correct mattress and room occupation
- vanity must have believable height and practical use scale
- desk must have realistic legroom and tabletop proportion
- chest / baú must have believable physical volume
- furniture must feel tangible, solid, and physically present

SCENE:

Place the furniture in a real medium-standard Brazilian bedroom.

The room must feel authentic, functional, lived-in, organized, and believable.

BRAZILIAN BEDROOM STYLE:

- real Brazilian middle-class home
- functional bedroom layout
- clean but not sterile
- neutral wall colors
- realistic flooring such as ceramic tile, laminate wood, or porcelain
- practical decor
- subtle everyday objects

- believable spacing between walls and furniture
- no luxury mansion look
- no foreign showroom look
- no empty studio look

AUTO-CONTEXT ROOM PLACEMENT:

The AI should place the furniture in the correct natural position according to its function:

- wardrobe against a wall
- bed centered or aligned naturally in the room
- bedside table next to the bed
- vanity near a wall or mirror area
- desk near a wall, window, or work corner
- trunk / baú at the foot of the bed or in a logical bedroom position

COMPOSITION:

- product is the hero of the image
- show the furniture clearly and fully when possible
- natural iPhone framing
- slightly wide but realistic perspective
- enough surrounding room visible to confirm real scale
- no exaggerated cinematic angle
- no forced dramatic perspective
- no extreme close-up
- no misleading lens distortion
- room and furniture must feel physically coherent

CAMERA STYLE:

- iPhone 15 Pro Max rear camera look
- 24mm to 26mm realistic wide-angle feel
- handheld or naturally stabilized smartphone photo aesthetic
- ultra-real smartphone realism
- natural perspective
- no excessive lens distortion
- high detail
- no soft fake blur
- no studio rendering feel

LIGHTING:

- real natural daylight
- window light entering the room naturally
- soft and believable shadows
- balanced exposure
- realistic highlights on wood, MDF, metal, mirror, glass, or fabric
- no harsh flash
- no overexposed windows
- no artificial studio lighting
- no HDR exaggeration

TEXTURE AND MATERIAL REALISM:

The furniture must look tactile and real:

- realistic wood grain
- realistic MDF finish

- realistic paint finish
- realistic fabric if upholstered
- realistic mirror reflections if present
- realistic metal handles
- realistic edges, joints, seams, drawer lines, and panel divisions
- no plastic fake surfaces
- no melted geometry
- no AI artifacts

FOCUS AND IMAGE QUALITY:

- sharp product details
- realistic microtexture
- no blur on the furniture
- no excessive background softness
- no beauty smoothing
- no waxy materials
- no fake CGI sharpness
- must look like a real iPhone photo taken in Brazil

STYLE:

- ultra photorealistic
- Brazilian home realism
- tactile and physical presence
- clean, natural, human, functional
- premium realism without looking like a 3D render
- no AI look
- no overprocessing

STRICT RULES:

- keep the exact furniture identity from the reference
- do not change the design
- do not change the color
- do not change the proportions
- do not invent drawers, mirrors, doors, handles, or panels
- do not alter dimensions
- do not stylize the product
- do not place it in a fake showroom
- do not create unrealistic room scale
- do not crop the product badly
- do not hide important parts of the furniture
- keep the furniture physically believable inside the room

NEGATIVE PROMPT:

wrong furniture design, altered product, changed proportions, wrong scale, miniature furniture, giant furniture, distorted geometry, fake wood texture, plastic texture, CGI, 3D render, cartoon, illustration, AI artifacts, unrealistic room, luxury showroom, empty studio, overexposed window, harsh flash, blurry furniture, soft image, smoothed details, warped drawers, warped doors, bent panels, fake reflections, inconsistent shadows, floating furniture, impossible perspective, cluttered room, distorted lens, low quality, oversaturated colors, bad anatomy of the room, unrealistic layout, missing parts, extra parts

Copiar prompt de vídeo sem fala — UNIVERSAL PRODUCT VIDEO PROMPT — WITH MANDATORY B-ROLL CUTS / MAX FIDELITY / ULTRAREALISM

Use the attached product image as the absolute visual reference. Create an ultra-photorealistic vertical video showing the EXACT product in a real, natural, functional environment.

The product must remain visually identical to the reference during the entire video: same shape, same color, same label, same packaging, same material, same proportions, same texture, same details. Do not redesign, replace, morph, simplify, or alter the product.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot. The video must be edited as a short premium product video with multiple natural cutaway shots.

VIDEO STRUCTURE WITH B-ROLL:

0s–1.5s — HERO SHOT:

Show the product clearly in its real environment. The product is centered or naturally framed, sharp, realistic, and visually dominant.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up macro shot showing the product material, surface texture, label, stitching, fabric, cap, edge, handle, finish, or construction detail depending on the product type.

3s–4.5s — B-ROLL FUNCTIONALITY SHOT:

Cut to the product being used naturally according to its real purpose. Show a real physical action: opening, closing, touching, applying, pouring, folding, lifting, pressing, sliding, wearing, placing, organizing, or interacting with the product in a human and believable way.

4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up angle showing a different important detail: texture, seam, logo, label, material reflection, edge finish, fabric movement, handle, drawer, zipper, sole, stitching, packaging, or tactile surface.

6s–8s — FINAL PRODUCT SHOT:

Return to a clean final hero shot of the product in the environment, stable and beautiful, reinforcing quality, functionality, and desire.

B-ROLL STYLE:

The B-roll must feel like a real edited product video, not one single camera movement.

Use smooth natural cuts, soft transitions, detail inserts, close-up shots, and functional cutaways.

The editing should feel premium, human, organic, and professional, but not robotic or artificial.

Every B-roll shot must show the same exact product with perfect consistency.

FUNCTIONALITY AUTO-INTERPRETATION:

The AI must infer the correct use based on the product category:

- clothing: touching fabric, showing seams, folding, hanging, wearing detail
- footwear: holding shoe, showing sole, stepping, leather or fabric texture
- furniture: opening drawers, showing handles, surface texture, real scale in room
- perfume/cosmetics: cap, bottle, label, application ritual, vanity details
- bedding/towels: smoothing fabric, folding, close-up of softness and stitching
- food/drink: opening, pouring, serving, label and packaging close-ups

- electronics: holding, turning on, tapping, ports, screen or button details
- home products: practical use in the correct environment

CAMERA:

Vertical 9:16, iPhone 15 Pro Max realism, natural handheld or stabilized movement, realistic depth of field, sharp product focus, close-up detail shots, smooth push-ins, no excessive blur, no fake cinematic effects.

STYLE:

Ultra-photorealistic, real human lifestyle realism, tactile physical interaction, visible microtexture, natural lighting, realistic shadows, authentic environment, no AI look, no CGI look, no robotic motion.

AUDIO:

No dialogue unless requested.

Use subtle real ambient sound and product handling sounds.

Optional soft premium background music, low volume.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

STRICT RULES:

- mandatory B-roll cuts
- do not make a single continuous shot
- product must stay consistent in every shot
- do not change product identity
- do not change label, shape, color, size, texture, material, or proportions
- all functional actions must match the real product
- movements must be human, natural, tactile, and believable
- keep the product visible and recognizable in every scene
- do not hide the product during transitions

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, missing B-roll, no cutaway shots, changed product, altered packaging, changed label, changed color, wrong scale, product morphing, inconsistent product between shots, fake branding, unreadable text, distorted typography, floating product, product disappearing, product leaving frame, object clipping through hands, robotic motion, stiff movement, extra fingers, deformed hands, bad anatomy, CGI, 3D render, cartoon, illustration, AI artifacts, blurry product, low quality, harsh flash, oversaturated colors, chaotic editing, glitch transitions, unrealistic overlays, fake texture, warped material, inconsistent lighting

POV | Meias na Cama

Copiar prompt de imagem – Use the attached sock image as the only and absolute visual reference for the product.

Create one ultra-realistic first-person POV smartphone photograph of the exact sock, pair of socks, or sock kit resting naturally on a real bed inside a comfortable Brazilian middle-class bedroom.

The image must look like a genuine photograph taken by a real person with one hand holding the smartphone while the other hand casually touches or gently adjusts the socks on the bed.

The socks must never be held in the air.

PRODUCT PRESERVATION:

Preserve the exact product shown in the attached reference:

same quantity,
same number of pairs,
same colors,
same prints,
same illustrations,
same pattern placement,
same sock type,
same length,
same cuff height,
same heel construction,
same toe construction,
same knit or plush texture,
same material thickness,
same proportions,
and the same visible construction details.

Do not redesign, recolor, shorten, lengthen, duplicate, remove, replace, simplify, or invent any product detail.

If the socks are plain, keep them plain.

If the socks contain prints, characters, symbols, or graphics, reproduce them faithfully as part of the fabric.

Do not reproduce logos, text, watermarks, labels, or branding from the reference background.

POV COMPOSITION:

The camera must clearly represent the photographer's own downward point of view.

The person is standing, sitting, or leaning naturally beside the bed while photographing the socks.

Show exactly one real human hand entering naturally from the lower or side edge of the frame.

The hand may:

lightly rest on one sock,
gently touch the fabric,
slightly move one cuff,
softly press part of the kit,

or casually separate two overlapping socks.

The hand must not lift the product.

The hand must not grip the socks.

The hand must not display them toward the camera.

The socks must remain supported by the bed throughout the image.

PHYSICAL FABRIC REALISM:

The socks must behave like real fabric resting on soft bedding.

Show:

organic folds,
irregular volume,
natural fabric collapse,
realistic thickness,
soft wrinkles,
subtle knit compression,
slight overlap,
uneven orientation,
natural heel volume,
relaxed toe shape,
and believable contact with the bed.

The bedding must compress subtly beneath the socks.

The socks must follow the small slopes, wrinkles, and softness of the blanket or bedspread.

Avoid perfectly flat socks.

Avoid rigid alignment.

Avoid identical angles.

Avoid catalog-style organization.

For a kit, preserve the exact quantity while arranging the socks naturally, with slight overlap and irregular spacing.

The kit must look casually placed on the bed, not professionally displayed.

HAND AND HUMAN REALISM:

The visible hand must be fully anatomical and physically believable.

Show:

five correct fingers,

natural finger lengths,
realistic joints,
correct thumb mechanics,
natural fingernails,
visible skin pores,
subtle wrinkles,
small tonal variations,
realistic wrist anatomy,
and believable contact pressure.

The fingers must create slight fabric compression only where they touch the socks.

Create accurate contact shadows and natural occlusion between the fingers, socks, and bedding.

The hand must not look pasted into the scene.

The hand, socks, bed, and room must share the same lighting, white balance, perspective, focus, sharpness, exposure, and photographic texture.

BRAZILIAN BEDROOM:

Use a real Brazilian middle-class comfortable bedroom.

The environment must feel:

clean,
organized,
functional,
comfortable,
warm,
lived-in,
human,
and naturally attractive.

Include realistic elements such as:

a real bed with ordinary bedding,
well-finished painted walls,
practical proportional furniture,
a simple wardrobe or dresser,
ceramic, porcelain, laminate, or light wood flooring,
natural window daylight,
and restrained everyday decoration.

The room must feel pleasant and well maintained without appearing luxurious.

No mansion.

No luxury showroom.

No artificial hotel room.

No generic foreign interior.

No fake studio.

No unfinished construction.

No excessive decoration.

No clutter.

CAMERA AND PHOTOGRAPHIC QUALITY:

Shot as if captured with an iPhone 15 Pro or a similar modern smartphone.

Use the 24mm to 28mm equivalent main camera.

Standard photo mode.

Natural handheld POV framing.

Broad natural focus.

Keep the hand, socks, bedding, and nearby room details visually connected.

Use:

true-to-life colors,
realistic smartphone exposure,
natural highlight rolloff,
subtle sensor texture,
balanced contrast,
authentic indoor sharpness,
and restrained computational photography.

No portrait mode.

No strong bokeh.

No artificial background blur.

No soft-focus haze.

No excessive HDR.

No beauty-filter smoothing.

No plastic skin.

No synthetic fabric texture.

ANTI-AI CONSTRAINTS:

No altered product.
No extra socks.
No missing socks.
No duplicated pairs.
No changed prints.
No changed colors.
No miniature socks.
No rigid fabric.
No floating product.
No perfectly aligned kit.
No fan arrangement.
No catalog layout.
No hand holding the socks in the air.
No second hand.
No extra fingers.
No missing fingers.
No fused fingers.
No mannequin hand.
No waxy skin.
No collage effect.
No mismatched lighting.
No CGI.
No 3D render.
No artificial studio appearance.
No text overlays.
No watermark.
No borders.

FINAL OUTPUT:

One ultra-realistic first-person iPhone-style photograph of the exact attached socks resting naturally on a real bed, with one anatomically correct human hand casually touching the fabric, organic folds, irregular volume, realistic bed compression, true material behavior, coherent lighting, natural smartphone perspective, and a comfortable Brazilian middle-class bedroom.

Copiar prompt de vídeo sem fala — Use the uploaded first frame as an immutable visual anchor and the only source of truth for the sock, pair of socks, or sock kit.

Create a 6-second ultra-photorealistic cinematic first-person POV smartphone video as a direct temporal continuation of the exact uploaded frame.

The socks must remain resting naturally on the bed throughout the entire video. One real human hand may only touch the product gently. The hand must never pick up, grip, lift, drag, fold, separate, rearrange, or present the socks toward the camera.

FORMAT:

Vertical 9:16.
6 seconds.
24 fps.

One continuous uninterrupted take.
No cuts.
No transitions.
No time jumps.
Natural iPhone-style smartphone video.

ABSOLUTE PRODUCT LOCK:

Preserve the exact product shown in the uploaded first frame during every frame of the video.

Maintain exactly:

the same number of socks,
the same number of pairs,
the same kit quantity,
the same sock order,
the same overlapping arrangement,
the same position on the bed,
the same colors,
the same prints,
the same illustrations,
the same characters or graphics,
the same pattern placement,
the same sock category,
the same full length,
the same cuff height and shape,
the same heel construction,
the same toe construction,
the same knit or plush texture,
the same fabric thickness,
the same stitching,
the same proportions,
the same organic folds,
the same irregular fabric volume,
and the same visible construction details.

Treat the product as a real object already represented correctly in the uploaded first frame.

Do not reinterpret, redesign, regenerate, recolor, simplify, improve, complete, replace, duplicate, remove, shorten, lengthen, or reconstruct any sock.

Do not reveal hidden sides or invent unseen product details.

The socks must not morph or change identity between frames.

TRUE FIRST-PERSON POV:

The camera must represent the photographer's own eye-level or chest-level viewpoint while standing, sitting, or leaning naturally beside the bed.

The camera points downward toward the socks at approximately a 35-to-55-degree angle.

The viewer must immediately feel:

"I am filming the socks on my own bed while gently touching them with my free hand."

Do not use a third-person angle.

Do not use a side angle as if another person were filming.

Do not place the camera at mattress height.

Do not create a professional catalog perspective.

HAND ACTION:

Show exactly one real adult human hand entering naturally from the lower-right, lower-left, or side edge of the frame.

The other hand is holding the smartphone and must remain outside the frame.

The visible hand performs one restrained, natural action:

the fingertips gently rest on the sock surface,
the index finger lightly touches the fabric,
or two or three fingers softly press the material once.

The hand may make one very short and subtle fingertip movement across the fabric without changing the product position.

The hand must maintain gentle contact with the socks.

The hand must never:

grip the socks,
hold the socks,
lift the socks,
pick up the socks,
pull a cuff,
drag the fabric,
separate the pair,
rearrange the kit,
rotate the socks,
fold or unfold the socks,
or move any sock away from its original position.

The product must remain fully supported by the bed during the complete video.

PHYSICAL TOUCH RESPONSE:

The sock fabric must respond subtly and realistically only where the fingers touch it.

Show:

slight local knit compression,
a small temporary indentation beneath the fingertip,
soft fabric displacement of only a few millimeters,
natural contact wrinkles,
realistic friction,
and gentle recovery when pressure decreases.

The physical response must remain local and restrained.

Do not deform the entire sock.

Do not distort the print.

Do not change the cuff, heel, toe, length, or silhouette.

The bedding may compress slightly beneath the hand and socks at the contact area.

The socks must preserve their original organic folds, irregular volume, natural fabric collapse, heel volume, relaxed toe shape, and bed contact.

TRUE HAND ANATOMY:

The visible hand must have:

five anatomically correct fingers,
natural finger lengths,
realistic joints,
correct thumb mechanics,
natural fingernails,
visible skin pores,
subtle wrinkles,
small tonal variations,
realistic knuckles,
believable wrist anatomy,
and natural contact pressure.

The fingers must not change size, shape, position, or count during the video.

The hand must share the same lighting, white balance, focus, exposure, motion blur, sharpness, perspective, and sensor texture as the socks, bedding, and room.

The hand must not look pasted in, waxy, over-smoothed, artificial, or separately generated.

BRAZILIAN BEDROOM:

Preserve or create a real Brazilian middle-class comfortable bedroom consistent with the uploaded first frame.

The room must feel:

clean,
organized,

functional,
comfortable,
warm,
lived-in,
human,
and naturally attractive.

Use believable details such as:

a real bed with ordinary bedding,
natural wrinkles in the blanket or bedspread,
well-finished painted walls,
practical proportional furniture,
a simple wardrobe or dresser,
ceramic, porcelain, laminate, or light wood flooring,
natural daylight from a real window,
and restrained everyday decoration.

The environment must look pleasant and well maintained without appearing luxurious.

No mansion.

No luxury showroom.

No fake hotel room.

No generic foreign interior.

No artificial studio.

No unfinished construction.

No excessive decoration.

No clutter.

CAMERA MOVEMENT:

Use subtle natural one-handed smartphone movement only:

gentle breathing drift,
minor wrist instability,
tiny framing corrections,
and restrained realistic micro-shake.

Maintain the original framing, camera distance, downward angle, and product placement from the first frame.

Keep the socks, hand, bedding, and nearby room details continuously readable.

No zoom.

No orbit.

No push-in.

No pull-back.

No rack focus.

No dramatic reframing.

No robotic camera movement.

No artificial floating camera.

CAMERA QUALITY:

Shot as if recorded with an iPhone 15 Pro or a similar modern smartphone.

Use the 24mm to 28mm equivalent main camera.

Standard video mode.

Broad natural focus.

Keep the hand, socks, and nearby bedding simultaneously clear.

Use:

true-to-life colors,
realistic smartphone auto exposure,
natural highlight rolloff,
balanced contrast,
subtle sensor texture,
authentic indoor sharpness,
and restrained computational processing.

No portrait mode.

No cinematic depth simulation.

No strong bokeh.

No artificial background blur.

No soft-focus haze.

No excessive HDR.

No over-sharpening.

No beauty-filter smoothing.

TEMPORAL CONTINUITY:

Every frame must preserve the same:

product identity,
product count,
sock arrangement,
colors,
prints,
pattern placement,
cuff shape,
heel shape,
toe shape,
fabric texture,
folds,
bed position,
hand identity,
finger anatomy,
room layout,
lighting direction,
white balance,
focus behavior,
and exposure.

The prints must remain attached to the same areas of the fabric.

The socks must not stretch, shrink, duplicate, disappear, slide, pulse, inflate, or change shape.

The background may show only minimal natural parallax caused by tiny handheld movement.

AUDIO:

Natural synchronized bedroom ambience only.

Include:

soft room tone,
faint distant Brazilian neighborhood ambience,
subtle bedding contact,
and a very soft fabric-touch sound caused by the fingertips.

No dialogue.

No voice-over.

No music.

No exaggerated fabric sounds.

No artificial transition sounds.

NEGATIVE CONSTRAINTS:

no lifting the socks,
no holding the socks,
no gripping the socks,
no picking up the socks,
no dragging the socks,
no rearranging the kit,
no separating pairs,
no product rotation,
no altered product,
no changed colors,
no changed prints,
no changed pattern placement,
no extra socks,
no missing socks,
no duplicated socks,
no product morphing,
no rigid fabric,
no floating product,
no exaggerated fabric deformation,
no distorted illustration,
no second visible hand,
no people,
no face,
no body,
no human reflection,
no extra fingers,
no missing fingers,
no fused fingers,
no mannequin hand,
no waxy skin,
no pasted-in hand,
no collage effect,
no mismatched lighting,
no CGI,
no 3D render,
no AI-generated appearance,
no logos added,
no unrelated text,
no subtitles,
no captions,
no text overlays,
no watermark,
no borders,
no glitch effects.

FINAL OUTPUT:

One continuous 6-second ultra-realistic vertical cinematic first-person smartphone video of the exact uploaded socks resting naturally on a real bed, while one anatomically correct human hand only touches and softly presses the fabric, creating subtle physically accurate local compression without lifting, moving, rearranging, or altering the product.

Movimento | Arruma-se comigo

Copiar prompt de vídeo — Ultra-realistic vertical smartphone video, 9:16 aspect ratio, authentic smartphone UGC fashion influencer style, natural handheld camera. A female influencer energetically and naturally walks toward the camera with light, confident steps, stopping close to the lens while maintaining warm, captivating eye contact. She never speaks or moves her lips. Her expression is sweet, angelic, approachable, and full of positive energy, with a soft closed-lip smile and gentle, welcoming eyes. Her face conveys kindness, charisma, and genuine friendliness through subtle micro-expressions.

As she reaches the camera, she naturally extends one hand forward with the palm facing upward and immediately performs a clear, realistic "come here" gesture by repeatedly curling only her index finger toward her own body in a fluid, inviting rhythm. The gesture is slightly faster and more playful, creating an energetic feeling without appearing rushed or exaggerated. She repeats the motion several times while maintaining direct eye contact, slightly tilting her head and subtly leaning forward as if personally inviting the viewer to come closer.

Her body language is relaxed, feminine, confident, and engaging. Natural breathing, smooth weight shifts, realistic wrist articulation, anatomically accurate finger movement, soft shoulder motion, gentle hair movement, subtle fabric physics, lifelike facial micro-expressions, premium fashion influencer aesthetic, cinematic daylight, ultra-realistic human biomechanics, seamless natural motion, authentic social media UGC performance.

No talking, no lip movement, no exaggerated facial expressions, no laughing, no teeth showing, no waving, no pointing, no thumbs up, no robotic movement, no stiff posture, no overacting. The only intentional hand gesture is the natural palm-up "come here" motion performed with the index finger in a friendly, energetic, inviting rhythm.

Movimento Moda

Copiar prompt de vídeo – "Animate the subject as a REAL person presenting clothing in a POV-style video.\n\n——\n\n🔥 START OF ANIMATION (UPDATED):\n\n– The subject starts at a natural distance from the camera\n– She calmly takes two small, natural steps forward toward the camera\n– While approaching, she gently touches and lightly holds the bow/lace detail on the chest area\n– The gesture is delicate, subtle and realistic, like naturally showing a clothing detail\n– No emphasis, no posing, no exaggeration\n– The movement feels spontaneous and casual\n– After briefly touching the bow, she naturally releases it\n– She takes a small step back to her original position\n– Smooth transition into the rest of the animation\n\n——\n\nGENERAL MOTION STYLE:\n\n– Natural, confident, fluid movements\n– Not static\n– Not exaggerated\n– Not robotic\n– Real human timing\n\n——\n\nBODY MOVEMENTS:\n\n– One hand naturally rests on the waist\n– Gentle hip movement (side-to-side, very subtle)\n– One foot forward, the other relaxed behind\n– Natural posture, relaxed shoulders\n\n——\n\nCLOTHING PRESENTATION:\n\n– Small, natural movements to highlight the outfit\n– Slight torso rotation to show fit and fabric\n– No aggressive posing\n– No fashion runway exaggeration\n– Movements feel spontaneous and casual\n\n——\n\nFACIAL EXPRESSION (VERY IMPORTANT – REAL HUMAN TIMING):\n\n– The subject does NOT smile continuously\n– Facial expression alternates naturally throughout the video\n– While approaching the camera:\n• Neutral, relaxed expression\n• Lips softly closed\n• Calm, confident look\n– During the bow/lace touch:\n• A brief, subtle smile appears\n• Smile is soft and natural, not exaggerated\n• Slight cheek movement only\n– After releasing the bow:\n•

Copiar prompt de vídeo sem fala — Create an ultra-photorealistic vertical image (9:16) showing the EXACT product from the attached reference image being presented to the camera in a natural first-person POV. The scene must feel human, real, spontaneous, and believable, as if someone is simply showing the product to the camera with one hand.

ABSOLUTE PRIORITY:

The attached product must be reproduced with maximum fidelity and zero redesign. Preserve exactly all visible characteristics from the reference image:

- packaging shape
- bottle / jar / box / container structure
- label design
- typography
- colors
- logo placement
- cap / lid / nozzle / pump details
- material finish
- reflections
- transparency
- proportions
- print alignment
- all visual details

Do not simplify, reinterpret, beautify, replace, invent, or alter any part of the product. The final product must look exactly like the attached reference.

MAIN COMPOSITION:

- true POV / first-person feeling
- only ONE hand visible
- no second hand
- no full person
- no face
- no body
- no selfie framing
- no person "showing" the product in the scene
- only the hand and, if necessary, a small part of the forearm may appear
- the product is held naturally and shown directly to the camera
- product close to the camera, clearly visible, hero of the frame
- label/front side turned toward the camera whenever physically possible
- framing should look organic and human, not staged like a studio ad

HAND / PRODUCT REALISM:

- grip must be anatomically correct
- hand posture must match the real size and shape of the product
- scale must be accurate: the product cannot look too big or too small in the hand
- fingers must wrap around the product naturally
- skin texture must be realistic
- nails natural
- no tattoos unless present in the reference or explicitly requested
- no rings, watches, bracelets, or accessories unless necessary and subtle
- never generate extra fingers
- never generate multiple hands
- never deform the hand or forearm

ENVIRONMENT:

Place the scene in a realistic, functional, believable environment that matches the product category naturally, but keep the environment secondary. The AI should infer the ideal setting based on the product itself.

Examples:

- perfume / skincare / cosmetics → vanity, bathroom, bedroom dresser
- food / drink / supplement → kitchen, dining table, pantry, desk

- tech / electronics → desk, office, bedroom setup
- fashion accessory → wardrobe area, mirror area, neutral indoor setting
- home / cleaning product → kitchen, laundry area, utility space

The environment must be:

- photorealistic
- natural
- functional
- clean but lived-in
- believable
- softly secondary
- never luxurious showroom
- never empty studio
- never fake CGI background

VISUAL STYLE:

- ultra photorealistic
- natural smartphone realism
- authentic iPhone-style look
- slight shallow depth of field
- sharp focus on the product and main label
- natural lighting or realistic indoor light
- realistic reflections and shadows
- subtle natural grain allowed
- organic social-media realism
- not overly polished
- not artificial advertising style

CAMERA:

- iPhone 15 Pro Max rear camera look
- 24mm wide-angle feel
- handheld POV realism
- natural perspective
- slight edge distortion acceptable
- vertical 9:16 composition

FOCUS HIERARCHY:

1. exact product fidelity
2. label consistency and readability
3. correct hand anatomy
4. correct product-to-hand proportion
5. realistic environment coherence
6. natural human POV feeling

STRICT RULES:

- use the attached product as the exact visual reference
- do not change any product features
- do not create a generic version
- do not replace the packaging
- do not hide the main label
- do not distort text
- do not create fake branding

- do not show multiple hands
- do not show the person
- do not create a mirror selfie
- do not crop the product awkwardly
- do not oversaturate colors
- do not stylize
- do not turn the image into CGI or illustration

ANTI-BUG / NEGATIVE PROMPT:

multiple hands, two hands, extra fingers, extra limbs, duplicated hand, deformed hand, broken anatomy, warped fingers, melted skin, visible face, visible person, visible body, selfie pose, mirror selfie, altered packaging, changed label, wrong logo, fake text, unreadable text, distorted typography, changed colors, changed cap, wrong material, oversized product, undersized product, floating product, unrealistic grip, blurry product, low quality, CGI, 3D render, illustration, cartoon, studio background, luxury showroom, fake reflections, overprocessed image, harsh flash, overexposed highlights, cluttered background, inconsistent scale, warped container, bent bottle, stretched packaging

OUTPUT GOAL:

Generate a flawless universal POV image where a single realistic hand naturally shows the exact attached product to the camera, preserving maximum fidelity, consistency, correct scale, and ultra-realistic detail, with zero margin for error.

Copiar prompt de imagem -## UNIVERSAL IMAGE PROMPT — KIDS STORE UGC / INFLUENCER HOLDING CHILD CLOTHING ON HANGER / ONE VISIBLE HAND / EXTREME HUMAN REALISM / NO CHILDREN

Create an ultra-photorealistic vertical UGC image (9:16) using two attached reference images.

Reference image 1 = the influencer identity source.

Reference image 2 = the exact child clothing item to be presented.

Preserve the influencer from reference image 1 with maximum fidelity: same face, same skin tone, same facial proportions, same body proportions, same natural asymmetry, same hair, same realistic adult anatomy, same pores, same skin microtexture, same realistic expression, and same authentic human appearance.

Preserve the clothing from reference image 2 with maximum fidelity: same garment type, same shape, same proportions, same size, same print, same pattern, same color, same stitching, same collar, same sleeves, same hem, same fabric texture, same drape, and same visible design identity. Do not alter the clothing in any way.

IMPORTANT NATURALITY RULE:

This must feel like real UGC content, not a rigid catalog shot and not an AI fashion render.

The clothing must be on a realistic hanger.

The influencer must hold the hanger with ONLY ONE visible adult hand by default.

The garment must hang naturally under real gravity.

Do not stretch the clothing sideways.

Do not hold it perfectly flat like a cardboard display.

Do not create a symmetrical pose.

Do not create a stiff mannequin-like frontal posture.

The influencer's body should have slight natural asymmetry, relaxed shoulders, natural elbow bend, subtle torso turn, and a believable human stance.

The free arm should remain relaxed, partially out of frame, or naturally resting without competing for attention.

CHILD / BABY VISIBILITY SAFETY RULE:

No real child, baby, toddler, infant, teenager, or underage person may appear anywhere in the image.

Do not generate children or babies in the store, background, mirror, poster, frame, sign, display, aisle, or any visible part of the environment.

If the clothing tag, packaging, poster, display card, or background object contains a baby or child image, preserve the structure but blur or softly obscure only the child/baby representation.

Scene: a real Brazilian children's clothing store, charming, organized, beautiful, welcoming, and commercially attractive. The store must feel like a comfortable Brazilian middle-class kids boutique or infant clothing shop.

KIDS STORE STYLE:

- real Brazilian infant / kids fashion store
- beautiful and organized racks
- shelves with folded clothing
- tasteful décor
- wood details
- soft neutral and playful tones
- warm retail lighting

- comfortable and real
- no visible minors
- no poor store
- no fake showroom
- no empty studio
- no foreign catalog look

HUMAN REALISM RULE:

The final image must look like a real high-definition photograph captured with iPhone 15 Pro Max clarity and fully human realism.

Skin must look organic, with pores, microtexture, natural tonal variation, realistic light response, and no smoothing.

Hair must have real strands, natural volume, coherent roots, and realistic shine.

Eyes must have moisture, life, coherent reflections, real iris texture, aligned pupils, and human expression.

Mouth, lips, and smile must feel natural and alive, not rigid or robotic.

Hands must be anatomically correct and natural.

The clothing must show real drape, softness, folds, fiber texture, weight, and contact with gravity. No stiff fabric. No fabric looking cut out or pasted.

Composition:

- influencer in the foreground
- clothing on hanger clearly visible
- one visible adult hand only holding the hanger
- slight natural body angle, not perfectly frontal
- product is the main commercial focus after the influencer's face
- enough store context to feel real
- no over-staged composition

Camera:

- iPhone 15 Pro Max realism
- vertical 9:16
- natural smartphone perspective
- sharp focus on face and clothing
- realistic depth
- no excessive blur
- no fake cinematic distortion

Lighting:

- realistic retail lighting
- soft and balanced
- natural highlights on skin, fabric, hanger, wood, and store elements
- realistic shadows
- no harsh flash
- no fake glow

Negative prompt:

rigid pose, symmetrical pose, mannequin posture, stretched garment, cardboard fabric, altered clothing, changed print, wrong scale, floating hanger, floating clothing, extra fingers, warped hands, deformed arms, child hands, baby hands, visible child, visible baby, visible minor, child poster without blur, baby poster without blur, child packaging without blur, baby packaging without blur, plastic skin,

blurry product, soft image, fake store, CGI, AI artifacts, poor commercial environment, oversaturated colors, text overlays, watermark

Copiar prompt de vídeo sem fala — UNIVERSAL VIDEO PROMPT — KIDS STORE UGC / CHILD CLOTHING ON HANGER / MAX FIDELITY / REAL SCALE / BRAZILIAN PHOTOREALISM

Use two attached reference images.

Reference image 1 = the influencer identity source.

Reference image 2 = the exact child clothing item to be presented.

Create an ultra-photorealistic vertical UGC video (9:16) inside a real Brazilian children's clothing store. The influencer presents the exact child clothing item on a realistic hanger.

The influencer must remain visually identical to reference image 1 during the entire video: same face, same skin tone, same facial proportions, same hair, same body proportions, same natural asymmetry, same expression style and same authentic human appearance.

The clothing must remain visually identical to reference image 2 during the entire video: same garment type, same shape, same size, same proportions, same color, same print, same pattern, same stitching, same collar, same sleeves, same hem, same fabric texture, same drape and same visual identity.

CHILD / BABY FULL PRIVACY BLUR RULE:

No real child, baby, toddler, infant, teenager or underage person may appear clearly anywhere in the video.

Do not generate visible minors in the store, background, mirror, poster, frame, shelf, clothing display, packaging, decoration or any visible area.

If any child or baby appears on a tag, packaging, poster, display card, frame, decoration or printed material, completely blur or privacy-mask the entire child/baby representation in every frame.

Blur face, body, hands, skin, silhouette and any human-like minor representation.

Do not blur the garment or hanger. Keep all clothing details sharp and faithful.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO UGC SHOT:

The influencer stands naturally in a real Brazilian children's clothing store, holding the hanger with the exact child clothing item. Prefer one visible adult hand holding the hanger naturally while the other arm stays relaxed or partially out of frame. The garment hangs naturally under gravity.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of the garment on the hanger: fabric texture, print, stitching, collar, sleeve, hem, tag, seam or material detail. The clothing must remain faithful and sharp.

3s–4.5s — NATURAL PRESENTATION SHOT:

Cut to the influencer gently lifting, slightly turning or presenting the hanger toward the camera. Do not stretch the garment sideways. Do not flatten it like cardboard. The movement must be human, relaxed and believable.

4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up showing fabric drape, sleeve detail, print alignment, stitching, hem, hanger support, texture and natural folds.

6s–8s — FINAL HERO SHOT:

Return to a stable UGC shot of the influencer holding the clothing on the hanger, smiling naturally or presenting calmly. The garment remains the main commercial focus after her face.

SCENE:

Real Brazilian middle-class children's clothing store, clean organized racks, shelves with folded clothing, soft neutral playful tones, tasteful decor, wood details, comfortable retail lighting. No visible children or babies. No poor store, no fake showroom, no empty studio.

CAMERA:

Vertical 9:16, iPhone 15 Pro Max front camera look, natural smartphone perspective, real UGC framing, sharp focus on influencer and clothing, realistic depth, no excessive blur, no fake studio look.

LIGHTING:

Realistic soft retail lighting, balanced exposure, natural shadows, realistic highlights on fabric, skin, hanger, shelves and store elements.

AUDIO:

Optional soft natural female voice in Brazilian Portuguese if requested. Otherwise no dialogue. Subtle store ambience and fabric movement sounds.

TECHNICAL PARAMETERS:

model: veo-3
length: 8 seconds
resolution: 1080x1920
framerate: 24fps
aspect_ratio: 9:16

STRICT RULES:

Mandatory B-roll cuts.
Keep the exact influencer identity.
Keep the exact garment identity.
Maintain real-world scale.
Do not change garment design, print, color, fabric or proportions.
Do not create stiff fabric.
Do not generate visible children or babies.
Blur the entire child/baby representation if it appears on any printed material.

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, altered clothing, changed print, changed color, wrong scale, stiff fabric, cardboard fabric, stretched garment, floating hanger, floating clothing, product morphing, extra fingers, warped hands, deformed arms, child hands, baby hands, visible child, visible baby, visible toddler, visible teenager, visible minor, readable child face, readable baby face, visible child body, visible baby body, child poster not fully blurred, baby poster not fully blurred, child on packaging not

<https://wpevghcfmjwmidcjdtn.d.supabase.co/storage/v1/render/image/sign/prompt-media/image/1786546190522-fcvwyl.jpg?token=eyJraWQiOiJzdG9yYWdlLXVyYyB1ZmduW5nLWtleV8zNDM0YzgzZi0wMzRmLTRINTEtYWYzYy01MzkxYWNjYjgxODliLCJhbGciOiJIUzI1NiJ9.eyJ1cmwiOiJwcm9tchQtbWVkaWEvaW1hZ2UvMTc4NjU0NjE5MDUyMi1mY3Z3eWwuanBnliwic2NvcGUiOiJkb3dubG9hZCIsImhhdCI6MTc4NjU0NjE5MDUyZXhwIjoyMTAxOTA2MTkzfQ.DbxdupibTL6GUNkXZJ9H0WbzonayOxSQC4pbAf5ii8&width=560&quality=70&resize=contain>

skin with visible pores, fine lines, natural tone variation, slight imperfections, no smoothing

the earring is the main focus, held between fingers, correct real-world scale, detailed material, subtle micro scratches, non-uniform reflections

composition tight on fingers and earring, no face, no ear visible

background softly blurred with depth

camera: handheld feel, 50mm lens, shallow depth of field

negative: earring on ear, extra hands, plastic skin, fake reflections, oversized object, floating object

the earring must remain identical in all scenes, same design, material and scale

scene 2: slight rotation showing reflections

scene 3: earring resting on fabric surface
scene 4: fingers lightly touching and adjusting the earring
scene 5: earring held still with subtle movement

earring always visible and not worn

lighting: soft natural light, consistent across all scenes

camera: slow controlled movements, no abrupt angle changes

style: realistic jewelry b-roll, not overproduced

background sounds: subtle ambient

music: minimal piano

Movimento | Casal girando

Copiar prompt de vídeo - AUDIO SETTINGS

Generate VIDEO ONLY. No audio / voice / speech / lip sync / ambient sound. Output must be completely silent.

CRITICAL CHARACTER PRESERVATION

Maintain both people exactly as in the source images. Preserve identities, facial features, hairstyles, body proportions, clothing, accessories, environment, lighting, camera angle and framing. Do not modify any visual element.

CORE IDEA

A spontaneous romantic moment. The man naturally reaches for the woman's hand and gently guides her into a smooth 360° twirl. She follows naturally with realistic body mechanics. After completing the turn, they return to facing each other. Both maintain warm, genuine smiles. Feels like a candid TikTok couple video rather than choreography.

HUMAN MOVEMENT PRINCIPLE

Every movement follows real biomechanics: anticipation, acceleration, inertia, deceleration, stabilization. Nothing at constant speed. No robotic timing. No dance choreography.

START — Both standing naturally. Relaxed posture. Natural breathing. Soft eye contact. Tiny unconscious movements. Small balance corrections. Pause ~0.5s.

HAND INTERACTION — The man extends one arm. Hand gently reaches for hers. Finger contact first, then hands close together. Realistic finger wrapping and natural grip pressure. No stiff fingers, no clipping, no deformation.

TWIRL — Man gently raises their joined hands and takes one small side step; body rotates only slightly. He guides. The woman pivots naturally on one foot; opposite foot steps smoothly around; she

completes one elegant full 360°. Hair follows with delayed physics. Clothing reacts naturally. Free arm swings softly with momentum. Shoulders relaxed. Turn lasts ~2s. No fast spinning. No exaggerated dancing.

BODY PHYSICS — Natural weight transfer, visible hip movement, authentic balance corrections, natural foot placement, realistic shoulder movement, micro torso stabilization, natural breathing. No floating, no sliding. Feet planted with realistic friction.

FACIAL BEHAVIOR — Genuine relaxed smiles. Subtle teeth allowed. Expressive eyes. Natural blinking. Occasional eye contact. Small joyful reactions. No exaggerated laughter. No frozen expressions. No lip sync.

HANDS remain connected through the twirl with natural grip adjustments, small wrist rotation, adaptive finger pressure. No clipping, no stretching, no extra fingers. Hair: delayed inertia, soft secondary motion, natural settling. Clothing: small delayed movement, realistic folds, no clipping.

CAMERA — Locked smartphone camera. Fixed framing. No zoom. No cinematic movement. No shake. Camera completely stationary. Environment identical. Lighting stable.

ULTRA REALISM — Photorealistic. Visible skin pores. Natural shading. Authentic muscle movement. Realistic reflections. Advanced clothing simulation. Natural shadows. Real human proportions.

FORBIDDEN — robotic movement, dance choreography, fast spinning, constant speed, frozen smile, floating/sliding feet, camera movement, CGI, physics glitches, extra fingers, clipping, environment/background changes, lip sync, talking.

FINAL RESULT

A completely silent, hyper-realistic smartphone video where a smiling man gently takes the woman's hand, softly guides her into one elegant and natural 360-degree twirl, and both return to facing each other with warm genuine smiles.

Copiar prompt de imagem — Fotografia comercial de joalheria em still-life com modelo, estilo campanha de luxo.

CENA E COMPOSIÇÃO (preservar exatamente como na imagem de referência):

- Duas mãos femininas de pele clara, unhas compridas em nude/glitter, seguram delicadamente um colar suspenso entre os dedos, exibindo o pingente centralizado à frente da câmera.
- Enquadramento fechado, vertical, focado nas mãos e no colar, com fundo desfocado (bokeh) mostrando elementos de loja de joias: vaso com flores brancas (gipsofila), caixa de joalheria aberta, outro colar exposto em busto de manequim ao fundo, superfície de mármore.
- Uma mão levemente acima segurando a corrente próxima ao fecho, outra mão abaixo apoiando o pingente central, dedos naturalmente curvados, anatomia realista.
- Anel dourado discreto em um dos dedos e pulseira de diamantes tênis visível no pulso inferior, mantidos como na imagem original.
- Iluminação suave, brilhante e difusa, tons quentes de luxo (dourado/branco), com reflexos e brilhos (sparkle bokeh) espalhados no fundo e na superfície de mármore.
- Profundidade de campo rasa: mãos e colar em foco nítido, fundo suavemente desfocado.
- Paleta de cores: tons neutros, dourado, branco e prata, clima elegante e sofisticado.

INSTRUÇÃO PRINCIPAL SOBRE O PRODUTO:

- Substituir o colar da cena pelo colar exato fornecido na imagem de referência do produto enviado pelo usuário.
- Reproduzir com máxima fidelidade: formato, tamanho, espessura da corrente, tipo de fecho, cor do metal, tipo e corte das pedras/cristais, engaste, pingentes, proporções e todos os detalhes visuais específicos do produto original.
- NÃO inventar, adicionar, remover ou alterar nenhum elemento do design do colar. O produto deve ser uma réplica fiel do item de referência, apenas reposicionado na cena.
- Ajustar automaticamente escala e posicionamento do colar às mãos da modelo, respeitando peso visual, comprimento real da corrente e forma como penderia naturalmente quando segurado.
- Garantir que a corrente siga uma trajetória natural e contínua entre os dedos, sem cortes, duplicações, nós impossíveis ou partes flutuando sem apoio físico.
- O pingente/elemento central do colar deve ficar visível, nítido e ser o ponto focal da imagem.

RESTRIÇÕES (não alterar):

- Não modificar rosto, mãos, unhas, anéis, pulseira, roupas ou pele da modelo.
- Não alterar o cenário, os objetos de fundo, a iluminação ou o enquadramento da imagem original.
- Não trocar o estilo fotográfico (deve permanecer realista, comercial, alta definição).

QUALIDADE FINAL:

- Imagem hiper-realista, nítida, sem distorções anatômicas ou deformações no metal/pedras.
- Reflexos de luz coerentes com o material do colar enviado (prata, ouro branco, ouro amarelo, ouro rosé etc., conforme o produto de referência).
- Resultado final deve parecer uma fotografia profissional de e-commerce/campanha de joalheria de alto padrão, pronta para uso em anúncios e redes sociais.

Copiar prompt de vídeo sem fala — Vídeo vertical 9:16, estilo POV UGC premium para TikTok Shop, still-life com modelo, 6-8 segundos.

⚠️ REGRA ABSOLUTA — PRODUCT LOCK:

O colar que aparece na imagem de referência é o PRODUTO DEFINITIVO E TRAVADO.

Este vídeo NÃO é uma geração de novo colar — é uma ANIMAÇÃO da imagem original.

A imagem de referência = fonte única da verdade do produto. Nenhum frame do vídeo pode divergir dela.

PROIBIDO EM QUALQUER FRAME:

- Aumentar, encurtar ou alongar a corrente.
- Criar corrente, elos ou partes extras que não estejam visíveis na imagem original (inclusive na parte de trás/oculta da mão).
- Alterar o tamanho, formato ou proporção do pingente.
- Mudar a espessura, o comprimento ou o tipo de elo da corrente.
- Adicionar, remover ou reposicionar pedras, cristais, detalhes ou acabamentos.
- Alterar cor do metal, brilho ou material.
- "Completar" ou inventar partes do colar que não aparecem na referência (se uma parte está oculta pela mão ou fora de quadro, ela deve permanecer oculta/fora de quadro durante o vídeo também — não deve ser revelada de forma inventada).
- Reconstruir, redesenhar ou transformar o colar em outro modelo, mesmo que sutilmente.
- Qualquer variação de forma entre frames (o colar deve ter exatamente o mesmo contorno, tamanho e proporção do início ao fim).

O QUE PODE SE MOVER:

- Apenas a CÂMERA e a MÃO da modelo.
- O produto em si é estático em termos de design — ele apenas muda de ângulo de exibição conforme a mão e a câmera se movem, como um objeto físico real sendo girado, nunca como um objeto sendo redesenhado.

CENA E MODELO (preservar exatamente como na imagem de referência):

- Mãos femininas de pele clara, unhas compridas em nude/glitter, seguram o colar diante da câmera em ângulo POV.
- Fundo desfocado (bokeh) mantendo os elementos originais: vaso de flores brancas, caixa de joalheria, busto de manequim, superfície de mármore, luzes douradas.
- Anel e pulseira nas mãos permanecem visíveis e inalterados.
- Iluminação suave e quente, brilhos e reflexos de luz (sparkle) consistentes com o material real do colar.

SEQUÊNCIA DE MOVIMENTO (0-8s):

1. (0-1.5s) Frame inicial idêntico à imagem de referência: modelo segura o colar, peça exatamente como no produto original.
2. (1.5-3.5s) Câmera aproxima-se lentamente do colar (zoom-in suave), sem alterar a forma, o tamanho ou a estrutura da peça — apenas revelando mais nitidez e detalhe da mesma geometria já existente.
3. (3.5-5.5s) Pequeno movimento lateral de câmera e/ou rotação mínima do pulso (poucos graus), simulando o giro natural de um objeto físico rígido — a peça inteira gira como um único bloco sólido, sem esticar, encolher ou distorcer nenhuma parte.
4. (5.5-7s) Close-up nos detalhes já visíveis na referência (pedra central, engaste, textura da corrente), sem revelar ou inventar ângulos/partes que não constavam na imagem original.
5. (7-8s) Câmera afasta-se suavemente, retornando ao enquadramento inicial, com o colar idêntico ao frame 1.

MOVIMENTO DE CÂMERA E MÃO:

- Câmera em mão, estilo POV, estabilização leve.
- Zoom suave e progressivo, sem cortes de cena.
- Mão realiza apenas micro-movimentos naturais (leve tremor de segurar algo real, rotação mínima do pulso).
- Nenhum movimento deve forçar o colar a esticar, balançar de forma não-física, ou mudar de comprimento aparente devido à perspectiva.

TESTE DE CONSISTÊNCIA (aplicar mentalmente a cada frame):

****PRODUCT LOCK — REGRA OBRIGATÓRIA:**** preserve a roupa exatamente como na imagem original. Não alterar cor, tecido, textura, modelagem, comprimento, mangas, alças, gola, decote, costuras, estampas, bordados, rendas, botões, zíperes, aplicações, transparências ou qualquer outro

detalhe. A roupa deve permanecer ****100% idêntica ao produto original****, apenas sendo exibida pendurada no cabide neste mesmo cenário.

Visual hiper-realista, alta definição, iluminação natural, proporções corretas, detalhes nítidos do tecido e acabamento profissional.

Copiar prompt de vídeo sem fala - {

"prompt": "ULTRA-PHOTOREALISTIC iPhone POV VIDEO. Use the provided reference image as the ABSOLUTE SOURCE OF TRUTH for the lingerie product. The exact same product must remain visually consistent from the first frame to the last frame. Do not redesign, reinterpret, reconstruct, beautify or modify the garment in any way.\n\nPRODUCT IDENTITY LOCK — HIGHEST PRIORITY:\nPreserve the exact original lingerie design, silhouette, proportions, dimensions, color, material, lace pattern, embroidery, stitching, seams, trims, straps, bow, elastic bands, edges, transparency and fabric texture exactly as shown in the reference. Every product detail must remain consistent throughout the entire video. No new details may appear and no existing details may disappear.\n\nSCENE — NEUTRAL ENVIRONMENT:\nA clean, simple and completely neutral real-world interior. Soft off-white, beige and light neutral tones. Plain walls and an uncluttered background with only subtle natural depth. No identifiable location, no boutique elements, no clothing racks, no shelves filled with products, no bedroom furniture, no showroom appearance and no decorative elements competing with the product. The environment must feel realistic, calm and naturally lived-in while remaining visually neutral. The product is always the dominant visual element.\n\nPRODUCT PRESENTATION:\nThe exact reference lingerie is hanging naturally from a simple light wooden hanger with NO text, NO branding and NO logo. The garment hangs vertically in a natural position. Preserve the exact original orientation, proportions and structure. Straps remain correctly positioned. The garment must never stretch, shrink, twist, fold unnaturally or change shape.\n\nHAND INTERACTION:\nONLY ONE ADULT FEMALE HAND is visible. The hand enters naturally from the lower side of the frame and gently holds the wooden hanger near the hook or lower bar. The hand remains relaxed and anatomically correct.\n\nThe hand performs ONLY ONE subtle gesture: the fingertips briefly and gently touch the outer edge of the garment for approximately one second, then return to a relaxed position on the hanger.\n\nDo NOT pull, stretch, pinch, squeeze or lift the fabric. Do NOT move the hand across the center of the garment or cover important product details.\n\nHAND ANATOMY:\nRealistic adult feminine hand, natural skin texture, anatomically correct wrist and fingers, five clearly separated fingers, realistic joints and natural proportions. Relaxed finger positioning. No extra, missing, fused, twisted or elongated fingers and no deformed wrist.\n\nNAILS AND JEWELRY:\nNeatly manicured feminine nails with a subtle glossy finish. One or two delicate minimal rings may be visible. No bracelets and no watch.\n\nCAMERA MOVEMENT:\nRealistic handheld iPhone POV recording. Start with medium-wide framing where the entire garment and hanger are clearly visible. The camera makes ONE extremely slow and subtle forward movement toward the product, similar to a real person naturally bringing the phone slightly closer to inspect the fabric.\n\nThe camera movement is smooth, continuous and physically realistic with extremely subtle handheld micro-movements. No dramatic movement. THE CAMERA MOVES CLOSER — THE PRODUCT DOES NOT MOVE.\n\nTIMELINE — 8 SECONDS:\n0.0–2.0s: Entire garment and hanger visible against the neutral background. Camera stable with tiny natural handheld movement. One female hand holds the hanger.\n\n2.0–4.0s: Camera begins one very slow forward movement. Hand remains relaxed and garment remains stable.\n\n4.0–5.5s: Fingertips gently touch the outer edge of the garment once, briefly highlighting the fabric texture without pulling or repositioning it.\n\n5.5–7.0s: Hand returns to its relaxed position. Camera continues its subtle approach, naturally revealing more lace, stitching and fabric detail.\n\n7.0–8.0s: Camera stops naturally. Garment remains centered and recognizable. Hold the final composition briefly.\n\nFOCUS:\nThe entire product remains the primary subject. Gradually reveal textile detail through natural camera proximity. No independent close-up shots, aggressive cropping or reconstruction of the product.\n\nFABRIC PHYSICS:\nMaintain realistic

Copiar prompt de imagem - UNIVERSAL IMAGE PROMPT — BAG ONLY / AUTOMATIC BRAZILIAN SCENE SELECTION / ABSOLUTE PRODUCT FIDELITY / EXTREME PHOTOREALISM / NO PEOPLE / NO AI LOOK

Use the attached bag image as the only and absolute visual reference.

Create one ultra-photorealistic vertical 9:16 premium commercial photograph showing the EXACT attached bag naturally positioned inside a real Brazilian environment automatically selected according to the bag's category, style, size, material, and intended use.

Show no people, no hands, and no body parts.

The exact bag must remain the absolute visual hero.

CORE OBJECTIVE:

The final result must look like a real premium product photograph captured in a real Brazilian location.

It must communicate:

the bag's exact design;
real dimensions;
material quality;
functional volume;
construction quality;
style;
practical use;
and purchase desirability.

The viewer must feel that the exact advertised bag is physically present in the scene.

ABSOLUTE BAG LOCK — HIGHEST PRIORITY:

Preserve exactly:

the same bag category;
same quantity;
same model;
same dimensions;
same height;
same width;
same depth;
same proportions;
same silhouette;
same body shape;
same base shape;
same opening;
same flap;
same handles;
same handle count;

same handle length;
same shoulder strap;
same crossbody strap;
same strap width;
same strap length;
same strap attachments;
same buckles;
same rings;
same chains;
same hooks;
same zippers;
same zipper pulls;
same buttons;
same magnetic closures;
same clasps;
same pockets;
same pocket count;
same seams;
same stitching;
same piping;
same borders;
same panels;
same folds;
same pleats;
same decorative pieces;
same charms when included;
same feet;
same metal hardware;
same logos;
same branding;
same lettering;
same spelling;
same typography;
same label placement;
same prints;
same patterns;
same illustrations;
same colors;
same color distribution;
same materials;
same texture;
same grain;
same gloss level;
same finish;
same lining only when already visible;
and every visible construction detail.

Do not redesign the bag.

Do not replace it with a similar model.

Do not create a generic bag from the same category.

Do not recolor it.

Do not change its shape.

Do not change the strap.

Do not alter hardware color.

Do not add or remove pockets, handles, chains, charms, clasps, zippers, or accessories.

Do not mirror the logo.

Do not rewrite printed text.

Do not invent hidden interior details.

Do not duplicate the hero bag.

If the reference contains a set of bags, preserve the exact set and exact quantity.

AUTOMATIC BAG CATEGORY ANALYSIS:

Identify whether the product is:

a handbag;
tote bag;
shoulder bag;
crossbody bag;
satchel;
hobo bag;
clutch;
mini bag;
backpack;
travel bag;
work bag;
laptop bag;
beach bag;
children's bag;
sports bag;
cosmetic case;
or another carrying product.

Select a scene that naturally matches the exact product.

AUTOMATIC BRAZILIAN ENVIRONMENT:

Choose one real Brazilian environment appropriate to the bag's use and visual language.

Possible contexts include:

an organized bedroom dressing area;

a real wardrobe corner;
a clean living room;
a home-office area;
an entryway console;
a practical office;
a real accessible-premium clothing store;
a real accessories boutique;
a travel-preparation area;
a child bedroom for children's bags;
a beach-home or veranda context for beach bags;
a professional workspace for business bags;
or another real environment directly related to the exact product.

The environment must feel:

Brazilian;
real;
clean;
organized;
human;
comfortable;
premium-accessible;
commercially attractive;
and physically believable.

Do not use:

an empty studio;
a fake showroom;
a luxury palace;
a foreign-looking hotel;
a giant empty room;
a futuristic space;
an artificial catalog background;
or excessive clutter.

PRODUCT PLACEMENT:

Place the bag naturally on an appropriate real surface, such as:

a wooden console;
a clean bench;
a dresser;
a wardrobe shelf;
a stone countertop;
a bedside bench;
a real office desk;
a boutique display table;
a chair;
a luggage bench;
or another physically suitable support.

The bag must remain fully grounded.

The base must make real contact with the surface.

The straps must follow real gravity.

Handles must retain their natural structure.

Chains must hang with real weight.

Do not make the bag float.

Do not make straps remain suspended without support.

Do not overfill or collapse the bag unless that behavior matches the reference.

COMPOSITION:

The bag must occupy approximately 65% to 80% of the frame.

Use a close frontal three-quarter angle or a slightly elevated three-quarter angle that shows:

the main face;
real depth;
base;
handles;
strap;
hardware;
material;
and visible functional construction.

Do not place the bag far from the camera.

Do not crop important straps, handles, corners, pockets, or hardware.

Do not show excessive ceiling, floor, or empty environment.

Keep the scene visually restrained and sales-focused.

CAMERA:

Professional full-frame camera realism.

Vertical 9:16.

4K commercial image quality.

Use a natural 50mm to 70mm equivalent perspective.

Use 35mm to 50mm only for large travel bags or backpacks requiring more context.

Natural product-height camera position.

No fisheye.

No extreme wide-angle distortion.

No exaggerated low angle.

DEEP FOCUS — NO BLUR:

Keep the entire bag sharply readable.

Preserve clarity in:

branding;
letters;
stitching;
grain;
zippers;
hardware;
handles;
straps;
pockets;
edges;
corners;
and base.

The environment must remain readable.

No portrait mode.

No artificial background blur.

No strong bokeh.

No soft haze.

No depth-map cutout.

No blurred straps or product edges.

LIGHTING:

Use physically believable lighting appropriate to the selected environment.

Possible sources include:

soft daylight;
window light;
residential ambient light;
office lighting;
boutique ceiling lighting;
or restrained professional fill light naturally integrated into the scene.

Preserve exact bag colors.

Use natural shadows.

Use realistic metal reflections.

Maintain correct material response.

No harsh flash.

No artificial glow.

No fake HDR.

No colored lighting changing the product.

MATERIAL REALISM:

Show physically accurate material behavior.

Leather must show real grain, tension, seams, folds, and subtle reflection.

Synthetic leather must retain realistic coated texture and flexibility.

Fabric must show real fibers, weave, folds, and stitching.

Canvas must show weight and authentic textile texture.

Nylon must show real weave, slight sheen, and flexible structure.

Suede must show natural directional fibers.

Plastic must look like real molded plastic.

Metal hardware must show real thickness, weight, highlights, and reflections.

Chains must hang naturally.

Straps must show real thickness and gravity.

No plastic-looking leather.

No melted geometry.

No fake texture.

No synthetic reflections.

CLEAN FRAME:

Outside legitimate branding and lettering physically present on the exact bag, generate no:

captions;
promotional text;
prices;
floating labels;
arrows;
icons;
social-media interface;
banners;
watermarks;
or unrelated logos.

NEGATIVE PROMPT:

wrong bag, similar replacement bag, generic handbag, redesigned bag, changed model, changed quantity, changed shape, changed proportions, wrong scale, changed color, altered material, changed strap, missing strap, extra strap, changed handle count, altered hardware, wrong zipper, extra pocket, missing pocket, invented charm, removed charm, altered logo, mirrored logo, misspelled branding, duplicated bag, similar bag in background, floating bag, floating strap, impossible handle position, collapsed geometry, inflated bag, fake leather, fake fabric, fake metal, melted edges, blurred bag, artificial bokeh, portrait-mode blur, empty studio, fake showroom, luxury palace, CGI, 3D render, illustration, collage, AI artifacts, random text, watermark.

FINAL OUTPUT:

One ultra-photorealistic vertical 9:16 premium sales photograph showing only the EXACT attached bag, naturally positioned at correct real-world scale inside a real Brazilian environment automatically selected according to its category, with absolute product fidelity, true material microtexture, deep focus, strong purchase appeal, and absolutely no visible AI traits.

Copiar prompt de vídeo sem fala - UNIVERSAL IMAGE-TO-VIDEO PROMPT — BAG ONLY
FIXED PRODUCT POSITION / 5 PREMIUM CAMERA MOVEMENTS
ABSOLUTE PRODUCT FIDELITY / NO PEOPLE / NO HANDS
ULTRA-PHOTOREALISTIC / BRAZILIAN ENVIRONMENT / NO AI LOOK

=====
REFERENCE FRAME — ABSOLUTE SOURCE OF TRUTH
=====

Use the attached image as the EXACT FIRST FRAME and the ABSOLUTE visual reference for the entire video.

The bag shown in the attached image is the ONLY product that may appear.

The generated video must preserve the exact bag from the first frame until the final frame.

DO NOT redesign the bag.

DO NOT reinterpret the bag.

DO NOT replace the bag.

DO NOT generate a similar bag.

DO NOT change any physical characteristic of the bag.

The attached image always has priority over every textual instruction.

=====

CRITICAL RULE — CAMERA MOVES, BAG DOES NOT

=====

The bag must remain COMPLETELY STATIC throughout the entire video.

The bag must stay in EXACTLY THE SAME:

- position;
- orientation;
- height;
- angle;
- support surface;
- physical posture;
- shape;
- size;
- proportions.

DO NOT:

- rotate the bag;
- tilt the bag;
- move the bag;
- slide the bag;
- lift the bag;
- lay the bag down;
- turn the bag around;
- reposition the bag;
- open the bag;
- close the bag;
- change the bag's orientation.

ONLY THE CAMERA MAY MOVE.

The entire video should feel like a camera operator filming one real stationary bag from different subtle angles.

=====

PRODUCT IDENTITY LOCK

=====

Preserve EXACTLY the product from the reference image.

Maintain:

- same model;
- same category;
- same quantity;
- same dimensions;
- same proportions;
- same silhouette;
- same body shape;
- same base;
- same handles;
- same handle count;
- same handle length;
- same straps;
- same strap width;
- same strap length;
- same strap attachments;
- same buckles;
- same rings;
- same chains;
- same hooks;
- same zippers;
- same zipper pulls;
- same closures;
- same pockets;
- same seams;
- same stitching;
- same piping;
- same panels;
- same decorative elements;
- same charms;
- same hardware;
- same logo;
- same branding;
- same lettering;
- same spelling;
- same typography;
- same patterns;
- same prints;
- same colors;
- same color distribution;
- same materials;
- same texture;
- same grain;
- same gloss;
- same finish;
- every visible physical detail.

The product must remain visually identical throughout the video.

=====

COLOR LOCK

=====

Preserve the EXACT original colors from the reference image.

Do not:

- recolor;
- change hue;
- change saturation;
- increase contrast;
- reduce contrast;
- make the product warmer;
- make the product cooler;
- make it darker;
- make it lighter;
- change hardware color;
- change logo color;
- change material finish.

Lighting changes must NOT alter the perceived identity or color of the product.

=====

MATERIAL LOCK

=====

Maintain the exact material appearance from the reference.

Leather remains leather.

Fabric remains fabric.

Canvas remains canvas.

Nylon remains nylon.

Suede remains suede.

Synthetic leather remains synthetic leather.

Metal remains metal.

Preserve the same:

- grain;
- weave;
- texture;
- folds;
- seams;
- stitching;
- reflections;
- surface finish.

Do not make the material plastic-looking.

Do not create artificial texture.

=====

ENVIRONMENT LOCK

=====

Keep the EXACT SAME Brazilian environment shown in the attached image.

Do not change the location.

Do not change the furniture.

Do not replace the background.

Do not add unnecessary objects.

Do not transform the environment.

Maintain consistent:

- lighting direction;
- furniture;
- walls;
- surfaces;
- colors;
- background elements;
- overall atmosphere.

The environment should remain physically stable throughout the video.

=====

NO PEOPLE

=====

Absolutely NO:

- people;
- hands;
- arms;
- fingers;
- body parts;
- human reflections;
- human silhouettes;
- mannequins.

The bag is the ONLY subject.

=====

VIDEO FORMAT

=====

Vertical 9:16.

Duration: 8 seconds.

24 fps.

Ultra-photorealistic.

Premium commercial product video.

Natural cinematic motion.

No narration.

No dialogue.

No subtitles.

No text overlays.

=====

CAMERA MOVEMENT

=====

Use ONLY subtle professional camera movements.

The bag remains completely stationary.

The camera may perform:

- slow push-in;
- subtle lateral slide;
- slight elevation;
- restrained pull-back;
- subtle change in framing.

Camera movements must be smooth, slow and controlled.

NO aggressive movement.

NO orbit around the product.

NO spinning camera.

NO dramatic parallax.

NO extreme perspective changes.

=====

SHOT 1 — HERO

0.0s–1.6s

=====

Begin exactly from the attached image.

Very subtle cinematic push-in toward the bag.

Keep the entire bag visible.

Do not crop:

- handles;
- straps;
- corners;
- base;
- logo;
- important hardware.

The bag remains completely static.

=====

SHOT 2 — MATERIAL DETAIL

1.6s–3.1s

=====

The camera slowly moves closer to the bag.

Reveal a naturally visible material detail.

Possible details:

- leather grain;
- fabric texture;
- stitching;
- piping;
- printed pattern;
- surface finish.

The bag does NOT move.

The camera moves toward the detail.

Keep the material and color identical to the reference.

=====

SHOT 3 — CONSTRUCTION / HARDWARE

3.1s–4.7s

=====

The camera makes a subtle lateral movement toward another visible construction detail.

Show:

- zipper;
- clasp;

- buckle;
- ring;
- chain;
- handle attachment;
- logo;
- stitching;
- or another detail already visible in the reference.

Do NOT rotate the bag to reveal another side.

Do NOT invent hidden details.

The bag remains completely stationary.

=====

SHOT 4 — ELEVATED VIEW

4.7s–6.3s

=====

The camera slowly rises slightly while maintaining the bag's exact physical position.

Create a subtle elevated three-quarter perspective.

IMPORTANT:

The bag itself DOES NOT rotate or tilt.

Only the camera changes elevation.

Do not lay the bag down.

Do not reveal unsupported geometry.

=====

SHOT 5 — FINAL HERO

6.3s–8.0s

=====

Slowly pull the camera back into a polished full-product composition.

The entire bag becomes visible again.

The final frame should show:

- exact bag;
- exact position;
- exact shape;
- exact colors;
- exact materials;
- exact environment.

End on a clean, stable premium product shot.

=====

FOCUS

=====

Keep the bag sharply readable.

No:

- focus pulsing;
- autofocus hunting;
- excessive motion blur;
- artificial bokeh;
- portrait-mode blur;
- blurred edges;
- disappearing details.

The product must remain sharp throughout the entire video.

=====

PHYSICAL REALISM

=====

The bag must behave like a real stationary physical object.

Gravity must remain consistent.

The bag must maintain realistic contact with its support surface.

Straps and handles must remain naturally positioned.

Chains, charms and loose elements must remain almost completely still unless extremely subtle natural movement is physically necessary.

No spontaneous movement.

No floating.

No deformation.

No morphing.

=====

LIGHTING

=====

Preserve the lighting from the original image.

Lighting should remain consistent throughout the video.

Natural shadows.

Natural reflections.

Realistic material response.

No color-changing light.

No artificial glow.

No dramatic lighting transitions.

=====

FINAL VISUAL STYLE

=====

Premium Brazilian UGC/product content.

Natural.

Elegant.

Commercial.

Realistic.

Desirable.

Sophisticated but believable.

The final result must look like a real camera filming a real bag in a real Brazilian environment.

It must NOT look AI-generated.

=====

NEGATIVE PROMPT

=====

moving bag,
rotating bag,
tilting bag,
falling bag,
sliding bag,
floating bag,
lifting bag,
laying bag down,
bag changing position,
bag changing orientation,
bag changing shape,
bag morphing,
bag warping,
bag stretching,
bag shrinking,
bag deformation,

product replacement,
different bag,
similar bag,
generic bag,
changed model,
changed proportions,
changed silhouette,
changed handles,
changed straps,
changed hardware,
changed zipper,
changed pocket,
changed logo,
changed branding,
misspelled logo,
changed color,
wrong color,
changed material,
fake leather,
fake fabric,
plastic texture,
invented details,
invented interior,
extra bag,
duplicate bag,
bag in background,
people,
person,
hands,
arms,
fingers,
body parts,
human reflection,
human silhouette,
camera orbit,
aggressive camera movement,
spinning camera,
extreme zoom,
fisheye,
extreme wide angle,
focus pulsing,
blurred product,
motion blur,
artificial bokeh,
CGI,
3D render,
cartoon,
AI artifacts,
unrealistic physics,
color filter,
heavy color grading,
text,

captions,
subtitles,
watermark,
logo overlay.

=====

FINAL OUTPUT

=====

Generate ONE ultra-photorealistic 8-second vertical 9:16 product video.

Use the attached image as the exact first frame.

The bag remains in ONE SINGLE FIXED POSITION for the entire video.

ONLY THE CAMERA MOVES.

The product must remain 100% identical to the reference in every frame.

No people.

No hands.

No narration.

No text.

No product movement.

No product deformation.

The result must look like a real premium commercial video filmed with a professional camera in the exact same Brazilian environment.

POV | Lingerie

Copiar prompt de vídeo - POV product showcase, ultra-realistic, 10 seconds, vertical 9:16, 4K, smartphone camera, soft natural lighting, premium e-commerce style.

The camera remains completely stable in a true first-person POV. A pair of clean, well-groomed hands naturally enters the frame.

The lingerie set stays 100% identical to the reference image throughout the entire video. Do not alter the color, lace pattern, stitching, shape, hardware, straps, proportions, texture, elasticity, transparency, branding, labels or any design details.

Sequence:

0.0–2.5s – The hands gently glide over the bra with slow, natural movements, lightly tracing the lace and edges to highlight the fabric texture without covering important details.

2.5–5.0s – The hands immediately move to the panties, grasping both side straps and bringing them smoothly very close to the camera, filling most of the frame with the product while keeping it perfectly in focus.

5.0–6.5s – The hands gently stretch both sides of the panties once to demonstrate comfort and flexibility, then smoothly release the tension and place the panties back in their original position exactly as before.

6.5–8.5s – The hands repeat the same presentation with the bra, lifting it by both side straps toward the camera for a detailed close-up of the lace and construction.

8.5–10.0s – The hands gently stretch the bra once, showing light flexibility without deforming it, then release and carefully return it to its original position on the surface.

Maintain smooth natural hand movements, realistic physics, accurate fabric behavior, constant focus, no camera shake, no zoom, no cuts, no transitions, no added objects, no generated text, no watermark, no flickering, no anatomy errors, no duplicated fingers, no product deformation, and no background changes. The final result should look like a premium commercial product demonstration suitable for TikTok Shop and Shopee.

POV | Lingerie

Movimento Selfie | Gancho Puxando

Copiar prompt de vídeo — AUDIO SETTINGS — CRITICAL FLOW COMPATIBILITY:

- Generate VIDEO ONLY
- Output must be completely silent
- No dialogue
- No narration
- No speech
- Zero audio channels

CRITICAL OVERRIDE — CLOSED-MOUTH SMILE & ZERO SPEECH ARTICULATION

FACIAL LOCK RULES:

- The subject keeps her lips fully sealed throughout the entire video.
- Mouth remains completely closed and visually stable.
- Zero lip separation.
- Zero jaw articulation.
- Zero speech-like movement.
- Zero lip-sync behavior.
- Zero phoneme or syllable formation.
- All expressiveness comes from the eyes, cheeks, posture, and body language.

The avatar must NEVER appear to be talking, speaking, singing, whispering, or simulating conversation.

She should look like a real girl casually recording a silent mirror-selfie TikTok while smiling naturally.

FACIAL BEHAVIOR:

Closed-mouth smile ONLY.

The smile should be soft, feminine, charismatic, natural, and simpática.

Eyes remain warm, expressive, and naturally focused on the mirror/camera.

Natural blinking only.

Tiny cheek movement is allowed.

Subtle eye reactions are allowed.

Minimal facial variation.

Expression should come primarily from the eyes.

The mouth must remain completely closed and visually stable from beginning to end.

FORBIDDEN:

lip articulation,
lip-sync,
mouth opening,
jaw movement,
speech-like facial motion,
rhythmic mouth movement,
phoneme shapes,
syllable formation,
talking energy,
conversational expression.

CORE IDEA:

Create a hyper-realistic spontaneous smartphone mirror selfie with natural feminine “biscoito” energy and playful clothing interaction.

The avatar casually records herself in a mirror while holding an iPhone naturally in one hand.

With her free hand, she softly stretches and adjusts the bottom of her blouse in a playful, feminine, casual way.

She subtly poses, shifts her body weight, makes tiny natural posture adjustments, and maintains a warm closed-mouth smile.

The vibe should feel:

despojada,
attractive,
naturally feminine,
spontaneous,
socially authentic,
subtly energetic,
simpática,
charismatic,
young,
casual.

This is NOT influencer overacting.

This is NOT dancing.

This is NOT runway behavior.

This is NOT exaggerated posing.

It should feel like a real attractive girl casually recording herself for TikTok while naturally fixing her blouse.

ADVANCED HUMAN KINETIC SYSTEM:

Human movement must NEVER happen at constant speed.

Every movement should contain realistic:

- acceleration;
- deceleration;
- body inertia;
- kinetic chain delay;
- residual momentum;
- muscular responsiveness;
- imperfect balance recovery;
- stabilization corrections;
- subtle overshoot;
- natural settling.

Movement must feel physically alive and spontaneous.

Avoid robotic, perfectly timed, mechanically smooth, or scripted motion.

The avatar should feel energetic without becoming hyperactive or exaggerated.

HUMAN MICRO-ENERGY SYSTEM:

Include subtle unconscious human movements:

- quick posture corrections;
- tiny shoulder reactions;
- natural body looseness;
- subtle body sway;
- small weight transfers;
- slight head responsiveness;
- tiny breathing movements;
- small balance corrections;
- spontaneous feminine body reactions.

These movements must remain subtle and believable.

Do NOT make the avatar hyperactive, chaotic, robotic, or overacted.

PHONE & CAMERA — RAW HANDHELD:

The camera must feel like a real smartphone being held naturally by the avatar.

NO artificial stabilization.

NO gimbal feeling.

NO tripod behavior.

NO cinematic camera movement.

NO floating camera.

NO zoom.

The phone arm must NOT feel locked.

The arm should naturally react to body movement.

Include:

- subtle wrist instability;
- tiny grip corrections;
- natural phone inertia;
- slight framing imperfections;
- small camera drift;
- tiny reactive movements;
- subtle shake caused by body weight transfer;
- natural stabilization corrections.

The camera should feel imperfect in a believable social-media way.

Do NOT make the movement excessively shaky.

SEQUENCE & INTERACTION:

START:

She begins naturally facing the mirror.

Phone already held naturally in one hand.

Free hand relaxed.

Relaxed asymmetrical posture.

Warm closed-mouth smile already active.

Eyes naturally focused toward the mirror/camera.

Tiny breathing movement visible.

Slight shoulder imbalance.

Small unconscious body movement before the main action.

Natural phone instability already active.

Hold the initial position for approximately 0.5–0.8 seconds before movement begins.

SHIRT / BLOUSE INTERACTION:

With the free hand, she naturally grabs the lower side of the blouse/shirt.

Her fingers gently pull the fabric slightly outward.

The movement should feel playful, feminine, casual, and unconscious.

The fabric must respond naturally:

- realistic tension;
- realistic folds;
- natural wrinkles;
- subtle stretching;
- realistic fabric recovery after release.

The hand must interact physically with the actual fabric.

No clipping through clothing.

No disappearing fingers.

No distorted hands.

The movement contains natural acceleration followed by soft deceleration and settling.

At the same time:

- subtle body sway;
- slight hip shift;
- natural shoulder counterbalance;
- tiny phone-arm reaction;
- realistic weight transfer.

The blouse interaction must feel spontaneous and socially natural.

NOT exaggerated.

NOT sexualized.

NOT like a fashion runway pose.

NATURAL “BISCOITO” ENERGY:

While adjusting the blouse, she subtly shifts her posture.

Allow:

- tiny playful body movements;
- slight feminine sway;
- small shoulder reactions;
- subtle head responsiveness;
- natural breathing;
- slight body looseness;
- tiny posture corrections.

The movement should communicate confidence and charisma without looking rehearsed.

BODY SHIFT & REPOSITIONING:

While fixing the blouse, she naturally changes her body angle slightly.

One shoulder moves subtly backward.

Hips reposition naturally.

A small side angle develops.

A slight feminine pose emerges naturally from the movement.

Body weight transfers realistically from one leg to the other.

Clothing and hair react naturally to the movement.

NO:

- spinning;
 - full rotation;
 - robotic pivot;
 - runway walk;
 - exaggerated hip movement;
 - dancing.
-

FINAL RECONNECTION:

She gently releases the blouse.

The fabric naturally returns to its resting position.

Residual body movement continues briefly after the release.

Hair continues settling naturally.

Breathing rhythm remains visible.

Phone instability remains subtly active.

Her eyes reconnect naturally with the mirror/camera.

The closed-mouth smile remains warm, attractive, and relaxed.

The final frame must NEVER feel frozen or artificially paused.

HAIR & CLOTHING PHYSICS:

Hair must behave as weighted physical mass.

Loose strands move independently.

Hair should have subtle secondary motion after body movement stops.

Clothing must respond dynamically to:

- hand interaction;
- stretching;
- body movement;
- gravity;
- release of tension.

Fabric must never become rigid, liquid, plastic, or distorted.

REAL HUMAN ANATOMY:

Maintain consistent anatomy throughout the entire video.

Hands must have:

- five fingers;
- realistic finger proportions;
- natural joints;
- correct thumb placement;
- realistic wrist structure.

No:

- extra fingers;
- missing fingers;
- fused fingers;
- malformed hands;
- disappearing fingers;
- hand deformation;
- limb morphing.

The same avatar must remain visually consistent throughout the entire video.

ULTRA REALISM:

Preserve:

- visible natural skin pores;
- realistic skin texture;
- subtle skin imperfections;
- natural facial asymmetry;
- realistic eye reflections;
- realistic hair strands;
- realistic cloth physics;
- natural mirror reflections;
- realistic shadows;
- physically accurate body movement;
- natural smartphone image characteristics.

The result must look like authentic user-generated content recorded casually on a smartphone.

FORBIDDEN:

speaking,
talking,
lip-sync,
mouth opening,
lip articulation,
jaw articulation,
phoneme shapes,
syllable motion,
speech-like timing,
conversational facial behavior,
rhythmic mouth movement,
robotic timing,
constant-speed movement,
artificial stabilization,
locked phone arm,
tripod behavior,
gimbal movement,
cinematic camera movement,
zoom,
floating camera,
exaggerated dancing,
exaggerated posing,
fast spinning,
runway behavior,
hyperactive movement,
dead eyes,
stiff hair,
rigid clothing,
cloth deformation,
hand deformation,
extra fingers,
missing fingers,
fused fingers,
CGI appearance,
3D render,
plastic skin,
artificial face,
AI artifacts.

FINAL RESULT:

Generate a completely silent, hyper-realistic mirror-selfie video with authentic handheld smartphone movement and natural human body physics.

The avatar casually adjusts and gently stretches the bottom of her blouse with one hand while holding the phone with the other.

She subtly shifts her body weight, makes natural posture corrections, maintains a warm closed-mouth smile, and moves with spontaneous feminine “biscoito” energy.

Her lips remain FULLY SEALED throughout the entire video.

No speaking.

No lip movement.

No mouth opening.

No artificial stabilization.

No exaggerated acting.

The final result must feel like a real, spontaneous TikTok mirror selfie recorded by an attractive, confident, despojada, and simpática girl.

Pov | Óculos na case

link imagem -

https://wpevghcfmjwmidcjdtn.supabase.co/storage/v1/render/image/sign/prompt-media/image/1786646731345-owsyub.jpg?token=eyJraWQiOiJzdG9yYWdlLXVybC1zaWduaW5nLWtleV8zNDM0YzgxZi0wMzRmLTRINTEtYWYzYy01MzkxYWNjYjgxODIiLCJhbGciOiJIUzI1NiJ9.eyJ1cmwiOiJwcm9tcHQtbWVkaWEvaW1hZ2UvMTc4NjY0NjczMTM0NS1vd3N5dWluYW50Iiwic2NvcGUiOiJkb3dubG9hZCIslmlhdCI6MTc4NjY0NjczMywiZXhwIjoyMTAyMDA2NzZmfQ.fmqbV_dXSpMpZ_nThBWjihWhfLr170VBhQ_72ltwb_s&width=560&quality=70&resize=contain

Copiar prompt de imagem — POV photorealistic scene of a person carefully placing a pair of eyeglasses inside an open eyeglasses case. First-person perspective, the hands are visible gently storing the glasses in the case. The glasses case is centered and open on a table, with the eyeglasses partially inside or being carefully adjusted into place. Real indoor room environment, natural and believable setting, soft lighting, cozy atmosphere. Background slightly blurred with shallow depth of field, keeping focus on the hands, glasses, and case. Ultra-realistic product photography style, realistic skin texture, clean hands, realistic eyeglass frame details, subtle shadows, high detail, natural colors, premium lifestyle aesthetic, vertical composition, high resolution.

Negative prompt: blurry subject, extra fingers, deformed hands, distorted glasses, broken frame, unrealistic reflections, messy background, cartoon, illustration, CGI, low quality, oversaturated colors, duplicated objects, warped case, floating items

Copiar prompt de vídeo sem fala — Create an ultra-photorealistic vertical image (9:16) showing the EXACT product from the attached reference image being presented to the camera in a natural

first-person POV. The scene must feel human, real, spontaneous, and believable, as if someone is simply showing the product to the camera with one hand.

ABSOLUTE PRIORITY:

The attached product must be reproduced with maximum fidelity and zero redesign. Preserve exactly all visible characteristics from the reference image:

- packaging shape
- bottle / jar / box / container structure
- label design
- typography
- colors
- logo placement
- cap / lid / nozzle / pump details
- material finish
- reflections
- transparency
- proportions
- print alignment
- all visual details

Do not simplify, reinterpret, beautify, replace, invent, or alter any part of the product. The final product must look exactly like the attached reference.

MAIN COMPOSITION:

- true POV / first-person feeling
- only ONE hand visible
- no second hand
- no full person
- no face
- no body
- no selfie framing
- no person "showing" the product in the scene
- only the hand and, if necessary, a small part of the forearm may appear
- the product is held naturally and shown directly to the camera
- product close to the camera, clearly visible, hero of the frame
- label/front side turned toward the camera whenever physically possible
- framing should look organic and human, not staged like a studio ad

HAND / PRODUCT REALISM:

- grip must be anatomically correct
- hand posture must match the real size and shape of the product
- scale must be accurate: the product cannot look too big or too small in the hand
- fingers must wrap around the product naturally
- skin texture must be realistic
- nails natural
- no tattoos unless present in the reference or explicitly requested
- no rings, watches, bracelets, or accessories unless necessary and subtle
- never generate extra fingers
- never generate multiple hands
- never deform the hand or forearm

ENVIRONMENT:

Place the scene in a realistic, functional, believable environment that matches the product category naturally, but keep the environment secondary. The AI should infer the ideal setting based on the product itself.

Examples:

- perfume / skincare / cosmetics → vanity, bathroom, bedroom dresser
- food / drink / supplement → kitchen, dining table, pantry, desk
- tech / electronics → desk, office, bedroom setup
- fashion accessory → wardrobe area, mirror area, neutral indoor setting
- home / cleaning product → kitchen, laundry area, utility space

The environment must be:

- photorealistic
- natural
- functional
- clean but lived-in
- believable
- softly secondary
- never luxurious showroom
- never empty studio
- never fake CGI background

VISUAL STYLE:

- ultra photorealistic
- natural smartphone realism
- authentic iPhone-style look
- slight shallow depth of field
- sharp focus on the product and main label
- natural lighting or realistic indoor light
- realistic reflections and shadows
- subtle natural grain allowed
- organic social-media realism
- not overly polished
- not artificial advertising style

CAMERA:

- iPhone 15 Pro Max rear camera look
- 24mm wide-angle feel
- handheld POV realism
- natural perspective
- slight edge distortion acceptable
- vertical 9:16 composition

FOCUS HIERARCHY:

1. exact product fidelity
2. label consistency and readability
3. correct hand anatomy
4. correct product-to-hand proportion
5. realistic environment coherence
6. natural human POV feeling

STRICT RULES:

- use the attached product as the exact visual reference

- do not change any product features
- do not create a generic version
- do not replace the packaging
- do not hide the main label
- do not distort text
- do not create fake branding
- do not show multiple hands
- do not show the person
- do not create a mirror selfie
- do not crop the product awkwardly
- do not oversaturate colors
- do not stylize
- do not turn the image into CGI or illustration

ANTI-BUG / NEGATIVE PROMPT:

multiple hands, two hands, extra fingers, extra limbs, duplicated hand, deformed hand, broken anatomy, warped fingers, melted skin, visible face, visible person, visible body, selfie pose, mirror selfie, altered packaging, changed label, wrong logo, fake text, unreadable text, distorted typography, changed colors, changed cap, wrong material, oversized product, undersized product, floating product, unrealistic grip, blurry product, low quality, CGI, 3D render, illustration, cartoon, studio background, luxury showroom, fake reflections, overprocessed image, harsh flash, overexposed highlights, cluttered background, inconsistent scale, warped container, bent bottle, stretched packaging

OUTPUT GOAL:

Generate a flawless universal POV image where a single realistic hand naturally shows the exact attached product to the camera, preserving maximum fidelity, consistency, correct scale, and ultra-realistic detail, with zero margin for error.

Movimento Natural

Copiar prompt de vídeo – Movimentos exatos em sequência de 10 segundos, filmagem estilo TikTok segurando celular:

0-1s: close rosto, sorriso leve, inclina cabeça direita, piscada lenta, gesto rápido com mão direita.
 1-2s: zoom out, sorriso largo, joga cabelo para trás com mão direita.
 2-3s: mão na cintura, balanço leve de quadril, sorriso confiante.
 3-4s: olha para baixo, ajusta peça com duas mãos na barra.
 4-5s: volta olhar para câmera, passa mão no cabelo, mão na cintura.
 5-6s: duas mãos ajustando laterais da peça na cintura, balanço corpo.
 6-7s: olha para baixo, ajusta barra novamente.
 7-8s: vira completamente de costas, fica 1s.
 8-9s: vira de frente, ajusta peça.
 9-10s: meche no cabelo e manda beijo

Roupina Pet

Copiar prompt de imagem

Use the attached image as the only and absolute reference for the pet clothing.

Create one ultra-realistic vertical 9:16 iPhone-style lifestyle photograph of a real domestic pet naturally wearing the exact attached garment inside a comfortable Brazilian middle-class home.

PRODUCT LOCK:

Preserve the exact pet clothing shown in the reference:

same clothing category,
same quantity,
same design,
same cut,
same dimensions,
same proportions,
same colors,
same fabric,
same texture,
same print,
same graphics,
same seams,
same collar,
same sleeves,
same leg openings,
same closures,
same trim,
same hem,
same accessories physically attached to the garment,
and the same visible construction details.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, or invent any part of the clothing.

Generate the exact attached garment, not a similar variation.

PET SELECTION:

Choose one real domestic pet whose species, body size, torso length, neck circumference, and leg proportions are physically compatible with the garment.

Use a dog or cat according to the actual design and intended use of the clothing.

The pet must be correctly scaled relative to the garment.

GARMENT FIT:

Dress the pet correctly and naturally.

The garment must fit around the pet's body with:

correct neck placement,
correct leg openings,
realistic torso coverage,
believable fabric tension,
natural folds,
accurate seams,

proper closures,
realistic interaction with the fur,
and physically coherent drape.

The clothing must not appear painted onto the animal.

It must not fuse with the fur, float away from the body, slide into the wrong position, or change its original design.

Do not stretch the garment unnaturally to fit an incompatible animal.

PET POSE:

Show the pet in one calm and natural pose:

standing,
sitting,
resting,
or looking toward the camera.

The pose must clearly display the garment while remaining physically believable.

The animal must not be positioned like a rigid mannequin or fashion model.

PET REALISM:

The pet must have:

correct anatomy,
natural fur,
realistic paws,
correct number of limbs,
believable joints,
natural eyes,
proper ears,
correct muzzle,
true body weight,
and a relaxed domestic posture.

The garment must create subtle realistic pressure and natural fur compression where it touches the body.

BRAZILIAN HOME:

Use a real Brazilian living room, bedroom, hallway, or dedicated pet corner.

The environment must feel:

clean,
organized,
comfortable,
functional,

warm,
lived-in,
and naturally attractive.

Include finished neutral walls, practical proportional furniture, clean ceramic, porcelain, laminate, or light wood flooring, natural daylight, and restrained household decoration.

Do not create a mansion, luxury showroom, foreign boutique, artificial studio, unfinished room, or visually cluttered environment.

CAMERA:

Shot as if captured with an iPhone 15 Pro or a similar modern smartphone.

Vertical 9:16.

24mm to 28mm equivalent main camera.

Standard photo mode.

Low pet-level or natural slightly elevated framing.

Broad readable focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle smartphone processing.

No portrait mode.

No extreme background blur.

No artificial bokeh.

No excessive HDR.

PHOTOGRAPHIC COHERENCE:

The pet, clothing, fur, floor, furniture, and room must share the same:

lighting direction,
white balance,
perspective,
focus behavior,
exposure,
shadow softness,
and photographic texture.

The result must look like one genuine iPhone photograph captured in a single moment.

CLEAN FRAME:

Legitimate text, branding, illustrations, and graphics may remain only when physically present on the exact garment.

Outside the clothing itself, generate no added text, logos, symbols, captions, stickers, interface elements, promotional graphics, or watermarks.

NEGATIVE CONSTRAINTS:

no altered clothing,
no similar replacement garment,
no changed color,
no changed print,
no duplicated clothing,
no invented accessories,
no incorrect fit,
no clothing painted onto fur,
no fused fabric and fur,
no floating fabric,
no wrong leg openings,
no twisted garment,
no deformed pet,
no extra paws,
no missing limbs,
no distorted muzzle,
no mannequin-like pose,
no CGI,
no 3D render,
no collage effect,
no artificial studio look,
no text overlays,
no watermark,
no borders.

FINAL OUTPUT:

One clean ultra-realistic vertical iPhone-style photograph of a real compatible domestic pet naturally wearing the exact attached clothing inside a comfortable Brazilian middle-class home, with complete garment fidelity, correct anatomical fit, realistic fabric behavior, and clear visual focus on the product.

Copiar prompt de vídeo sem fala — Use the uploaded first frame as an immutable visual anchor and the exclusive source of truth for the pet, clothing, environment, lighting, camera angle, and composition.

Create an 8-second ultra-photorealistic vertical smartphone lifestyle video of the same real domestic pet naturally moving while wearing the exact clothing shown in the first frame.

FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

One continuous uninterrupted take.

No cuts.

No transitions.

No scene changes.

CLOTHING LOCK:

Preserve the exact pet garment throughout every frame:

Animal alegre, feliz e empolgado

same category,

same quantity,

same design,

same cut,

same dimensions,

same proportions,

same colors,

same fabric,

same texture,

same print,

same graphics,

same seams,

same collar,

same sleeves,

same leg openings,

same closures,

same trim,

same hem,

same attached accessories,

and the same visible construction details.

Treat the clothing as a real physical garment already represented correctly in the uploaded first frame.

Do not redesign, recolor, simplify, duplicate, remove, replace, reconstruct, improve, or invent any part of it.

The clothing must not morph, change color, change print, change length, gain parts, lose parts, or slide into a different position during the video.

PET LOCK:

Preserve the same pet throughout the entire video:

same species,
same breed or physical type,
same size,
same fur color,
same markings,
same eyes,
same ears,
same muzzle,
same paws,
and same body proportions.

The pet must not morph, duplicate, change size, or change appearance.

ACTION:

Use one calm and physically believable movement sequence.

The pet takes two or three slow natural steps, pauses, and turns its body slightly toward the camera so the garment remains clearly visible.

The pet may then:

look toward the camera,
move its ears slightly,
blink,
adjust one paw,
or sit calmly.

Keep all movement restrained, natural, and appropriate for a real domestic animal.

Do not create runway behavior, trained posing, spinning, jumping, running, or exaggerated movement.

GARMENT PHYSICS:

The clothing must react naturally to the pet's body movement.

Show:

subtle fabric tension,
small organic folds,
realistic drape,
minor seam movement,
natural sleeve and leg-opening behavior,
correct collar placement,
believable contact with fur,
and slight fur compression beneath the garment.

The clothing must remain securely fitted.

It must not:

slide around the torso,

rotate independently,
detach,
float,
inflate,
pulse,
stretch impossibly,
merge with the fur,
or pass through the pet's body.

PET MOVEMENT:

Show realistic:

paw placement,
joint movement,
body weight,
balance,
gait,
head movement,
fur response,
breathing,
and posture.

The clothing must not restrict the animal in an anatomically impossible way.

CAMERA ACTION:

Begin with the exact framing of the uploaded first frame.

Use low pet-level handheld framing.

Gently follow the pet with a restrained camera adjustment.

Add only subtle smartphone movement:

minor breathing drift,
small framing corrections,
and a slow approach of a few centimeters.

Maintain the same visible side of the garment whenever possible.

Do not orbit around the pet.

Do not use aggressive zoom.

Do not change lenses.

Do not move close enough to force reconstruction of hidden clothing details.

BRAZILIAN HOME:

Preserve or create a real Brazilian middle-class comfortable home consistent with the first frame.

Use a clean living room, bedroom, hallway, or pet corner with:

finished neutral walls,
practical proportional furniture,
clean ceramic, porcelain, laminate, or light wood flooring,
natural daylight,
subtle household objects,
and restrained decoration.

The environment must feel warm, organized, functional, lived-in, and naturally attractive without appearing luxurious or staged.

CAMERA QUALITY:

Shot as if recorded with an iPhone 15 Pro or a similar modern smartphone.

24mm to 28mm equivalent main camera.

Standard smartphone video mode.

Broad natural focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle sensor texture.

Restrained smartphone processing.

No portrait mode.

No cinematic artificial depth simulation.

No strong bokeh.

No artificial subject isolation.

No excessive motion blur.

No fake HDR.

TEMPORAL CONSISTENCY:

Every frame must preserve the same:

pet identity,
pet anatomy,
fur color,

garment identity,
garment fit,
garment print,
fabric texture,
room layout,
floor texture,
lighting direction,
white balance,
focus behavior,
and exposure.

The clothing must not morph.

The pet must not morph.

The environment must not change, multiply, disappear, or transform.

CLEAN FRAME:

Legitimate text, branding, illustrations, and graphics may remain only when physically present on the exact garment.

Outside the clothing itself, generate no floating text, captions, symbols, icons, stickers, social-media interface, camera controls, promotional graphics, or watermarks.

AUDIO:

Natural synchronized home ambience only.

Include:

soft paw sounds,
subtle fabric movement,
gentle pet breathing,
minor collar or closure movement when physically present,
and faint household room tone.

No dialogue.

No voice-over.

No music.

No artificial transition sounds.

NEGATIVE CONSTRAINTS:

no altered clothing,
no changed color,
no changed print,
no clothing morphing,
no sliding garment,

no floating fabric,
no fabric merging with fur,
no incorrect leg openings,
no detached clothing,
no deformed pet,
no extra paws,
no missing limbs,
no distorted gait,
no pet morphing,
no runway behavior,
no jumping,
no scene change,
no CGI,
no 3D render,
no collage effect,
no subtitles,
no captions,
no text overlays,
no watermark,
no borders,
no glitch effects.

FINAL OUTPUT:

One continuous 8-second ultra-realistic vertical iPhone-style video of the same real domestic pet taking a few calm natural steps while wearing the exact attached clothing inside a comfortable Brazilian middle-class home, with stable garment identity, realistic fabric movement, correct animal anatomy, and no visual drift.

Copiar prompt de vídeo sem fala — Create an ultra-photorealistic vertical image (9:16) showing the EXACT product from the attached reference image being presented to the camera in a natural first-person POV. The scene must feel human, real, spontaneous, and believable, as if someone is simply showing the product to the camera with one hand.

ABSOLUTE PRIORITY:

The attached product must be reproduced with maximum fidelity and zero redesign. Preserve exactly all visible characteristics from the reference image:

- packaging shape
- bottle / jar / box / container structure
- label design
- typography

- colors
- logo placement
- cap / lid / nozzle / pump details
- material finish
- reflections
- transparency
- proportions
- print alignment
- all visual details

Do not simplify, reinterpret, beautify, replace, invent, or alter any part of the product. The final product must look exactly like the attached reference.

MAIN COMPOSITION:

- true POV / first-person feeling
- only ONE hand visible
- no second hand
- no full person
- no face
- no body
- no selfie framing
- no person "showing" the product in the scene
- only the hand and, if necessary, a small part of the forearm may appear
- the product is held naturally and shown directly to the camera
- product close to the camera, clearly visible, hero of the frame
- label/front side turned toward the camera whenever physically possible
- framing should look organic and human, not staged like a studio ad

HAND / PRODUCT REALISM:

- grip must be anatomically correct
- hand posture must match the real size and shape of the product
- scale must be accurate: the product cannot look too big or too small in the hand
- fingers must wrap around the product naturally
- skin texture must be realistic
- nails natural
- no tattoos unless present in the reference or explicitly requested
- no rings, watches, bracelets, or accessories unless necessary and subtle
- never generate extra fingers
- never generate multiple hands
- never deform the hand or forearm

ENVIRONMENT:

Place the scene in a realistic, functional, believable environment that matches the product category naturally, but keep the environment secondary. The AI should infer the ideal setting based on the product itself.

Examples:

- perfume / skincare / cosmetics → vanity, bathroom, bedroom dresser
- food / drink / supplement → kitchen, dining table, pantry, desk
- tech / electronics → desk, office, bedroom setup
- fashion accessory → wardrobe area, mirror area, neutral indoor setting
- home / cleaning product → kitchen, laundry area, utility space

The environment must be:

- photorealistic
- natural
- functional
- clean but lived-in
- believable
- softly secondary
- never luxurious showroom
- never empty studio
- never fake CGI background

VISUAL STYLE:

- ultra photorealistic
- natural smartphone realism
- authentic iPhone-style look
- slight shallow depth of field
- sharp focus on the product and main label
- natural lighting or realistic indoor light
- realistic reflections and shadows
- subtle natural grain allowed
- organic social-media realism
- not overly polished
- not artificial advertising style

CAMERA:

- iPhone 15 Pro Max rear camera look
- 24mm wide-angle feel
- handheld POV realism
- natural perspective
- slight edge distortion acceptable
- vertical 9:16 composition

FOCUS HIERARCHY:

1. exact product fidelity
2. label consistency and readability
3. correct hand anatomy
4. correct product-to-hand proportion
5. realistic environment coherence
6. natural human POV feeling

STRICT RULES:

- use the attached product as the exact visual reference
- do not change any product features
- do not create a generic version
- do not replace the packaging
- do not hide the main label
- do not distort text
- do not create fake branding
- do not show multiple hands
- do not show the person
- do not create a mirror selfie
- do not crop the product awkwardly

- do not oversaturate colors
- do not stylize
- do not turn the image into CGI or illustration

ANTI-BUG / NEGATIVE PROMPT:

multiple hands, two hands, extra fingers, extra limbs, duplicated hand, deformed hand, broken anatomy, warped fingers, melted skin, visible face, visible person, visible body, selfie pose, mirror selfie, altered packaging, changed label, wrong logo, fake text, unreadable text, distorted typography, changed colors, changed cap, wrong material, oversized product, undersized product, floating product, unrealistic grip, blurry product, low quality, CGI, 3D render, illustration, cartoon, studio background, luxury showroom, fake reflections, overprocessed image, harsh flash, overexposed highlights, cluttered background, inconsistent scale, warped container, bent bottle, stretched packaging

OUTPUT GOAL:

Generate a flawless universal POV image where a single realistic hand naturally shows the exact attached product to the camera, preserving maximum fidelity, consistency, correct scale, and ultra-realistic detail, with zero margin for error.

POV | Mão Pegando Eletro

link imagem -

<https://wpevghcfmjwmidcjdtnd.supabase.co/storage/v1/render/image/sign/prompt-media/image/1787005845383-zo31h5.jpg?token=eyJraWQiOiJzdG9yYWdlLXVybC1zaWduaW5nLWtleV8zNDM0YzgxZi0wMzMmLTRINTEtYWYzYy01MzkxYWNjYjgxODIiLCJhbGciOiJIUzI1NiJ9.eyJ1cmwiOiJwcm9tcHQtbWVkaWEvaW1hZ2UvMTc4NzAwNTg0NTM4My16bzMxaDUuanBnliwic2NvcGUiOiJkb3dubG9hZCIsImIhdCI6MTc4NzAwNTg1NSwiZXhwIjoyMTAyMzY1ODU1fQ.vwN2AsUVXeP7K0tNn1vQdYM0tPKO8LWRuJiiLb7hny0&width=560&quality=70&resize=contain>

Copiar prompt de imagem –

Hyper-realistic POV style product photography, first-person point of view.

Looking down from a natural standing height at a clean modern store counter. The exact product from the reference image is placed centered on the counter surface.

The product sits naturally on the counter with realistic contact shadows. Soft natural store lighting, slight reflections on the counter, clean and professional retail environment. Shallow depth of field, the background softly blurred showing subtle store elements without distraction.

PRODUCT LOCK (absolute rules):

- Use the exact product from the reference image with 100% fidelity.
- Do not change shape, size, proportions, colors, materials, text, logos, branding, packaging details or any visible element.
- Do not redesign, stylize, improve or reinterpret the product in any way.
- The product must remain perfectly identical and clearly identifiable.

Style: ultra-photorealistic, clean commercial retail photography, natural lighting, high detail, 8k quality, authentic customer POV looking at the product on the store counter.

Copiar prompt de vídeo sem fala —

Hyper-realistic cinematic video in pure POV style, first-person point of view.

Start looking down at the exact product from the reference image resting on a clean modern store counter. Soft natural retail lighting, realistic shadows.

A single realistic hand enters the frame from the bottom, naturally grasps the product, and slowly lifts it from the counter. The hand then gently rotates the product left and right and slightly tilts it to clearly showcase all sides and details. Movements are smooth, controlled, natural and elegant, without shaking or exaggeration.

After demonstrating, the hand holds the product steady facing the camera for a moment.

PRODUCT LOCK (absolute rules):

- Use the exact product from the reference image with 100% fidelity.
- Do not change shape, size, proportions, colors, materials, text, logos, branding, packaging or any visible detail.
- Do not redesign, stylize, improve or reinterpret the product in any way.

No text, subtitles, graphics or watermarks. No speech. Ultra-realistic lighting, shallow depth of field, premium commercial quality, 4K, vertical 9:16, smooth cinematic motion.

Crianças | Produto infantil em loja

Copiar prompt de imagem - UNIVERSAL VIDEO PROMPT — CHILDREN PRODUCT ON STORE SHELF / MAX FIDELITY / REAL SCALE / BRAZILIAN PHOTOREALISM

Use the attached children's product image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT product naturally placed on a shelf or display area inside a real Brazilian children's store.

The product must remain visually identical to the reference during the entire video: same type, shape, size, proportions, color, packaging structure, material finish, label placement, edges, seams, thickness and visible details.

CHILD / BABY FULL PRIVACY BLUR RULE:

No real child, baby, toddler, infant, teenager or underage person may appear clearly anywhere in the video.

Do not generate visible minors in the store, aisle, background, posters, frames, mirrors, shelves, displays, packaging or any visible area.

If any child or baby appears on the product packaging or background store materials, completely blur or privacy-mask the entire child/baby representation in every frame.

Blur face, body, hands, skin, silhouette and human-like minor representation.

Do not blur the whole product. Keep product structure, colors, packaging and non-child design elements sharp and faithful.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO SHELF SHOT:

Show the exact product placed naturally on a shelf or display. The product is the hero, clearly visible, correctly scaled and physically supported.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of packaging texture, label placement, edge, seam, material finish, cap, lid, box corner, plastic surface or printed detail.

3s–4.5s — RETAIL CONTEXT SHOT:

Cut to a slow natural camera movement across the shelf or display area, keeping the exact product in focus. The environment confirms a real Brazilian children's store without competing with the product.

4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another detail angle showing surface texture, packaging volume, shelf contact, side profile, product thickness or tactile material quality.

6s–8s — FINAL HERO SHOT:

Return to a clean final product shot on the shelf, stable, sharp, realistic and commercially clear.

SCENE:

Real Brazilian middle-class children's product store or infant retail environment. Organized shelves, soft playful neutral decor, clean retail lighting, wood, white, beige, pastel or warm store details. No visible children or babies.

CAMERA:

Vertical 9:16, iPhone 15 Pro Max rear camera look, natural smartphone perspective, smooth handheld or stabilized movement, sharp product focus, realistic store depth.

LIGHTING:

Soft retail lighting, balanced exposure, realistic shadows and natural highlights on packaging, plastic, paper, fabric, shelves and display surfaces.

AUDIO:

No dialogue. No voiceover. Subtle store ambience and soft shelf/product handling sounds if applicable.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not alter product design, packaging, label placement, color or material.

Do not generate visible children or babies.

Blur the entire child/baby representation if it appears on packaging or printed material.

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, wrong product design, altered product, changed proportions, wrong scale, floating product, fake shelf, cluttered shelf, product morphing, blurry product, CGI, 3D render, AI artifacts, poor store, empty studio, fake showroom, visible child, visible baby, visible toddler, visible teenager, visible minor, readable child face, readable baby face, visible child body, visible baby body, child on packaging not fully blurred, baby on packaging not fully blurred, child poster not fully blurred, baby poster not fully blurred, text overlays, watermark

Copiar prompt de vídeo sem fala - UNIVERSAL VIDEO PROMPT — CHILDREN PRODUCT ON STORE SHELF / MAX FIDELITY / REAL SCALE / BRAZILIAN PHOTOREALISM

Use the attached children's product image as the absolute visual reference. Create an ultra-photorealistic vertical video (9:16) showing the EXACT product naturally placed on a shelf or display area inside a real Brazilian children's store.

The product must remain visually identical to the reference during the entire video: same type, shape, size, proportions, color, packaging structure, material finish, label placement, edges, seams, thickness and visible details.

CHILD / BABY FULL PRIVACY BLUR RULE:

No real child, baby, toddler, infant, teenager or underage person may appear clearly anywhere in the video.

Do not generate visible minors in the store, aisle, background, posters, frames, mirrors, shelves, displays, packaging or any visible area.

If any child or baby appears on the product packaging or background store materials, completely blur or privacy-mask the entire child/baby representation in every frame.

Blur face, body, hands, skin, silhouette and human-like minor representation.

Do not blur the whole product. Keep product structure, colors, packaging and non-child design elements sharp and faithful.

IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

VIDEO STRUCTURE:

0s–1.5s — HERO SHELF SHOT:

Show the exact product placed naturally on a shelf or display. The product is the hero, clearly visible, correctly scaled and physically supported.

1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of packaging texture, label placement, edge, seam, material finish, cap, lid, box corner, plastic surface or printed detail.

3s–4.5s — RETAIL CONTEXT SHOT:

Cut to a slow natural camera movement across the shelf or display area, keeping the exact product in focus. The environment confirms a real Brazilian children's store without competing with the product.

4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another detail angle showing surface texture, packaging volume, shelf contact, side profile, product thickness or tactile material quality.

6s–8s — FINAL HERO SHOT:

Return to a clean final product shot on the shelf, stable, sharp, realistic and commercially clear.

SCENE:

Real Brazilian middle-class children's product store or infant retail environment. Organized shelves, soft playful neutral decor, clean retail lighting, wood, white, beige, pastel or warm store details. No visible children or babies.

CAMERA:

Vertical 9:16, iPhone 15 Pro Max rear camera look, natural smartphone perspective, smooth handheld or stabilized movement, sharp product focus, realistic store depth.

LIGHTING:

Soft retail lighting, balanced exposure, realistic shadows and natural highlights on packaging, plastic, paper, fabric, shelves and display surfaces.

AUDIO:

No dialogue. No voiceover. Subtle store ambience and soft shelf/product handling sounds if applicable.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not alter product design, packaging, label placement, color or material.

Do not generate visible children or babies.

Blur the entire child/baby representation if it appears on packaging or printed material.

ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, wrong product design, altered product, changed proportions, wrong scale, floating product, fake shelf, cluttered shelf, product morphing, blurry product, CGI, 3D render, AI artifacts, poor store, empty studio, fake showroom, visible child, visible baby, visible toddler, visible teenager, visible minor, readable child face, readable baby face, visible child body, visible baby body, child on packaging not fully blurred, baby on packaging not fully blurred, child poster not fully blurred, baby poster not fully blurred, text overlays, watermark

Pov | Segurando o Chinelô

Copiar prompt de imagem - Use the uploaded image as the ****ABSOLUTE AND EXCLUSIVE REFERENCE FOR THE SHOES****.

Create an ultra-photorealistic vertical 9:16 smartphone POV photograph matching the natural composition of the reference.

HAND GRIP — EXTREMELY IMPORTANT

A ****SINGLE FEMININE HAND MUST DIRECTLY GRIP BOTH SHOES AT THE SAME TIME****.

The hand is positioned ****ABOVE AND BETWEEN THE TWO SHOES****, with the fingers physically inserted into and gripping the ****upper collar/opening of BOTH individual shoes****.

The hand must NOT hold only one shoe.

The hand must NOT hold one shoe while the other hangs independently.

The grip must work like this:

- * The ****thumb visibly grips the collar/upper edge of one shoe****.
- * The ****index and middle fingers physically grip the collar/opening of the second shoe****.
- * The remaining fingers naturally wrap around the upper edges and inner openings of the two shoes.
- * ****EVERY SHOE MUST HAVE DIRECT PHYSICAL CONTACT WITH THE SAME HAND.****
- * Both shoes are lifted together by this single hand.
- * The two shoes remain side-by-side and naturally touching/overlapping.
- * Both shoes are suspended at the same height because they are ****physically supported by the hand****.

The hand must visibly enter the openings of both shoes enough to make the physical grip unmistakable.

****IMPORTANT:** The hand is NOT holding the shoes by the laces, soles or heels. It is gripping the TWO SHOES directly by their upper collar/opening, with the fingers physically inside the openings.

PHYSICAL SUPPORT — ABSOLUTE RULE

Both shoes must have a visible and believable connection to the hand.

****NO FLOATING.
NO LEVITATION.
NO UNATTACHED SHOE.
NO SHOE HANGING WITHOUT SUPPORT.
NO INVISIBLE SUPPORT.****

If the viewer follows the shoes upward, they must clearly see that ****both shoes are attached to and supported by the same feminine hand.****

PRODUCT LOCK

Use the uploaded shoes exactly as they appear in the reference.

Do not redesign, recreate or reinterpret the product.

Preserve 100% of the original:

- * model
- * silhouette
- * proportions
- * colors
- * materials
- * textures
- * stitching
- * sole
- * laces
- * logos
- * lettering
- * patterns
- * decorative elements
- * every visible detail

The shoes must look like the ****exact same physical pair from the reference image****, photographed in a different environment.

FEMININE HAND

One realistic feminine hand only.

Natural feminine fingers, realistic anatomy, realistic skin pores and texture, subtle elegant manicure.

A small portion of the wrist and forearm can be visible.

No second hand.

No face.

No full body.

SCENE

Elegant modern neutral home interior.

Large cream/off-white textured upholstered sofa in the background, with a light neutral tiled floor beside it.

Soft beige, cream and warm white color palette.

The environment should look like a real sophisticated apartment photographed naturally with a smartphone.

CAMERA

First-person POV.

Vertical 9:16.

Camera positioned slightly above the shoes and naturally pointing downward.

Close-up composition.

The entire hand and ****BOTH** points of contact between the hand and the shoes must remain visible******.

Natural smartphone perspective.

Realistic depth of field with subtle background blur.

LIGHTING

Soft natural daylight from a nearby window.

Natural shadows.

Realistic highlights and reflections.

No studio lighting.

No artificial glow.

FINAL QUALITY

Ultra-photorealistic authentic smartphone photograph.

The final image must look like a real woman casually picked up ****both shoes together with one hand****.

****THE MOST IMPORTANT REQUIREMENT: ONE SINGLE FEMININE HAND MUST PHYSICALLY GRIP AND SUPPORT BOTH SHOES DIRECTLY BY THEIR UPPER OPENINGS. BOTH SHOES MUST BE VISIBLY CONNECTED TO THE HAND.****

Copiar prompt de vídeo sem fala

-0- Create an ultra-realistic vertical 9:16 product video using the uploaded image as the ****exact first-frame reference****.

PRODUCT LOCK — ABSOLUTE

The two shoes must remain ****100% identical to the shoes in the input image throughout the entire video****.

Do not redesign, regenerate, morph, replace, simplify or alter the shoes.

Preserve exactly:

- * model and silhouette
- * colors
- * materials and textures
- * stitching
- * sole
- * laces
- * logos and lettering
- * patterns
- * proportions
- * every visible product detail

The shoes must remain the ****same physical pair from the input image during every frame****.

HAND & GRIP — CRITICAL

The ****same single feminine hand must physically hold BOTH shoes throughout the entire video****.

The hand remains positioned above and between the shoes, gripping the upper collar/opening of ****both individual shoes****.

Both shoes must remain physically connected to the hand at all times.

The fingers must maintain a believable grip on both shoes during the entire movement.

****NEVER release either shoe.****

****NEVER allow one shoe to float, levitate, separate or move independently from the hand.****

MOTION

Create a subtle, natural product-showcase movement.

The woman gently lifts the pair of shoes slightly upward, holds them steady for a moment, then makes a very small natural movement toward the camera and back.

The movement must be slow, smooth and controlled.

The two shoes move ****together as one physically connected pair****, following the hand's movement naturally.

No sudden movements.

No shaking.

No rotation that hides the product.

No flipping.

No tossing.

CAMERA

POV smartphone camera.

The camera remains handheld but stable.

Very subtle natural handheld micro-movement.

No zoom.

No dramatic camera movement.

No camera rotation.

Keep the shoes centered and clearly visible throughout the entire video.

Maintain the original composition and perspective of the input image.

ENVIRONMENT

Keep the exact same neutral modern interior from the input image.

Cream/off-white textured sofa in the background.

Light neutral tiled floor.

Soft natural daylight.

Do not change the environment during the video.

REALISM

Ultra-photorealistic smartphone footage.

Natural feminine hand movement.

Realistic finger articulation.

Realistic skin texture.

Physically accurate interaction between the hand and both shoes.

Natural shadows and lighting.

Realistic depth of field.

The result should look like a genuine UGC product video recorded casually with a smartphone.

STRICT NEGATIVE RULES

NO floating shoe.

NO levitating shoe.

NO detached shoe.

NO second hand.

NO extra fingers.

NO hand deformation.

NO shoe deformation.

NO product morphing.

NO changing colors.

NO changing logos.

NO changing materials.

NO duplicated shoes.

NO disappearing shoe.

NO new shoe appearing.

NO laces changing.

NO sole changing.

NO camera zoom.

NO camera spin.

NO fast movement.

NO scene transition.

NO text.

NO watermark.

****The two original shoes and the single feminine hand must remain physically connected and visually consistent from the first frame to the last frame.****

Movimento Casal | Amor

Copiar prompt de vídeo - Ultra-realistic vertical smartphone video, 9:16 aspect ratio, authentic smartphone couple fashion UGC, natural handheld camera. A stylish couple stands naturally side by side with warm, relaxed expressions. The female influencer smoothly turns about 45 degrees to the side, naturally showcasing the fit of her outfit. As she finishes turning, the male influencer, smiling with a friendly and playful closed-mouth expression, gives her a light, affectionate pat on the back of her hip/glute area in a brief, natural, and respectful gesture. She reacts with a subtle amused smile and a slight playful glance toward him before both return their attention to the camera.

The interaction feels spontaneous, lighthearted, and affectionate, emphasizing chemistry between the couple rather than exaggeration. Natural eye contact, realistic body mechanics, smooth weight transfer, authentic hand contact, gentle clothing interaction, realistic fabric physics, subtle hair movement, cinematic daylight, premium fashion influencer aesthetic, ultra-realistic human motion, seamless natural movement, authentic smartphone UGC style.

No talking, no lip movement, no mouthing words, no exaggerated reactions, no overacting, no vulgar behavior, no aggressive contact, no robotic movement, no stiff posture.

Estilo POV - Camisa na cama

link video - <https://files.catbox.moe/8d6z2n.mp4#t=0.1>

Copiar prompt de vídeo —

Duration: 8–10 seconds

Use the uploaded image as the exact first frame.

Create an ultra-realistic first-person TikTok Shop UGC smartphone video.

The satin pajama set must remain 100% identical throughout the entire video.

Preserve exactly:

- * same satin fabric
- * same pink color
- * same black piping
- * same pocket
- * same buttons
- * same shorts
- * same wrinkles
- * same stitching
- * same proportions
- * same reflections
- * same bed
- * same pillows
- * same lighting
- * same composition

Nothing about the product may change.

Camera

The camera is held naturally above the bed by the person filming.

The framing remains almost fixed during the entire video.

Only tiny handheld smartphone movements.

Natural autofocus.

Natural exposure adjustments.

Looks exactly like someone casually filming at home.

Never cinematic.

Never stabilized.

Hand Movement

The video begins with both pajama pieces lying naturally on the

Saco grande de ração em loja PET premium brasileira

Copiar prompt de imagem - Use the attached image as the only and absolute reference for the large pet food bag.

Create one ultra-realistic vertical 9:16 iPhone-style photograph of the exact attached pet food bag naturally standing on the floor inside a real Brazilian accessible-premium pet shop.

The final image must look like a genuine smartphone photograph captured by a customer inside a real store, not CGI, not a 3D render, and not an artificial catalog composition.

PRODUCT LOCK:

Preserve the exact product shown in the attached reference:

same quantity,
same bag size,
same weight category,
same proportions,
same packaging shape,
same colors,
same material,
same branding,
same legitimate printed text,
same labels,
same graphics,
same top seal,

same bottom structure,
same visible folds,
and the same construction details.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, or invent any product detail.

Generate the exact attached bag, not a similar product.

Legitimate branding, text, illustrations, and graphics may remain only when physically printed on the exact packaging.

Do not duplicate, enlarge, extract, or place packaging artwork elsewhere in the image.

PHYSICAL WEIGHT:

The bag must behave like a real heavy pet food package, such as a 10 kg, 15 kg, or similarly sized bag according to the reference.

Show:

realistic bottom expansion,
natural packaging tension,
subtle irregular creases,
believable internal weight,
slight material compression near the base,
stable floor contact,
and physically accurate contact shadows.

The bag must not appear empty, rigid, inflated like a balloon, floating, miniature, oversized, or pasted into the store.

PLACEMENT:

Place the bag naturally on the floor in a real pet-food aisle or organized product display area.

The bag may stand independently or rest naturally against a low display support when physically necessary.

Do not place the bag on a table, checkout counter, unstable shelf, or floating display.

Keep the front packaging face clearly visible.

COMPOSITION:

Keep the exact bag as the unmistakable main subject.

Use a natural frontal three-quarter angle that clearly shows:

the main packaging face,
real bag thickness,
side folds,
top seal,

bottom spread,
and contact with the floor.

The bag should occupy a strong central or slightly off-center position.

Do not add hands, people, pets, shopping carts, or extra copies of the featured product.

PET SHOP ENVIRONMENT:

Use a real Brazilian accessible-premium pet shop with:

organized proportional shelves,
practical aisles,
clean ceramic or porcelain flooring,
finished walls,
realistic ceiling lighting,
subtle pet products in the background,
and believable retail architecture.

The store must feel:

Brazilian,
clean,
organized,
functional,
welcoming,
well maintained,
commercially attractive,
and premium without appearing luxurious.

The background products must remain secondary and visually softer, without becoming copies of the featured bag.

Avoid:

luxury showroom,
warehouse,
empty synthetic store,
generic foreign supermarket,
fake studio,
unfinished construction,
visual clutter,
or unrealistic oversized aisles.

CAMERA:

Shot as if captured with an iPhone 15 Pro or a similar modern smartphone.

Vertical 9:16.

24mm to 28mm equivalent main camera.

Standard photo mode.

Natural standing-height or slightly lowered framing.

Broad readable focus.

True-to-life colors.

Realistic commercial indoor exposure.

Natural highlight rolloff.

Subtle smartphone processing.

No portrait mode.

No strong background blur.

No artificial bokeh.

No excessive HDR.

PHOTOGRAPHIC COHERENCE:

The bag, floor, shelves, store lighting, and background products must share the same:

lighting direction,
white balance,
perspective,
focus behavior,
exposure,
shadow softness,
reflections,
and photographic texture.

The result must look like one genuine iPhone photograph captured inside a real pet shop.

CLEAN FRAME:

Outside legitimate text and branding physically printed on the exact bag, generate no added:

text,
letters,
numbers,
logos,
symbols,
icons,
captions,
stickers,
price graphics,
promotional banners,
social-media interface,

camera controls,
or watermarks.

NEGATIVE CONSTRAINTS:

no altered bag,
no similar replacement product,
no duplicated bag,
no extra featured product units,
no changed packaging,
no changed branding,
no distorted label,
no invented text,
no floating package,
no empty-looking bag,
no balloon-like inflation,
no rigid CGI packaging,
no people,
no hands,
no pets,
no shopping cart,
no luxury showroom,
no warehouse,
no CGI,
no 3D render,
no collage effect,
no text overlays,
no watermark,
no borders.

FINAL OUTPUT:

One clean ultra-realistic vertical iPhone-style photograph of the exact attached large pet food bag naturally standing on the floor inside an organized Brazilian accessible-premium pet shop, with complete packaging fidelity, believable heavy weight, realistic folds, and physically correct store integration.

Copiar prompt de vídeo sem fala - Use the uploaded first frame as an immutable visual anchor and the exclusive source of truth for the large pet food bag, store environment, floor, shelves, lighting, camera angle, and composition.

Create an 8-second ultra-photorealistic vertical smartphone video of the exact large pet food bag naturally standing on the floor inside a real Brazilian accessible-premium pet shop.

FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

One continuous uninterrupted take.

No cuts.

No transitions.

No time jumps.

No scene changes.

ABSOLUTE PRODUCT LOCK:

Preserve the exact pet food bag throughout every frame:

same quantity,
same dimensions,
same weight category,
same proportions,
same packaging shape,
same colors,
same material,
same branding,
same legitimate printed text,
same labels,
same graphics,
same top seal,
same bottom structure,
same visible folds,
and the same construction details.

Treat the bag as a real heavy physical object already represented correctly in the uploaded first frame.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, reconstruct, complete, or reinterpret it.

Do not reveal hidden sides or invent unseen packaging details.

The bag must not morph, change size, change label, change text, gain folds, lose folds, inflate, deflate, rotate independently, or alter its visible geometry.

PRODUCT POSITION:

The bag remains stationary and fully supported by the same store floor throughout the video.

Maintain realistic:

heavy weight,
bottom expansion,
packaging tension,

material creases,
base compression,
friction,
contact shadows,
and perspective.

Do not lift, rotate, drag, open, squeeze, tilt, touch, or reposition the bag.

The bag must not move independently.

CAMERA ACTION:

Begin with the exact framing and camera angle of the uploaded first frame.

Perform one slow natural handheld push-in of only a few centimeters.

Add a subtle lateral drift to reveal slightly more of:

the bag's thickness,
side folds,
bottom spread,
top seal,
material texture,
and floor contact.

Maintain the same visible packaging face and camera axis.

Do not orbit around the bag.

Do not reveal the opposite side.

Do not use aggressive zoom.

Do not change lenses.

Do not move close enough to force reconstruction of printed text or hidden packaging geometry.

PET SHOP ENVIRONMENT:

Preserve or create a real Brazilian accessible-premium pet shop consistent with the first frame.

Use:

organized proportional shelves,
practical aisles,
clean ceramic or porcelain flooring,
finished walls,
realistic ceiling lighting,
subtle secondary pet products,
and believable commercial architecture.

The store must feel:

Brazilian,
clean,
organized,
functional,
welcoming,
well maintained,
commercially attractive,
and premium without appearing luxurious.

The background must remain stable, secondary, and visually calm.

Background products must not become duplicates of the featured bag.

CAMERA QUALITY:

Shot as if recorded with an iPhone 15 Pro or a similar modern smartphone.

24mm to 28mm equivalent main camera.

Standard smartphone video mode.

Natural standing-height or slightly lowered framing.

Broad natural focus.

True-to-life colors.

Realistic commercial indoor exposure.

Natural highlight rolloff.

Subtle sensor texture.

Restrained smartphone processing.

Realistic handheld micro-movement.

No portrait mode.

No cinematic artificial depth simulation.

No strong bokeh.

No artificial product isolation.

No excessive motion blur.

No fake HDR.

TEMPORAL CONSISTENCY:

Every frame must preserve the same:

bag identity,
packaging geometry,
colors,
branding,
printed text,
graphics,
fold structure,
floor position,
shelf layout,
background products,
lighting direction,
white balance,
focus behavior,
and exposure.

The bag must not morph.

The store must not change, multiply, disappear, or transform.

CLEAN FRAME:

Legitimate branding and text may remain only when physically printed on the exact bag.

Outside the product itself, generate no:

floating text,
captions,
symbols,
icons,
hearts,
arrows,
stickers,
social-media interface,
camera controls,
price graphics,
promotional banners,
or watermarks.

AUDIO:

Natural synchronized pet-shop ambience only.

Include subtle:

indoor commercial room tone,
faint distant customer movement,
soft shelf ambience,
subtle air-conditioning sound,
and minor store background noise.

No dialogue.

No voice-over.

No music.

No artificial transition sounds.

NEGATIVE CONSTRAINTS:

no bag movement,
no bag rotation,
no product morphing,
no packaging inflation,
no packaging deflation,
no altered branding,
no changed printed text,
no label drift,
no duplicated bag,
no extra featured product units,
no people entering the frame,
no hands,
no pets,
no floating product,
no shelf transformation,
no scene change,
no warehouse,
no luxury showroom,
no CGI,
no 3D render,
no collage effect,
no subtitles,
no captions,
no text overlays,
no watermark,
no borders,
no glitch effects.

FINAL OUTPUT:

One continuous 8-second ultra-realistic vertical iPhone-style video of the exact attached large pet food bag remaining naturally grounded inside an organized Brazilian accessible-premium pet shop, with a slow subtle camera approach, believable heavy packaging physics, stable store environment, complete product fidelity, and no visual drift.

Copiar prompt de vídeo — Ultra-realistic vertical smartphone video, 9:16 aspect ratio, authentic smartphone men's fashion UGC, natural handheld camera. A male influencer stands naturally facing the camera with relaxed shoulders, confident posture, and direct eye contact. He wears a friendly, approachable closed-mouth smile that feels genuine and effortless.

He naturally interacts with his outfit by lightly smoothing the front of his shirt with one hand, then briefly adjusting the collar and gently brushing the fabric across the chest and shoulders to highlight the fit, texture, and premium quality. He subtly grips the lower hem of the shirt and gives it a light outward pull before releasing it naturally, allowing the fabric to fall back into place. He then casually slides one hand into his pocket while using the other to lightly touch the side of the shirt near the waist, showing the garment from different angles with small, smooth body turns.

Throughout the movement, he shifts his weight naturally from one leg to the other, slightly rotating his torso left and right to display the overall look without posing excessively. His body language is relaxed, masculine, charismatic, and authentic, conveying confidence and comfort rather than performance. Every gesture is fluid and physically believable, with realistic hand articulation, natural breathing, subtle shoulder movement, authentic fabric physics, gentle clothing folds, cinematic daylight, premium men's fashion aesthetic, ultra-realistic human biomechanics, seamless natural motion, authentic smartphone UGC style.

No talking, no lip movement, no mouthing words, no singing, no whispering, no laughing, no exaggerated facial expressions, no teeth showing, no overacting, no runway posing, no robotic movement, no stiff posture.

POV | vestindo Roupas na Cama

Copiar prompt de vídeo --==-- Create a realistic top-down product placement video using the provided opening image as the starting frame and the provided final arrangement image as the ending reference.

The camera must stay completely fixed in an overhead view. Keep the same carpet background, lighting, framing, shadows, and the same feminine hands with the same nails and accessories.

Very important: the hands must handle only one single clothing piece at a time. Never pick up, hold, or place two pieces together.

The action should happen step by step:

the hands bring in one piece only

gently place or lightly toss this single piece into its exact final position

adjust it naturally remove the hands

then bring in the next single piece

place it in its correct final position

repeat the same process until all pieces are arranged

Each piece must be placed separately, one after another, never simultaneously. No stacking two pieces in the hands, no overlapping placement action with multiple items at once.

The items must appear in a logical order based on the final arrangement. Start with one piece, place it correctly, then move on to the next, until the final layout matches the reference image exactly.

The movements should be smooth, natural, and slightly slow — not rushed. The hands should look like they are organizing the products carefully on the bed/carpet.

The final frame must match the reference arrangement exactly, with the same quantity of pieces, same colors, same orientation, same spacing, and same placement.

No camera movement, no zoom, no cuts, no transitions, no morphing, no teleporting items, no extra products, no duplicated items, no missing items, no deformed hands, and absolutely no picking up two pieces at the same time.

Copiar prompt de imagem - Use the attached image as the only and absolute reference for the pet product.

Create one ultra-realistic vertical 9:16 iPhone-style photograph of the exact attached product naturally positioned on a real counter, table, or bench inside an appropriate Brazilian domestic or commercial environment.

PRODUCT LOCK:

Preserve the exact product shown in the reference:

- same category,
- same quantity,
- same size,
- same proportions,
- same shape,
- same colors,
- same materials,
- same packaging,
- same branding,
- same legitimate printed text,
- same graphics,
- same labels,
- same closures,
- same functional components,
- and the same visible construction details.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, or invent any product detail.

Generate the exact attached product, not a similar variation.

PLACEMENT:

Choose one physically appropriate support according to the product:

- a Brazilian home kitchen counter,
- a clean wooden table,
- a stone countertop,
- a pet-shop checkout counter,
- a grooming station,
- or another realistic bench appropriate to the product.

The product must rest naturally on the surface with:

- correct scale,
- believable weight,
- stable support,
- realistic material texture,
- natural packaging folds when applicable,
- accurate reflections,
- coherent contact shadows,
- and physically correct perspective.

Do not make the product float, tilt without support, appear pasted onto the surface, or look artificially rigid.

COMPOSITION:

Keep the exact product as the unmistakable main subject.

Use a natural three-quarter frontal angle that clearly shows its shape, depth, packaging, label, or main functional area.

The background must remain secondary, organized, and visually calm.

Do not add hands, people, pets, or additional product units.

BRAZILIAN ENVIRONMENT:

Use a real Brazilian middle-class comfortable home or accessible-premium pet shop.

The environment must feel:

clean,
organized,
functional,
attractive,
real,
lived-in,
and commercially useful without appearing luxurious.

Use finished walls, practical proportional furniture, clean ceramic, porcelain, stone, laminate, or light wood surfaces, natural daylight or believable commercial ambient lighting, and restrained decoration.

CAMERA:

Shot as if captured with an iPhone 15 Pro or a similar modern smartphone.

Vertical 9:16.

24mm to 28mm equivalent main camera.

Standard photo mode.

Natural handheld framing.

Broad readable focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle smartphone processing.

No portrait mode.

No strong background blur.

No artificial bokeh.

No excessive HDR.

CLEAN FRAME:

Legitimate branding, text, graphics, and illustrations may remain only when physically printed on the exact product.

Outside the product itself, generate no added:

text,
letters,
numbers,
logos,
symbols,
icons,
captions,
stickers,
price graphics,
social-media interface,
camera controls,
promotional banners,
or watermarks.

NEGATIVE CONSTRAINTS:

no altered product,
no similar replacement product,
no duplicated product,
no extra product units,
no changed packaging,
no changed branding,
no distorted label,
no invented text,
no people,
no hands,
no pets,
no floating object,
no artificial studio,
no CGI,
no 3D render,
no collage effect,
no text overlays,
no watermark,
no borders.

FINAL OUTPUT:

One clean ultra-realistic vertical iPhone-style photograph of the exact attached pet product naturally resting on a real counter, table, or bench inside an appropriate Brazilian home or accessible-premium pet shop, with complete product fidelity, correct physical support, and natural commercial realism.

Copiar prompt de vídeo sem fala 0–0 Use the uploaded first frame as an immutable visual anchor and the exclusive source of truth for the pet product, surface, environment, lighting, camera angle, and composition.

Create an 8-second ultra-photorealistic vertical smartphone B-roll video of the exact pet product naturally positioned on a real counter, table, or bench.

FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

One continuous uninterrupted take.

No cuts.

No transitions.

No scene changes.

ABSOLUTE PRODUCT LOCK:

Preserve the exact product throughout every frame:

same category,
same quantity,
same dimensions,
same proportions,
same shape,
same colors,
same materials,
same packaging,
same branding,
same legitimate printed text,
same graphics,
same labels,
same closures,
same functional components,
same visible folds,
and the same construction details.

Treat the product as a real physical object already represented correctly in the uploaded first frame.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, complete, or reconstruct it.

Do not reveal hidden sides or invent unseen details.

The product must not morph, change size, rotate independently, change label, gain parts, lose parts, or move from its original support.

PRODUCT POSITION:

The product remains stationary and fully supported by the same counter, table, or bench throughout the video.

Maintain realistic:

weight,
surface contact,
material texture,
packaging folds,
reflections,
friction,
contact shadows,
and perspective.

Do not lift, touch, open, squeeze, rotate, or reposition the product.

CAMERA ACTION:

Begin with the exact framing of the uploaded first frame.

Perform one slow and subtle handheld movement:

a gentle push-in toward the product,
combined with a very small lateral drift of only a few centimeters.

The movement may reveal slightly more depth, surface texture, packaging thickness, or one visible functional detail without exposing hidden sides.

Maintain the same visible product face and camera axis.

Do not orbit around the product.

Do not use aggressive zoom.

Do not change lenses.

Do not move close enough to force reconstruction of the label or unseen geometry.

ENVIRONMENT:

Preserve or create an appropriate Brazilian setting consistent with the first frame:

a home kitchen counter,
a clean wooden table,
a stone countertop,
a pet-shop checkout counter,
a grooming station,

or another realistic commercial or domestic support.

The environment must feel:

Brazilian,
clean,
organized,
functional,
comfortable,
realistic,
and commercially attractive without appearing luxurious.

The background must remain stable, secondary, and visually calm.

CAMERA QUALITY:

Shot as if recorded with an iPhone 15 Pro or a similar modern smartphone.

24mm to 28mm equivalent main camera.

Standard smartphone video mode.

Broad natural focus.

True-to-life colors.

Realistic exposure.

Natural highlight rolloff.

Subtle handheld micro-movement.

Restrained smartphone processing.

No portrait mode.

No cinematic artificial depth simulation.

No strong bokeh.

No excessive motion blur.

No fake HDR.

TEMPORAL CONSISTENCY:

Every frame must preserve the same:

product identity,
product geometry,
packaging,
branding,

printed text,
graphics,
surface position,
environment layout,
lighting direction,
white balance,
focus behavior,
and exposure.

The product must not morph.

The background must not change, multiply, disappear, or transform.

CLEAN FRAME:

Legitimate branding and text may remain only when physically printed on the exact product.

Outside the product itself, generate no:

floating text,
captions,
symbols,
icons,
hearts,
arrows,
stickers,
social-media interface,
camera controls,
price graphics,
promotional banners,
or watermarks.

AUDIO:

Natural synchronized room or store ambience only.

Include subtle:

indoor room tone,
distant household or store ambience,
and faint environmental sound appropriate to the location.

No dialogue.

No voice-over.

No music.

No artificial transition sounds.

NEGATIVE CONSTRAINTS:

no product movement,
no product rotation,
no product morphing,
no altered packaging,
no changed branding,
no changed printed text,
no label drift,
no duplicated product,
no extra product units,
no people,
no hands,
no pets,
no floating object,
no scene change,
no CGI,
no 3D render,
no collage effect,
no subtitles,
no captions,
no text overlays,
no watermark,
no borders,
no glitch effects.

FINAL OUTPUT:

One continuous 8-second ultra-realistic vertical iPhone-style B-roll video of the exact attached pet product resting naturally on a real counter, table, or bench inside an appropriate Brazilian environment, using only a subtle camera approach while preserving complete product identity and physical stability.

Saco grande de ração em casa brasileira

Copiar prompt de imagem –Use the attached image as the only and absolute reference for the large pet food bag.

Create one ultra-realistic vertical 9:16 iPhone-style photograph of the exact attached pet food bag naturally standing on the floor inside a comfortable Brazilian middle-class home.

PRODUCT LOCK:

Preserve the exact product shown in the reference:

same quantity,
same bag size,
same weight category,
same proportions,
same packaging shape,
same colors,
same material,
same branding,
same legitimate printed text,
same labels,
same graphics,
same top seal,
same bottom structure,
same visible folds,
and the same construction details.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, or invent any product detail.

Generate the exact attached bag, not a similar product.

Legitimate branding, text, illustrations, and graphics may remain only when physically printed on the exact packaging.

Do not duplicate, enlarge, extract, or place packaging artwork elsewhere in the image.

PHYSICAL WEIGHT:

The bag must behave like a real heavy pet food package, such as a 10 kg, 15 kg, or similarly sized bag according to the attached reference.

Show:

realistic bottom expansion,
natural packaging tension,
subtle irregular creases,
believable internal weight,
stable floor contact,
slight material compression near the base,
and physically accurate contact shadows.

The bag must not appear empty, rigid, inflated like a balloon, floating, miniature, oversized, or pasted into the scene.

PLACEMENT:

Place the product naturally on the floor in one appropriate household area:

an organized pet feeding corner,
a pantry support area,

a kitchen support area,
a clean service area,
or another realistic indoor pet-storage space.

The bag must remain upright or naturally supported according to its real packaging structure.

Do not place it on a table, sofa, bed, or unstable surface.

COMPOSITION:

Keep the exact bag as the unmistakable main subject.

Use a natural frontal three-quarter angle that clearly shows the main packaging face, real depth, bottom structure, and side folds.

Do not add hands or people.

One real domestic pet may appear calmly in the middle or background only as secondary context, without blocking or touching the bag.

BRAZILIAN HOME:

Use a real Brazilian middle-class comfortable home with:

finished neutral walls,
practical cabinetry,
clean ceramic, porcelain, laminate, or light wood flooring,
natural window daylight,
subtle household objects,
an organized pet area,
and restrained decoration.

The environment must feel:

Brazilian,
clean,
organized,
functional,
comfortable,
lived-in,
warm,
and naturally attractive without appearing luxurious.

Do not create a mansion, luxury showroom, fake studio, unfinished laundry room, dirty service area, warehouse, or generic foreign interior.

CAMERA:

Shot as if captured with an iPhone 15 Pro or a similar modern smartphone.

Vertical 9:16.

24mm to 28mm equivalent main camera.

Standard photo mode.

Natural standing-height or slightly lowered framing.

Broad readable focus.

True-to-life colors.

Realistic indoor exposure.

Natural highlight rolloff.

Subtle smartphone processing.

No portrait mode.

No strong background blur.

No artificial bokeh.

No excessive HDR.

PHOTOGRAPHIC COHERENCE:

The bag, floor, walls, furniture, and optional pet must share the same:

lighting direction,
white balance,
perspective,
focus behavior,
exposure,
shadow softness,
and photographic texture.

The result must look like one genuine iPhone photograph captured inside a real home.

CLEAN FRAME:

Outside legitimate text and branding physically printed on the exact bag, generate no added:

text,
letters,
numbers,
logos,
symbols,
icons,
captions,
stickers,
price graphics,
social-media interface,

camera controls,
promotional banners,
or watermarks.

NEGATIVE CONSTRAINTS:

no altered bag,
no similar replacement product,
no duplicated bag,
no extra product units,
no changed packaging,
no changed branding,
no distorted label,
no invented text,
no floating package,
no empty-looking bag,
no balloon-like inflation,
no rigid CGI packaging,
no people,
no hands,
no dirty environment,
no artificial showroom,
no CGI,
no 3D render,
no collage effect,
no text overlays,
no watermark,
no borders.

FINAL OUTPUT:

One clean ultra-realistic vertical iPhone-style photograph of the exact attached large pet food bag naturally standing on the floor inside an organized Brazilian middle-class home, with complete packaging fidelity, believable heavy weight, realistic folds, and physically correct floor contact.

Copiar prompt de vídeo sem fala — Use the uploaded first frame as an immutable visual anchor and the exclusive source of truth for the large pet food bag, floor, environment, lighting, camera angle, and composition.

Create an 8-second ultra-photorealistic vertical smartphone video of the exact large pet food bag naturally standing on the floor inside a comfortable Brazilian middle-class home.

FORMAT:

Vertical 9:16.

8 seconds.

24 fps.

One continuous uninterrupted take.

No cuts.

No transitions.

No time jumps.

No scene changes.

ABSOLUTE PRODUCT LOCK:

Preserve the exact pet food bag throughout every frame:

same quantity,
same dimensions,
same weight category,
same proportions,
same packaging shape,
same colors,
same material,
same branding,
same legitimate printed text,
same labels,
same graphics,
same top seal,
same bottom structure,
same visible folds,
and the same construction details.

Treat the bag as a real heavy physical object already represented correctly in the uploaded first frame.

Do not redesign, recolor, simplify, duplicate, remove, replace, improve, reconstruct, or reinterpret it.

Do not reveal hidden sides or invent unseen packaging details.

The bag must not morph, change size, change label, change text, gain folds, lose folds, inflate, deflate, or alter its visible geometry.

PRODUCT POSITION:

The bag remains stationary and fully supported by the same floor throughout the video.

Maintain realistic:

heavy weight,
bottom expansion,
packaging tension,
material creases,
base compression,
friction,
contact shadows,

and perspective.

Do not lift, rotate, drag, open, squeeze, tilt, or reposition the bag.

The bag must not move independently.

CAMERA ACTION:

Begin with the exact framing and camera angle of the uploaded first frame.

Perform one very slow natural handheld push-in of only a few centimeters.

Add a subtle lateral drift to reveal slightly more of the bag's depth, side folds, bottom spread, and material texture.

Maintain the same visible packaging face and camera axis.

Do not orbit around the bag.

Do not reveal the opposite side.

Do not use aggressive zoom.

Do not change lenses.

Do not move close enough to force reconstruction of printed text or hidden packaging geometry.

OPTIONAL PET MOVEMENT:

One real domestic pet may remain calmly visible in the middle or background when already present in the first frame.

The pet may:

look toward the bag,

sit,

stand,

lie down,

or take one or two slow natural steps.

The pet must remain secondary.

It must not touch, bite, scratch, push, block, or deform the bag.

Do not introduce a new pet when none is established in the first frame.

BRAZILIAN HOME:

Preserve or create a real Brazilian middle-class comfortable home consistent with the first frame.

Use an organized:

pet feeding corner,
pantry support area,
kitchen support area,
clean service area,
or another realistic indoor pet-storage space.

Include:

finished neutral walls,
practical cabinetry,
clean ceramic, porcelain, laminate, or light wood flooring,
natural window daylight,
subtle household objects,
and restrained decoration.

The environment must feel clean, functional, comfortable, lived-in, Brazilian, and naturally attractive without appearing luxurious or staged.

CAMERA QUALITY:

Shot as if recorded with an iPhone 15 Pro or a similar modern smartphone.

24mm to 28mm equivalent main camera.

Standard smartphone video mode.

Natural standing-height or slightly lowered framing.

Broad natural focus.

True-to-life colors.

Realistic indoor exposure.

Natural highlight rolloff.

Subtle sensor texture.

Restrained smartphone processing.

No portrait mode.

No cinematic artificial depth simulation.

No strong bokeh.

No artificial product isolation.

No excessive motion blur.

No fake HDR.

TEMPORAL CONSISTENCY:

Every frame must preserve the same:

bag identity,
packaging geometry,
colors,
branding,
printed text,
graphics,
fold structure,
floor position,
optional pet identity,
environment layout,
lighting direction,
white balance,
focus behavior,
and exposure.

The bag must not morph.

The optional pet must not morph.

The room must not change, multiply, disappear, or transform.

CLEAN FRAME:

Legitimate branding and text may remain only when physically printed on the exact bag.

Outside the product itself, generate no:

floating text,
captions,
symbols,
icons,
hearts,
arrows,
stickers,
social-media interface,
camera controls,
price graphics,
promotional banners,
or watermarks.

AUDIO:

Natural synchronized home ambience only.

Include subtle:

indoor room tone,
faint distant Brazilian neighborhood ambience,

minor household sounds,
and soft pet movement only when a pet is present.

No dialogue.

No voice-over.

No music.

No artificial transition sounds.

NEGATIVE CONSTRAINTS:

no bag movement,
no bag rotation,
no product morphing,
no packaging inflation,
no packaging deflation,
no altered branding,
no changed printed text,
no label drift,
no duplicated bag,
no extra product units,
no people,
no hands,
no pet touching the bag,
no floating product,
no scene change,
no dirty environment,
no artificial showroom,
no CGI,
no 3D render,
no collage effect,
no subtitles,
no captions,
no text overlays,
no watermark,
no borders,
no glitch effects.

FINAL OUTPUT:

One continuous 8-second ultra-realistic vertical iPhone-style video of the exact attached large pet food bag remaining naturally grounded inside an organized Brazilian middle-class home, with a slow subtle camera approach, believable heavy packaging physics, complete product fidelity, and no visual drift.

Copiar prompt de imagem - UNIVERSAL IMAGE PROMPT — REALISTIC WOMAN HAND HOLDING BAG

NATURAL UGC POV / AUTOMATIC BRAZILIAN ENVIRONMENT

ABSOLUTE PRODUCT FIDELITY / REAL HUMAN ANATOMY

RED MANICURE / ELEGANT RINGS / EXTREME PHOTOREALISM

Use the attached bag image as the ONLY and ABSOLUTE visual reference for the product.

Create one extremely photorealistic vertical 9:16 lifestyle photograph showing the EXACT attached bag naturally being held and presented by ONE beautiful adult woman's hand inside a realistic Brazilian environment.

The image must feel like a spontaneous premium UGC photograph captured with a modern smartphone, NOT like a traditional studio advertisement.

The scene should feel natural, feminine, stylish, modern and believable.

=====
ABSOLUTE PRODUCT REFERENCE
=====

The attached bag image is the SOURCE OF TRUTH.

The bag must remain EXACTLY the same as the reference.

Preserve with absolute accuracy:

- same model;
- same category;
- same quantity;
- same shape;
- same silhouette;
- same proportions;
- same dimensions;
- same width;
- same height;
- same depth;
- same handles;
- same number of handles;
- same handle shape;
- same strap;

- same strap length;
- same strap thickness;
- same strap attachments;
- same chains;
- same rings;
- same hooks;
- same buckles;
- same zippers;
- same zipper pulls;
- same clasps;
- same pockets;
- same seams;
- same stitching;
- same piping;
- same decorative elements;
- same charms;
- same hardware;
- same logo;
- same branding;
- same letters;
- same spelling;
- same typography;
- same patterns;
- same prints;
- same colors;
- same color distribution;
- same material;
- same texture;
- same grain;
- same finish;
- every visible physical detail.

DO NOT redesign the bag.

DO NOT reinterpret the bag.

DO NOT replace it with a similar bag.

DO NOT simplify it.

DO NOT add anything.

DO NOT remove anything.

DO NOT change the color.

DO NOT change the material.

DO NOT change the hardware.

DO NOT change the proportions.

DO NOT create additional accessories.

The product must look like the EXACT physical bag photographed in the reference image.

=====

PRODUCT COLOR LOCK

=====

The original colors of the bag have absolute priority.

Preserve exactly:

- bag color;
- strap color;
- handle color;
- stitching color;
- hardware color;
- logo color;
- pattern colors;
- material tones.

Natural lighting may affect reflections and shadows, but must NEVER change the actual product colors.

No color grading over the product.

No warm color cast.

No cool color cast.

No oversaturation.

No desaturation.

=====

ONE WOMAN'S HAND — NATURAL UGC

=====

Show EXACTLY ONE adult feminine hand.

Only one hand is visible.

No second hand.

No second arm.

No reflection containing another hand.

The hand should look like a real beautiful woman's hand photographed naturally.

The hand must have:

- exactly five fingers;
- realistic finger proportions;
- natural knuckles;
- visible subtle skin lines;
- realistic pores;
- natural skin texture;
- realistic joints;
- correct thumb anatomy;
- natural wrist;
- realistic finger pressure;
- realistic contact with the bag.

The hand should NOT look like a mannequin hand or beauty-model hand.

Keep subtle natural imperfections.

Do not excessively smooth the skin.

Do not make the hand unnaturally perfect.

=====

NAILS — RED MANICURE

=====

The woman has elegant, well-maintained RED NAILS.

Nails should be:

- medium length;
- feminine;
- neatly shaped;
- realistic;
- glossy red polish;
- subtle natural reflections;
- professionally manicured;
- believable nail thickness;
- natural cuticles.

The red manicure should look like a real manicure photographed under natural light.

NO artificial glowing nails.

NO neon effect.

NO plastic-looking nails.

NO exaggerated nail length.

NO decorative nail art unless naturally appropriate.

=====

RINGS — ELEGANT AND REALISTIC

=====

The woman wears a few delicate and elegant rings.

Use:

- one or two tasteful rings;
- realistic proportions;
- thin or medium bands;
- subtle metallic reflections;
- physically correct placement on the fingers;
- natural contact with the skin.

The rings should complement the handbag without competing with it.

Do NOT add excessive jewelry.

Do NOT cover the bag's logo or important details with the rings.

The rings must look like real jewelry photographed with a smartphone.

=====

HAND + BAG INTERACTION

=====

The hand must interact with the bag in a completely natural way.

Choose the most physically appropriate grip based on the exact structure of the reference bag.

Possible natural interaction:

- holding one handle;
- holding the main handle between the fingers;
- lightly gripping the strap;
- holding the bag by a reinforced handle;
- naturally presenting the bag toward the camera.

The grip must respect the actual construction of the bag.

The fingers must visibly make physical contact with the handle or strap.

Correct contact shadows must be present.

No floating fingers.

No fingers passing through the bag.

No impossible grip.

The hand must not cover the logo, main design or important product details.

=====

NATURAL FEMININE AESTHETIC

=====

The overall aesthetic should feel:

- feminine;
- stylish;
- modern;
- confident;
- effortless;
- slightly descolada;
- premium but accessible;
- authentic;
- spontaneous.

The image should feel like:

"uma mulher mostrando sua bolsa favorita para as amigas"

rather than:

"uma modelo fazendo uma campanha publicitária".

Avoid overly posed commercial behavior.

Avoid perfect catalog composition.

Avoid artificial studio perfection.

=====

ENVIRONMENT

=====

Automatically select ONE realistic Brazilian environment that naturally matches the bag's category and intended use.

Possible environments:

- modern Brazilian bedroom;
- realistic walk-in closet;
- dressing area;
- bedroom vanity area;
- living room;
- apartment entryway;
- home office;
- stylish office;
- clothing boutique;
- accessories store;
- café;
- hotel-like apartment interior;
- travel preparation area;
- veranda.

The environment must feel like a real Brazilian home or commercial space.

It should be clean and aesthetically pleasing, but not excessively perfect.

Include subtle signs of real life:

- natural furniture;
- realistic textures;
- small imperfections;
- believable objects in the background;
- natural spatial proportions.

Do not create a luxury palace.

Do not create a fake showroom.

Do not create an empty studio.

=====

COMPOSITION

=====

Vertical 9:16.

The handbag is the PRIMARY subject.

The bag should occupy approximately 60%–75% of the frame.

The woman's hand naturally enters the frame and holds the bag.

Keep the bag's most important visual face clearly visible.

Show enough of the environment to establish context.

Do not make the environment dominate the composition.

Do not crop important parts of the bag.

Do not crop the hand unnaturally.

=====

CAMERA

=====

Realistic smartphone photography.

Natural handheld POV feeling.

Camera approximately at chest or eye level.

35mm–50mm equivalent perspective.

Vertical 9:16.

Subtle natural smartphone perspective.

Very slight lens distortion is acceptable.

The photograph should feel captured casually by a real person.

NOT a studio photograph.

NOT a fashion editorial.

NOT CGI.

=====

FOCUS

=====

The handbag and woman's hand must remain sharply detailed.

Clearly visible:

- product texture;
- stitching;
- logo;
- hardware;
- handles;
- strap;
- red manicure;
- rings;
- natural skin texture.

Use realistic depth of field.

Avoid excessive background blur.

The environment should remain recognizable.

No artificial cutout effect.

No portrait-mode halo.

=====

LIGHTING

=====

Use natural realistic lighting appropriate to the selected environment.

Prefer:

- soft window daylight;

- natural apartment lighting;
- soft indoor daylight;
- realistic boutique lighting.

Lighting should create:

- natural skin highlights;
- realistic shadows;
- subtle reflections on the rings;
- realistic reflections on bag hardware;
- natural material texture.

No dramatic studio lighting.

No colored lighting.

No artificial glow.

No excessive HDR.

=====

PHOTOREALISM

=====

The final image must look like a REAL photograph taken with a modern smartphone.

Include subtle realistic details:

- natural skin pores;
- tiny skin imperfections;
- realistic nail texture;
- realistic metal reflections;
- subtle fabric/material imperfections;
- physically correct shadows;
- realistic contact between hand and bag;
- natural environmental lighting.

Avoid the typical AI-generated appearance.

=====
FINAL OUTPUT
=====

Create ONE ultra-photorealistic vertical 9:16 lifestyle photograph.

Show the EXACT attached bag with absolute product fidelity.

Show EXACTLY ONE beautiful adult woman's hand naturally holding or presenting the bag.

The hand has elegant glossy RED nails and a few tasteful realistic rings.

The interaction must be physically natural.

The scene must look like a real Brazilian lifestyle photograph captured spontaneously with a modern smartphone.

The bag remains the hero.

Natural.

Feminine.

Stylish.

Descolada.

Premium.

Real.

ZERO visible AI appearance.

Copiar prompt de vídeo sem fala — UNIVERSAL ONE-HAND BAG POV VIDEO
REALISTIC PRODUCT INSPECTION / NATURAL UGC

AUTOMATIC BRAZILIAN ENVIRONMENT
ABSOLUTE PRODUCT FIDELITY
SAME HAND THROUGHOUT
NO PEOPLE / NO SECOND HAND / NO NARRATION
ULTRA-PHOTOREALISTIC

=====
REFERENCE IMAGE — ABSOLUTE SOURCE OF TRUTH
=====

Use the attached bag image as the ONLY and ABSOLUTE visual reference for the product.

The attached image defines the EXACT physical identity of the bag.

The video must show the SAME physical bag from the reference being naturally handled by ONE adult woman's hand.

Do not generate a new bag for each scene.

Do not reinterpret the product.

Do not replace the product.

Do not create a similar product.

The original attached reference ALWAYS has priority.

=====
CRITICAL CONTINUITY RULE
=====

The bag is ONE SINGLE PHYSICAL OBJECT throughout the entire video.

The hand is ONE SINGLE PHYSICAL HAND throughout the entire video.

Every scene must continue from the same physical reality.

At the beginning of each scene, verify the product against the ORIGINAL ATTACHED REFERENCE IMAGE.

Never use a previous AI-generated frame as the authority for the bag's identity.

If any generated frame contains a product error, DO NOT carry that error into the next scene.

Always return to the original reference.

=====
ABSOLUTE BAG IDENTITY LOCK
=====

Preserve EXACTLY:

- same category;
- same model;
- same quantity;
- same dimensions;
- same height;
- same width;
- same depth;
- same proportions;
- same silhouette;
- same body shape;
- same base;
- same handles;
- same number of handles;
- same handle thickness;
- same handle length;
- same straps;
- same strap width;
- same strap length;
- same strap attachments;
- same chains;
- same rings;
- same hooks;
- same buckles;
- same clasps;
- same zippers;
- same zipper pulls;
- same pockets;
- same pocket placement;
- same seams;
- same stitching;
- same piping;
- same panels;
- same folds;
- same decorative details;
- same charms;
- same hardware;
- same hardware color;
- same logo;
- same branding;
- same letters;
- same spelling;
- same typography;
- same patterns;
- same prints;
- same colors;
- same color distribution;
- same materials;
- same texture;
- same grain;
- same finish;
- every visible physical characteristic.

=====

PRODUCT COLOR LOCK

=====

The exact colors from the reference must remain unchanged.

Do not:

- recolor the bag;
- change hue;
- change saturation;
- change brightness;
- change hardware color;
- change strap color;
- change stitching color;
- change logo color;
- apply colored lighting to the product;
- apply color filters to the product.

Natural lighting and reflections may change slightly,
but the actual product colors **MUST** remain identical.

=====

PRODUCT GEOMETRY LOCK

=====

The physical geometry of the bag must remain stable.

DO NOT:

- stretch;
- shrink;
- inflate;
- flatten;
- melt;
- warp;
- deform;
- reshape;
- change proportions;
- change handle length;
- change strap length;
- change pocket size;
- change hardware position.

Perspective may naturally change because of the camera,
but the **ACTUAL** physical geometry must remain identical.

=====

NO INVENTED DETAILS

=====

Only show details that are actually visible or clearly supported by the reference image.

DO NOT invent:

- interior compartments;
- hidden pockets;
- additional zippers;
- additional straps;
- additional hardware;
- hidden logos;
- unseen decorations;
- unsupported closures;
- unseen back panels;
- unsupported interior details.

If a detail is not visible in the reference,
DO NOT invent it.

DO NOT open the bag unless the opening and interior are clearly visible and supported by the reference.

=====

ONE-HAND RULE — ABSOLUTE

=====

Exactly ONE adult feminine hand may appear in the entire video.

There must NEVER be:

- a second hand;
- a second arm;
- a second wrist;
- a reflected hand;
- a mirrored hand;
- a duplicate hand;
- a background hand;
- a mannequin hand.

The same hand must remain visually consistent across all four scenes.

=====

HAND IDENTITY LOCK

=====

Maintain the same hand throughout the video.

Preserve:

- same skin tone;
- same hand size;
- same finger proportions;
- same wrist;
- same nail shape;

- same nail length;
- same nail color;
- same rings;
- same jewelry;
- same natural skin texture.

Exactly five fingers.

Natural thumb placement.

Realistic joints.

Realistic knuckles.

Natural skin pores and fine lines.

Realistic contact shadows.

No artificial smoothing.

No plastic skin.

=====

NATURAL HAND INTERACTION

=====

The hand must interact with the bag exactly as a real woman would.

The fingers must physically contact the handle, strap or product surface.

The grip must respond naturally to the weight of the bag.

Finger pressure must be believable.

The wrist must remain anatomically aligned.

Small natural finger adjustments are allowed.

Subtle wrist movement is allowed.

The hand must NEVER move like a robotic animation.

Avoid exaggerated gestures.

Avoid unnecessary finger movement.

The hand should feel relaxed, confident and natural.

=====

BAG WEIGHT + PHYSICS

=====

The bag must behave according to its apparent real-world size and weight.

Small or medium bags:

The hand may naturally lift the bag by its handle or strap.

Large or heavy bags:

The bag should remain partially supported by a realistic surface while the hand inspects the handle, strap or exterior.

The hand must never appear to effortlessly lift an unrealistically heavy bag.

Handles and straps must respond naturally to gravity and tension.

No floating.

No weightless movement.

No impossible strap behavior.

=====

REALISTIC BRAZILIAN ENVIRONMENT

=====

Automatically select ONE realistic Brazilian environment appropriate for the exact bag category.

Possible environments:

- modern Brazilian bedroom;
- dressing area;
- wardrobe;
- closet;
- apartment entryway;
- living room;
- home office;
- professional office;
- clothing boutique;
- accessories store;
- travel preparation area;
- café;
- veranda;
- or another realistic context appropriate to the product.

The environment must feel:

- Brazilian;
- real;
- lived-in;
- clean;
- stylish;
- believable;

- premium but accessible.

Avoid luxury-palace aesthetics.

Avoid fake showroom environments.

Avoid empty studios.

The environment must remain consistent throughout the video.

=====

VIDEO FORMAT

=====

Vertical 9:16.

Duration: exactly 8 seconds.

24 fps.

Exactly FOUR distinct product-focused scenes.

Natural editorial cuts.

Photorealistic smartphone/video-camera appearance.

No narration.

No dialogue.

No subtitles.

No text overlays.

=====

SHOT 1 — POV APPROACH

0.0s–2.0s

=====

Start from the exact product shown in the reference.

The bag is naturally resting in the selected environment.

The camera approaches the bag from a realistic first-person perspective.

The single woman's hand naturally enters the frame.

She gently reaches toward the bag's existing handle or strap.

Her fingers make realistic contact.

Movement is slow and natural.

The bag remains stable.

Do not immediately pick up the bag unless physically appropriate.

The viewer should feel as if a real woman is about to inspect the bag.

=====

SHOT 2 — NATURAL ONE-HAND PRESENTATION

2.0s–4.0s

=====

The same hand gently lifts, holds or presents the bag according to its actual structure and realistic weight.

Use ONLY the grip that makes physical sense for the reference bag.

Keep the main product face clearly visible.

Show realistic:

- weight;
- gravity;
- strap tension;
- handle tension;
- hand pressure;
- natural movement.

The hand may make a very subtle adjustment to improve the presentation.

Do not rotate the bag dramatically.

Do not flip the bag.

Do not change its orientation unnecessarily.

=====

SHOT 3 — CLOSE PRODUCT INSPECTION

4.0s–6.0s

=====

Move the camera slightly closer in a natural POV movement.

Focus on ONE real detail visible in the reference.

Possible details:

- stitching;
- material grain;
- zipper;
- clasp;
- buckle;

- handle attachment;
- strap;
- logo;
- hardware;
- pocket;
- printed pattern.

The same hand may lightly touch or adjust the selected detail.

Only use a detail that actually exists.

Do not invent anything.

The product remains sharply visible.

=====

SHOT 4 — FINAL POV HERO

6.0s–8.0s

=====

Return to a strong natural first-person product composition.

The same hand holds or lightly presents the bag.

Keep the entire main product clearly visible.

Use a very subtle handheld camera movement.

The hand remains relaxed.

The bag remains stable and physically believable.

End with a clean, desirable, realistic product presentation.

The final frame should look like a genuine TikTok or Instagram product video.

=====

CAMERA

=====

Natural first-person smartphone perspective.

35mm–50mm equivalent lens.

Camera positioned at realistic chest or eye level.

Natural handheld micro-movement.

Very subtle body movement.

Very subtle camera stabilization imperfections.

The camera should feel physically held by a real person.

NO:

- fisheye;
- extreme wide angle;
- aggressive shake;
- dramatic orbit;
- 360-degree rotation;
- impossible camera movement;
- floating camera;
- exaggerated cinematic movement.

=====

FOCUS

=====

Keep the hand and bag sharply readable.

Maintain clarity on:

- logo;
- material;
- stitching;
- hardware;
- handles;
- straps;
- nails;
- rings.

Use realistic depth of field.

No artificial cutout effect.

No portrait-mode blur.

No excessive bokeh.

No focus pulsing.

No autofocus hunting.

=====

LIGHTING

=====

Use realistic lighting from the selected environment.

Prefer natural window light or believable indoor lighting.

Maintain consistent lighting throughout the video.

Preserve:

- exact bag colors;
- natural skin tone;
- nail color;
- ring reflections;
- hardware reflections.

No colored lighting.

No dramatic lighting transitions.

No artificial glow.

No heavy HDR.

=====

AUDIO

=====

NO narration.

NO dialogue.

NO voice-over.

Use only natural synchronized environmental sounds.

Possible sounds:

- subtle room ambience;
- soft fabric movement;
- natural hand contact;
- handle movement;
- strap movement;
- subtle zipper sound only if the zipper is visibly touched;
- subtle hardware contact.

No dramatic sound effects.

No exaggerated product sounds.

No mandatory music.

=====

UGC REALISM

=====

The final video should feel like authentic Brazilian UGC.

It should look as though a real woman is casually inspecting a handbag before buying it or showing it to her followers.

The movement should be:

natural;
slightly imperfect;
relaxed;
feminine;
confident;
spontaneous.

Avoid polished fashion-commercial choreography.

Avoid robotic movements.

Avoid perfectly synchronized cinematic motion.

REAL HUMAN BEHAVIOR IS MORE IMPORTANT THAN CINEMATIC PERFECTION.

=====

NEGATIVE PROMPT

interface elements.

=====
FINAL OUTPUT
=====

Generate ONE ultra-photorealistic 8-second vertical 9:16 first-person POV sales video.

Exactly FOUR scenes.

Exactly ONE adult woman's hand throughout the entire video.

The same hand and the same EXACT bag must remain consistent from the first frame to the last.

The bag must preserve 100% of the original reference identity.

The woman naturally approaches, touches, handles, inspects and presents the bag.

All movements must obey real human anatomy and real-world physics.

The result must look like authentic Brazilian TikTok/Instagram UGC captured with a smartphone.

Natural.

Feminine.

Modern.

Desirable.

Spontaneous.

Real.

ZERO visible AI appearance.

Copiar prompt de vídeo sem fala —

```
```text
```

Crie um vídeo POV vertical 9:16, extremamente realista, usando a imagem de referência como base.

A prioridade máxima é PRESERVAR A BLUSA EXATAMENTE COMO ESTÁ NA IMAGEM DE REFERÊNCIA.

A blusa não deve mudar de formato, cor, tamanho, tecido, estampa ou proporção em nenhum momento.

MOVIMENTO:

A pessoa segura o cabide com as duas mãos de maneira natural, como alguém mostrando uma blusa para outra pessoa.

0–2s:

A blusa permanece centralizada e relativamente imóvel. As mãos fazem apenas pequenos ajustes naturais no cabide.

2–4s:

A pessoa aproxima MUITO LEVEMENTE o cabide da câmera. O movimento é curto e lento. A blusa acompanha o cabide sem balançar excessivamente.

4–6s:

A pessoa mantém o cabide na posição e faz um pequeno movimento lateral, apenas alguns centímetros para a esquerda e direita. A blusa continua mantendo exatamente seu formato original.

6–8s:

A pessoa retorna o cabide para a posição central e permanece estável até o final.

IMPORTANTE:

O movimento deve acontecer principalmente nos BRAÇOS, MÃOS E CABIDE.  
A BLUSA DEVE PERMANECER ESTÁVEL.

FÍSICA DA ROUPA:

- tecido realista
- movimento mínimo
- pequenas dobras naturais
- sem ondulação exagerada
- sem esticar
- sem encolher
- sem mudar o caimento
- sem alterar mangas, gola ou comprimento
- sem deformação
- sem morphing
- sem trocar o design

#### MÃOS E BRAÇOS:

Movimentos humanos lentos e naturais.

Anatomia correta.

Sem dedos extras.

Sem mãos deformadas.

Sem braços duplicados.

#### CÂMERA:

POV de smartphone, vertical 9:16.

Pequeno movimento natural de mão.

Sem zoom.

Sem rotação.

Sem cortes.

Sem transições.

Sem movimentos cinematográficos exagerados.

#### CENÁRIO:

Preserve exatamente o ambiente da imagem de referência: loja de roupas moderna, piso de concreto, parede de madeira, araras, espelho circular e iluminação quente.

#### NÃO FAZER:

Não animar a blusa sozinha.

Não fazer o tecido ondular.

Não fazer a blusa respirar ou pulsar.

Não alterar o formato da peça.

Não gerar novas partes da roupa.

Não trocar a roupa.

Não modificar a estampa.

Não modificar a cor.

Não criar deformações entre os frames.

#### RESULTADO:

Vídeo POV extremamente natural, simples e realista, como uma pessoa segurando uma blusa em uma loja e mostrando o produto para a câmera. Menos movimento é melhor. Priorize CONSISTÊNCIA DA BLUSA acima de qualquer efeito de movimento.

Copiar prompt de imagem – ## UNIVERSAL IMAGE PROMPT — POV CHANGING TABLE / CHILDREN PRODUCT / ONE VISIBLE ADULT HAND / EXTREME REALISM / NO CHILDREN

Create an ultra-photorealistic vertical POV image (9:16) using the attached reference image as the exact product source.

Preserve the product with maximum fidelity: same type, same shape, same size, same proportions, same colors, same packaging, same material, same texture, same finish, same label placement, same edges, same visible details, and same visual identity. Do not redesign, recolor, simplify, or alter the product.

### IMPORTANT NATURALITY RULE:

This must feel like a real POV photo taken in a nursery-style room.

Show only ONE visible adult feminine hand if a hand appears.

The hand may lightly support or present the object naturally.

Do not create two hands.

Do not create rigid staging.

Do not create symmetrical arrangement.

### CHILD / BABY VISIBILITY SAFETY RULE:

No real child, baby, toddler, infant, teenager, or underage person may appear anywhere in the image.

Do not generate a baby on the changing table, child hands, baby hands, child body, baby body, child face, or baby face.

If the product packaging contains a child or baby image, blur or softly obscure only that child/baby representation while preserving the rest of the product sharp, clear, and faithful to the reference.

Scene: real comfortable Brazilian middle-class nursery-style room with a clean changing table, dresser, or baby-care surface. The environment must feel cozy, organized, safe, clean, and realistic, with neutral tones, soft wood details, baskets, fabric, and practical décor. No child or baby present.

### Composition:

- first-person POV
- product placed on the changing table or dresser
- one visible adult feminine hand only if needed
- product is the hero
- realistic support surface
- no clutter competing with the product

### Camera:

- iPhone 15 Pro Max realism
- vertical 9:16
- natural smartphone POV
- sharp focus on product
- realistic room depth

#### Lighting:

- soft natural daylight or warm practical room light
- balanced exposure
- realistic shadows
- realistic material highlights

#### Negative prompt:

visible baby, visible child, visible minor, child hands, baby hands, child body, baby body, child face, baby face, child on packaging without blur, baby on packaging without blur, altered product, wrong scale, floating product, deformed hands, extra fingers, poor room, unfinished construction, dirty cement floor, poverty look, CGI, AI artifacts, watermark

CHILD / BABY FULL PRIVACY BLUR RULE:

No real child, baby, toddler, infant, teenager, or underage person may appear clearly anywhere in the image.

If any child or baby appears in the scene, background, poster, frame, mirror, book cover, screen, product packaging, label, display card, store shelf, decoration, or printed material, the AI must completely blur, obscure, or privacy-mask the entire child/baby representation.

Blur the full child/baby figure, not only the face:

- blur the face
- blur the body
- blur the hands
- blur the skin
- blur the silhouette
- blur any realistic child/baby representation
- blur child/baby illustrations if they appear as human-like minors on packaging or printed material

Do not blur the entire product.

Do not blur the whole package.

Do not destroy the product identity.

Keep the product shape, color, packaging structure, label placement, materials, texture, proportions, and non-child design elements sharp, realistic, and faithful to the reference.

The child/baby blur must look intentional and clean, like a privacy-safe blur applied only over the minor representation. The rest of the image must remain ultra-sharp, photorealistic, clear, and commercially usable.

Do not replace the baby or child with another person.

Do not generate a new child.

Do not create visible minors anywhere.

Do not leave child/baby faces, bodies, hands, or silhouettes readable.

Toy dolls, plush toys, mascots, cartoon animals, and non-human toys may remain visible only when they are clearly toys or decorative objects and do not look like real children or real babies.

visible child, visible baby, visible toddler, visible infant, visible teenager, visible minor, readable child face, readable baby face, visible child body, visible baby body, visible child hands, visible baby hands, child on packaging not fully blurred, baby on packaging not fully blurred, child illustration not blurred, baby illustration not blurred, minor visible in background, child in poster, baby in poster, child in frame, baby in frame

Copiar prompt de vídeo sem fala 0— UNIVERSAL VIDEO PROMPT — POV CHANGING TABLE OR DRESSER / CHILDREN PRODUCT / MAX FIDELITY / REAL SCALE / BRAZILIAN PHOTOREALISM

Use the attached children's product image as the absolute visual reference. Create an ultra-photorealistic vertical POV video (9:16) showing the EXACT product naturally placed on a changing table, dresser or baby-care surface inside a real Brazilian nursery-style room.

The product must remain visually identical to the reference during the entire video: same type, shape, size, proportions, colors, packaging structure, material finish, label placement, visible details, texture and product identity.

CHILD / BABY FULL PRIVACY BLUR RULE:

No real child, baby, toddler, infant, teenager or underage person may appear clearly anywhere in the video.

Do not generate a baby on the changing table, child hands, baby hands, child body, baby body, child face or baby face.

Do not generate visible minors in the room, mirror, poster, frame, shelf, screen, packaging or any visible area.

If the product packaging or any background object contains a child or baby image, completely blur or privacy-mask the entire child/baby representation in every frame.

Blur face, body, hands, skin, silhouette and human-like minor representation.

Do not blur the whole product. Keep the product sharp, clear and faithful to the reference.

#### IMPORTANT EDITING RULE:

This video MUST include clear B-roll scenes. Do not create only one continuous shot.

#### VIDEO STRUCTURE:

##### 0s–1.5s — HERO POV SHOT:

Show the exact product placed naturally on the changing table or dresser. The product is the hero, sharp, correctly scaled and physically supported.

##### 1.5s–3s — B-ROLL DETAIL SHOT 1:

Cut to a close-up of packaging texture, label placement, product edge, cap, lid, seam, material finish, surface detail or tactile construction.

##### 3s–4.5s — NATURAL HANDLING SHOT:

Cut to one adult feminine hand lightly supporting, adjusting, rotating or pointing to the product. Do not use two hands. Do not create rigid staging. The product must remain stable and proportional.

##### 4.5s–6s — B-ROLL DETAIL SHOT 2:

Cut to another close-up angle showing product volume, side profile, surface reflection, label area, packaging corner, material texture or contact shadow.

##### 6s–8s — FINAL HERO SHOT:

Return to a clean final POV shot of the product on the changing table or dresser, with the nursery context visible and product sharp.

#### SCENE:

Real comfortable Brazilian middle-class nursery-style room. Neutral tones, soft wood details, changing table, dresser, baskets, folded fabrics, curtains, rug, shelves and subtle decor may appear naturally. Clean but lived-in. No visible children or babies.

#### CAMERA:

Vertical 9:16, iPhone 15 Pro Max rear camera look, natural smartphone POV, smooth handheld or stabilized movement, sharp product focus, realistic room depth, no excessive blur, no artificial softness.

#### LIGHTING:

Soft natural daylight or warm practical room light, balanced exposure, realistic shadows and realistic highlights on product packaging, fabric, wood and room surfaces.

#### AUDIO:

No dialogue. No voiceover. Natural quiet room ambience, subtle product handling and surface contact sounds. Optional soft minimal music at low volume.

#### TECHNICAL PARAMETERS:

model: veo-3  
length: 8 seconds  
resolution: 1080x1920  
framerate: 24fps  
aspect\_ratio: 9:16

#### STRICT RULES:

Mandatory B-roll cuts.

Keep the exact product consistent in every shot.

Maintain real-world scale.

Do not alter product design, packaging, label placement, color, material or proportions.

Do not generate visible children or babies.

Blur the entire child/baby representation if it appears on packaging or printed material.

#### ANTI-CRASH / NEGATIVE PROMPT:

single continuous shot only, no B-roll, visible baby, visible child, visible toddler, visible teenager, visible minor, child hands, baby hands, child body, baby body, child face, baby face, child on packaging not fully blurred, baby on packaging not fully blurred, altered product, wrong scale, floating product, product morphing, deformed hands, extra fingers, two visible hands, poor room, unfinished construction, dirty cement floor, poverty look, CGI, 3D render, AI artifacts, blurry product, soft image, watermark

Copiar prompt de imagem - UNIVERSAL IMAGE PROMPT — CHILDREN'S FOOTWEAR WORN ON FEET / ABSOLUTE PRODUCT FIDELITY / BRAZILIAN PHOTOREALISM / NO AI LOOK / DEEP FOCUS

Use the attached footwear image as the one and only absolute source of truth.

Create one ultra-photorealistic vertical 9:16 premium commercial image of the EXACT children's footwear product being naturally worn on a real child's feet inside a real Brazilian environment appropriate to the shoe style and target gender.

The final result must look like a real professional photograph of the exact advertised children's shoe worn in real life, with correct child anatomy, real scale, natural posture, true material behavior, believable environment, and zero visible AI traits.

CORE GOAL:

The viewer must immediately feel:

- this is the exact footwear product being sold
- it looks beautiful, real, wearable, and desirable
- it fits naturally on a real child's feet
- it feels physically believable, comfortable, and premium
- the focus is fully on the footwear

#### GENDER AND CONTEXT INTERPRETATION — MANDATORY:

Automatically interpret the product style.

- If the product is clearly feminine, show it on real girl feet.
- If the product is clearly masculine, show it on real boy feet.
- If the product is clearly unisex, show it on real child feet in a neutral child context.

The surrounding environment and styling must harmonize naturally with the product's apparent gender and category, but the footwear must remain the visual hero.

#### ABSOLUTE PRODUCT LOCK — MANDATORY:

Preserve exactly:

- same footwear type
- same model
- same pair identity
- same category
- same shape
- same proportions
- same real scale
- same silhouette
- same toe shape
- same heel shape
- same collar shape
- same shaft height if applicable
- same sandal opening structure if applicable
- same sole thickness
- same outsole shape
- same midsole design
- same upper construction
- same stitching
- same panels
- same overlays
- same straps
- same laces
- same closure system
- same velcro placement
- same buckle if present
- same zipper if present
- same elastics if present
- same decorative elements
- same prints

- same characters or graphics
- same branding
- same logo placement
- same letters
- same visible labels
- same colors
- same color distribution
- same materials
- same finish
- same texture
- same visible construction details

If the attached reference shows only one shoe photographed alone, infer it as one exact matching pair of the same model and place that exact pair on the child's feet.

Do not redesign the shoe.

Do not beautify it by inventing details.

Do not replace it with a similar children's shoe.

Do not alter proportions.

Do not alter colors.

Do not simplify closures or decorative elements.

Do not add new accessories.

Do not remove existing details.

REAL SCALE — CRITICAL:

The footwear must appear at correct child scale.

The shoes must fit naturally on real child feet.

Do not create:

- miniature unrealistic feet
- oversized shoes
- adult feet wearing child shoes
- shoes too small for the feet
- shoes floating loosely
- distorted foot proportions

The size relationship between:

- shoe
- foot
- ankle
- lower leg
- floor
- furniture
- environment

must be physically correct and believable.

CHILD ANATOMY — CRITICAL:

Show only the necessary visible body area:

- feet
- ankles
- part of the lower legs

The child anatomy must be realistic and age-appropriate:

- real child foot shape
- correct ankle size
- natural leg proportions
- natural skin folds
- correct toes shape if visible
- believable resting posture
- natural asymmetry between both feet

No adult feet.

No mannequin feet.

No deformed toes.

No fused toes.

No extra toes.

No floating legs.

No rigid pose.

The child must be:

- standing naturally
- sitting naturally
- or resting feet naturally on a bed, sofa, rug, floor, or bench

The feet must always be physically supported.

#### FOOTWEAR FIT AND PHYSICAL REALISM:

The shoes must behave like real shoes worn by a child.

Show:

- correct opening and closure behavior
- natural contact between foot and shoe
- realistic pressure points
- believable fit around the ankle
- natural bending only if compatible with the shoe type
- proper sole contact with the surface
- realistic laces, straps, buckles, or velcro behavior
- correct heel placement
- correct toe box shape under wear
- real material tension and folds

The pair must not look pasted onto the feet.

The shoes must not look like a digital wrap around generic feet.

#### BRAZILIAN ENVIRONMENT AUTO-SELECTION:

Automatically choose a real Brazilian environment appropriate to the footwear type, while keeping the focus on the shoes.

Examples:

- sneakers: bedroom, playroom, hallway, living room, school-prep area, or outdoor home area
- sandals: varanda, living room, child bedroom, garden area, or casual home setting
- dress shoes: clean indoor home area, living room, celebration-prep area, or child party-ready context
- school shoes: entryway, study corner, child bedroom, or practical morning routine context
- baby/toddler shoes: soft rug area, nursery corner, play mat, bed, or sofa edge

The environment must feel:

- Brazilian
- real
- organized
- clean
- child-friendly
- comfortable
- lived-in
- premium but natural
- visually believable

Avoid:

- fake showroom
- empty studio
- foreign generic interior
- exaggerated luxury
- clutter chaos
- 3D-render look
- artificial catalog set

## COMPOSITION — FOOTWEAR FIRST:

The footwear must be the absolute focus.

The shoes should occupy approximately 65% to 85% of the frame.

Show enough of:

- feet
- ankles
- lower legs
- supporting surface
- nearby environment

to confirm real use and scale.

Do not crop the shoes badly.

Do not place the shoes too far away.

Do not turn the image into a portrait of the child.

Do not show the face.

Use a natural angle such as:

- downward close perspective
- low child-foot-level angle
- seated perspective

- side three-quarter angle focused on the shoes
- slightly elevated view focused on the feet

#### CAMERA:

Professional full-frame camera realism.

Vertical 9:16.

4K commercial photo quality.

Lens feel:

- 50mm to 85mm equivalent for tighter product realism
- 35mm to 50mm equivalent when more context is needed
- no fisheye
- no extreme wide-angle distortion
- no exaggerated cinematic angle

#### DEEP FOCUS — NO BLUR:

The footwear must remain tack sharp.

The feet, ankles, and immediate surrounding context must also remain clearly readable.

Use realistic deep focus.

No portrait mode.

No extreme bokeh.

No artificial blur.

No soft haze.

No cutout look.

Keep clearly visible:

- upper material texture
- sole texture
- stitching
- closures
- laces
- branding
- prints
- decorative details
- foot-to-shoe fit
- floor contact
- shadows

#### LIGHTING:

Use realistic natural or ambient light appropriate to the environment.

Possible sources:

- soft daylight
- natural indoor ambient light
- subtle practical home lighting

Maintain:

- true product colors
- natural child skin tone
- realistic shadows
- balanced highlights
- believable reflections

Avoid:

- harsh flash
- fake HDR
- artificial glow
- overexposed highlights
- colored light distortion

MATERIAL REALISM:

All materials must behave correctly:

- leather like real leather
- synthetic leather like real synthetic material
- fabric like real woven fabric
- mesh like real mesh
- rubber like real rubber
- foam sole like real foam
- plastic details like real molded plastic
- metallic details like real metal if present

Show:

- stitching
- grain
- weave
- edge finishing
- sole thickness
- flex points
- light wear behavior only if natural
- contact shadows
- microtexture

No fake textures.

No melted geometry.

No synthetic reflections.

No plastic-looking skin.

No fake shoe wrapping.

CLEAN FRAME:

Outside legitimate branding or printed details physically present on the exact footwear, generate no:

- subtitles
- captions
- promotional text
- prices
- banners
- interface elements

- watermarks
- random text

#### STRICT RULES:

- exact footwear fidelity
- child feet only
- boy feet for boy shoes
- girl feet for girl shoes
- neutral child context for unisex shoes
- product must dominate the frame
- focus must remain fully on the footwear
- no face
- no blur
- no AI look
- no CGI look
- no product drift
- no similar shoe substitution

#### NEGATIVE PROMPT:

changed footwear, wrong shoe, similar children's shoe, altered colors, altered sole, altered closure, altered shape, altered branding, wrong scale, oversized shoes, miniature feet, adult feet, deformed feet, extra toes, missing toes, fused toes, floating feet, shoes pasted onto feet, wrong environment, fake showroom, empty studio, clutter chaos, distant framing, too much empty space, portrait-style framing, blurred shoes, portrait blur, strong bokeh, soft focus, CGI, 3D render, AI look, fake textures, melted geometry, distorted logos, random text, watermark, overlay.

#### FINAL OUTPUT:

One ultra-photorealistic vertical 9:16 premium sales photograph of the EXACT attached children's footwear product naturally worn on real child feet, at correct child scale, in a real Brazilian environment appropriate to the product style and gender, with total visual focus on the footwear, true material behavior, realistic anatomy, deep focus, strong purchase appeal, and absolutely no visible AI traits.

Copiar prompt de vídeo sem fala– UNIVERSAL CHILDREN'S FOOTWEAR SALES VIDEO PROMPT  
— WORN ON FEET / 5 FUNCTIONAL B-ROLL SCENES / ABSOLUTE PRODUCT FIDELITY /  
BRAZILIAN PHOTOREALISM / NO AI LOOK

Use the attached footwear image as the one and only absolute visual reference for the featured product.

Create one ultra-photorealistic vertical 9:16 premium sales video showing the EXACT children's footwear product naturally worn on real child feet inside a real Brazilian environment appropriate to the footwear style and target gender.

The final result must look like a real premium product video recorded in Brazil, with physically believable child anatomy, true product fidelity, natural material behavior, correct scale, and zero visible AI traits.

The footwear must remain the absolute hero in every scene.

#### VIDEO GOAL:

The viewer must immediately understand:

- this is the exact children's shoe being sold
- it fits naturally on real child feet
- it looks comfortable, beautiful, and wearable
- it is being shown in a believable real-life context
- the focus is completely on the footwear

#### GENDER AND CONTEXT INTERPRETATION — MANDATORY:

Automatically interpret the product style.

- If the product is clearly feminine, show it on real girl feet in a harmonized girl context.
- If the product is clearly masculine, show it on real boy feet in a harmonized boy context.
- If the product is clearly unisex, show it on real child feet in a neutral child context.

#### REFERENCE RESET RULE — CRITICAL:

At the start of each new scene, re-anchor the footwear directly to the original attached reference.

Do not allow scene-to-scene drift.

Do not let one generated shot reinterpret the next.

Each B-roll scene must independently preserve the original footwear identity.

#### ABSOLUTE PRODUCT LOCK:

Preserve exactly in all scenes:

- same footwear type
- same model
- same pair
- same category
- same shape
- same silhouette
- same proportions
- same toe shape
- same heel shape
- same upper construction
- same panels
- same stitching
- same closure system
- same velcro placement
- same laces
- same buckles
- same elastics
- same sole thickness

- same sole design
- same outsole shape
- same branding
- same logos
- same letters
- same decorative elements
- same prints
- same graphics
- same characters if present
- same colors
- same material
- same finish
- same texture
- same visible construction details

If the reference shows only one shoe photographed alone, infer an exact matching pair and keep that exact pair consistent in all scenes.

Do not redesign the footwear.

Do not replace it with a similar shoe.

Do not simplify it.

Do not alter colors.

Do not alter proportions.

Do not invent new decorative elements.

Do not remove details.

#### VIDEO FORMAT:

- vertical 9:16
- 8 seconds
- 24 fps
- exactly 5 separate B-roll scenes
- no narration
- no dialogue
- no subtitles
- no text overlays

#### CHILD ANATOMY AND SUPPORT — CRITICAL:

Show only:

- feet
- ankles
- lower legs
- optional small portion of knees when needed

Do not show the face.

The feet must be real child feet:

- age-appropriate proportions
- natural ankle structure
- believable lower legs
- real skin texture

- natural asymmetry
- physically correct support

The feet must always remain supported by:

- floor
- rug
- bed
- sofa
- bench
- play mat
- step
- or other believable surface

No floating feet.

No mannequin feet.

No adult feet.

No deformed toes.

No extra toes.

#### FOOTWEAR FIT AND MOTION REALISM:

The shoes must fit the child naturally and remain consistent in every scene.

Show:

- real contact with the feet
- proper heel fit
- proper toe fit
- believable closure tension
- natural material bending only where physically appropriate
- real floor contact
- believable walking or resting behavior
- subtle sole compression when stepping if appropriate
- natural child movement

Do not make the footwear look rigid when it should flex.

Do not make it collapse unnaturally.

Do not make it look pasted onto the feet.

#### BRAZILIAN ENVIRONMENT AUTO-SELECTION:

Choose one coherent real Brazilian child environment appropriate to the product type, such as:

- child bedroom
- playroom
- hallway
- living room
- home varanda
- nursery area
- school-prep corner
- child party-prep indoor space
- real outdoor home area

The environment must feel:

- Brazilian
- real
- organized
- child-friendly
- clean
- comfortable
- natural
- lived-in
- premium but believable

Do not use:

- fake showroom
- empty studio
- foreign generic environment
- excessive luxury
- clutter chaos
- synthetic set

#### MANDATORY 5-SCENE STRUCTURE:

##### SHOT 1 — 0.0s to 1.5s — HERO FOOTWEAR INTRO

Show both feet wearing the exact footwear clearly.

Use a close or medium-close angle with the shoes dominating the frame.

The child is standing or sitting naturally.

The supporting surface must be visible.

Use a subtle push-in or gentle lateral camera movement.

##### SHOT 2 — 1.5s to 3.0s — MATERIAL / CLOSURE DETAIL

Cut to a close-up of one important visible detail:

- upper texture
- sole
- stitching
- velcro
- laces
- buckle
- branding
- decorative element
- side structure

Keep the shoe exact and sharply readable.

##### SHOT 3 — 3.0s to 4.6s — NATURAL USE / STEP OR REST

Cut to a natural functional scene:

- a gentle step
- a subtle foot movement

- a child seated with feet resting naturally
- a soft weight shift
- a natural small walk motion if appropriate

The movement must be subtle, believable, and keep the footwear visible.

#### SHOT 4 — 4.6s to 6.2s — SECONDARY ANGLE / SIDE OR HIGH-ANGLE VIEW

Cut to another product-focused angle showing:

- side profile
- front profile
- top opening
- ankle fit
- how the pair looks together
- sole contact
- real scale

This shot must not repeat the previous framing.

#### SHOT 5 — 6.2s to 8.0s — FINAL SALES HERO

Return to a polished final hero view.

Show the exact pair clearly on the child's feet in a beautiful, believable child setting.

End with the product looking:

- wearable
- comfortable
- attractive
- premium
- physically real
- fully recognizable

#### CAMERA:

Professional full-frame commercial realism.

Vertical 9:16.

4K-grade appearance.

Lens feel:

- 50mm to 85mm for tight product emphasis
- 35mm to 50mm when more context is needed
- no fisheye
- no extreme distortion
- no exaggerated cinematic movement

#### FOCUS — NO BLUR:

The footwear must remain sharply readable in every scene.

The feet, ankles, and immediate context must also remain clear.

Use realistic deep focus.

No portrait mode.

No artificial background blur.

No strong bokeh.

No soft haze.

No focus pulsing.

Keep clearly visible:

- shoe structure
- sole
- closures
- branding
- textures
- foot fit
- supporting surface
- shadows

LIGHTING:

Use realistic natural or ambient light.

Possible sources:

- soft daylight
- natural home ambient light
- subtle practical indoor lighting

Maintain:

- real product colors
- natural skin tone
- realistic shadows
- balanced highlights
- believable reflections

Avoid:

- harsh flash
- fake HDR
- artificial glow
- overexposed highlights
- colored lighting distortion

MATERIAL REALISM:

- leather must look like real leather
- synthetic materials must look authentic
- fabric must show real fibers
- mesh must show real weave
- rubber must show realistic sole behavior
- closures must behave naturally
- child skin must show real texture
- socks if present must behave like real socks

No fake reflections.  
No melted geometry.  
No pasted-on shoe look.  
No synthetic skin.

#### AUDIO:

No narration.  
No dialogue.

Use only subtle natural ambience and light product-use sounds, such as:

- soft room tone
- subtle footsteps
- gentle shoe contact with floor
- soft fabric movement
- natural indoor ambience

Optional very soft premium background music may be used, but it must remain discreet and secondary.

No subtitles.  
No captions.  
No text overlays.

#### CLEAN FRAME:

Outside legitimate branding or printed details physically present on the exact footwear, generate no:

- subtitles
- captions
- promotional text
- prices
- watermarks
- interface elements
- random text

#### STRICT RULES:

- exact product fidelity
- child feet only
- girl feet for girl shoes
- boy feet for boy shoes
- neutral child context for unisex shoes
- total focus on the footwear
- no face
- no narration
- no blur
- no product drift
- no similar shoe substitution
- no AI look
- no CGI look

#### NEGATIVE PROMPT:

single continuous take, no B-roll, changed footwear, wrong children's shoe, altered colors, altered branding, altered closures, altered sole, wrong scale, adult feet, deformed feet, extra toes, missing toes, floating feet, pasted-on shoes, fake environment, empty studio, fake showroom, clutter chaos, shoes too far from camera, portrait framing, blurred shoes, artificial blur, soft focus, strong bokeh, CGI, 3D render, AI look, fake textures, melted geometry, random text, watermark, overlay, subtitles.

FINAL OUTPUT:

One ultra-photorealistic 8-second vertical premium sales video with exactly five separate B-roll scenes showing the EXACT attached children's footwear product naturally worn on real child feet, with correct child anatomy, correct real-world scale, a harmonized Brazilian child environment, total visual focus on the footwear, deep focus, true material behavior, and absolutely no visible AI traits.

## Casa Pov | Duas Mãos Fronha

link imagem -

<https://wpevghcfmjwmidcjdtn.supabase.co/storage/v1/render/image/sign/prompt-media/image/1787010447880-izunky.jpg?token=eyJraWQiOiJzdG9yYWdlLXVybC1zaWduaW5nLWtleV8zNDM0YzgxZi0wMzMmLTRINTEtYWYzYy01MzkxYWNjYjgxODliLCJhbGciOiJIUzI1NiJ9.eyJ1cmwiOiJwcm9tcHQtbWVkaWEvaW1hZ2UvMTc4NzAxMDQ0Nzg4MC1penVua3kuanBnliwic2NvcGUiOiJkb3dubG9hZCI6MTc4NzAxMDQ1NywiZWhwIjoyMTAyMzcwNDU3fQ.eFHrcIkaNBw2rWFFLiYiTX9saymgar3kjLRk2E49uU8&width=560&quality=70&resize=contain>

Copiar prompt de imagem - Hyper-realistic POV style product photography, first-person point of view.

Looking down at a soft and cozy bed. The exact pair of pillowcases from the reference image is neatly placed on the bed, slightly overlapping or side by side, centered in the frame.

The bed has clean, soft bedding with natural wrinkles and a comfortable, inviting look. Soft natural daylight coming through a window, creating gentle shadows and a warm, serene atmosphere. Shallow depth of field, the background softly blurred.

PRODUCT LOCK (absolute rules):

- Use the exact pair of pillowcases from the reference image with 100% fidelity.
- Do not change pattern, colors, fabric texture, ties, shape, size, proportions or any visible detail.
- Do not redesign, stylize, improve or reinterpret the pillowcases in any way.
- The products must remain perfectly identical and clearly identifiable.

Style: ultra-photorealistic, clean and cozy bedroom aesthetic, soft natural lighting, high detail, 8k quality, authentic intimate POV looking at the two pillowcases on the bed.

Copiar prompt de vídeo sem fala – Hyper-realistic cinematic video in pure POV style, first-person point of view.

Start looking down at a soft and cozy bed. The exact pair of pillowcases from the reference image is placed on the bed. Soft natural daylight.

Two realistic hands enter the frame. Both hands carefully pick up one of the pillowcases, lift it naturally and hold it up toward the camera, slowly turning and adjusting it to clearly show the fabric, pattern and details. Movements are smooth, realistic and gentle.

After showing it, the hands can lightly place it back or continue holding it.

PRODUCT LOCK (mandatory – do not break):

- The pillowcases must be 100% identical to the reference image in every single detail.
- Do not change the pattern, colors, fabric texture, bows, ties, shape, size, proportions, stitching or any visible element.
- Do not redesign, restyle, improve, simplify or reinterpret the pillowcases in any way.
- Keep the exact same design and appearance from the reference.

No text, subtitles or watermarks. No speech. Ultra-realistic lighting, shallow depth of field, premium quality, 4K, vertical 9:16, natural cinematic motion.

---

## **Gancho premium**

Copiar prompt de vídeo – Use the original reference image as the exact identity reference. Preserve the exact same face, hairstyle, skin tone, body proportions, clothing, lighting and background. The video must look like a real TikTok UGC recorded naturally with a smartphone. Vertical 9:16. No cinematic effects. No slow motion. Real human speed. Natural body movement only.

### **SCENE**

0.0–1.5s

She immediately looks down at the shirt she is wearing with a subtle disappointed expression, as if she genuinely doesn't like it. She points directly at the shirt with her index finger. Immediately afterward, she lifts the same index finger in front of her chest and clearly performs a natural "no" gesture by moving only the raised index finger smoothly from left to right several times while simultaneously giving a gentle head shake from side to side. The finger gesture must be obvious and synchronized with the head movement, clearly communicating "No, I don't like this shirt." She alternates her gaze naturally between the shirt and the camera, maintaining a believable UGC style.

1.5–2.5s

Without any cut, she immediately takes one natural step toward the camera. While approaching, she confidently extends her open hand toward the lens. The movement should be fluid and performed at normal human speed, exactly like a real TikTok creator making a transition.

2.5–3.0s

Her open palm completely covers the camera lens, naturally filling the entire frame. The hand realistically touches the lens as if intentionally creating a transition.

3.0–4.0s

She smoothly pulls her hand away from the lens while taking a small natural step back. She returns to her original position, looking directly into the camera with a soft closed-mouth smile and relaxed posture, naturally preparing for the next scene or outfit transition.

Requirements:

- The "no" gesture must be performed with the raised index finger, clearly moving left and right.
- Synchronize the finger gesture with a gentle head shake.
- Point at the shirt before making the finger "no" gesture.
- Normal human speed.
- No slow motion.
- No robotic movements.
- Natural facial expressions.
- Natural blinking.
- Realistic breathing.
- Subtle body weight shifts.
- One continuous shot.
- No cuts.
- No morphing.
- No camera shake beyond subtle natural handheld micro-movements.
- The hand must completely cover the camera lens before moving away.

She's not to say exactly anything!

---

## Tecnologia Pov

<https://wpevghcfmjwmidcjdtnnd.supabase.co/storage/v1/render/image/sign/prompt-media/image/1786548669981-99jl51.jpg?token=eyJraWQiOiJzdG9yYWdlLXVybC1zaWduaW5nLWtleV8zNDM0YzgxZi0wMzRmLTRINTEtYWYzYy01MzkxYWNjYjgxODIiLCJhbGciOiJIUzI1NiJ9.eyJ1cmwiOiJwcm9tcHQtbWVkaWEvaW1hZ2UvMTc4NjU0ODY2OTk4MS05OWpsNTEuanBnliwic2NvcGUiOiJkb3dubG9hZCIsImhhZCI6MTc4NjU0ODY3MiwiZXhwIjoyMTAxOTA4NjcyfQ.HW5jronA2Afn6xc2Y7alUvjPcZp21NA4fLEUQUnmUZw&width=560&quality=70&resize=contain>

Copiar prompt de imagem

ultra realistic POV perspective of a high-end gamer desk setup, primary focus on a featured tech product (mouse/keyboard/monitor/cooler/mousepad) fully visible and unobstructed in the center of the frame

product displayed clearly in full form, no hands covering it, design, shape, logo and materials completely visible, positioned naturally on desk surface with correct scale and proportions

hands appear only as secondary elements, slightly entering the frame from the edges, positioned near but not over the product, suggesting imminent interaction without blocking visibility

adaptive gender logic: feminine hands for soft/pastel products, masculine hands for darker/aggressive designs

hands with realistic anatomy: five fingers, natural spacing, detailed skin texture, visible pores, subtle imperfections, natural nails

environment: realistic gamer setup with RGB lighting, mechanical keyboard, monitor glow, mousepad fabric texture, subtle cable clutter, desk imperfections, lived-in environment

lighting: product receives key light (hero lighting), soft RGB ambient fill, natural reflections on materials, realistic shadow falloff, no overexposure

camera: POV angle, slightly elevated (15–25 degrees) to reveal full product surface, 35mm lens, shallow depth of field but product entirely sharp

composition: product centered and dominant, hands placed in foreground edges creating depth without obstruction

style: hyperreal tech commercial photography, ultra detailed textures, cinematic realism

negative constraints: no hands covering product, no partial product visibility, no distortion, no CGI look, no plastic skin, no exaggerated glow

Copiar prompt de vídeo sem fala

- POV cinematic sequence inside a gamer desk setup, only hands visible interacting with the product naturally, same environment and lighting maintained across all shots, no changes in setup
- 
- scene progression with dynamic B-roll cuts:
  - hand smoothly gliding the mouse across the mousepad showing precision
  - fingers typing on mechanical keyboard with realistic tactile feedback
  - hand adjusting RGB lighting on the product
  - subtle repositioning of the product showing ergonomics
  - close-up macro of product texture and materials
  - hand pausing briefly as ambient RGB light reflects on skin
- 
- environment: consistent gamer setup with RGB LEDs, monitor glow, desk imperfections, cables, realistic clutter
- 
- lighting: stable RGB lighting, realistic reflections, soft shadow transitions
- 
- camera: multiple POV micro angles but same perspective continuity, shallow depth of field, smooth cinematic motion
- 
- style: tech commercial B-roll, hyper realistic, no scene change, no product variation
- 
- background sounds: subtle keyboard clicks, mouse glide, faint PC fan
- music: modern tech ambient beat, minimalistic
- 
- (no dialogue)
-

Copiar prompt de vídeo – A cena acontece em UM ÚNICO PLANO-SEQUÊNCIA CONTÍNUO. Câmera 100% FIXA, com enquadramento focado na superfície onde as peças estão sendo posicionadas. A iluminação é natural e suave, criando um ambiente acolhedor.

O primeiro frame mostra a superfície COMPLETAMENTE VAZIA. Apenas UMA mão aparece para realizar toda a ação.

A mão entra de fora do enquadramento segurando UMA peça original da referência. Ela coloca essa peça DIRETAMENTE NA POSIÇÃO FINAL CORRETA que ela ocupa na imagem de referência. NÃO colocar uma peça em cima da outra. Cada roupa possui sua própria área/posição na superfície.

Depois de posicionar a primeira peça, ela PERMANECE TOTALMENTE PARADA E INALTERADA. A mão sai. Somente depois disso, a mão retorna trazendo a próxima peça original. A segunda peça é colocada NA SUA PRÓPRIA POSIÇÃO FINAL, exatamente como na referência, sem cobrir, substituir, atravessar ou transformar a primeira.

Repetir somente se existirem outras peças reais na referência. NÃO adicionar peças extras.

Depois que uma peça for colocada, ELA FICA CONGELADA EM SUA IDENTIDADE. Pode existir apenas um pequeno movimento natural do tecido ao tocar a superfície, mas depois: não muda de formato; não muda de categoria; não muda de cor; não muda de estampa; não vira outra roupa; não se funde com outra peça; não duplica; não desaparece. A mão também NÃO deve ficar alisando uma peça sobre outra.

Quando todas as peças originais estiverem posicionadas, o resultado deve reproduzir EXATAMENTE a disposição da imagem de referência. Pausa breve de aproximadamente 0,5 segundo.

A mesma mão retira as peças UMA POR VEZ, SEM TRANSFORMÁ-LAS. Retirar primeiro A ÚLTIMA PEÇA QUE FOI ADICIONADA. A mão segura essa peça, levanta e leva completamente para fora do enquadramento. A outra peça permanece parada e exatamente igual. Depois a mão retorna, pega a peça restante e também a leva fisicamente para fora. A superfície termina 100% VAZIA.

SEQUÊNCIA OBRIGATÓRIA: VAZIO → ENTRA PEÇA 1 → COLOCA NA POSIÇÃO 1 → PEÇA 1 FICA PARADA → ENTRA PEÇA

## Influenciador UGC + calçado

Copiar prompt de imagem - {"scene": "influencer holding the shoe near chest level", "focus": "shoe close to camera", "background": "clean neutral or soft lifestyle", "lighting": "soft frontal light", "product\_detail": "stitching, texture and material fully visible"} {"global\_rules": ["preserve exact product design from reference", "do not redesign or reinterpret footwear", "maintain exact proportions, stitching, texture and structure", "no deformation of straps, sole or heel", "product must look like a real photographed item, not generated", "no symmetry correction", "no plastic textures", "no CGI look", "natural lighting only", "visible skin texture and pores", "natural camera imperfections", "no looped motion patterns in video"]}]

Copiar prompt de vídeo sem fala - AUDIO / SPEECH: The influencer speaks naturally in Brazilian Portuguese while holding the product close to the camera:

"Tênis lindo, de qualidade, solado super macio é esse aqui. Ele é um dos mais vendidos da Shopee e o precinho nem se fala."

MOTION: very subtle hand stabilization, small rotation of the shoe, no aggressive movement. Maintain exact grip and scale, no product bending or reshaping.

ANTI-BUG: no product redesign, no geometry change, no texture smoothing, no lighting flicker, no frame inconsistency, no repeated animation loops, product must remain identical across all frames.

## Ugc | Segurando o produto

Copiar prompt de imagem – ``text

Crie uma imagem vertical 9:16 extremamente fotorealista, com aparência de uma selfie espontânea feita por uma garota jovem, estilosa e descolada para postar nas redes sociais.

A imagem de referência é a FONTE ABSOLUTA DE VERDADE para o produto e para a identidade da pessoa.

PRODUTO — FIDELIDADE ABSOLUTA:

Use exatamente o produto presente na imagem de referência.

Preserve sem nenhuma alteração:

- formato;
- tamanho e proporções;
- cores;
- embalagem;
- textura;
- acabamento;
- tampa;
- rótulo;
- logotipo;
- tipografia;
- textos visíveis;
- estampas;
- detalhes gráficos;

- quantidade de produtos;
- acessórios que acompanham o produto.

NÃO redesenhe, simplifique, modernize ou substitua o produto.

NÃO invente detalhes.

NÃO altere a marca.

NÃO altere nenhuma informação da embalagem.

NÃO deforme o produto.

O produto precisa parecer fisicamente idêntico ao da referência.

A pessoa segura o produto naturalmente, como alguém que está mostrando uma descoberta ou produto favorito para os seguidores.

#### IDENTIDADE DA PESSOA:

Preserve exatamente a pessoa da referência:

- mesmo rosto;
- mesmas proporções faciais;
- mesma estrutura óssea;
- mesmos olhos;
- mesmo nariz;
- mesmos lábios;
- mesmas sobrancelhas;
- mesmo tom de pele;
- mesmo cabelo;
- mesmas características naturais;
- mesma assimetria facial;
- mesmas tatuagens, piercings ou marcas, caso existam.

Não transformar a pessoa em uma modelo genérica de IA.

Não modificar excessivamente o rosto.

Não aplicar beleza artificial.

Não deixar a pele plástica.

#### ESTÉTICA DA PERSONAGEM:

A personagem deve transmitir uma garota:

- descolada;
- estilosa;
- espontânea;
- moderna;
- confiante;
- divertida;
- jovem;
- com personalidade;
- com energia de criadora de conteúdo;
- estética "cool girl";
- aparência de quem não está tentando parecer perfeita.

Ela NÃO deve parecer uma modelo fazendo uma campanha publicitária.

#### EXPRESSÃO:

Expressão facial natural e levemente provocativa, como uma selfie casual.

Pode ter:

- sorriso de canto;
- sorriso discreto;
- sobrancelha levemente levantada;
- olhar confiante;
- olhar divertido;
- expressão de "olha isso";
- leve cara de surpresa ou aprovação.

O olhar deve transmitir personalidade e atitude.

EVITAR:

- sorriso comercial exagerado;
- expressão de modelo de catálogo;
- pose rígida;
- rosto congelado;
- expressão artificial;
- aparência de publi tradicional.

POSE:

Pose casual e levemente assimétrica.

A pessoa pode:

- inclinar levemente a cabeça;
- deixar um ombro um pouco mais baixo;
- aproximar o produto do rosto;
- segurar o produto de maneira relaxada;
- fazer uma pequena inclinação do corpo;
- usar a outra mão de maneira natural;
- parecer que tirou a foto espontaneamente.

A pose deve parecer improvisada, mas visualmente bonita.

ROUPA:

Preserve a roupa da referência quando ela estiver presente.

Caso a roupa não esteja definida na referência, utilizar uma estética casual e moderna:

- camiseta oversized;
- baby tee;
- regata estilosa;
- moletom;
- cropped básico;
- camisa casual aberta.

A roupa deve parecer real, confortável e atual, sem aparência de figurino.

CENÁRIO:

O ambiente deve parecer um local real onde uma garota descolada faria uma selfie.

Preferência por:

- quarto moderno;
- banheiro bonito;

- closet;
- elevador;
- corredor;
- cafeteria;
- apartamento moderno;
- ambiente urbano;
- espelho de quarto;
- fundo clean com pequenos elementos reais.

O cenário deve ser discreto e não competir com o produto.

Não criar um cenário de estúdio fotográfico.

#### CÂMERA:

Fotografado como selfie real de câmera frontal de iPhone 15 Pro Max.

- lente grande angular de smartphone;
- 24mm;
- câmera na altura dos olhos;
- enquadramento próximo;
- rosto e produto em destaque;
- pequena distorção natural de lente;
- perspectiva típica de selfie;
- celular fora do enquadramento.

A fotografia NÃO deve parecer feita por fotógrafo profissional.

#### ILUMINAÇÃO:

Iluminação natural, bonita e espontânea.

Preferência por:

- luz natural de janela;
- luz ambiente suave;
- sombras naturais;
- highlights discretos;
- contraste moderado.

A pele deve manter textura real.

Não usar iluminação cinematográfica exagerada.

Não usar iluminação de estúdio.

Não usar flash estourado.

Não usar ring light evidente.

#### REALISMO:

A imagem deve parecer uma foto real publicada no TikTok ou Instagram.

Preservar:

- poros;
- textura da pele;
- pequenos fios de cabelo;
- pequenas imperfeições;

- reflexos naturais;
- sombras naturais;
- pequenas irregularidades de uma câmera de smartphone.

Não deixar a imagem perfeita demais.

#### RESULTADO VISUAL:

A sensação final deve ser:

"Ela simplesmente pegou o produto, fez uma selfie e ficou MUITO boa."

Não deve parecer:

"Uma modelo foi contratada para segurar um produto."

A estética é:

COOL GIRL + UGC + SELFIE DE IPHONE + NATURAL + ESTILOSOSA + DESCOLADA + VIRAL.

#### PRIORIDADE ABSOLUTA:

1. Produto idêntico à referência.
  2. Identidade idêntica à referência.
  3. Interação natural com o produto.
  4. Expressão descolada e espontânea.
  5. Aparência de selfie real.
  6. Estética moderna e viral.

Copiar prompt de vídeo sem fala —

UNIVERSAL UGC VIDEO PROMPT — PRODUCT IN HAND / NEVER RELEASE

Create an ultra-photorealistic vertical UGC video of a female influencer holding the exact product from the attached reference image in one hand while speaking in Brazilian Portuguese. Preserve the product with maximum fidelity: same packaging, label, colors, logo placement, shape, cap, material, proportions, and all visible details.

The influencer holds the product naturally close to the camera and NEVER releases it during the entire video. The product must stay visible, stable, correctly scaled to the hand, and consistently the same in every frame. Natural human movement, authentic UGC style, realistic skin texture, correct hand anatomy, casual home or lifestyle environment, soft natural lighting, vertical 9:16, smartphone realism.

Anti-crash / negative prompt: product disappearing, product leaving frame, product passing through hand, floating product, hand clipping through product, altered packaging, changed label, fake logo, distorted text, product morphing, wrong scale, extra fingers, deformed hand, multiple hands, robotic movement, blurry product, CGI, cartoon, low quality, harsh lighting.

Technical parameters: model: veo-3, length: 8 seconds, resolution: 1080x1920, framerate: 24fps, aspect\_ratio: 9:16.
